### CHAPTER 1 - AGRICULTURAL HOLDINGS AND LAND

1.1	Agricultural holdings by size class	3
1.2	Utilised agricultural area by size class	4
1.3	Area under forage by size class	4
1.4	Area under potatoes by size class	5
1.5	Area under permanent cropping excluding vineyards by size class	5
1.6	Area under vineyards by size class	6
1.7	Area under market gardening crops by size class	6
1.8	Utilised agricultural area (hectares) by type	7
1.9	Area under vineyards by type	7
1.10	Area under vineyards by size class	8

### CHAPTER 2 - EMPLOYMENT IN AGRICULTURE

2.1	Total employment (number of persons) in agriculture by sex	13
2.2	Total employment (number of persons) in agriculture by type of employment	13
2.3	Full-time employment (number of persons) in agriculture by sex	14
2.4	Part-time employment (number of persons) in agriculture by sex	14
2.5	Total employment (number of persons) in agriculture by Annual Work Unit (AWU)	15

### CHAPTER 3 - THE PIG INDUSTRY

3.1	Pig farms and pig population	19
3.2	Pig population by type	20
3.3	Pig population by size class	20
3.4	Breeding females by size class	21
3.5	Pig population and pig farms by size class	21
3.6	Annual pig population by type	22
3.7	Monthly pig slaughters (number of heads)	23
3.8	Monthly pig slaughters (carcass weight: tonnes)	24

### CHAPTER 4 - THE CATTLE INDUSTRY

4.1	Cattle farms and cattle population	29
4.2	Cattle population by age and sex	30
4.3	Cattle population by herd size	31
4.4	Dairy cows by size class	32
4.5	Cattle population and cattle farms by herd size	33
4.6	Annual cattle population by age	34
4.7	Monthly cattle slaughters (number of heads)	35
4.8	Monthly cattle slaughters (carcass weight: tonnes)	36

### CHAPTER 5 - SHEEP AND GOATS

5.1	Sheep and goat population	41
5.2	Sheep population by type	42
5.3	Goat population by type	43
5.4	Sheep population by herd size	44
5.5	Goat population by herd size	45
5.6	Annual sheep population by type	46
5.7	Annual goat population by type	47

**CHAPTER 6 – POULTRY**

6.1	Holdings with poultry by size class	51
6.2	Poultry distribution (number of heads) by type	52
6.3	Broilers by size class	53
6.4	Laying hens by size class	54
6.5	Monthly broiler slaughters (000 heads)	55
6.6	Monthly broiler slaughters (carcass weight: tonnes)	55

**CHAPTER 7 - OUTPUT OF THE AGRICULTURAL INDUSTRY**

7.1	Annual volume (tonnes) and wholesale value (€000) of fruit and vegetables sold through official markets	59
7.2	Annual volume (tonnes) of vegetables sold through official markets by species	60
7.3	Annual wholesale value (€000) of vegetables sold through official markets by species	60
7.4	Monthly volume (tonnes) of vegetables sold through official markets by species	61
7.5	Monthly wholesale value (€000) of vegetables sold through official markets by species	62
7.6	Annual volume (tonnes) of fruit sold through official markets by species	63
7.7	Annual wholesale value (€000) of fruit sold through official markets by species	63
7.8	Monthly volume (tonnes) of fruit sold through official markets by species	64
7.9	Monthly wholesale value (€000) of fruit sold through official markets by species	64
7.10	Annual average wholesale prices (euro/kilogram) of marketed vegetables by species	65
7.11	Annual average wholesale prices (euro/kilogram) of marketed fruit by species	65
7.12	Annual total estimated volume (tonnes) and producer value (€000) of fruit and vegetables	66
7.13	Annual total estimated volume (tonnes) of vegetables by species	67
7.14	Annual total estimated volume (tonnes) of fruit by species	67
7.15	Annual total estimated producer value (€000) of vegetables by species	68
7.16	Annual total estimated producer value (€000) of fruit by species	68
7.17	Annual volume (carcass weight: tonnes) of slaughtered livestock by type of animal	69
7.18	Monthly volume (carcass weight: tonnes) of slaughtered livestock by type of animal	70
7.19	Annual producer value (€000) of slaughtered livestock by type of animal	71
7.20	Monthly producer value (€000) of slaughtered livestock by type of animal	72
7.21	Annual average producer prices (euro/kilogram) of slaughtered animals by type of animal	73
7.22	Quarterly and monthly milk intake (tonnes)	74
7.23	Total estimated milk production (tonnes) by animal	75
7.24	Quarterly and monthly estimated egg production (000 eggs)	76

**CHAPTER 8 – INDICES**

8.1	Annual vegetables price index (2010=100)	81
8.2	Monthly vegetables price index (2010=100)	82
8.3	All items monthly vegetables price index (2010=100)	82
8.4	Annual vegetables volume index (2010=100)	83
8.5	Monthly vegetables volume index (2010=100)	84
8.6	All items monthly vegetables volume index (2010=100)	84
8.7	Annual fruit price index (2010=100)	85
8.8	Monthly fruit price index (2010=100)	86
8.9	All items monthly fruit price index (2010=100)	86
8.10	Annual fruit volume index (2010=100)	87
8.11	Monthly fruit volume index (2010=100)	88

**CHAPTER 8 - INDICES (continued)**

8.12	All items monthly fruit volume index (2010=100)	88
8.13	Annual producer price indices for agricultural products (2010=100)	89
8.14	Quarterly and annual producer price indices for agricultural products (2010=100)	90
8.15	Annual input price indices for agricultural products (2010=100)	91
8.16	Quarterly and annual input price indices for agricultural products (2010=100)	92

**CHAPTER 9 - ECONOMIC ACCOUNTS FOR AGRICULTURE**

9.1	Gross agricultural production (€000) at producer prices	97
9.2	Final agricultural production (€000) at producer prices	97
9.3	Intermediate consumption (€000) for agriculture	98
9.4	Net value added (€000) for agriculture	98
9.5	Final agricultural production (€000)	99
9.6	Gross agricultural production (€000) at producer prices by product and usage	100
9.7	Gross agricultural production (€000) at producer prices by usage	101

**CHAPTER 10 - SUPPLY BALANCE SHEETS OF AGRICULTURAL PRODUCTS**

10.1	Cereals (000 tonnes)	105
10.2	Cereals 2013/2014 (000 tonnes)	106
10.3	Vegetables (000 tonnes)	107
10.4	Fresh fruit (000 tonnes)	107
10.5	Citrus (000 tonnes)	108
10.6	Potatoes (000 tonnes)	108
10.7	Potatoes 2013/2014 (000 tonnes)	109
10.8	Sugar (000 tonnes)	110
10.9	Wine (000 hectolitres)	110
10.10	Wine 2013/2014 (000 hectolitres)	111
10.11	Meat (000 tonnes)	111
10.12	Meat 2014 (000 tonnes)	112
10.13	Milk (000 tonnes)	113
10.14	Cheese (000 tonnes)	113
10.15	Eggs (000 tonnes)	114
10.16	Eggs 2014 (000 tonnes)	114

**CHAPTER 11 – FISHERIES**

11.1	Fishing vessels by length and port of berth	119
11.2	Fishing vessels by length and type	119
11.3	Fishing vessels by licence and length	120
11.4	Fishing vessels by licence and port of berth	120
11.5	Fishing vessels by type and port of berth	121
11.6	Annual volume (tonnes) of fish landings at the official market	122
11.7	Annual wholesale value (€000) of fish landings at the official market	122
11.8	Annual average wholesale price (euro/kilogram) of marketed fresh fish	122

**CHAPTER 11 - FISHERIES (continued)**

11.9	Annual volume (tonnes) of fish landings at the official market by region	123
11.10	Annual wholesale value (€000) of fish landings at the official market by region	123
11.11	Annual fresh fish price index (2010=100)	123
11.12	Monthly fresh fish price index (2010=100)	124
11.13	All items fresh fish price index (2010=100)	124
11.14	Annual fresh fish volume index (2010=100)	125
11.15	Monthly fresh fish volume index (2010=100)	126
11.16	All items fresh fish volume index (2010=100)	126
11.17	Value added of the aquaculture industry	127
11.18	Sales and purchases of fish of the aquaculture industry	128
11.19	Intermediate consumption of the aquaculture industry by type of expenditure	129

## List of Charts

5.2 Sheep farms by district	42
5.3 Goat farms by district	43
5.4 Sheep population by herd size	44
5.5 Goat population by herd size	45
5.6 Annual percentage change in sheep population by type: 2013/2012 and 2014/2013	46
5.7 Annual percentage change in goat population by type: 2013/2012 and 2014/2013	47

### CHAPTER 7 - OUTPUT OF THE AGRICULTURE INDUSTRY

7.1 Annual volume (carcass weight: tonnes) of slaughtered livestock by type of animal	69
7.2 Annual producer value (€000) of slaughtered livestock by type of animal	71
7.3 Annual milk intake (tonnes)	74
7.4 Estimated annual egg production (000 eggs)	76

### CHAPTER 8 – INDICES

8.1 Annual vegetables price index (2010=100)	81
8.2 Annual vegetables volume index (2010=100)	83
8.3 Annual fruit price index (2010=100)	85
8.4 Annual fruit volume index (2010=100)	87

### CHAPTER 9 - ECONOMIC ACCOUNTS FOR AGRICULTURE

9.1 Percentage distribution of gross agricultural production by type of production: 2014	100
9.2 Percentage distribution of gross agricultural production by usage: 2014	101

**CHAPTER 11 – FISHERIES**

11.1 Distribution of fishing vessels by port of berth	121
11.2 Annual fresh fish price index (2010=100)	123
11.3 Annual fresh fish volume index (2010=100)	125
11.4 Percentage distribution of factor income of the aquaculture industry: 2014	127
11.5 Distribution of sales of the aquaculture industry	128
11.6 Distribution of intermediate consumption of the aquaculture industry by type	129

## **FOREWORD**

The farming and fishing sectors are an intrinsic part of the Maltese identity. It can safely be said that these two economic activities were among the first to be practised in Malta and Gozo. Although they are relatively small contributors to the Maltese economy, their continued existence is crucial to upholding the rural and marine character of the Islands. Beyond the traditional aspects, farming and fishing also constitute forward-looking industries which are facing changing trends and challenges being experienced in these two sectors in Europe and in the Mediterranean.

This publication is a sequel to many similar collections published in previous years. It covers a considerable range of statistical topics: land structure, livestock, employment, and important structural and economic information on the two sectors. Owing to this comprehensive scope, I trust that this will be a useful reference work in the hands of policy makers, the media, academics and the wider public.

A lot of work has gone into this compilation, for which appreciation is due to the staff of the Agriculture and Environment Statistics Unit.

Reuben Fenech  
Director General

January 2016

## **COMMENTARY**

### **INTRODUCTION**

The Agriculture and Fisheries 2014 publication provides users of official statistics with eleven chapters highlighting the most important aspects of these sectors. Each chapter is summarised below with background information on the different themes, followed by a brief definition of the variables collected, the data availability and a concise commentary on the main findings. The focus of each chapter is a set of tables and graphs that have been chosen to show the wide range of data available for a particular theme, providing users with information showing specific trends within the sectors.

### **CHAPTER 1 - AGRICULTURAL HOLDINGS AND LAND**

This chapter focuses on the Utilised Agricultural Area (UAA) and the total number of agricultural holdings in Malta and Gozo. An agricultural holding is defined as a single unit, both technically and economically, which has a single management and which undertakes agricultural activities listed in Annex I of Regulation (EC) No 1166/2008 of the European Parliament and of the Council of 19 November 2008 on farm structure surveys and the survey on agricultural production methods (repealing Council Regulation (EEC) No 571/88). Data was collected biennially from 2003 to 2007 through the survey on the structure of agricultural holdings while the Census of Agriculture was undertaken in 2010. A Farm Structure Survey was carried out in 2013.

The number of holdings in 2013 amounted to 12,466 (Table 1.1) with a total of 11,689 hectares of Utilised Agricultural Area (Table 1.2). The majority of agricultural holdings in Malta and Gozo are relatively small, with 75.6 per cent of the agricultural holdings having a UAA less than 1.0 hectare each (Table 1.1). Medium-sized agricultural holdings made up 22.0 per cent of the total; such holdings comprise between one and five hectares, while 2.4 per cent are considered large, each having a minimum of five hectares of UAA. The distribution of the UAA can be seen in Table 1.8. The cultivation of forage crops, covering 5,290 hectares or 45.3 per cent, is predominant. A total of 1,458 hectares are used for kitchen gardens. This reflects the high number of small agricultural holders. Area under vines in 2013 (Table 1.9) increased by 69 hectares or 11.2 per cent from 2010. However it has to be noted that drops of 40.3 and 13.1 per cent were registered in the table vines and local variety vines respectively, while the international varieties increased by 26.1 per cent.

### **CHAPTER 2 - EMPLOYMENT IN AGRICULTURE**

Employment refers to all those people actively engaged in agricultural production. Such information was collected biennially through the Farm Structure Survey from 2003 to 2007, and the Census of Agriculture 2010. The 2013 employment data is available through the Farm Structure Survey. Tables showing employment by sex, status of employment and work time have been compiled.

In 2013, 19,066 persons were actively engaged in agricultural activity (Table 2.1), up by 2.8 per cent when compared to the 2010 census. Full-time and part-time employment during 2013 increased by 5.5 and 2.6 per cent respectively over 2010 (Table 2.2). Employment in agriculture is dominated by the male gender. Female full-time employment represents 9.3 per cent of the total (Table 2.3). On the other hand, female participation in part-time activity amounted to 21.6 per cent of all part-time employment (Table 2.4).

Table 2.5 reveals the structure of employment by Annual Work Units (AWUs). The majority of persons employed in agriculture, 70.3 per cent work less than 25 per cent of 1 AWU. On the other hand, 1,372 farmers worked 1 AWU, these being engaged full-time in the sector.

### CHAPTER 3 – THE PIG INDUSTRY

Regulation (EC) No 1165/2008 of the European Parliament requires all Member States to carry out an annual Pig Census. Malta has been compiling these statistics on an annual basis since 2000. A postal census was sent to all licensed pig breeders, all of whom responded to the questionnaire. In 2014, 47,465 pigs on 100 farms were registered. Table 3.6 shows that the pig population decreased by 4.0 per cent over 2013. Young pigs (including piglets) and breeding stock decreased by 9.8 and 12.6 per cent respectively over 2013. On the other hand, fattening pigs (>50kg) advanced by 3.7 per cent over 2013. Tables 3.7 and 3.8 show data on slaughtering, compiled from data supplied by the Civil Abattoir within the Ministry for Sustainable Development, the Environment and Climate Change. The number of pigs slaughtered in 2014 (Table 3.7) decreased by 2.0 per cent to 69,789, from 71,230 in 2013. In contrast, the carcass weight of pigs slaughtered rose by 3.9 per cent to 6,153 tonnes in 2014, as shown in Table 3.8.

### CHAPTER 4 - THE CATTLE INDUSTRY

Information on cattle stocks has been entirely compiled from the Bovine Register, maintained and controlled by the Veterinary Regulatory Directorate. Information is collected in line with Regulation (EC) No 1165/2008.

The cattle stock as at 1 December 2014 amounted to 14,883 heads across 281 farms (Table 4.1). This represents a decline of 3.1 per cent of cattle farms over 2013, while the number of heads decreased by 2.2 per cent. Dairy cows, which represented 43.7 per cent of all cattle in 2014 (Table 4.2), registered an annual increase of 2.7 per cent to 6,502 heads. Table 4.6 shows that cattle between 1 and 2 years old decreased by 15.9 per cent over 2013. Cattle less than 1 year old and cattle over 2 years of age rose by 4.3 and 1.1 per cent respectively.

During 2014, the number of cattle slaughtered increased slightly by 0.3 per cent to 4,088 from 4,076 heads in 2013 (Table 4.7). In contrast, the carcass weight decreased slightly by 0.4 per cent to 1,129 tonnes in 2014 from 1,134 tonnes in 2013 (Table 4.8).

### CHAPTER 5 - SHEEP AND GOATS

The annual stocks of all sheep and goats have been monitored since 2003 and are compliant with Regulation (EC) No 1165/2008. The Agricultural and Fisheries Statistics Unit bases its figures on the data obtained from the list provided by the Veterinary Regulatory Directorate. Whether for own consumption or for commercial purposes, sheep and goats in Malta are primarily reared for their milk. The sheep and goats industry is mainly a backyard industry and their offspring are not slaughtered at slaughterhouses since they are mainly destined for own consumption. The milk is mainly used to produce traditional cheeselets (*gbejniet*).

The total sheep population registered in the Maltese Islands as at the end of December amounted to 10,526 heads (Table 5.1). As in previous years, sheep stocks fell by 3.7 per cent over 2013. Table 5.6 shows that rams registered the highest drop of 5.4 per cent while ewe lambs and lambs decreased by 3.9 and 0.3 per cent respectively. Ewes and ewe lambs made up 90.0 per cent of all sheep. The herd structure of sheep (Table 5.4) shows that 33.6 per cent of all sheep belong to herd sizes ranging from 1-9 sheep, followed by the herd sizes of 20-49 sheep, at 27.7 per cent. Herds with over 100 sheep made up 7.9 per cent of the total stock.

The total goat population (Table 5.1) in the Maltese Islands amounted to 4,627 heads, a marginal increase of 0.6 per cent over 2013. This was mainly due to an increase of 61.6 and 0.6 per cent in kids and male goats. Such increase was offset by a drop of 4.1 per cent in goats mated for the first time and goats already kidded (Table 5.7). The goats' smallest herd size made up 42.6 per cent, while goats' herds with more than 100 heads accounted for only 10.2 per cent of the population (Table 5.5).

## **CHAPTER 6 - POULTRY**

In 2013, as revealed in the survey on the structure of agricultural holdings, 779 agricultural holdings had a combined total of 0.92 million poultry. The majority of these agricultural holdings (63.8 per cent) only had 0.5 per cent of the total poultry stock. Such holdings were either very small or are engaged in another agricultural activity. On the other hand, 118 agricultural holdings had a total of 0.91 million heads or 99.0 per cent of the total poultry stock. These holdings had, on average, 8,000 heads (Table 6.1).

A total of 616,974 broilers were recorded in the FSS 2013 (Table 6.2), of which 480,750 (77.9 per cent) were on holdings with 10,000 broilers or more (Table 6.3). The distribution of laying hens followed a similar pattern. Layers amounted to 297,188, of which 87.0 per cent were found on agricultural holdings with 10,000 laying hens or more (Table 6.4).

Data on the slaughtering of broilers are obtained monthly from licensed slaughterhouses. For the second consecutive year, the number of broilers slaughtered decreased. While a drop of 8.2 per cent was registered last year over 2012, a drop of 5.2 per cent was registered in 2014 over 2013 (Table 6.5). This was reflected in the broiler meat production, which decreased from 4.1 to 3.9 million kilograms in 2014 (Table 6.6).

## **CHAPTER 7 - OUTPUT OF THE AGRICULTURAL INDUSTRY**

Fresh vegetables that passed through organised markets in 2014 amounted to 41,092 tonnes, yielding a wholesale value of €15.9 million (Table 7.1). This resulted in a marginal increase of 0.5 per cent in volume and a drop of 6.3 per cent in the wholesale value when compared to 2013. The volume of fresh fruit increased by 9.9 per cent, from 2,176 tonnes in 2013 to 2,392 tonnes in 2014. The wholesale value of fresh fruit went up by 3.4 per cent, to € 2,899 when compared to 2013.

The estimated total fruit and vegetable production figures are shown in Tables 7.12 to 7.16. When taking into consideration direct sales, own consumption and sales to processors, the estimated production of fresh vegetables amounted to 74,410 tonnes, up by 0.6 per cent on 2013. This was mainly due to increases in watermelons (7.0 per cent), tomatoes (5.2 per cent), and dry onions (4.0 per cent). Amongst the decreases registered there were potatoes (14.5 per cent) and cabbages (1.2 per cent). The estimated producer value of fresh vegetables went down by 27.2 per cent to €33.2 million in 2014 (Table 7.15). The estimated fruit production increased by 2.7 per cent to 9,359 tonnes in 2014 (Table 7.12). Significant increases of 39.4, 32.9 and 18.8 per cent were registered in the production of sweet oranges, oranges and strawberries respectively. The estimated producer value of fresh fruit (Table 7.16) went up by 1.9 per cent to €7.4 million.

Animal production registered a slight increase of 0.3 per cent to 11,198 tonnes. While cattle meat and broiler meat decreased by 0.4 and 4.8 per cent respectively, pig meat increased by 3.9 per cent over 2013 (Table 7.17). The producer value of slaughtered livestock decreased by 2.5 per cent to €24.6 million in 2014, from €25.3 million in 2013 (Table 7.19).

The total estimated milk production (Table 7.23) in 2014 amounted to 46.2 thousand tonnes, an increase of 4.1 per cent over 2013. This was the result of an increase of 4.5 per cent in cow's milk production while a drop of 3.8 and 3.6 per cent was registered in the sheep and goats milk production respectively.

Egg production (Table 7.24) advanced by 2.5 per cent to 84.5 million eggs in 2014, from 82.5 million eggs in 2013.

## CHAPTER 8 - INDICES

The All items vegetables price index in 2014 (Table 8.1) went down by 5.7 per cent to 94.6 points. Percentage changes of the vegetable price index varied from one product to another, the largest fluctuations being a decrease of 30.2 per cent in sugar melons and an increase of watermelons by 33.1 per cent.

On the contrary, the All items vegetables volume index (Table 8.4) increased slightly by 0.5 per cent to 99.6 points in 2014. This was mainly due to increases in the supply of vegetables, with the exception of lettuce, carrots and tomatoes, which decreased by 8.3, 5.6 and 3.9 per cent respectively.

The All items fresh fruit price index for 2014 (Table 8.7) stood at 101.9 points, down by 9.5 per cent over 2013. This was the result of lower prices received for sweet oranges (32.4 per cent), nectarines (20.7 per cent) and oranges (0.7 per cent).

The All items fresh fruit volume index for 2014 (Table 8.10) went up by 9.9 per cent over 2013, resulting from increases in all fruit items under review, except for early figs and bambinella, which registered a decrease of 37.2 and 35.8 per cent respectively. The increases ranged from 2.6 per cent in grapes to 103.2 per cent in cherry plums.

General price trends for the agriculture industry are monitored through the producer price index (Table 8.13). In 2014, the producer price index went down by 8.6 per cent to 104.9 points. Lower producer prices were recorded in all sectors under review except for forage which increased marginally by 0.3 per cent. Potatoes registered the highest decrease (24.6 per cent), while fresh vegetables decreased by 15.3 per cent. Input prices for agriculture (Table 8.15) decreased by 2.4 per cent from 115.9 points in 2013 to 113.1 points in 2014. This was mainly attributed to lower prices of 6.7, 5.4 and 1.3 per cent for animal feeding stuffs, fertilisers and soil improvers and motor fuels.

## CHAPTER 9 - ECONOMIC ACCOUNTS FOR AGRICULTURE

The aim of the Economic Accounts for Agriculture is to analyse the production process and the incomes generated by the industry. Gross agricultural production at producer prices for 2014 is estimated at €132.5 million, a drop of 3.1 per cent over 2013, as shown in Table 9.1. Similarly, the final agricultural production at producer prices, after taking into consideration losses and intra-unit consumption, decreased by 3.1 per cent to €125.3 million in 2014 (Table 9.2).

The producer value of crop output (Table 9.2), which amounts to 37.6 per cent of final agricultural production, went down 2.9 per cent in 2014, mainly due to a decrease in the value of potatoes (12.7 per cent).

Animal output, which represents 56.8 per cent of final production, dropped by 3.5 per cent over 2013. The producer value of slaughtered animals went down by 2.1 per cent, mainly due to a drop in the value of slaughtered poultry (11.3 per cent). Similarly, the value of animal products went down by 5.5 per cent over 2013 on account of decreases of 6.2 and 3.6 per cent in the value of milk and eggs respectively.

Intermediate consumption (Table 9.3) for 2014 amounted to €64.4 million, down by 6.8 per cent over 2013. This decrease was attributable to a drop in expenditure on almost all the items mainly, compound feeding stuffs (11.3 per cent), veterinary services (9.0 per cent) and fertilisers (5.4 per cent).

Total subsidies absorbed by the industry in 2014 (Table 9.4) amounted to €20.8 million, up by 6.9 per cent. Subsidies directly linked to production declined by 15.5 per cent, mainly due to lower amounts received in respect of crop products. In contrast, an increase of 8.9 per cent or €1.6 million was registered in the subsidies not directly linked with production.

In 2014, the factor income of the agricultural industry (Table 9.4) advanced by 2.5 per cent to €74.7 million. Dependence on subsidies increased by 1.2 percentage points, from 26.6 per cent in 2013 to 27.8 per cent in 2014.

Domestic sales (Table 9.6) amounted to €115.7 million in 2014, representing 87.3 per cent of gross agricultural production. Farm consumption amounted to €7.2 million in 2014, or 5.4 per cent of the gross production, while exports of agricultural products, mainly potatoes, amounted to 1.7 per cent of the gross production.

## **CHAPTER 10 - SUPPLY BALANCE SHEETS OF AGRICULTURAL PRODUCTS**

Supply balance sheets show the country's supply of a particular agricultural product over a specific period of time. The supply of the agricultural product is made up of the total production of the product added to the total quantity of the imported product, and adjusted to any change in stocks that may have occurred during the reference period. The supply balance sheets also provide information on the usage of the specific agricultural product.

A set of the most important supply balance sheets are published. Supply balance sheets are compiled through various sources. The International Trade and Transport Statistics Unit within the National Statistics Office provide data on commodity flows. Production data for various agricultural commodities are compiled mainly through administrative sources.

## **CHAPTER 11 - FISHERIES**

The fishing fleet register is updated by the Fishing vessel register section within the Department of Fisheries and Aquaculture.

Information from the updated register on all licensed fishing vessels in Malta is analysed by the Agriculture and Environment Statistics Unit. Vessel length, licence, type and port are analysed in Tables 11.1 to 11.5. A total of 2,943 licensed fishing vessels were registered as at the end of 2014. This represented a slight decrease of 0.3 per cent from the 2,952 fishing vessels listed in 2013. Fishing vessels less than 10 metre made up 95.1 per cent of all fishing vessels, with a total of 2,799 vessels (Table 11.1).

Tables 11.6 to 11.10 show data regarding monthly fish landings, obtained from the official fish market. The information in these tables includes the weight, wholesale value and price per kilogramme of the major species landed. In 2014, the volume of fresh fish landings declined by 13.1 per cent to 867 tonnes from 998 tonnes in 2013. The two main species landed, swordfish and dorado decreased by 11.7 and 37.1 per cent respectively. Increases were registered in bogue (7.6 per cent), dog-fish (4.9 per cent) and stone bass (2.2 per cent). The wholesale value went down by 11.0 per cent over 2013 (Table 11.7). Table 11.8 shows that the average wholesale price of shrimp declined by 18.9 per cent while the average wholesale price of dorado increased by 33.4 per cent over 2013.

Price and volume indices of the main species landed, with 2010 as the base year, are published in Tables 11.11 to 11.16. The fresh fish price index advanced by 3.7 per cent over 2013, while the fresh fish volume index decreased by 13.1 per cent over 2013.

Tables 11.17 to 11.19 focus on economic statistics related to Aquaculture. The data were collected by means of an exhaustive survey where all the fish farms are obliged to submit annual information on their structures and economic activity. The data collected from fish farms are in line with Regulation (EC) No 762/2008 of the European Parliament and of the Council of 9 July 2008, on the submission by Member States of statistics on aquaculture.

Table 11.17 shows that the gross output of the aquaculture industry, which comprises mainly of tuna farming and closed cycle species, amounted to €101.1 million, up by 3.2 per cent from

€98.1 million in 2013. The gross value added of the aquaculture industry in 2014 amounted to €17.6 million, up by 111.5 per cent from €8.3 million in the preceding year. Taking fixed capital consumption and exchange rate differences into consideration, the factor income amounted to €20.9 million. Compensation of employees amounted to €3.5 million, while entrepreneurial income stood at €16.2 million.

During the year under review, the volume of fresh fish sold amounted to 8,606 tonnes, a decrease of 5.2 per cent over the preceding year. This was mainly due to a drop in sales of tuna by 11.0 per cent, while sea bass and sea bream increased by 49.0 and 6.0 per cent respectively (Table 11.18).

When compared to 2013, intermediate consumption which takes into account the costs incurred in the production tuna farming and closed cycle species, declined by 6.9 per cent. This resulted from decreases in purchases of live tuna and other fish and in variable production costs by 11.4 and 10.4 per cent respectively (Table 11.19).

## **Chapter 1 - Agricultural Holdings and Land**

## 1.1 Agricultural holdings by size class

	Size class: Utilised agricultural area (ha)

## Methodological Notes

1. The Farm Structure Survey is in line with Regulation (EC) 1166/2008 of 19 November 2008 on farm structure surveys and the survey on agricultural production methods. This survey is based on a sample of farms extracted from the agricultural register.

### 2. Definitions:

- **Agricultural holding:** The agricultural holding is a single unit which has a single management and which produces agricultural products. A holding may have agricultural land in different localities and hence, all information related to it is taken at the holder's residence.
- **Utilised agricultural area (UAA):** The utilised agricultural area is all the land used by the holding for agricultural production, whether rented or family owned. This includes arable land and permanent cropping.
- **Arable land:** Arable land is land which is worked regularly, generally under a system of crop rotation such as potatoes, vegetables, fodder and fallow land. The area under greenhouses is included under this heading.
- **Fallow land:** Fallow land is land which is included in the crop rotation system but is not producing a harvest and is left to recover for the duration of the crop year.
- **Permanent crops:** Land under permanent crops is the land cultivated with crops that occupy the land for long periods and need not be replanted after each harvest.
- **Kitchen Gardens:** Kitchen gardens include those areas devoted to the cultivation of agricultural products mainly intended for consumption by the holder and his household.

## **Chapter 2 - Employment in Agriculture**

## 2.1 Total employment (number of persons) in agriculture by sex

Number of persons	Year			
	2005	2007	2010	2013
<b>MALTA</b>				
<b>Males</b>	<b>14,464</b>	<b>13,844</b>	<b>14,599</b>	<b>15,115</b>
<b>Females</b>	<b>3,504</b>	<b>3,304</b>	<b>3,940</b>	<b>3,951</b>
<b>Total</b>	<b>17,968</b>	<b>17,148</b>	<b>18,539</b>	<b>19,066</b>
Malta				
Males	11,521	11,057	11,481	11,882

Source: Farm Structure Survey.

## Methodological Notes

1. The Farm Structure Survey is in line with Regulation (EC) 1166/2008 of 19 November 2008 on farm structure surveys and the survey on agricultural production methods. This survey is based on a sample of farms extracted from the agricultural register.
2. **Definition:**
  - **Annual work units (AWU):** The annual work unit corresponds to the work performed by one person who is occupied in an agricultural holding on a full-time basis. Persons with a minimum working time of 1,800 hours annually are considered full-time workers and count as 1 AWU. The performance of part-time workers is converted into AWU pro rata.

## **Chapter 3 - The Pig Industry**

### 3.1 Pig farms and pig population

## Methodological Notes

1. The pig census is carried out every year and is in accordance with Council Regulation No.1165/2008. Census Date is 1 December.
2. The small number of pig breeders does not allow for a sample survey to be carried out. Hence, a head count on all farms is taken.
3. In order to obtain livestock numbers, a postal survey is undertaken. Non-respondents are contacted by telephone and every effort is made to contact every farm on the register.
4. Monthly data with regard to pigs slaughtering are provided by the civil abattoir under the responsibility of the Ministry for Sustainable Development, the Environment and Climate change (MSDEC).
5. Data in respect of meat production are presented in terms of carcass weight.
6. **Definition:**
  - **Pig carcass weight:** The weight of the slaughtered pig's cold body, either whole or divided in half along the mid-line, after being bled, eviscerated and having its tongue, bristles, hooves, genitalia, flare fat, kidneys and diaphragm removed.

## **Chapter 4 - The Cattle Industry**

## Methodological Notes

1. The Cattle Census is carried out every year in accordance with Commission Regulation (EC) No. 1165/2008. The reference date is 1 December 2014.
2. The information for this exercise has been compiled on the basis of records from the Bovine Register, which is under the control of the Veterinary Regulatory Directorate at the civil abattoir.
3. Certain categories cannot be directly compiled from the Bovine Register and therefore specific co-efficients based on the Census of Agriculture of 2010 are used.
4. Monthly data with regard to cattle slaughtering are provided by the civil abattoir under the responsibility of the Ministry for Sustainable Development, the Environment and Climate change (MSDEC).
5. Data in respect of meat production are presented in terms of carcass weight.
6. **Definition:**
  - **Cattle carcass weight:** The weight of the slaughtered cattle's cold body after being skinned, bled, eviscerated and having its genitalia, limbs at the carpus and tarsus, head, tail, kidneys, kidney fats and udder removed.

**Chart 5.7 Annual percentage change in goat population by type: 2013/2012 and 2014/2013**

## **Methodological Notes**

1. The sheep and goats census is carried out every year and is in accordance with Commission Regulation (EC) No. 1165/2008. The reference date is 1 December 2014.
2. The information for this exercise has been compiled on the basis of records from the Bovine Register, which is under the control of the Veterinary Regulatory Directorate at the civil abattoir.
3. Certain categories cannot be directly compiled from the Bovine Register and therefore specific co-efficients based on the Census of Agriculture of 2010 are used.

## Methodological Notes

1. Data on the number of broilers and layers is obtained from the Farm Structure Survey. Such survey is in line with Regulation (EC) 1166/2008 of 19 November 2008 on farm structure surveys and the survey on agricultural production methods.
2. Data on broiler slaughtering are provided directly by private licensed slaughterhouses. Data sets are finalised after actual data are collected from all active licensed slaughterhouses.
3. Slaughterhouses provide data on the number of heads slaughtered, carcass weight, and the average carcass price per kilogram.
4. Data in respect of meat production are presented in terms of carcass weight.
6. **Definition:**
  - **Broiler carcass weight:** The weight of the slaughtered broiler's cold body after being bled, plucked and eviscerated and having its head, feet, neck, heart, liver and gizzard removed.

## **Chapter 7 - Output of the Agricultural Industry**

## 7.1 Annual volume (tonnes) and wholesale value (€000) of fruit and vegetables sold through official markets

December	5,894	3,677	4,623	5,476	5,610
<b>Total</b>	<b>82,108</b>	<b>55,386</b>	<b>69,628</b>	<b>82,475</b>	<b>84,503</b>

**Chart 7.4 Estimated annual egg production (000 eggs)**

## Methodological Notes

1. The information on crops is collected from the three official markets (Pitkali, Farmers' Central Co-operative Society and Gozitano) where all farmers deposit their produce for sale to licensed hawkers, through private middlemen. The information is compiled on a daily basis and data is forwarded to the NSO on a monthly basis.
2. Data is recorded by crop where quantities and values are kept, together with average unit price.
3. Unit volume and prices are used in the compilation of monthly volume and price indices for each agricultural product.
4. Regional data is derived at source where every consignment at the official markets is classified by the residence of the farmer.
5. The main types of produce are shown. A full list of items that pass through the official markets may be made available on request.
6. The total estimated production of fruit and vegetables includes the amount that was sold through official markets, an estimated amount that was sold directly together with that amount consumed by the farmers' holding.
7. Data with regard to cattle and pig slaughtering are provided by the civil abattoir under the responsibility of the Ministry for Sustainable Development, the Environment and Climate change (MSDEC). Data on broiler slaughtering are provided directly by the private licensed slaughterhouses. Data sets are finalised after actual data are collected from all active licensed slaughterhouses.
8. Slaughterhouses provide data on the number of heads slaughtered, carcass weight, and the average carcass price per kilogram.
9. Data on milk is obtained directly from the Malta Dairy products on a monthly basis.
10. The production of eggs is estimated on the number of layers that is obtained directly from the civil abattoir.

Tractors	98.9	98.9	98.9	98.9	98.9
Buildings	109.0	109.0	109.0	109.0	109.0

## Methodological Notes

1. Producer price indices provide information about the developments in the prices of vegetables, fruit, animals, and animal products over a particular period, whereas input price indices monitor changes in the purchase prices of raw and auxiliary materials and services from other industries.
2. Producer price indices are calculated using producer prices, which are prices obtained by farmers, excluding subsidies. Such data is obtained directly from Pitkali, FCCS and Gozitano on a monthly basis.
3. Input price indices are calculated using purchase prices of raw and auxiliary materials and services. The data used is obtained on a quarterly basis directly from the major retail outlets specialising in the provision of agricultural products.
4. Both producer and input prices used in the calculation of the respective index are calculated net of VAT.
5. The indices have 2010 as the base year. Price indices are calculated on the basis of the Laspeyres formula whereby a fixed weighting structure is representative of the base year. For the quarterly indices, there is a slight variation in the compilation of the index for vegetables and fruit due to seasonality. The composition of each quarterly basket of vegetables and fruit differs according to availability.
6. A meaningful comparison may only be undertaken between the reference month/quarter and the corresponding period in the preceding year.

## **Chapter 9 - Economic Accounts for Agriculture**

## 9.1 Gross agricultural production (€000) at producer prices

	Year		
	2012	2013	2014
<b>Gross agricultural production at producer prices</b>	<b>132,571</b>	<b>136,820</b>	<b>132,547</b>
Losses	(5,742)	(5,779)	(5,605)
Intra-unit consumption	(1,664)	(1,630)	(1,605)
Seeds	(216)	(216)	(216)
Milk	(596)	(602)	(561)
Grapes	(852)	(812)	(829)
Final agricultural production at producer prices	125,165	129,412	125,338

## 9.2 Final agricultural production (€000) at producer prices

	Year		
	2012	2013	2014
<b>Final agricultural production at producer prices</b>	<b>125,165</b>	<b>129,412</b>	<b>125,338</b>
Agricultural output	117,695	122,284	118,332
Crop output	47,640	48,577	47,172
Forage	4,314	4,633	4,529
Vegetables and horticultural products	29,243	28,840	28,331
Potatoes	5,822	6,770	5,910
Fruit	6,418	6,605	6,728
Other crop products	1,844	1,730	1,674
Animal output	70,055	73,707	71,160
Animals	41,901	44,377	43,448
Cattle	3,556	3,512	3,191
Pigs	11,486	14,030	14,583
Sheep and goats	381	363	349
Poultry	7,794	7,747	6,874
Other animals (Rabbits)	18,683	18,726	18,451
Animal products	28,154	29,329	27,712
Milk	21,325	21,471	20,131
Eggs	6,619	7,648	7,371
Other animal products	210	210	210
Inseparable non-agricultural secondary activities	7,470	7,128	7,006
Processing of agricultural products			
Wine	2,663	2,538	2,590
Other animal products: milk	4,807	4,590	4,416

### 9.3 Intermediate consumption (€000) for agriculture

	Year		
	2012	2013	2014
<b>Total intermediate consumption</b>	<b>(70,902)</b>	<b>(69,122)</b>	<b>(64,445)</b>
Cropping	(6,610)	(6,714)	(6,620)
Imported seeds and planting stock	(3,784)	(3,770)	(3,781)
Fertilisers and soil improvers	(1,996)	(2,109)	(1,995)
Plant protection products	(830)	(835)	(844)
Animal feed	(35,930)	(35,211)	(31,640)
Fodder supplied by other holdings	(4,055)	(4,366)	(4,270)
Fodder produced and consumed on the holding	(259)	(267)	(259)
Compound feedingstuffs	(31,616)	(30,578)	(27,112)
Energy and lubricants	(9,700)	(9,350)	(9,024)
Electricity	(1,632)	(1,611)	(1,576)
Fuel	(8,068)	(7,739)	(7,448)
Various services	(18,663)	(17,848)	(17,161)
Maintenance of materials	(6,648)	(6,564)	(6,380)
Maintenance of buildings	(2,144)	(2,008)	(1,862)
Veterinary services	(1,209)	(1,105)	(1,005)
Other goods and services	(8,662)	(8,171)	(7,914)

### 9.4 Net value added (€000) for agriculture

	Year		
	2012	2013	2014
Final agricultural production at producer prices	125,165	129,412	125,338
Subsidies on production	1,697	1,572	1,328
Final agricultural production at basic prices	126,862	130,983	126,666
Total intermediate consumption	(70,902)	(69,122)	(64,445)
Gross value added at basic prices	55,960	61,861	62,221
Fixed capital consumption	(6,891)	(6,827)	(6,919)
Net value added at basic prices	49,069	55,033	55,302
Subsidies not directly linked with production	18,212	17,845	19,430
Factor income	67,281	72,878	74,732
Compensation of employees	4,007	4,083	4,052
Operating surplus	63,274	68,795	70,680
Rents paid	(520)	(535)	(548)
Interest paid	(762)	(756)	(752)
Entrepreneurial income	61,991	67,505	69,380

## 9.5 Final agricultural production (€000)

	Final production at producer prices	Subsidies on products	Final production at basic prices
<b>Output of the agricultural industry</b>	<b>125,337</b>	<b>1,328</b>	<b>126,666</b>
Crop output	47,172	1,315	48,487
Forage	4,529	-	4,529
Vegetables and horticultural products	30,005	1,190	31,195
Potatoes	5,910	30	5,940
Fruit	6,728	95	6,823
Animal output	71,160	14	71,173
Livestock products	43,448	-	43,448
Other animal products	27,712	14	27,726
Inseparable non-agricultural secondary activities	7,006	-	7,006
Processing of agricultural products			
Wine	2,590	-	2,590
Other animal products: milk	4,416	-	4,416

## 9.6 Gross agricultural production (€000) at producer prices by product and usage

	Total	Usage					
		Domestic sales	Losses	Exports	Farm consumption	Other uses	Intra-unit consumption
<b>Gross Agricultural Production</b>	<b>132,547</b>	<b>115,653</b>	<b>5,605</b>	<b>2,268</b>	<b>7,157</b>	<b>259</b>	<b>1,605</b>
Agricultural output	125,542	111,678	5,605	2,268	4,126	259	1,605
Crop output	48,216	42,472	-	2,268	2,172	259	1,045
Forage	4,529	4,270	-	-	-	259	-
Vegetables and horticultural products	30,005	28,519	-	237	1,249	-	-
Potatoes	5,910	3,413	-	2,031	465	-	-
Fruit	7,557	6,270	-	-	458	-	829
Other crop products	216	-	-	-	-	-	216
Animal output	77,325	69,206	5,605	-	1,954	-	561
Animals	48,824	41,571	5,377	-	1,876	-	-
Cattle	3,191	3,191	-	-	-	-	-
Pigs	14,583	14,583	-	-	-	-	-
Sheep and goats	349	331	-	-	17	-	-
Poultry	7,638	6,860	764	-	14	-	-
Other animals (Rabbits)	23,064	16,606	4,613	-	1,845	-	-
Animal products	28,501	27,635	228	-	77	-	561
Milk	20,692	20,061	-	-	70	-	561
Eggs	7,599	7,364	228	-	7	-	-
Other animal products	210	210	-	-	-	-	-
Inseparable non-agricultural secondary activities	7,006	3,975	-	-	3,031	-	-
Processing of agricultural products							
Wine	2,590	-	-	-	2,590	-	-
Other animal products: milk	4,416	3,975	-	-	442	-	-

**Chart 9.1 Percentage distribution of gross agricultural production by type of production: 2014**

## 9.7 Gross agricultural production (€000) at producer prices by usage

	Year		
	2012	2013	2014
<b>Gross agricultural production</b>	<b>132,571</b>	<b>136,820</b>	<b>132,547</b>
Domestic intersectoral sales	115,381	119,618	115,653
To other agricultural units	4,055	4,366	4,270
Outside the agricultural industry	111,326	115,252	111,383
Losses	5,742	5,779	5,605
Exports	2,264	2,271	2,268
Farm consumption	7,261	7,257	7,157
Other uses	259	267	259
Intra-unit consumption	1,664	1,630	1,605

**Chart 9.2 Percentage distribution of gross agricultural production by usage: 2014**

## Methodological Notes:

1. The data compiled refers to the output derived on agricultural holdings, and not total disposable income from agricultural households.
2. Data with respect to the output side of agriculture is collected from a number of sources. The civil abattoir provides monthly slaughtering statistics on various types of animals. The four official fruit and vegetable markets provide data on quantities and wholesale values of the produce obtained by the farmer. Private slaughterhouses provide information on the slaughtering of poultry. The Ministry for Sustainable Development, the Environment and Climate change (MSDEC) provides information on subsidies and vintners. Data from tomato processors is collected directly by the NSO by means of annual returns.
3. In respect of intermediate consumption, the data is based on estimates compiled from the input price indices of which prices are obtained from agricultural shops and administrative sources.
4. The economic indicators published refer to calendar years.

### 7. Definitions:

- **Gross production at producer prices** represents the total value of agricultural goods and services produced over a particular period. Gross production includes losses incurred on the agricultural holding.
- **Final production at producer prices** is arrived at by deducting losses incurred and output for own use from gross production at producer prices. Final production refers to all goods and services actually consumed.
- **Final production at basic prices** is the summation of final production at producer prices plus all subsidies related to production, net of VAT.
- **Intermediate consumption** represents the value of all goods and services used as inputs in the production process, excluding fixed assets. Products used in intermediate consumption are valued at purchase prices, net of VAT.
- **Gross value added of the agricultural industry** is the actual value added created by all the agricultural holdings before deducting fixed capital consumption (depreciation). Therefore, gross value added is the difference between final production at basic prices and intermediate consumption.
- **Factor Income** measures the remuneration of all the factors of production.
- **Entrepreneurial income** measures the compensation of unpaid labour (sole proprietors and unpaid family members). It is similar to the accounting concept of current profit before distribution.

## **Chapter 10 - Supply Balance Sheets of Agricultural Products**

## 10.1 Cereals (000 tonnes)

	Crop year		
	2011/2012	2012/2013	2013/2014
<b>Total Resources</b>	<b>146.3</b>	<b>148.1</b>	<b>134.4</b>

Domestic uses	11.5	11.6	11.6
Seeds	-	-	-
Losses	-	-	-
Animal feed	-	-	-
Industrial uses	-	-	-
Human consumption	11.5	11.6	11.6

Notes:

1. Crop year is July to June..
2. Fresh fruit does not include Nuts, Citrus fruit, Dried fruit and Table Olives.

## 10.5 Citrus (000 tonnes)

	Crop year		
	2011/2012	2012/2013	2013/2014
<b>Total Resources</b>	<b>13.9</b>	<b>12.1</b>	<b>11.1</b>
Usable production	1.7	1.6	1.8
Imports	12.2	10.5	9.3
From EU	9.6	6.9	7.0
<b>Total Uses</b>	<b>13.9</b>	<b>12.1</b>	<b>11.1</b>
Exports	0.0	0.0	0.0
To EU	0.0	0.0	0.0
Change in stocks	0.0	0.0	0.0
Final stocks	0.0	0.0	0.0
Initial stocks	0.0	0.0	0.0
Domestic uses	13.9	12.1	11.1
Seeds	-	-	-
Losses	-	-	-
Animal feed	-	-	-
Industrial uses	-	-	-
Human consumption	13.9	12.1	11.1

**Note:** Crop year is July to June.

## 10.6 Potatoes (000 tonnes)

	Crop year		
	2011/2012	2012/2013	2013/2014
<b>Total Resources</b>	<b>41.7</b>	<b>41.3</b>	<b>45.9</b>
Usable production	14.6	17.0	19.0
Imports	27.1	24.3	27.0
From EU	27.0	24.2	26.9
<b>Total Uses</b>	<b>41.7</b>	<b>41.3</b>	<b>45.9</b>
Exports	4.5	4.3	3.1
To EU	4.5	4.3	2.9
Change in stocks	-3.8	-1.5	7.3
Final stocks	6.9	5.5	12.8
Initial stocks	10.8	6.9	5.5
Domestic uses	41.0	38.5	35.5
Seeds	0.2	0.2	0.2
Losses	-	-	-
Animal feed	-	-	-
Industrial uses	-	-	-
Human consumption	40.8	38.3	35.3

**Note:** Crop year is July to June.

## 10.7 Potatoes 2013/2014 (000 tonnes)

	Total	Type of potato		
		Early	Other	Potato starch
<b>Total Resources</b>	<b>45.9</b>	<b>20.1</b>	<b>25.7</b>	<b>0.1</b>
Usable production	19.0	18.3	0.7	-
Imports	27.0	1.8	25.1	0.1
From EU	26.9	1.8	25.0	0.1
<b>Total Uses</b>	<b>45.9</b>	<b>20.1</b>	<b>25.7</b>	<b>0.1</b>
Exports	3.1	-	3.1	-
To EU	2.9	-	2.9	-
Change in stocks	7.3	7.3	0.1	-
Final stocks	12.8	12.1	0.7	-
Initial stocks	9.5	4.8	0.7	-
Domestic uses	35.5	12.9	22.6	0.1
Seeds	0.2	0.2	-	-
Losses	-	-	-	-
Animal feed	-	-	-	-
Industrial uses	-	-	-	-
Human consumption	35.3	12.7	22.6	0.1

**Note:** Crop year is July to June.

## 10.8 Sugar (000 tonnes)

	Crop year		
	2011/2012	2012/2013	2013/2014
<b>Total Resources</b>	<b>42.4</b>	<b>40.5</b>	<b>43.8</b>
Usable production	-	-	-
Imports	42.4	40.5	43.8
From EU	19.3	20.4	17.7
<b>Total Uses</b>	<b>42.4</b>	<b>40.5</b>	<b>43.8</b>
Exports	20.1	21.2	24.5
To EU	0.4	0.4	0.7
Change in stocks	0.6	-0.9	-0.7
Final stocks	2.8	1.9	1.2
Initial stocks	2.2	2.8	1.9
Domestic uses	21.7	20.2	20.0
Seeds	-	-	-
Losses	-	-	-
Animal feed	-	-	-
Industrial uses	-	-	-
Human consumption	21.7	20.2	20.0

**Note:** Crop year is July to June.

## 10.9 Wine (000 hectolitres)

	Crop year		
	2011/2012	2012/2013	2013/2014
<b>Total Resources</b>	<b>93.2</b>	<b>96.9</b>	<b>101.6</b>
Usable production	19.8	21.9	21.2
Imports	47.8	55.0	55.8
From EU	39.9	42.1	47.3
<b>Total Uses</b>	<b>93.2</b>	<b>96.9</b>	<b>101.6</b>
Exports	0.0	0.0	0.0
To EU	0.0	0.0	0.0
Change in stocks	-5.6	4.6	0.7
Final stocks	20.0	24.6	25.3
Initial stocks	25.6	20.0	24.6
Domestic uses	73.2	72.3	76.3
Human consumption	73.2	72.3	76.3
Industrial uses	-	-	-
Processing	-	-	-
Losses	0.0	0.0	0.0

**Note:** Crop year is August to July.

## 10.10 Wine 2013/2014 (000 hectolitres)

	Quality wines		Table wines		Other wines	
	Total	of which white	Total	of which white	Total	of which white
<b>Total Resources</b>	<b>30.2</b>	<b>16.0</b>	<b>56.4</b>	<b>21.7</b>	<b>15.0</b>	<b>7.5</b>

Human consumption	4.8	-	4.8

## **Methodological Notes**

1. The Supply Balance Sheets (SBS) compare resources and uses of a product or a group of products over a reference period (calendar year or crop year).
2. The SBS summarise data from different sources to show the various flows and uses of a specific product in a specific reference area over a specific period of time. The data refer to the production, trade and various uses of the product.
3. Various administrative sources are used to compile such data mainly data from the International trade and transport statistics unit within the NSO, from the civil abattoir and private slaughterhouses, and also from the viticulture section within the Ministry of Sustainable Development, Environment and the Climate change (MSDEC).

## **Chapter 11 - Fisheries**

### 11.1 Fishing vessels by length and port of berth

	Total	Size class: Metres			
		<5	5 - <10	10 - <15	≥15
<b>MALTA</b>	<b>2,943</b>	<b>1,306</b>	<b>1,493</b>	<b>93</b>	<b>51</b>
Malta	2,499	1,087	1,288	75	49
Valletta Area	536	189	315	14	18
Southwest Area	1,047	326	640	50	31
West Area	273	218	55	0	0
North Northeast Area	643	354	278	11	0
Gozo and Comino	444	219	205	18	2

Source: Department of Fisheries and Aquaculture.

### 11.2 Fishing vessels by length and type

	Total	Size class: Metres			
		<5	5 - <10	10 - <15	≥15
Trawlers	17	0	0	0	17
MPV	1,333	330	890	80	33
Other fishing vessels	1,593	976	603	13	1
Luzzu	279	36	232	11	0
Kajjik	924	670	254	0	0
Firilla	21	5	16	0	0
Bimbu	40	3	37	0	0
Other	329	262	64	2	1
<b>Total</b>	<b>2,943</b>	<b>1,306</b>	<b>1,493</b>	<b>93</b>	<b>51</b>

## 11.17 Value added of the aquaculture industry

	2011	2012	2013	2014
<b>Number of farms</b>	<b>6</b>	<b>6</b>	<b>6</b>	<b>6</b>
	<b>€ 000</b>			
<b>Gross output of the aquaculture industry</b>	<b>50,192</b>	<b>97,553</b>	<b>98,075</b>	<b>101,169</b>
of which:				
Tuna farming	38,594	69,072	92,797	81,462
Closed cycle species	12,373	14,104	13,068	15,879
Change in stocks	-1,060	14,255	-7,962	3,662
Other output	285	122	172	166
Less intermediate consumption	39,760	84,943	89,761	83,589
<b>Gross value added of the aquaculture industry</b>	<b>10,432</b>	<b>12,610</b>	<b>8,314</b>	<b>17,581</b>
Less fixed capital consumption	1,893	1,416	1,480	1,426
<b>Net value added</b>	<b>8,539</b>	<b>11,193</b>	<b>6,834</b>	<b>16,154</b>
Exchange rate differences	141	-3,576	-3,409	4,765
<b>Factor income of the aquaculture industry</b>	<b>8,680</b>	<b>7,618</b>	<b>3,425</b>	<b>20,919</b>
Less compensation of employees	2,928	3,446	3,407	3,528
<b>Operating surplus</b>	<b>5,752</b>	<b>4,172</b>	<b>18</b>	<b>17,391</b>
Less rents payable	319	132	185	163
interest payable	782	994	611	1,039
<b>Entrepreneurial income</b>	<b>4,650</b>	<b>3,046</b>	<b>-778</b>	<b>16,190</b>

Notes:

1. Closed cycle species refers to Sea bream, Sea bass, Meagre and Amberjack.
2. Exchange rate differences relate to Tuna farming.

**Chart 11.4 Percentage distribution of factor income of the aquaculture industry: 2014**

## 11.18 Sales and purchases of fish of the aquaculture industry

	2011	2012	2013	2014	2012/2011	2013/2012	2014/2013
					Percentage change		
<b>Sales of fish</b>

Other selling costs	1,523	1,531	1,076	2,832	0.5	-29.7	163.3
<b>Overheads</b>	<b>3,206</b>	<b>5,357</b>	<b>5,966</b>	<b>6,839</b>	<b>67.1</b>	<b>11.4</b>	<b>14.6</b>
Accounting/audit fees	81	58	76	73	-28.2	30.6	-3.4
Environmental monitoring	46	31	32	31	-32.7	4.7	-5.3
Contractual work	1,045	3,095	4,354	3,639	196.2	40.7	-16.4
Other fixed costs	2,035	2,173	1,504	3,096	6.8	-30.8	105.9

Note: Closed cycle species refers to Sea bream, Sea bass, Meagre and Amberjack.

Chart 11.6 Distribution of intermediate consumption of aquaculture industry by type

## Methodological Notes

1. Statistical data for fish landings are collected through the daily returns of sales submitted by middlemen at the fish market.
2. The information is submitted to the NSO on a monthly basis by the Department of Fisheries and Aquaculture. Data on fish landings by species, volume, average monthly unit prices and total value paid out to fishermen are used in this compilation.
3. The indices are used to monitor developments in price and volume movements over a particular period. The price and volume indices are fixed-weight Laspeyres type indices with 2010 as the base year.
4. The fishing Fleet register is maintained by the Fishing Vessel Register section within the Department of Fisheries and Aquaculture.
5. Only the six dominant species landed are included. No individual species under the heading 'Other species' exceed 10 per cent of total landings. Statistical information on all species may be made available on request.
6. The data pertaining to the aquaculture industry was collected by means of an exhaustive survey where all the fish farms were obliged to submit information on their structures and economic activity. The data requested from each fish farm were the number, surface area and volume of cages utilised; purchases and sales of fish in weight and in value; opening and closing valuation of stocks at a particular point in time; and the expenses incurred in the production of farmed fish. All fish farms responded to the enquiry.

### 7. Definitions:

- **Aquaculture industry** which is entirely dependent on marine resources has two sectors:
  - tuna farming, which relies on captured wild fish and is referred to as “Capture Based Species” (CBS), and
  - the farming of “closed cycle species” (CCS) such as sea bream, sea bass, meagre and amberjack that are cultured from eggs produced in hatcheries.
- **Change in stocks** is difference between the closing stock of the species as at 31 December and opening stock as at 1 January.
- **Intermediate consumption** represents the value of all goods and services used as inputs in the production process, excluding fixed assets.
- **Gross value added** of the aquaculture industry is the actual value added created by all the fish farms before deducting fixed capital consumption (depreciation). Therefore, gross value added is the difference between gross output and intermediate consumption.
- **Fixed capital consumption** is the depreciation of fixed assets.
- **Factor Income** measures the remuneration of all the factors of production.
- **Net entrepreneurial income** is similar to the accounting concept of current profit before distribution.

## **Appendices**

## Appendix A

### List of Maltese designations of the major vegetables, fruit and fish

English	Malti
Bellpepper	Bżar aħdar
Broad beans	Ful
Cabbages	Kaboċċi
Carrots	Karrotti
Cauliflowers	Pastard
Celery	Krafes
Cucumber	Ħjar
Dry onions	Basal niexef
Eggplant	Brunġiel
Globe artichokes	Qaqoċċ
Green onions	Basal aħdar
Kohlrabi	Ġidra
Lettuce	Ħass
Potatoes	Patata
Pumpkins	Qara' ħamra
Sugar melons	Bettieħ
Tomatoes	Tadam
Vegetable marrows	Qara' baġħli
Watermelons	Dullieġħ
Other vegetables	Ħxejjex oħra

English	Malti
Bambinella	Bambinella
Cherry plums	Cherry plums
Dry figs	Tin taċ-ċappa
Early figs	Bajtar ta' San Ġwann
Grapes	Għeneb
Lemons	Lumi
Nectarines	Nuċiprisk
Oranges	Laring
Peaches	Ħawħ
Pomegranates	Rummien
Strawberries	Frawli
Sweet oranges	Lumilaring
Other fruit	Frott ieħor

English	Malti
Blue fin tuna	Tonna
Bogue	Vopa
Dog-fish	Mazzola
Dorado	Lampuka
Shrimp	Gamblu
Stone bass	Dott
Swordfish	Pixxispad
Other species	Ħut ieħor

## Appendix B
