UGANDA BUREAU OF STATISTICS

2020

STATISTICAL ABSTRACT

FOREWORD

The Uganda Bureau of Statistics (UBOS) is committed to the production and dissemination of integrated statistical information that meet the National and International standards quality requirements. Specifically, indicators are required for monitoring the progress towards achieving the goals for the National Development Plan III, 2020/21-2024/25 and the United Nations (UN) Sustainable Development Goals (SDGs). This Statistical Abstract is UBOS's prime annual publication through which key statistical information derived from the latest surveys, censuses and administrative records of Ministries, Departments and Agencies (MDAs) are disseminated for use in tracking outcomes of policies as well as decision-making.

The information presented in the 2020 Statistical Abstract covers statistics on the Environmental, Demographic, Socio-economic, Production and Macroeconomic sectors. Information on these sectors is presented basing on either a Calendar Year (January-December) or Financial Year (July-June) structure, depending on availability of data.

The Bureau would like to appreciate the continued cooperation of MDAs and Local Governments in providing the requisite data to produce this publication. In a special way, I wish to thank the 2020 Statistical Abstract Committee that compiled this publication. The Bureau welcomes constructive comments from stakeholders that aim at enhancing the quality of its future publications.

Copies of this publication are available at the Bureau's Head Office located at Statistics House, Plot 9, Colville Street, Kampala and the official UBOS website: www.ubos.org.

It is my sincere hope that the statistical information in this publication will be used by the readers to make informed decisions.

Chris N. Mukiza (PhD)
Executive Director

URA	Uganda Revenue Authority
USE	Universal Secondary Education
UTA	Uganda Tea Association
UTL	Uganda Telecommunication Limited
VA	Value Added
VCs	Vulnerable Children
WHO	World Health Organisation

Executive Summary

The Statistical Abstract is an annual publication compiled by Uganda Bureau of Statistics, which provides the statistical summary on various socio-economic indicators for Uganda. Some figures in this edition may vary from those in the earlier editions due to the updates. Note that some of the CY 2019 and FY 2019/20 data presented in this edition are provisional and could be revised in subsequent publications.

This publication is divided into four major chapters which are preceded by a glossary of definitions and general information on Uganda. A set of Statistical Appendix Tables that are serialized, using a combination of numbers and alphabets, such as Table 1.1 A, Table 2.3 B etc, are also provided for the readers' information. The reader is encouraged to refer to such tables while reading the text. It should be noted that the number of districts has been increasing.

Chapter one presents environmental statistics covering land, climate, forestry and water supply with the following highlights:

Land Area by coverage by 2017

- Uganda has a total area of 241,555 square kilometers.
- Open water bodies covered 37,460 square kilometers.
- Wetlands cover 7,621 square kilometers.
- Land area is 196,237 square kilometers.
- Agricultural land increased from 105,308 sq. kms in 2015 to 106,662 sq. kms in 2017.
- Built up land area covered 1,387 square kilometers.

Forests

- Forest cover reduced significantly by 60.4 percent between 1990 and 2015.
- Woodlands cover declined to 12,391 sq km in 2017 from 28,347 sq km in 2000.
- Total forest cover declined by 25.4 percent between 2010 and 2015.
- Round wood production increased to 1,165,063 tonnes in 2018 from 1,075,035 tonnes in 2017.

Climate

- In 2019, all 12 monitoring canters, recorded the rainfall above their long term annual averages apart from Mbarara that recorded rainfall below the long term annual averages.
- In 2019, Arua and Jinja recorded temperatures that were below the long term annual minimum while only Lira recorded below its highest mean daily maximum temperature.

Water Supply

- Total water produced by NWSC increased from 134.9 million cubic meters in FY 2018/19 to 139.6 million cubic meters in FY 2019/20.
- 93.3 percent of the total water produced in 2019/20 was supplied. However, only 87.2 million cubic metres was sold. This indicates a 77.4 percent billing efficiency.

Chapter Two presents Demographic and Socio-Economic Statistics relating to Population, Education, Labour Force, Employment and Earning, Income and Expenditure, Public Health and Crime. Below are highlights of the chapter:

Demographic and Socio-Economic Statistics

- According to 2014 NPHC results;
 - Uganda population was 34.6 million persons.
 - Annual population growth rate between 2002 and 2014 censuses was 3.03 percent.
 - 2014 population density was 174 persons per square kilometer.
 - Sex ratio was 94.5 percent in 2014.
- According to the 2016 UDHS;
 - Total fertility was 5.4 children per woman.
 - Infant mortality rate was 43 deaths per 1000 live birth.
 - Under five mortality rate was 64 deaths per 1000 live birth.

Education

- The enrollment rate at pre-primary level decreased to 8 percent in 2017 from 18 percent registered in 2016.
- Primary school enrolment was at 8.8 million in 2017.
- Secondary school enrolment stood at 1,370,583 in 2017.
- 99 percent of the students who registered for UCE exams in 2019, sat for the examinations.
- 8 percent of the students who sat for UCE exams in 2019 failed.
- In 2017, more than two thirds of pupils attending primary school had adequate sitting space.
- 228,563 students were orphaned in 2017.

Labour force, Employment and Earnings

- Uganda's working population increased from 13.9 million in 2012/13 to 15 million people in 2016/17 (UNHS).
- The proportion of working females was 51percent in 2016/2017.
- According to 2016/17 UNHS, 13 percent of the persons in employment were living in poor households a decline from 17 percent during 2012/13.
- Uganda's working population increased from 13.9 million in 2012/13 to 2016/17 (15.0 million).
- 72 percent of the working population was engaged in the agriculture sector in 2012/13.
- 30 percent of the persons in the work force have attained at least secondary school in 2016/17.

Income and expenditure

- Updates in the UNHS data sets/waves from 2005/06 to 2018/19 indicate that, the largest share of household expenditure has been on food (41.5%), followed by expenditure on housing, water, electricity, gas and other fuel (19.4%) and education (6.7%).
- Overall, 50 percent of the food consumed in households came from own production between 2013 and 2016 though this declined to 43 percent in 2018/19.
- 8.4 percent of the households moved out of poverty whereas 10.2 percent slipped into poverty. A large percentage (72.9%) of the households was never poor compared with the chronically poor (8.5%).

Health

- The staffing levels in public health facilities was 71 percent in 2017/18.
- Government allocation on health in the year 2018/19 was 7.2 percent, up from 6.4 percent spent in FY 2017/18.
- There was an 8.3 percentage increase of facilities in 2017/18 from 6,404 in 2016/17 constituting 533 additional health facilities.
- Malaria remains the highest cause of morbidity and mortality among the children below 5 years of age.
- Haemorrhage still remains the leading cause of maternal illness and mortality in the country, accounting for 46 percent of the deaths in 2018/19.
- The TB case detection rate increased from 56 percent in 2017/18 to 78 percent in 2018/19

Crime

- The number of crimes reported to Police decreased from 238,746 in 2018 to 215,224 in 2019.
- Defilement was the most common serious crime accounting for more than half of all the serious crimes in 2019.
- The Uganda Police Force recorded a total of about 12,858 road traffic accidents in 2019.

A total of 14,690 casualties from road traffic crashes was registered in 2019 and passengers formed the highest percentage with (40.3 percent).

- The leading cause of road accidents in 2019 was careless driving (40.1 percent),
- About 25.8 percent of road accident crashes occurred between 4:00-7:59pm.
- Uganda's prison population in 2019 stood at 60,086 people.
- In 2019, 345 prisoners occupied space meant for 100 prisoners.

Chapter three presents statistics on production, which for purposes of this Abstract includes Agriculture and Fisheries, Industry, Producer Prices, Energy, Building and Construction, Transport and Communications, Tourism and Migration. Below are the highlights of the chapter:

Agriculture

- Area planted for Food crops stood at 8,364,000 Hectares in 2019.
- A total of 8,326,000 tonnes of bananas were produced in 2019.
- In 2018, 346 million tonnes of fish was caught in Uganda's water bodies.

Index of production

- The Index of Production which measures output from manufacturing activities recorded for the year 2019 was 276.3 which was a 0.1 percent increase from the year that ended 2018.
- The 'Chemicals, Paint, Soap and Foam products' group registered the highest increase of 16.5 percent.

Energy

- Energy purchases by Uganda Electricity Transmission Company increased by 7.5 percent from 4,078 GWh in 2018 to 4384 GWh in 2019
- Total number of UMEME customers increased by 14.6 percent from 1,372,166 consumers in 2018 to 1,572,605 consumers in 2019.
- Total installed capacity of electricity power plants increased by 27.5 percent from 983.55MW in 2018 to 1254.007MW in 2019.
- There was 8.2 percent and 4.9 percent increase in the import volume of petrol and diesel respectively in 2019 compared to 2018.

Building and construction

- 58 percent of the plans submitted were approved for residential buildings while 29.7 percent were approved for commercial buildings
- The Net Domestic Supply of cement which considers domestic production registered an increase of 21 percent between 2018 and 2019.

Minerals

- In 2019 minerals produced fetched a value of 148 billion Shillings.

Transport

- The number of newly registered motor vehicles and motor cycles increased by only 0.1 percent from 136,977 in 2018 to 145,455 in 2019.

During **2019**, there was a notable increase in the vehicles licensed to transport tourists by 17.6 percent, from 501 in 2018 to 589 in 2019.

- There was 1.3 percent increase in the aircraft movement at Entebbe Airport in 2019 compared a eight percent raise registered in 2018.
- The total number of passengers passing through Entebbe International Airport increased by 7.2 percent from 1.69 million in 2018 to 1.83 million in 2019

Communication

- The total number of mobile money registered customers increased by almost 9.1 percent from 24.5 Million customers in 2018 to 26.7 Million customers in 2019.
- The total volume of letters handled by Posta Uganda decreased by 28 percent in 2019, from 1,140,623 letters in 2018 to letters 819,574 letters.

Migration and Tourism

- The country recorded a total of 1.0 million international arrivals and 1.2 million departures in 2019.
- The number of visitors to national parks decreased from 325,345 in 2018 to 323,861 in 2019.
- The most popularly visited national park in 2019 was Murchison Falls (32 percent), followed by Queen Elizabeth (24 percent) and Bwindi Impenetrable (11.2 percent).
- 48 percent of the visitors to national parks were foreigners who are non-residents.

Chapter four presents Macro-Economic Statistics including National Accounts, Prices, External Trade, Public Finance, Banking, Currency and Insurance. Below are the highlights of the chapter:

National Accounts

- In the FY 2019/20, GDP at constant (2016/17) prices was estimated to grow by 2.9 percent. The contribution of the sectors was as indicated below.
- Agriculture, forestry and fishing (24.0 percent)
- Industry (26.2 percent)
- Services (43.0 percent)
- The GDP per capita at 2016/17 constant price declined from Ug. Shs 3,080,000 in 2018/19 to Ug. Shs 3,075,000 in 2019/20, a decline of 0.16 percent.

Consumer Price Index (CPI)

- Annual average Headline inflation for Calendar Year (CY) 2019 was 2.9 percent compared to 2.6 percent recorded in CY 2018;
- The annual average Core Inflation increased to 3.6 percent in 2019 from the 2.4 percent recorded during the 2018 CY;
- The annual average Food Crops inflation for CY 2019 decreased to minus 3.2 percent from minus 1.5 percent recorded for the CY 2018.
- Energy, Fuel and Utilities (EFU) registered a decrease in the annual average inflation to 4.2 percent from 10.7 percent recorded during the 2018 Calendar Year,

PPI-Manufacturing and Utilities

- The PPI-M&U (Combined) decreased on average by 2.3 percent to 178.05 for the 2019 calendar year from 182.17 recorded in 2018 Calendar Year (CY).

- The drop in the producer prices was mainly due to a price reduction in PPI-Manufacturing Sector by 2.6 percent driven by the Food Products (-5.2 percent), Beverages (-0.2 percent), Chemical Products (-3.3 percent) and Leather Products (-19.6).
- The PPI-M (local) remained stable in 2019 compared to 2018.
- The PPI-M (Export) for the CY 2019 decreased by 8.5 percent from an annual average of 212.70 in 2018 to 194.63.

PPI- Hotels and Restaurants

- The Annual Average Producer Prices for Hotels and Restaurants Sector rose by 1.8 percent in the CY 2019, compared to 5.7 percent increase recorded in CY 2018.

External Trade

- During Calendar Year (CY) 2019, total export earnings (Formal and Informal exports combined) increased by 12.7 percent to US\$ 4,095.7 million from US\$ 3,633.9 million recorded in 2018.
- Similarly, the total imports bill increased by 14.2 percent to US\$ 7,753.8 million in 2019 from US\$ 6,789.4 million registered in 2018.
- The overall annual trade deficit increased to US\$ 3,658.1 million in 2019 compared to the value of US\$ 3,155.5 million recorded in 2018.
- In 2019, Formal exports accounted for US\$ 3,563.8 million while informal exports were worth US\$ 531.9 million.
- The total Formal import bill in 2019 stood at US \$ 7,696.0 million while informal import bill was worth US \$ 57.8 million compared to that of US\$ 6,729.4 million and US\$ 60.0 million respectively as recorded in 2018.
- The African continent remained the main destination of Uganda's exports, followed by Europe and then the Middle East while the Asian continent was the main source of Uganda's merchandise imports

Government Finance Statistics (GFS)

- In the FY 2018/19, the net Central Government revenue (excludes tax refunds and government taxes) was Shs 17,839.3 billion compared to Shs.15, 281.1 billion collected in the FY 2017/18. This was about 16.7 percent increment in the net central government revenue. the largest contributor to the Central Government revenue was the Tax revenue accounting for 90.6 percent while non-tax revenue contributed only 9.4 percent.
- Whereas central government expenditure excluding transfers to Local Government increased by 16.6 percent from Shs. 17,980.6 billion for the FY 2017/18 to Shs. 20,968 billion for FY 2018/19. The recurrent expenditure was Shs. 9,852.8 billion accounting for 46.9 percent of the Central Government Expenditure while, development expenditure and donor expenditure were shs. 5,558.4 billion and shs. 5,556.8 billion respectively, both accounting for about 26.5 percent of the total Central Government expenditure.

Balance of Payments

- The overall BoP balance stood at a deficit of 69 million US dollars in 2018/19 following a previous surplus of 161 million US dollars recorded in 2017/18.
- The current account balance registered a deficit of 2,753 million US dollars in 2018/19 compared to a deficit of 1,822 million US dollars recorded in 2017/18 translating into about 51.1 percent deficit over the period.
- The capital account balance declined by 5.4 percent from 105 million US dollars surplus recorded in 2017/18 to 100 million US dollars recorded in 2018/19.
- The financial account shows a net borrowing position of 2,430 million US dollars in 2018/19 up from 1,124 million US dollars recorded in 2017/18.

Banking and Currency

- The Net Foreign Assets (NFA) declined by 7.2 percent from UGX 14,953 billion shillings as at June 2018 to UGX 13,870 billion shillings as at June 2019.
- The Net Domestic Assets (NDA) grew by 35.1 percent from UGX 7,795 billion shillings in June 2018 to UGX 10,535 billion in June 2019.
- Domestic claims and claims on other sectors each increased from UGX 16,836 billion to UGX 20,084 billion and UGX 14,120 billion to UGX 16,112 billion over the period under review, respectively.
- M1 increased by 6.1 percent from 9,446 billion shillings in June 2018 to 10,018 billion shillings in June 2019.
- M2 increased by 8.2 percent from 15,968 billion shillings in June 2018 to 17,279 billion shillings in June 2019
- M3 increased by 7.3 percent from 22,749 billion shillings in June 2018 to 24,405 billion shillings in June 2019.
- The total assets of commercial banks in shillings increased by 10.4 percent from 27,685 billion shillings as at June 2018 to 30,559 billion shillings as at June 2019.
- The total outstanding loans and advances in local currency to the private sector increased by 13.8 percent from 7,780 billion shillings in June 2018 to 8,853 billion shillings in June 2019.
- The Central Bank Rate (CBR), increased to 10.0 percent in June 2019 from 9.0 percent in June 2018.
- Commercial bank rate increased to 15.0 percent in June 2019 from 14.0 percent in June 2018. On annualized basis, the CBR averaged 9.7 percent in 2019 compared to an average of 9.3 percent recorded in 2018.
- The average buying rate for foreign exchange (US dollar) appreciated from 3,707 shillings in 2018 to 3,690 shillings in 2019. Likewise, the average selling rate depreciated from 3,730 shillings in 2018 to 3,709 shillings in 2019.

Insurance

- Life insurance Gross premium incomings increased by 28.7 percent in 2018 from UGX168 billion to UGX217 billion in 2017.

- The value of non-life Insurance premium incomings increased from UGX292 billion in 2017 to UGX333 billion in 2018, representing a growth of 13.8 percent.
- The Net Incurred claims on life insurance registered a 31.4 percent increase in 2018 compared to the 26.2 percent increase registered in 2017.
- The Net incurred claims on non-life insurance decreased by 5.8 percent in 2018 from an earlier growth of 7.1 percent in 2017.

Glossary

A nursery school	A place where children are prepared for entry into primary school education.
Accident fatality risk	The accident fatality risk, defined as the number of accidental deaths per 100,000 populations.
Accident Severity	Determined by or classified according to the most severe casualty involved in an accident. Severity is also used to rank accidents
Adult	A person aged 18 years and above, as per the Constitution of Uganda.
Agriculture	The growing of crops and rearing of animals for food, other human needs or economic gain.
An orphan	A child below 18 years of age who has lost either one or both parents.
Assault/Attack	This is the threatening/attacking someone in a way that frightens him/her. In most of the cases violence is involved i.e. inflicting severe or aggravated bodily injury.
Asset	Anything valuable that an entity owns, benefits from or has use of, in generating income.
Aviation fuel	More purified kerosene fuel used in aviation gas-turbine engines.
Base period	The reference period, to which a series of index numbers relate, It is usually expressed as 100.
BCG (Bacillus Camete Guerin)	A vaccine against Tuberculosis.
Bio-mass energy	Energy that is obtained from fuel wood, charcoal and crop residues.
Broad money - (M2)A	Equivalent to (M2) plus certificates of deposit.
Broad money - (M3)	Equivalent to (M2) A plus foreign currency deposits.
Broad money - (M2)	Consists of the currency in circulation, as well as the demand, time and savings deposits. The deposits are those held by the private sector.
Careless Driving	A person whose conduct is inconsiderate in disregard for the right of others and that endangers or is likely to endanger person or property.
Casualty (Victim)	Person who sustains a slight, serious or fatal injury.
Child	A juvenile. A person aged below 18 years.
Child labour	Work that is mentally, physically, socially and/or morally dangerous and harmful to children. Hazardous work which by its nature or the circumstances under which it is performed, jeopardises the health, safety and morals of a child. Also includes work or activities that interfere with children's school attendance.

Child Labour measurement framework	National and International standards are used to define child labour. Based on these standards, children become child Labourers if they are aged 5-11 years and engaged in economic activities for at least one hour a week, or, aged 12-13 years and engaged in economic activities for at least 14 hours per week, or, aged 14-17 years and involved in economic activities for at least 43 hours a week, or 14-17 years and engaged in work regarded as hazardous. According to this definition, household chores are not among activities grouped in child labour.
Child work	A child is regarded to be involved in child work, if she/he is aged 5-17 years and was involved in economic activities for at least one hour during the reference week, by extension, therefore, such a child will be regarded as a child worker.
Civil Servants	Employees of line ministries, teaching service, police, prison, public universities and local governments.
Cohabiting	A state where a man and woman are not officially married but are living together in a sexual union.
Completion rate	The total number of new entrants in the last grade of any education level, regardless of age, expressed as a percentage of the population at the entrance age to the last grade of that education level.
Crime	An unlawful act or omission punishable by law.
Crime Rate	The incidence of crime per 100,000 people.
Damage property	of The abstract measure of property not being intact, and may refer to any household item which suffered after a crime incidence.
Day Care	A place that looks after children between 0 - 2 years and their parents pick them in the evening.
Defrauding	This is the act of depriving an individual, organisation, or even a household of their money, or property through deceitful trickery or cheating methods. It is also a deliberate deception to secure unfair or unlawful gain.
Diesel fuel	Fuel used for internal combustion in diesel engines and as a burner material in heating installations such as furnaces. Another name for this product is automotive gasoil.
Divorced	A condition where legally married couples legally separate for life and each stays away from the other thereafter. However, either of the two (man or woman) can re-marry.
DMBs	Deposit Money Banks. Commercial banks in Uganda's institutional settings.
DPT	A vaccine against Diphtheria, Pertussis (whooping cough) and Tetanus.
Driver	In relation to a motor vehicle, means a person who drives, or attempts to drive, or is in charge of a motor vehicle (including a cycle) or an instructor of a learner driver. In relation to animals, means a person who guides cattle, in singular or in herds, or flocks, pack saddle animals on a road. But in relation to a towed vehicle, a person who drives the towing vehicle.

Earnings for persons in paid employment	For paid employment jobs, earnings include: direct wages and salaries, bonuses and gratuities, commissions and tips, directors' fees, profit-sharing bonuses and other forms of profit-related pay, remuneration for time not worked as well as free or subsidised goods and services from an employer.
Economic activity	Covers all market production and certain types of non-market production, including production and processing of primary products for own consumption, own-account construction (owner occupied dwellings) and other production of fixed assets for own use.
Employed Persons	Persons who work for wage or salary in cash or in kind or both and have a formal job attachment.
Employment	Restricted to only the working age population who were engaged in any activity to produce goods or provide services for pay or profit. "For pay or profit" refers to work done as part of a transaction in exchange for remuneration payable in the form of wages or salaries for time worked or work done, or in the form of profits derived from the goods and services produced through market transactions.
Employment status	Refers to the status of an economically active person with respect to his/her position at his/her place of work and his/her mode of remuneration.
Engineering plant	Movable plant or equipment being a self-propelled vehicle or trailer designed or constructed for the special purposes of engineering operations which, where proceeding on a road, does not carry any load greater than such as is necessary for its propulsion or equipment.
Enterprise	A single legal entity or a combination of legal entities. It may also be a sole legal unit carrying out one or more activities at one or more locations. It may alternatively be several establishments.
Establishment	An economic unit engaged in one or predominantly one kind of economic activity under single ownership or control and is situated at a single physical location.
Exports	Outward flows comprising goods leaving the economic territory of a country to the rest of the world.
Fatal Accident	An accident in which death occurs at the scene of the accident or within one year of the accident as a result of injuries sustained in the accident.
Foreign Reserves	Consist of those external assets available to and controlled by central banks for direct financing of balance of payments imbalances, for indirectly regulating the magnitude of such imbalances through intervention in exchange markets to affect the currency exchange rate, and/or for other purposes. Included are monetary gold, Special Drawing Rights (SDRs), reserve position in the fund, foreign exchange assets (consisting of currency, deposits and securities) and other claims.
General Hospitals	Health facilities that provide preventive, outpatient curative, maternity, inpatient health services, emergency surgery, blood transfusion, laboratory and other general services. They also provide in-service training, consultation and research in support of community-based health care programmes.

Gross Domestic Product	The value of goods and services produced within the economic territory of the country.
Gross Enrolment Rate	The ratio of pupils in primary school (regardless of age) to the country total population aged 6-12 years.
Gross Enrolment Ratio	Total enrolment in a specific level of education (Pre-primary, Primary, Secondary and Tertiary), regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school-year.
Gross Intake Rate	The ratio of the pupils enrolled in primary one regardless of age to the country total population aged six years.
Gross Intake Ratio	The total number of new entrants in the last grade of a given level of education, regardless of age, expressed as percentage of the total population of the theoretical entrance age to the last grade of that education level.
Gross Output	The production value as compiled from total receipts from industrial and non-industrial goods and services in an economy, adjusted for stock changes but excluding Excise Duty and Indirect Taxes. This is Gross Output at factor cost.
Growth Rate	The number of people added to (or subtracted from) a population in a year due to natural increase and net migration expressed as a percentage of the population at the beginning of the time period.
Hazardous work	Refers to a situation where a person is engaged in work for more than 43 hours a week or works under conditions that entail them to work at night.
Health Centre II	Out-patient clinic treating common diseases and offering antenatal care. It is supposed to be led by an enrolled nurse, working with a midwife, two nursing assistants and a health assistant. According to the Ugandan government's health policy, every parish is supposed to have a Health Centre II.
Health Centre III	Health centre with facilities which include an operation room and a section for minor surgery. It is headed by a clinical officer, offers the continuous basic preventive and curative care and provides support supervision of the community and the Health Centre II facilities under its jurisdiction. According to the Ugandan government's health policy, every sub-county is supposed to have a Health Centre III.
Health Centre IV	A mini-hospital that provides the kind of services found at Health Centre III, but in addition has separate wards for men, women, and children in which to admit patients. It should have a senior medical officer and another doctor as well as a theatre for carrying out emergency operations. According to the Ugandan government's health policy, every county or parliamentary constituency is supposed to have a Health Centre IV.
Heavy Fuel Oil	Residual fuel obtained after refinery of petroleum products. It is used in ships and industrial large-scale heating installations as a fuel in furnaces or boilers.

Home based child care	An arrangement where a mother in the community looks after children at a cost in her premises and trains them basic skills necessary for proper upbringing.
Imports	Inward flows of goods from the rest of the world into the economic territory of a country.
Incarciration Rate/Imprisonment Rate	The number of inmates confined in prison or jail per 100,000 persons of the population.
Incidence of Crime	The total number of crimes reported per population of interest over a given period of time in a defined area (territory/country).
Index Number	A number that shows relative change in price or volume between the base period and another period.
Industry	This is an economic activity undertaken by a business establishment as specified in the International System of Industrial Classification (ISIC).
Infant Mortality Rate	The number of deaths of infants under one year of age per 1,000 live births in a given period.
Inflation	The persistent increase in the general level of prices of goods and services in an economy over a period of time
Informal employment rate (IER)	Persons in informal employment comprise of: <ul style="list-style-type: none"> • Employees whose employers' do not pay contributions to their social security or, if they do, do not benefit from annual leave or payment in lieu of leave not taken, or paid sick leave in case of illness or injury or income tax deduction. • Employers and own account workers employed in their own businesses or places of work that are not registered for income tax and/or Value Added Tax (VAT). • Members of producers' cooperatives employed in their cooperatives that are not registered. • Own account workers engaged in the production of goods exclusively for own final use by their household (such as subsistence farming or do it yourself construction of own dwellings), if considered employed according to the 13th International Classification of Labour Services (ICLS) Edition definition of employment. • Contributing family workers, irrespective of whether they work in formal or informal sector enterprises.
Intermediate Consumption	The value of goods and services that are used in the process of production of other goods and services rather than final consumption
Juvenile	A person below 18 years of age (Children Statute 1997).
Kerosene	This is fuel used as an illuminant for lighting and in some cases for cooking.

Labour force	The labour force consists of all persons of working age who were either employed or unemployed.
Labour Force Participation Rate	
Labour underutilisation	Labour underutilisation is a broad concept that encompasses unemployment and other forms of mal-employment, namely, insufficiency of the volume of work (labour slack), low remuneration (low earnings) and incompatibility of education and occupation (skill mismatch). For the present purpose, labour underutilization is defined to be the aggregate of labour slack (unemployed, time related under employment as well as those marginally attached to the labour force), low earnings and skill mismatch.
Large Business	Business establishment employing 100 or more persons.
Life Expectancy	The average number of years a person could expect to live if current mortality trends were to continue for the rest of that person's life. Most commonly cited as life expectancy at birth.
Liquid Petroleum Gas	Liquid Petroleum Gases (LPG's) are hydrocarbons, which are gaseous under conditions of normal temperature and pressure but are liquefied by compression or cooling to facilitate storage, handling and transportation.
Literacy rate	The percentage of population aged 10 years and above that can read with understanding and write a simple sentence meaningfully in any language.
Loan	Money or securities supplied by one party (the lender) to a second party (the borrower) in a transaction in return for a promised future payment by the borrower. Such transactions normally include the payment of interest due to the lender as per agreed repayment schedules between the two parties.
Low pay rate	Low pay rate (LPR) or inadequate earnings rate refers to the proportion of the employed persons with hourly/monthly earnings less than 2/3 of median hourly/median earnings of full-time workers (persons working 40-48 hours a week); cf. Resolution on employment-related income by the 16 th ICLS (1998).
Marginally attached to the labour force	Discouraged workers and other inactive persons with labour force attachment.
Micro Hydro Power Stations	Hydro Power Stations generating electricity in the range of 5 KW – 100 KW
Mini Hydro Power Stations	Hydro Power Stations generating electricity in the range of 101 KW – 1 MW
Minor Accident	Accident where no persons are injured.
Minor Injury	Injury of a minor character such as a sprain, bruise or cut not judged to be severe or slight shock requiring roadside attention.

Motor vehicle	Any self-propelled automobile intended or adapted for use on the road.
National Referral Hospitals	In addition to the services offered at the regional referral hospital, they provide comprehensive specialist services and are involved in teaching and health research.
Net Enrolment Rate	The ratio of pupils in primary school aged 6 – 12 to the country total population aged 6 -12 years.
Net Enrolment Ratio	The Enrolment of the official age-group for a given level of education (Pre-primary, Primary and Secondary) expressed as a percentage of the corresponding population.
Net Intake Rate	The ratio of the pupils aged six in primary one to the country total population aged 6 years.
Net Intake Ratio	The number of new entrants of official age expressed as a proportion of the official school entry age (<i>3 years for pre- primary, 6 years for primary, 13 years for secondary and 19 years for tertiary</i>).
Non-traditional exports	Refers to commodities other than traditional exports (Coffee, Cotton, Tea, and Tobacco) that have recently featured in Uganda’s export trade.
Numeracy rate	The Percentage of pupils who can use numbers, complete sequences, make additions, subtraction, simple multiplication, simple division, simple weights and measures, money counting, telling time, interpret a pictograph and draw a pictogram.
Occupation	Refers to the nature of task and duties performed during the reference period preceding the interview by persons in paid employment, unpaid family work or self-employment jobs.
Orphan	A child whose biological parent or both parents are dead. Single orphans are children who have lost one biological parent, while double orphans are those who have lost both biological parents.
Other crimes in general	Include threatening violence, human trafficking, abduction, kidnap, arson (general), malicious damage to property, escapes from lawful custody, rescues from lawful custody, examination leakage and stealing, piracy, criminal trespass, domestic violence, attempted suicide, attempted murder (by shooting), attempted murder (other than shooting), other penal code offences (not categorised)
Overdraft	A type of a short-term loan particularly used to supply short-term credit to tide over the production cycle or finance for seasonal requirements.
Pass Rate	The percentage of pupils/students that passed exams at a given level of education.
Passengers	Travellers in a car, bus, train, plane or ship who are not driving or part of the crew. These also include those embarked and disembarked.
Pedestrian	Any person travelling on foot.
Permissible light work	Light work refers to non-hazardous activities done by children in their homes under observation and supervision by their families in an environment free of exploitation.

Persons in employment	Refers to all persons of working age who, during a short reference period, were engaged in any activity to produce goods or provide services for pay or profit. For “pay or profit” refers to work done as part of a transaction in exchange for remuneration payable in the form of wages or salaries for the time worked or work done. The payment may also be in the form of profits derived from the goods and services produced through market transactions.
Petrol	This is a light hydrocarbon fuel used in positive ignition engines. Another name used for this type of fuel is premium motor spirit.
Population pyramid	A population pyramid is a pictorial representation of the age distribution of a given population. Its shape is determined by the past birth and death rates in that population.
Poverty Gap (P1)	The sum over all individuals of the shortfall of their real private consumption per adult equivalent from the poverty line, divided by the poverty line. It is the measure of the depth of poverty, however, with limitations since it is insensitive to how consumption is distributed among the poor mainly below the poverty line. P1 is the per capita cost of eradicating poverty, as a percentage of the poverty line, if money could be targeted perfectly.
Poverty Headcount (P0)	The P0 indicator is “headcount”: the percentage of individuals estimated to be living in households with real private consumption per adult equivalent below the poverty line
Prison	Place where people are legally kept as a punishment for crimes they have committed or while awaiting trial.
Prison capacity	This is the number of inmates a prison can safely accommodate which is 01 prisoner per every 3.6m ² of accommodation space.
Prison occupancy rate	Is the number of inmates accommodated per available accommodation space of one prisoner expressed as a percentage.
Prisoner	A person kept in prison as a punishment for a crime or while waiting for trial.
Producer Price	The amount receivable by the producer from the purchaser for a unit of a good or service produced as output minus any VAT, or similar deductible tax, invoiced to the purchaser. It excludes any transport charges invoiced separately by the producer.
Proportional morbidity ratio	The proportion attributable to a given cause of illness. It is a proxy for the prevalence of sickness in a population.
Pupil-Classroom Ratio (PCR)	The average number of pupils (students) per classroom at a specific level of education in a given school year.
Pupil-Stance Ratio (PSR)	The average number of pupils (students) per latrine stance at a specific level of education in a given school year.
Pupil-Teacher Ratio (PTR)	The average number of pupils (students) per teacher at a specific level of education in a given school year.
Reckless/Dangerous Driving	A mental state in which the driver displays a wanton disregard for the rules of the road; the driver misjudges common driving procedures, often causing accidents and other damages.

Regional Referral Hospitals	In addition to the services offered at the general hospital, these hospitals offer specialist services such as psychiatry, ear, nose and throat, radiology, pathology, ophthalmology as well as higher level surgical and medical services, including teaching and research.
Relative Humidity	A measure (expressed as a percentage value) of the amount of water vapour/moisture in the air (at a specific temperature) compared to the maximum amount of water vapour air could hold at that temperature. Warm air can hold more moisture than cold air. Relative humidity of 100 percent, therefore, indicates that the air is holding all the water it can at the current temperature and any additional moisture at that point will result in condensation and precipitation.
Residents	Persons whose usual residence is in Uganda, including those whose nationality is not Ugandan.
Retained Reserves	The increase in value of a currency or the increase in value of fixed assets consisting mainly of freehold land and buildings.
Revaluation reserves	Reserves arising due to the revaluation of fixed assets but cannot be paid out as dividends because they are not realised profits. They merely restate the value of an asset.
Separated	A situation where married couples separate from each other without legalising the separation, and hence can re-unite after some time. However they are still regarded as married from the legal point of view.
Serious Accident	Accident in which a person is admitted in the hospital as an “in-patient” or any of the following injuries whether or not one is admitted in the hospital, or sustains: fractures, concussion, internal injuries, crashing, severe cuts and lacerations.
Serious Injury	Injury for which a person is admitted in hospital as an ‘in-patient’, or any of the following injuries whether or not the person is admitted in hospital: fractures, concussion, internal injuries, crashing, burns, severe cuts and lacerations or severe general shock requiring medical treatment.
Single	A man or woman who has never been married or never been in a consensual union.
Skill mismatch or skill inadequate employment	Skill mismatch measures the incompatibility between education and occupation. Workers whose educational attainment is above the skill requirement of their jobs are in some sense underutilised. The return on investment in their education and training is below optimum and somewhat wasted.
Solid waste	Any semi-solid or solid matter created by human or animal activities, and which are disposed because they are hazardous or useless.
Squared Poverty Gap (P2)	The sum over all individuals of the square of the shortfall of their real private consumption per adult equivalent and the poverty line divided by the poverty line. The reason to square the shortfall is to give greater weight to those who are living far below the line. The indicator caters for a policy which also makes transfers from someone just below the poverty line to the poorest person which P1 does not reflect.

Teaching Service Teachers of primary and secondary schools, technical or commercial institutes as well as other tertiary institutions, colleges and establishments.

The Employment-to-population ratio (EPR) The number of employed persons in the working age population given as a percentage of the total number of persons in the working age population. It is one of the measures of the extent of job creation in the economy. The indicator is calculated as:

$$\text{EPR (\%)} = \frac{\text{(Number of employed persons in working age population)}}{\text{Total number of persons in the working age population}} (\times 100)$$

The labour force participation rate (LFPR) The labour force participation rate measures the proportion of the working age population that is economically active .i.e. working and unemployed. LFPR is the number of persons in the labour force given as a percentage of the working age population. The indicator is calculated as:

$$\text{(LFPR (\%))} = \frac{\text{(Number of persons who are employed + Number of persons who are unemployed)}}{\text{Total number of persons in the working age population}} (\times 100)$$

The Performance index A measure of the quality of passing at all levels of education.

The unemployment rate (UR) Unemployment rate (UR) is the percentage of the labour force that is unemployed. It is calculated as follows:

$$\text{UR(\%)} = \frac{\text{Number of unemployed persons in the working age population}}{\text{Total number of persons in the labour force}} (\times 100)$$

Theft The illegal taking of another person's property without that person's freely-given consent.

Time-related underemployment (TRE) The *time-related underemployed* includes all employed persons whose hours of work “are insufficient in relation to an alternative employment situation in which the person is willing and available to engage.” Hence, the criteria of time-related underemployment at the national level can be summarised as: (i) willingness to work additional hours; (ii) availability to work additional hours and, (iii) having worked below a threshold of working hours (less than 40 hours a week).

Total Fertility Rate (TFR) The average number of children that would be born alive to a woman (or group of women) during her lifetime if she were to pass through her childbearing years conforming to the age-specific fertility rates of a given period.

Trade Balance The difference in value between the country's visible imports and exports.

Traditional Exports Long-term export cash crops introduced to Uganda long time ago (Coffee, Cotton, Tea and Tobacco).

Traffic Accident Crashes between vehicles; between vehicles and pedestrians; between vehicles and animals; or between vehicles and fixed obstacles.

Transition rate	The number of pupils (or students) admitted to the first grade of a higher level of education in a given year, expressed as a percentage of the number of pupils (or students) enrolled in the final grade of the lower level of education in the previous year.
Treasury Bill	Short-term bearer securities with maturities of 91 days, 182 days, 273 days or 364 days issued by Bank of Uganda.
Under- utilisation	An aggregate of persons who were unemployed, in time related under-employment and potential labour force.
Unemployment	Persons of working age are classified as unemployed if, during a short reference period such as a day or a week, they (a) were without work, i.e. did not work for even one hour in any economic activity (paid employment, self-employment, or unpaid work for a family business or farm); (b) were available for work; and (c) had taken active steps to seek work during the past four weeks.
Value Added	The value of outcome when factors of production interact to produce and avail goods and services. Value added is the difference between the value of gross output and the value of intermediate inputs.
Value Added Tax (VAT)	A form of consumption tax. From the perspective of the buyer, it is a tax on the purchase price. From the seller's perspective, it is a tax only on the value added to a product, material or service.
Victim	A person who is offended as a result of a criminal act.
Wage Bill	All cash payments made by employers in return for labour provided by the employees. The payments include salaries and wages, overtime, holiday pay, bonuses, commissions, sick leave and any other allowances paid in cash to the employees.
Widowed	A situation where one partner in a marriage is dead. It applies to both monogamous and polygamous marriages. In case of polygamous marriages where the man is dead, the women are referred to as widows. However, where a man loses one of his many wives, he cannot be referred to as a widower.
Work	Comprises of own-use production work, employment work, unpaid trainee work, volunteer work and other forms of work. Work excludes activities that do not involve producing goods or services (e.g. begging and stealing), self-care (e.g. personal grooming and hygiene) and activities that cannot be performed by another person on one's own behalf (e.g. sleeping, learning and activities for own recreation).
Working age	While no international standard on age limits exists, for purposes of statistical measurement, the working age population is commonly defined as persons aged 15 years and older, but this may vary from country to country.

Working persons Persons of working age are classified as working or employed if, during a short reference period such as a day or a week, (i) they did some work (even for just one hour) for pay, profit or family gain, in cash or in kind; or (ii) they were attached to a job or had an enterprise from which they were ‘temporarily’ absent during this period (for such reasons as illness, maternity, parental leave, holiday, training, industrial dispute).

Working poor Individuals forming part of the working population but whose incomes fell below the official poverty line.

Working poverty rate (WPR) WPR is the proportion of the employed population living in households that are classified as poor, i.e. their consumption or income levels are below a determined national poverty line. The direct measurement of the indicator can be expressed as:

$$WPR = \frac{\text{Number of employed persons in poor households (Number of working poor)}}{\text{Total number of employed persons}} (\times 100)$$

Worst Forms of Child Labour According to ILO convention No.182 (1999), the worst forms of child labour include:

- (i) Child slavery or practice similar to slavery, such as sale and trafficking of children, debt bondage and serfdom, use of children in armed conflict;
- (ii) Use, procurement and offering of a child for prostitution and pornography;
- (iii) Use of children in illicit activities such as drug trafficking;
- (iv) Work that is likely to harm the health, safety and morals of children

Youth For statistical purposes, the United Nations defines *youth*, as those persons between the ages of 15 and 24 years, without prejudice to other definitions by Member States. In practice, however, many national statistics offices apply their own definitions of youth which often differ from the international standard. In Uganda, a youth is a person aged 18-30 years.

National Standard Indicator Framework

UN Indicators /Priority National Indicators[i]	Unit of measure	Periodicity	2014/15	2015/16	2016/17	2017/18	2018/19	2019/20
Graduation Criterion 1: Income								
1.1. Gross National Income (GNI) per capita								
1.1.1: GDP Per Capita (US\$), Current Prices	US\$	Annual	919	807	833	864	884	910
1.1.2: GDP Growth Rate (%)	Percent	Annual	5.2	4.8	3.8	6.2	6.8	2.9

Sustainable Development Goals Indicators

Indicator Number	Indicator	National Data	Year	Source
SDG One “End Poverty in all its forms everywhere”				
1.2.1	Proportion of population living below the national poverty line by sex and age	21.4	2017	UNHS, UBOS
1.2.2	Proportion of total adult population with secure tenure rights to land, with legally recognized documentation and who perceive their rights to land as secure by sex and by type of tenure	36	2017	Lands Information System, MULHUD
SDG Two “End Hunger, Achieve Food Security and improved Nutrition and Promote Sustainable Agriculture”				
2.2.1	Prevalence of stunting (height for age <-2 standard deviation from the median of the World Health Organization (WHO) Child Growth Standards) among children under 5 years of age	28.8	2016	UDHS, UBOS
2.2.2	Prevalence of malnutrition (weight for height >+2 or <-2 standard deviation from the median of the WHO Child Growth Standards) among children under 5 years of age, by type (wasting and overweight)	7.3	2016	UDHS, UBOS
2.a1	The agriculture orientation index for government expenditures	0.16	2019	GFS, UBOS
SDG Three “Ensure Healthy Lives and Promote wellbeing for all at all ages”				
3.1.1	Maternal deaths per 100,000 live births	336	2016	UDHS, UBOS
3.1.2	Proportion of births attended by skilled health personnel	74.2	2016	UDHS, UBOS
3.2.1	Under-five mortality rate (deaths per 1,000 live births)	64	2016	UDHS,
3.2.2	Neonatal mortality rate (deaths per 1,000 live births)	27	2016	UDHS,
3.3.2	Tuberculosis incidence per 100,000 population	308	2019	TB Survey
3.3.3	Malaria incidence per 1,000 population	340	2019	HMIS, MOH
3.3.4	Hepatitis B incidence per 100,000 population	0.8	2019	HMIS, MOH
3.4.1	Mortality rate attributed to cardiovascular disease, cancer, diabetes or chronic respiratory disease	45	2019	HMIS, MOH
3.4.2	Suicide mortality rate	85	2019	UPF, MOH
3.9.2	Mortality rate attributed to unsafe water, unsafe sanitation and lack of hygiene (exposure to unsafe Water, Sanitation and Hygiene for All (WASH) services)	16	2019	HMIS, MOH
3.9.3	Mortality rate attributed to unintentional poisoning	7	2019	HMIS, MOH
3.6.1	Death rate due to road traffic injuries	53	2016	UDHS, UPF
3.7.1	Proportion of women of reproductive age (aged 15-49 years) who have their need for family planning satisfied with modern methods	53.9	2016	UDHS, UBOS
3.a.1	Age-standardized prevalence of current tobacco use among persons aged 15 years and older	5.1	2016	UDHS, UBOS
3.b.1	Proportion of the population with access to affordable medicines and vaccines on a sustainable basis	35.8	2016	UDHS, UBOS
SDG Four “Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all”				
4.2.1	Proportion of children under 5 years of age who are developmentally on track in health, learning and psychosocial well-being, by sex	63.3	2016	UDHS, UBOS
SDG Five “Achieve gender equality and empower all women and girls”				
5.2.1	Proportion of ever-partnered women and girls aged 15 years and older subjected to physical, sexual or psychological violence by a current or former intimate partner in the previous 12 months, by form of violence and by age	39.6	2016	UDHS, UBOS

Sustainable Development Goals Indicators

Indicator Number	Indicator	National Data	Year	Source
5.3.1	Proportion of women aged 20-24 years who were married or in a union before age 15	7.3	2016	UDHS, UBOS
	Proportion of women aged 20-24 years who were married or in a union before age 18	34	2016	UDHS, UBOS
5.3.2	Proportion of girls and women aged 15-49 years who have undergone female genital mutilation/cutting, by age	0.3	2016	UDHS, UBOS
5.6.1	Proportion of women aged 15-49 years who make their own informed decisions regarding sexual relations, contraceptive use and reproductive health care	58.5	2016	UDHS, UBOS
5.b.1	Proportion of individuals who own a mobile telephone, by sex	55.7	2016	UDHS, UBOS
SDG Six "Ensure availability and sustainable management of water and sanitation for all"				
6.1.1	Proportion of population using safely managed drinking water services	77.9	2016	UDHS, UBOS
6.2.1	Proportion of population using safely managed sanitation services, including a hand-washing facility with soap and water	20.8	2016	UDHS, UBOS
6.3.1	Proportion of domestic and industrial wastewater flows safely treated	79	2019	MWE
6.b.1	Proportion of local administrative units with established and operational policies and procedures for participation of local communities in water and sanitation management	89	2019	MWE
SDG Seven "Ensure access to affordable, reliable, sustainable and modern energy for all"				
7.1.1	Proportion of population with access to electricity	26.7	2016	UDHS, UBOS
7.1.2	Proportion of population with primary reliance on clean fuels and technology	0.6	2016	UDHS, UBOS
7.3.1	Energy intensity measured in terms of primary energy and GDP	0.237	2017	National Energy Balance, MEMD
SDG Eight "Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all"				
8.1.1	Annual growth rate of real GDP per capita	29.4	2019/20	National Accounts Statistics, UBOS
8.3.1	Proportion of informal employment in non-agriculture employment, by sex+	84.9	2016/17	NLFS, UBOS
8.5.2	Unemployment rate, by sex, age and persons with disabilities	9.7	2016/17	NLFS, UBOS
8.6.1	Proportion of youth (aged 15-24 years) not in education, employment or training Note: The current figure covers youth aged 18-30 years	40.7	2016/17	NLFS, UBOS
8.7.1	Proportion and number of children aged 5-17 years engaged in child labour, by sex and age	15.1	2016/17	NLFS, UBOS
8.10.1	Number of (a) commercial bank branches per 100,000 adults and	a) 3.1		NLFS, UBOS
	(b) number of automated teller machines (ATMs) per 100,000 adults	b) 4.7		
8.10.2	Proportion of adults (15 years and older) with an account at a bank or other financial institution or with a mobile-money-service provide	17.4	2016	UDHS, UBOS
SDG Nine "Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation"				
9.1.2	Passenger and freight volumes, by mode of transport		2018	Civil Aviation Authority
	Number of Passenger by Air	1,697,012		
	Freight Volumes by Air	63,353		

Sustainable Development Goals Indicators

Indicator Number	Indicator	National Data	Year	Source
9.2.1	Manufacturing value added as a proportion of GDP	15.9	2019/20	National Accounts Statistics, UBOS
9.2.2	Manufacturing employment as a proportion of total employment	9.4	2016/17	NLFS, UBOS
9.a.1	Total official international support (official development assistance plus other official flows) to infrastructure	1,438,887,624.4 USD	2019	MoFPED
SDG Fifteen “Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt / reverse land degradation and halt biodiversity”				
15.1.1	Forest area as a proportion of total land area	9.5	2017	National Forest Authority
15.7.1	Proportion of traded wildlife that was poached or illicitly trafficked	0.33	2019	UWA
SDG Sixteen “Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels”				
16.1.4	Proportion of population that feel safe walking alone around the area they live	61	2017	NGPSS, UBOS
16.2.1	Proportion of children aged 1-17 years who experienced any physical punishment and/or psychological aggression by caregivers in the past month	84.9	2016	UDHS, UBOS
16.3.1	Proportion of victims of violence in the previous 12 months who reported their victimization to competent authorities or other officially recognized conflict resolution mechanisms	48	2017	NGPSS, UBOS
16.3.2	Un-sentenced detainees as a proportion of overall prison population	48.1	2019	UPS
16.5.1	Proportion of persons who had at least one contact with a public official and who paid a bribe to a public official, or were asked for a bribe by those public officials, during the previous 12 months	16	2017	NGPSS, UBOS
16.6.2	Proportion of the population satisfied with their last experience of public services	66	2017	NGPSS, UBOS
16.7.2	Proportion of population who believe decision-making is inclusive and responsive, by sex, age, disability and population group	29	2017	NGPSS, UBOS
16.9.1	Proportion of children under 5 years of age whose births have been registered with a civil authority, by age	32.2	2016	UDHS, UBOS
16.b.1	Proportion of population reporting having personally felt discriminated against or harassed in the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law	35	2017	NGPSS, UBOS
SDG Seventeen “Strengthen the means of implementation and revitalize the global partnership for sustainable development”				
17.8.1	Proportion of individuals using the Internet	15.6	2016	UDHS, UBOS, CAA

CHAPTER ONE:

Administrative Units

Uganda is stratified into administrative units namely; Districts, Counties, Constituencies, Sub-Counties, Parishes and Villages to facilitate service delivery near to the people. In total, there are 135 districts as at 1st January 2019, including Kampala Capital City. Below is a table indicating the number of administrative units at lower levels by region.

1.0

Table 1.1: Number of Administrative Units per Region

Region	Level	2002	2014	2016	2017	2018	2019

1.0 Environment Statistics

Environment Statistics are vital in describing the state, quality and quantity of the aspects of the environment and natural resources as well as their trends overtime. This section presents statistics on land, forestry, climate, water supply and Waste.

1.1 Land Cover

Uganda has an area of 241,555 square kilometres (sq.km), of which 45,318 sq. km are open water and wetlands while 196,237 sq. km is land. The altitude above sea level ranges from 620 metres (Albert Nile) to 5,111 metres (Mt. Rwenzori peak). For trans-boundary water bodies, Uganda shares Lake Victoria with Kenya and Tanzania and Lakes Albert and Edward with the Democratic Republic of Congo (DRC). Within its boundaries are lakes Wamala, Bunyonyi, Katwe, Nakivale, Mbuoro, Kyoga, George and Bisina.

In Western Uganda, the Rwenzori Mountains (often called the Mountains of the Moon) form about eighty kilometers of the border between Uganda and the Democratic Republic of Congo (DRC). In Eastern Uganda, the boarder with Kenya is marked by volcanic Mt. Elgon (4,324m) Above Sea Level (ASL). In the north-east, there is Mt Moroto (3,085M ASL). Further south-west, there is the Mufumbiro volcanoes (4,132m) ASL that mark the border with Rwanda and Congo.

Land area estimates for 2017 by type of cover as updated using the Remote Sensing Survey carried out by National Forestry Authority (NFA) indicated that agricultural land occupies the largest proportion of land cover area (44.2 percent), followed by grassland (21.2 percent) and then water (15.5 percent) as shown in Figure 1.1 and Table 1.1;

Figure 1.1: Percentage Share of Land Cover type, for Uganda 2017

Areas under grasslands and water bodies almost remained the same between 2010 and 2017. Area under forest has significantly been decreasing since 1990. It decreased by 11.2 percent between 2010 and 2015 but gained by close to four percentage points between 2015 and 2017. This gain is attributed to the various restoration efforts by government and the civil society organisations. Land area for agriculture increased by 12.4 percent between 1990 and 2000, and by 8.6 percent between 2005 and 2010. It then increased by 6.1 percent between 2010 and 2015. It slightly increased by less than two percent between 2015 and 2017 and this is attributed to strict measures instituted by the forestry authorities on forest land encroachment. Notably, built-up area increased by more than 40 percent between 2010 and 2015 but increased by hardly two percent between 2015 and 2017. The changes are illustrated in Figure 1.2 and the data is presented in Statistical Appendix Table 1.1.1

Figure 1.2: Land Cover area by type, 1990-2017 (Ha)

1.2 Forests

The Food and Agricultural Organisation (FAO) defines a Forest as Land spanning more than 0.5 hectares with trees higher than 5 meters and a canopy cover of more than 10 percent, or trees able to reach these thresholds in situ. Forests are very vital for their services like rainfall formation, carbon sequestering and products like round wood, firewood, timber among others. Statistics on various aspects of Forests provide information on trends on the utilization; products extracted and management; area under Forests in Uganda.

1.2.1 Forests Cover

In 2015, Uganda had a total of 1.9 million hectares of forest land compared to 4.9 million hectares in 1990. This is a reduction of 60 percent over a period of 25 years. In 1990, forests covered 20.4 percent of the land area of the country compared to less than 10 percent in 2015. Table 1.2.1 gives the forest cover areas and changes between 1990 and 2015.

Table 1.2.1: Forest Cover & Forest change over 25 years

Year/ Land cover/use	Broad leaved Plantations	Conifer Plantations	THF well stocked	THF low stocked	Wood land	Total Forest Cover
2015 (hectares)	44,298	63,568	529,186	102,000	1,214,478	1,953,530
2010 (hectares)	19,436	38,472	659,228	127,623	1,775,041	2,619,679
2005 (hectares)	14,841	18,767	542,787	201,644	2,816,423	3,594,462
1990 (hectares)	18,682	16,384	651,110	273,062	3,974,508	4,933,746
Change (2010- 2015)	24,862	25,096	-130,042	-25,623	-560,563	-666,149
Percentage Change in Area (2010-2015)	127.9	65.2	-19.7	-20.1	-31.6	-25.4
Change (1990- 2015)	25,616	47,184	-121,924	-171,062	-2,760,030	-2,980,216
Percentage Change in Area over 25 years (%)	137.1	288.0	-18.7	-62.6	-69.4	-60.4

1.2.2 Local and Central Forest Reserves

In Uganda, the Local Forest Reserves (LFRs) are forests that are managed by the Local Government whereas Central Forest Reserves (CFRs) are those managed by National Forestry Authority (NFA).

The proportion of land under Central Forest Reserves (CFRs) was by far higher than those under the Local Forest Reserves (LFRs) in all the regions as established through the National Bio-mass Study of 2015. Regionwise, the Western Region had the largest proportion of land under CFRs (49.9%) representing almost half of the total CFRs land while Eastern Region had the lowest proportion (less than 3%), as shown in Table 1.2.2

Table 1.2.2: Share of total area under forest reserves by region, 2015

Region	Central Forest Reserve		Local Forest Reserve		Total Forest reserve Area
	Hectares	Percentage	Hectares	Percentage	
Central	123,411	23.3	312	31.1	123,723
Eastern	12,689	2.4	235	23.5	12,924
Northern	128,852	24.4	382	38.1	129,234
Western	263,639	49.9	75	7.5	263,714
Uganda	528,593		1,002		529,595

1.2.3. Production of Round Wood

Round Wood is wood in its natural state as felled, or otherwise harvested, round, split, roughly squared or other forms (e.g. roots, stumps, burls, etc.) and with or without bark.

The quantity and value of round wood produced in Uganda for the last five years is shown in Table 1.2.3. In 2018, Uganda produced 54.3 million tonnes of round wood worth about Shs1.2 trillion, registering an increment of 8.4 percent in value. See Annex Tables 1.2A and 1.2B for details

Table 1.2.3: Production of Round Wood

Category	2014	2015	2016	2017	2018
Quantity ('000 tonnes)	46,603	48,581	50,168	52,195	54,285
Value (Mill. Shs)	773,969	876,789	972,101	1,075,035	1,165,063

Source : National Forest Authority

1.3 CLIMATE

Climate refers to the average weather of a place or region over a long period of time, normally 30 years and above. It defines typical weather conditions based on long term averages of various parameters. The parameters are temperature, rainfall, humidity, air pressure and winds. Climate statistics are vital for understanding trends in climate and projecting likely future changes for informed decision making and policy formulation. Climate change is considered one of the top major global challenges in the 21st Century with its impacts mainly affecting developing countries including Uganda like increased incidences of droughts, floods, erratic rains among others.

1.3.1 Rainfall and Rain-days

This section presents the Long Term Average and Monthly rainfall pattern during 2019 for four (4) selected regional centres. The centres are Entebbe, Gulu, Jinja and Kabale. Also detailed presentation is made for the synoptic stations which include Arua, Entebbe, Gulu, Jinja, Kabale, Kitgum, Kampala, Kasese, Lira, Masindi, Mbarara, Namulonge, Soroti and Tororo. The section further presents information on the monthly rain-days in these stations. See Appendix Table 1.3 A

1.3.1.1 Rainfall

Entebbe

Entebbe area received a total precipitation of 1,921 millimeters in 2019. The station generally received higher amounts of rainfall than the long-term average for most of the months in the year. The highest amount of rainfall (481.2 mm) was received in May while the lowest was received in August (11.8 mm). See Figure 1.3.1 (a) and Statistical Appendix Table 1.3 (A).

Figure 1.3.1 (a): Entebbe 2019 Monthly and Long term Rainfall

Kabale

Kabale area received a total precipitation of 1241 millimeters in 2019. The station generally received slightly higher amounts of rainfall than the long-term average for most of the months in the year. The highest amount of rainfall (231 mm) was received in October and November while the lowest was received in August (4.5 mm). See Figure 1.3.1 (b) and Statistical Appendix Table 1.3 (A)

Figure 1.3.1 (b): Kabale 2019 Monthly and Long term Rainfall

Jinja

Jinja area received a total precipitation of 2123 millimeters in 2019. It generally received much higher amounts of rainfall than the long-term average for most of the months in the year. The highest amount of rainfall (355.8 mm) was received in December while the lowest was received in March (41.5 mm). See Figure 1.3.1 (c) and Statistical Appendix Table 1.3 (A).

Figure 1.3.1 (c): Jinja 2019 Monthly and Long term Rainfall

Gulu

Gulu area received a total precipitation of 2,027 millimeters in 2019. It generally received higher amounts of rainfall than the long-term average for most of the months in the year. The highest amount of rainfall (483.3 mm) was received in June while the lowest was received in January (2.3 mm). See Figure 1.3.1 (d) and Statistical Appendix Table 1.3 (A).

Figure 1.3.1 (d): Gulu 2019 Monthly and Long term Rainfall

1.3.1.2 Rain Days

Rain days are important in knowing the distribution of days on which it rained within the different months of the year. Rain days are defined as days with total daily rainfall of at least 1mm. During 2018, the centres (synoptic stations) had total rain-days as follows; Kampala (126), Arua (103), Kitgum (133), Lira (110), Soroti (96), Kasese (100), Entebbe (134), Jinja (104), Masindi (119), Mabarara (101), Tororo (130), Gulu (125) and Kabale (123). See Appendix Table 1.3A (i) .

Monthly distribution of rain-days in the centres indicate that Entebbe had the highest number of rain-days, followed by Kitgum, Tororo and Kampala during the year 2018 as shown in Figure 1.3.1 (e)

Figure 1.3.1 (e): Monthly distribution of rain-days in Selected centres in 2018

1.3.2 Temperature

Maximum Temperature

The Mean Maximum temperature represents an average of the single highest temperature recorded in that month each year. The mean daily maximum temperatures for the different months at the six different regional centres were generally highest at the beginning of the year (January to February) but significantly declined in March and thereafter during 2019. Between June and December, the temperature kept rising and falling but was below

those experienced in the first three months. Kampala experienced the lowest mean maximum temperature of 25.1°C while Gulu had the highest mean maximum temperature of 32.1°C in the same year as seen in Figure 1.3.2 and Appendix Table 1.3B.

Figure 1.3.2: Long term mean maximum temperature for selected centres, 2019

Minimum Temperatures

The Mean Minimum Temperature represents an average of the single lowest temperature recorded in that month each year. The daily mean minimum temperature for selected centres shows that Kasese and Jinja had the lowest mean daily minimum temperatures of 15.3°C and 15.4°C respectively while Arua and Kampala had the highest daily mean minimum temperature of 18.0°C and 18.1°C respectively during 2019. The trend for long term mean minimum temperature is generally similar for all centres increasing from January to March and then declining between April and July. (See Figure 1.1.3 and Appendix Table 1.3B).

Figure 1.3.3: Long term Mean minimum temperature for selected centres, 2019

1.3.3 Relative Humidity

Monthly mean relative humidity in the Morning (0600 hours) and Noon (1200 hours) generally continued to be in-line with the long term average for all the selected centres (Statistical Appendix Table 1.3C). Figure 1.3.4 below, shows mean relative humidity at 0600 hours for the selected centres. Entebbe and Kasese continued to experience a generally high mean relative humidity at 0600 hrs. Throughout 2017 ranging between 77 and 91 percent. Lira generally recorded the lowest mean relative humidity at 0600 hrs of 45 percent in the year.

Figure 1.3.4: Mean Relative Humidity at 06:00 hours for selected centres, 2017

Figure 1.3.5 below shows the (2012-2017) mean relative humidity at 12:00 hours for selected centres. Entebbe continued to experience the highest long term mean relative humidity at 12:00 hours throughout 2017 ranging from 59.0 to 88 percent. Lira with 20 percent in January had the lowest mean relative humidity at 12:00 hours in the year. See Appendix Table: 1.3C

Figure 1.3.5: Mean Relative Humidity at 12:00 hours for selected centers, 2017

1.4 Water Supply

1.4.1 Water Produced - Metered

During the year 2019/20, water production was 139.6 million cubic meters compared to 134.9 million cubic meters produced in the 2017/18 hence an increase of about seven percent which is higher than the increment registered in 2017/18 of 5%. Figure 1.4.1 below shows the national trends of metered water production by NWSC over the past financial years.

Out of the 139.6 million cubic meters produced in 2019/20, 127.8 million m³ accounting for 95 percent of the total production was supplied. Of the total supplied, 90 million m³ was sold implying a billing efficiency of 71 percent (Statistical Appendix Table 1.4D).

Figure 1.4.1: Water produced by NWSC in Uganda, 2014/15 – 2019/20

1.4.2 Water produced - Unmetered

The Directorate of Water Development (DWD) supplies water especially in the rural areas and small towns through the provision of boreholes.

Over the years, water supply by DWD has been fluctuating. Whereas there was a reduction in water supply from 2.6 million cubic metres in 2014/15 to 0.47 million cubic metres in 2015/16 because a number of towns were taken over by NWSC during the 2015/16 FY coupled with late reporting to the UPMIS online system, an increase was observed from 0.8 million cubic metres in 2016/17 to 2.4 million cubic metres in 2017/18. The trend is improving given that, districts are getting used to the application (UPMIS). Details at District level are as seen in Statistical Appendix Table 1.4F.

1.5 Waste Statistics

The Basel Convention defines waste as “substances or objects which are disposed off or are intended to be disposed off or are required to be disposed off by the provisions of national law”.

1.5.1 Municipal Solid Waste

The Uganda Bureau of Statistics (UBOS) collects information on solid waste collected (tons) from KCCA and other selected Municipalities across the country. Waste collected increased by 9.4 percent from 729,755 tons in 2018 to 798,590 tonnes in 2019. KCCA had the highest increase (12.8%) followed by the Northern (8.9 %). Municipality collections are as seen from Appendix Table 1.5 A

Figure 1.5.1: Solid waste collected by region

1.5.2 Hazardous Waste Collected by Licensed waste agents

Hazardous waste is described as waste that causes un-acceptable risk to public health and the environment. The quantity of hazardous waste reported in here is that collected by the various NEMA licensed hazardous waste agents. The treated hazardous waste increased by 28 percent in 2016/17 (5,668 tons) to 2017/18 (7,226 tons). In the period 2016/17; Oils and Chemicals waste (60.3%) were the most collected and treated followed by General waste (14.4%) while Plastics and Polythenes (1.1%) were the least. In the period 2017/18; Oil and chemicals (74.9%) was the most collected and treated followed by medical and pharmaceuticals (10.6%). Between the two periods, the quantity of medical and pharmaceutical waste recorded a two fold increase. The figures in this publication slightly differ from those in previous ones because in the course of compilation UBOS received more data about previous years.

Figure 1.5.2: Quantity of hazardous waste collected 2015/16, 2016/17 and 2017/18

Source: Luwero Industries and other sources

1.5.3 Electronic Waste (E-Waste)

The Basel Convention on the control of trans-boundary movement and disposal of hazardous waste, to which Uganda is a member, defines E-Waste, as: “all discarded electrical and electronic assemblies, scrap, components and batteries”.. E-Waste includes a broad range and growing number of electronic devices ranging from large household appliances such as refrigerators and air conditioners, to personal products such as handheld cellular phones, personal stereos, consumer electronics and computers.

E-Waste is one of the new environmental threats arising out of huge global sales of Electric and Electronic Equipment (EEE), with symmetric volumes of waste generated after, whose disposal is a complicated process especially for developing countries such as Uganda.

1.5.3.1 Placed on the Market

The placed on the market variable is the total imports less exports plus local manufactured EEE. Results reveal that, the amount of EEE placed on the market has been steadily decreasing since 2014 from 37,231 tonnes to 28,083 tonnes in 2018. The component of small equipment forms the biggest percentage of electronics placed on the market since 2014. This is followed by Temperature exchange equipment such as AC and refrigerators. However, large equipment (excluding Photovoltaic panels) have the least quantities of what is placed on the market. For details see Statistical Appendix Table 1.5 C

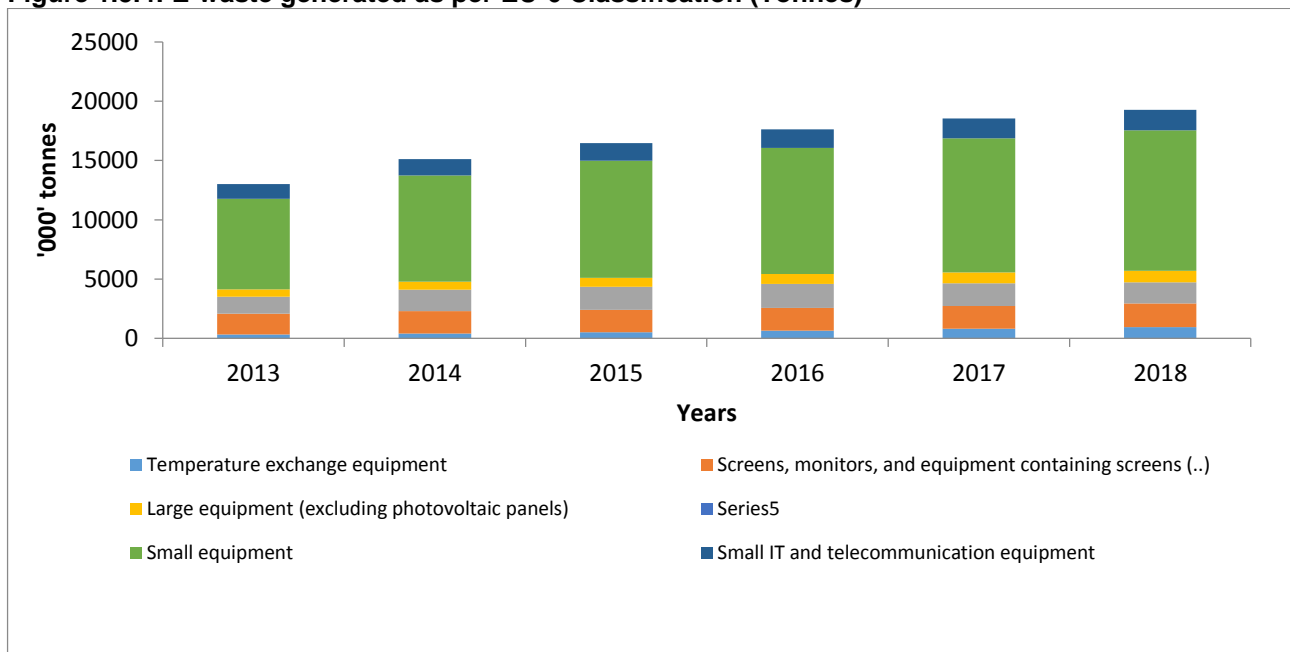

Figure 1.5.3: Amount of EEE placed on the market (Tonnes)

1.5.3.2 E-Waste Generated

The E-waste generated depends on the quantities placed on the market and various life spans for the various categories. The E-waste generated has increased over time as shown in Figure 1.5.4. In the year 2018, the amount of e-waste generated was about 19,264 tonnes compared to 13,027 tonnes generated in 2013. The biggest component of E-waste generated in 2018 was small equipment as seen from graph 1.5.4. E-waste generated has increased more than ten times between 1999 to 2018 as shown in the Appendix Table 1.5 E.

Figure 1.5.4: E-waste generated as per EU-6 Classification (Tonnes)

CHAPTER TWO

2.1 Demographic Statistics

2.1.1 Population Trends

Uganda has conducted a decennial Population and Housing Census since 1911 and the latest was in 2014. The 1911, 1921 and 1931 population censuses were mainly administrative in nature. The first scientific census was conducted in 1948 where a questionnaire was used. Between 1948 and 1969, separate enumeration procedures were made for the African and non-African population in the country using different forms and sometimes the census night was not uniform.

Figure 2.1.1 shows that Uganda's population has continued to grow over time. It increased from 9.5 million in 1969 to 34.6 million in 2014 representing an average annual growth rate of 3.0 percent between 2002 and 2014. The population is projected to be 41.6 million by mid year 2020.

Figure 2.1.1: Census population, 1969 - 2014 and Projected Population 2018 and 2020

Table 2.1.1 shows that the growth rate declined from 3.2 in 2002 to 3.0 in 2014, with an average annual increase of about one million persons. However, the population grew at a lower rate in the early twentieth century where it increased from about 2.5 to 2.9 million between 1911 and 1921. This is an increase of 400,000 persons in ten years, reflecting an average annual population growth rate of less than two percent. The highest average annual growth rate (3.9 percent) was observed during the intercensal period between 1959 and 1969.

Table 2.1.1: Population size, Inter-censal Population changes and average annual growth rates, 1911-2014

Census year	Male	Female	Total	Intercensal Period	Average Annual Increase (000's)	Average Annual Growth Rate (%)
1911	1,116,903	1,349,422	2,466,325			
1921	1,320,286	1,534,322	2,854,608	1911-1921	39	1.5
1931	1,707,437	1,834,844	3,542,281	1921-1931	68	2.2
1948	2,481,394	2,477,126	4,958,520	1931-1948	83	2.0
1959	3,283,222	3,253,394	6,536,616	1948-1959	143	2.5
1969	4,812,447	4,722,604	9,535,051	1959-1969	300	3.9
1980	6,259,837	6,376,342	12,636,179	1969-1980	262	2.7
1991	8,185,747	8,485,958	16,671,705	1980-1991	367	2.5
2002	11,824,273	12,403,024	24,227,297	1991-2002	647	3.2
2014	17,060,832	17,573,818	34,634,650	2002-2014	882	3.0

Source Uganda Bureau of statistics.

2.1.2 Population Distribution by Age and Sex

A population pyramid is a pictorial representation of the age distribution of a given population. Its shape is determined by the past birth and death rates in that population. Uganda's population pyramid (Figure 2.1.2) is broad based, implying that the majority of the population is young, characteristic of a country with high fertility levels.

Figure 2.1.2: Population Pyramid in Five-Year Age Groups, Uganda, 2014

2.1.2.1 Population of Special Interest Age Groups

Table 2.1.2 shows that the highest proportion of Uganda's population is young (under 18 years). The young population increased from 51 percent in 1969 to 56 percent in 2002, slightly dropped to 55 percent in 2014 and is projected at 53 percent in the year 2020. One in five persons of the population is of primary school going age (6-12 years). On the other hand, the proportion of older persons (aged 60 years and above) decreased from six percent in 1969 to about four percent in 2014.

Table 2.1.2 Percentage Distribution of the Population by Special Interest Groups, for the censuses; 1969-2014 and projections.

Age Category	Census Period				Projections		
	1969	1991	2002	2014	2018	2019	2020
6 – 12 Years	22.7	22.3	21.9	21.3	20.2	19.9	19.7
10 – 24 Years	27.8	33.3	34.2	31.7	35.2	35.2	35.1
13 – 19 Years	12.9	15.8	16.3	17.1	17.3	17.3	17.2
15 – 24 Years	16.2	20.0	19.9	20.6	21.5	21.6	21.7
18 – 30 Years	21.7	23.6	22.3	22.5	22.9	23.2	23.5
Less than 18 Years	51.4	53.8	56.1	55.0	53.6	53.1	52.6
60 Years or More	5.8	5.0	4.6	4.1	3.7	3.7	4.0

2.1.3 Population in Urban Areas

In Uganda the definition of urban areas has changed over time. During the 2002 and 2014 Censuses urban areas constituted of only the gazetted (approved by the responsible authority) while in the earlier censuses both the gazetted and ungazetted urban areas were included. Any trading centre with more than 1,000 people was considered urban.

Figure 2.1.3 shows that the urban population increased from less than one million persons in 1980 to about three million in 2002, representing a nearly threefold increase and further increased to 7.4 million in 2014. It is projected at 10.6 million persons in the year 2020. The higher increase is attributed to four factors. Those are 1) gazetting of new urban areas; 2) natural growth; 3) redemarcation of the boundaries of selected urban areas; and 4) Rural - Urban Migration. The growth in urban population was mainly driven by creating new districts and subsequently gazetting of new urban areas (Town councils and Municipalities). The recent approval by parliament of 15 new cities will also lead to the growth of the urban population for the period July 2020 to July 2023 during their cluster operationalisation.

Figure 2.1.3: Urban Population by Census Year and projection

2.1.4 Marital Status

The demographers' interest in marriage is based mainly on its influence on the fertility behaviour which is one of the components of population dynamics. Marriage is the gateway to family formation, the most basic unit of social and community organisation in any society. It forms the base setting in most societies within which childbearing occurs. Age at marriage is, therefore, one of the drivers of fertility because early marriages exposes teenagers to early pregnancy and hence early child bearing.

Table 2.1.3 show the proportion of females by marital status. Currently, the word "married" refers to women and men who report being married or living together as husband and wife. The table shows that about one in every five teenagers aged 15-19 was married in all the three surveys yet this is also the school going age group.

Table 2.1.3: Proportion of Females by marital status and age group

Age group	2006			2011			2016		
	Never Married	Currently Married	*Ever Married	Never Married	Currently Married	*Ever Married	Never Married	Currently Married	*Ever Married
15-19	77.6	19.6	2.7	77.3	20.0	2.8	77.2	19.9	2.9
20-24	21.9	67.1	11.0	23.9	67.3	8.8	25.5	64.0	10.5
25-29	5.8	80.4	13.8	5.6	82.5	11.9	10.0	77.3	12.7
30-34	2.8	81.6	15.6	2.3	81.1	16.6	3.9	78.5	17.6
35-39	1.9	78.1	20.1	1.5	79.9	18.7	2.7	77.1	20.1
40-44	1.8	73.3	24.9	0.8	75.8	23.4	2.4	73.6	24.1
45-49	0.7	70.3	29.0	2.2	62.0	35.8	1.5	69.6	28.9
Total	23.8	62.6	13.7	24.4	62.5	13.2	25.8	60.6	13.5
Number	2,028	5,337	1,167	2,118	5,418	1,138	4,783	11,223	2,500

Source: UDHS, 2006-2016

*Ever married include separated, divorced and widowed

Early Marriages

Early marriages result into social, health and economic challenges and the situation is made worse if the person loses a partner when still young. Widowed mature persons are at a disadvantage compared to their married counterparts in terms of economic security and health. Figure 2.1.4 shows that about one in every ten female children (15-17 years) have ever been married while the corresponding proportion for their male counterparts was less one percent implying the big sex differentials of age at marriage.

Figure 2.1.4: Proportion of Children aged 15-17 ever married by sex and survey year

Widowhood

Table 2.1.4 presents the widowhood rates of the population 15 years and above. Overall, the widowhood rates among persons aged 60 years and above slightly increased from 36 percent in 2012/13 to 38 percent in 2016/17. The proportion of women aged 60 years and above who were widowed in the two survey years was nearly 59 percent, about 10 times that of their male counterparts. This is partly explained by the fact that men are more likely to remarry if they lose their loved ones compared to women.

Table 2.1.4: Widowhood rates by sex, age group and survey year

Age group	2012/13			2016/17		
	Males	Females	Both Sexes	Males	Females	Both Sexes
15-17	0.1	0.0	0.1	0.1	0.2	0.1
18-30	2.1	0.6	0.5	3.2	0.7	0.5
31-59	6.2	12.7	7.4	7.3	12.2	7.0
60+	6.4	58.8	35.5	6.7	58.9	38.1
Total	3.7	10.9	6.4	4.7	10.6	6.3

Source: UNHS, 2012/13, 2016/17

2.1.5 Fertility

The Total Fertility Rate refers to the average number of children that would be born alive to a woman during her lifetime if she were to pass through her childbearing years conforming to the age-specific fertility rates of a given period. Figure 2.1.5 shows that the fertility levels in Uganda have declined over time. The Total Fertility Rate (TFR) declined from 7 children per woman to 5 children per woman between 1995 and 2016.

Figure 2.1.5: Fertility Trends, 1995- 2016

Source: UDHS Data (1995, 2000/2001, 2006, 2011, 2016)

* Population and Housing Census Data (2014)

2.1.6 Mortality

Figure 2.1.6 presents the trend of Infant Mortality Rate (IMR) and Under Five Mortality (U5MR) from 2000/01 to 2016. Infant mortality is the probability of dying between birth and exactly one year of age expressed per 1,000 live births while Under Five Mortality is the probability of dying between birth and less than five years of age expressed per 1,000 live births. Infant and Under Five Mortality rates between 2000 and 2016, declined by more than half, dropping from 88 to 43 deaths per 1000 live births and from 152 to 64 deaths per 1,000 live births respectively.

Figure 2.1.6: Infant and Under Five Mortality Trends, 2000- 2016

Source: UDHS of 1995, 2000/2001, 2006, 2011, 2016 and National Population and Housing Census 2014

2.1.7 Life Expectancy at Birth

Life expectancy at birth is an estimate of the average number of years a person is expected to live if a particular pattern of mortality is maintained. Table 2.1.5 shows that, overall, life expectancy at birth in 2014 was 63.7 years. As expected, males registered a lower life expectancy (62.8 years) compared to their female counterparts (64.5 years). Between 2002 and 2014 there was a gain of about 13 years in life expectancy which could be attributed to the improvement in the childhood mortality rates.

Table 2.1.5: Life Expectancy at Birth by Census Year 1969- 2014

Census Year	Male	Female	Total
1969	46.0	47.0	46.5
1991	45.7	50.5	48.1
2002	48.8	52.0	50.4
2014	62.8	64.5	63.7

Source: Uganda Bureau of statistics.

2.1.8 Households

Uganda is administratively at macro level divided into districts, constituencies, counties/municipalities, subcounties/Town councils, parishes/wards and LCIs. At micro level there is a household which is referred to as a group of persons who normally eat and live together with one responsible person regarded as head. During the 2014 National Population and Housing Census there were 7.3 million households. They are projected to be about 9.0 million households by mid year 2020

Figure 2.1.7: Census and projected Households (2014-2020)

2.2 Education

Uganda's education system is comprised of an early childhood programme that caters for children aged 3-5 years (pre-primary education), followed by seven (7) years of primary education, followed by four (4) years of Ordinary Level secondary education, two (2) years of Advanced Level secondary education and the final tier is three (3) to five (5) years of Tertiary education. Each level is nationally examined with certificates awarded.

2.2.1 Pre-Primary School Education

Pre-primary education offers Early Childhood Care and Education (ECCE). The official school going age for pre-primary is 3-5 years. The enrolment at Pre-primary level decreased by 10 percent from 18 percent in 2016 to 8 percent in 2017 as presented in Table 2.2.1. Over the years 2013 to 2017, the number of females enrolled in pre-primary has been more than that of males. The Pupil Classroom Ratio (PCR) and Pupil Teacher Ratio (PTR) stood at 27 and 22, respectively in 2017.

Table 2.2.1 Trends of selected Pre-Primary Education Indicators, 2013-2017

*only classrooms used were considered

2.2.1.1 Teachers' qualification

Figure 2.2.1 shows that the majority of the pre-primary teachers of the pre-primary teachers that declared their qualification had a diploma in nursery school teaching (60%), those with a certificate in nursery teaching and grade II accounted for 9 percent each individually.

Figure 2.2.1 Pre-primary teachers by qualification, 2017

*Others include

Grade III Teacher, Grade V Teacher including DSNE (Diploma in Special Needs Education), Diploma in Secondary Education (DSE), DTE- Diploma in Tertiary Education, Graduate Teacher, Trained care giver and DPE (Diploma in Primary Education)

2.2.2 Primary School Education

Primary school enrolment refers to the number of pupils attending primary school in a given time period irrespective of age. The primary enrolment increased from 8.5 million in 2013 to about 8.8 million pupils in 2017, as shown in Table 2.2.2. The number of teachers has been increasing over the years from about 186,000 in 2013 to 207,000 in 2017. The Pupil Teacher Ratio has remained constant at 43 pupils per teacher since 2015.

Table 2.2.2: Key Primary Education Indicators, 2013-2017

Indicator	2013	2014	2015	2016	2017

2.2.2.1 Pupil Enrolment

Table 2.2.3 shows that enrollment decreases as pupils' progress to higher classes. In 2017, enrolment decreased from about 2.0 million in P.1 to about 0.62 million in P.7.

Table 2.2.3: Primary School Enrolment by class

Class	2013	2014	2015	2016	2017
Primary 1	1,883,803	1,932,489	1,842,006	1,888,847	1,965,606
Primary 2	1,307,745	1,349,233	1,277,974	1,352,893	1,365,311

2.2.2.2 Sitting space

Adequate sitting space refers to at most three pupils per standard desk. Table 2.2.4 shows that in 2017, more than two thirds (67 percent) of the pupils enrolled in primary had adequate sitting space. The share of pupils with adequate sitting space increased with the level of class.

Table 2.2.4: Primary school pupils with adequate sitting space by class, 2017

Class	Enrolment in 2017	Pupils with adequate space	Share of pupils with adequate space total Enrolment
Primary 1	1,965,606	1,071,795	54.5
Primary 2	1,365,311	862,380	63.2
Primary 3	1,377,947	919,042	66.7
Primary 4	1,365,908	953,670	69.8
Primary 5	1,170,640	868,778	74.2
Primary 6	971,231	754,340	77.7

Total	8,840,589	5,956,151	67.4

Source: Annual School Census, Ministry of Education and Sports, 2017

2.2.2.3 Primary Leaving Examinations (PLE) Performance

Passing PLE is a requirement for one to transit to the first grade of secondary education (S.1). The majority (47 percent) of the pupils who sat for PLE passed in Division II, about 66,146 pupils failed (DIV U) while of the 695,707 pupils that registered for PLE 12,500 (DIV X) did not sit for the examinations.

Table 2.2.5: Primary Leaving Examination indicators; 2019

Indicator	Male	Female	Total	
			Percentage	Numbers
Pupils who registered	48.3	51.7	100.0	695,707
Pupils Who Sat for PLE	48.3	51.7	100.0	683,207
Pupils who passed PLE	49.1	50.9	100.0	617,061
DIV I	56.6	43.4	100.0	69,239
DIV II	50.3	49.7	100.0	318,092
DIV III	42.9	57.1	100.0	140,402
DIV IV	49.1	50.9	100.0	89,328
DIV U	40.8	59.2	100.0	66,146
DIV X	46.8	53.2	100.0	12,500
Pass Rate (Percent)	92%	89%	-	90%
Performance index*	61%	57%	-	59%

Source: Uganda National Examinations Board

*The Performance index measures the quality of passing at all levels of education and is computed as the (Number in Div. I multiplied by 20) + (Number in Div II multiplied by 15) + (Number in Div III multiplied by 10) + (Number in Div IV multiplied by 5) + (Number in Div U multiplied by 0) all Divided by (Total that Sat PLE multiplied by 20)

Between 2015 and 2019, the pass rate decreased from 91 percent in 2018 to 90 percent in 2019 with a performance index of 59 percent. There was no change in the proportions of pupils that sat for PLE.

Source: Uganda National Examinations Board

*obtained Div I, II, III and IV

2.2.2.4 Primary Completion and Transition Rate

In 2017, more than half (60 percent) of the primary school pupils completed P.7 while the transition rate to S1 stood at 61 percent, as seen in Table 2.2.6. There were minimal variations by sex for the two variables.

Table 2.2.6: P.7 completion and Transition rates to S.1 by years ; 2013-2017

Indicator	2013	2014	2015	2016	2017
P.7 Completion rate*					
Boys	68.00	72.00	59.80	59.70	59.3
Girls	67.00	72.00	63.30	63.40	60.0
Total	67.40	72.00	61.60	61.50	60.0
Transition rate to S1					
Boys	72.30	70.50	62.80	64.40	60.8
Girls	72.00	70.50	63.60	65.20	60.5
Total	72.20	70.50	63.20	64.80	60.6

Source: Annual School Census, Ministry of Education and Sports, 2013-2017

*It is calculated by taking the total number of students in the last grade of primary school, minus the number of repeaters in that grade, divided by the total number of children of official graduation age.

2.2.2.5 Teachers' qualification

More than half (61 percent) of the primary school teachers were Grade III Teachers, followed by those with a Diploma in Primary Education (15 percent) as shown in Table 2.2.7.

Table 2.2.7: Primary teachers by level of qualification and sex, 2017

Teacher Qualification	Sex			Percentage to total number of teachers
	Female	Male	Total	
DPE (Diploma in Primary Education)	13,220	18,168	31,388	15.1
Grade II Teacher	286	234	520	0.3
Grade III Teacher	54,732	70,709	125,441	60.5

Total	89,256	117,982	207,238	100

Source: Annual School Census, Ministry of Education and Sports, 2017

2.2.3 Secondary School Education

Secondary school enrolment reduced by six percent from about 1,458 ,000 in 2016 to 1,371,000 in 2017 while the Student Teacher Ratio (STR) dropped to 21 in 2017 from 22 in 2016. The Student Classroom Ratio also improved to 49 from 51 in 2016 as shown in Table 2.2.8. This implies that the number of students per classroom and the number of students per teacher are reducing.

Table 2.2.8: Selected Secondary School Education Indicators,2013 – 2017

Indicator	2013	2014	2015	2016	2017
Gross Enrolment rate	29	30	25	27	25

2.2.3.1 Student Enrolment by class

Table 2.2.9 shows that enrollment decreases as students' progress to higher classes. In 2017, enrolment decreased from 347,529 (Senior One) to 67,611 (Senior Six). A similar pattern was observed for the previous years

Table 2.2.9: Secondary School Enrolment by Class,2013-2017

Year	Senior 1	Senior 2	Senior 3	Senior 4	Senior 5	Senior 6	Total
2013	346,537	305,501	284,919	250,274	85,760	89,448	1,362,439

2.2.3.3 Uganda Certificate of Education (UCE) Performance

Uganda Certificate of education (UCE) refers to the examination that is given at the end of Senior Four (S4), while the Uganda Advanced Certificate of Education (UACE) refers to the examination given at the end of Senior Six (S6).

The majority of the students (143,219) who sat for UCE in 2019 passed in Division 4. There was significant decrease in the number of the students that failed (DIV.U) UCE from 42,324 in 2018 to 26,135 in 2019. The performance index increased to 44 percent in 2019 as compared to 41.4 percent in 2018.

Table 2.2.11: Uganda Certificate of Education (UCE) results by grade and sex, 2019

Indicator	Male	Female	Total	
			Percentage	Numbers
Students who registered	49.9	50.1	100.0	337,720
Students Who Sat for UCE	49.9	50.1	100.0	333,060
Students who didn't sit	50.4	49.6	100.0	4,660
Students who passed	50.5	49.5	100.0	306,925
Division 1	59.3	40.7	100.0	27,842
Division 2	55.8	44.2	100.0	58,575
Division 3	51.4	48.6	100.0	77,289
Division 4	46.1	53.9	100.0	143,219
Division U	43.6	56.4	100.0	26,135
Division X	50.4	49.6	100.0	4,660
Pass Rate	93%	91%		92%
Performance Index*	47%	41%		44%

*The Performance index measures the quality of passing at all levels of education and is computed as the (Number in Div. I multiplied by 20) + (Number in Div II multiplied by 15) + (Number in Div III multiplied by 10) + (Number in Div IV multiplied by 5) + (Number in Div U multiplied by 0) all Divided by (Total that Sat UCE multiplied by 20)

Source: MoES/ UNEB, 2019

Almost all (99 percent) of the students who registered for UCE exams in 2019, sat for the examinations and only 8 percent failed. Figure 2.2.3 shows that the performance index increased slightly from 41 percent in 2018 to 44 percent in 2019. The pass rate also increased to 92 percent in 2019 from 87 percent in 2018.

Figure 2.2.3: Trend in proportion of students who sat for Uganda Certificate of Education (UCE), pass rate and performance index, 2015-2019

2.2.3.5 S.4 Completion and Transition Rate to S.5; 2013-2016

Ordinary Level Secondary (S1-S4) completion rate is computed as the total number of students in the fourth grade (S4) of secondary education divided by the total number of children of official completion age (16 years). It captures the transition rate from primary to secondary schooling. Table 2.2.13 shows that the transition rate to Senior Five (S5) in 2017 was 25 percent, a decrease from 30 percent in 2016. In both instances, males were more likely to complete S.4 as well as transition to S.5 compared to their female counterparts.

Table 2.2.13: S.4 completion and Transition rates to S.5

SEX	2013	2014	2015	2016	2017
Senior 4 Completion rate					
Boys	36.7	36.4	36.4	39.6	36.2
Girls	33.8	33.9	35.9	36.0	33.5
Total	35.3	35.8	36.2	37.8	34.8
Transition rate to S5

2.2.3.6 Orphans

The Annual School Census considers an orphan as a child below 18 years of age who has lost either one or both parents. In 2017, orphans accounted for 8 percent of the pre-primary enrolment - a slightly lower percentage from that of 2016 (9 percent) as seen in Table 2.2.14. The share of orphans to primary enrollment in 2017 was 12 percent, a similar proportion for 2016 and 2015. About 17 percent of the students enrolled into secondary education in 2017 were orphans which was one percentage point less than the 2016 proportion. Details on number of orphans by sex, education level for 2013-2017 are in Appendix Table 2.2. L.

Table 2.2.14: Share of orphans to total enrolment by education level, 2013 – 2017

Education Level	Sex	2013	2014	2015	2016	2017
Pre-Primary	Male	20,608	20,759	16,188	24,875	24,996
	Female	19,404	19,563	15,332	23,403	23,339
	Total	40,012	40,322	31,520	48,278	48,335
Primary	Male	628,287	587,868	485,475	543,791	528,248
	Female	609,144	568,988	471,497	529,778	513,958
	Total	1,237,431	1,156,856	956,972	1,073,569	1,042,206

2.2.3.7 The National Assessment of Progress in Education (NAPE) competence scores

Educational assessment seeks to determine how well students are learning and is an integral part of the quest for improved education. It provides feedback to students, educators, parents, policy makers, and the public about the effectiveness of educational services¹. The National Assessment of Progress in Education (NAPE) tests for pupils' competencies in Literacy, Numeracy and Biology for secondary students only.

Table 2.2.15 shows an increasing trend in the literacy rate for P.3 pupils although there was a 4 percent decline from 2014 to 2015. The literacy rate was higher for girls compared to boys. On the other hand, the P.6 Literacy rate declined from 2013-2014 though a 14 percent increase was observed between 2014 and 2015. The Numeracy rate for P.3 pupils increased from 69 percent in 2013 to 72 percent in 2016. However, a notable decline was observed in the Numeracy rate for P.6 pupils from 41 percent in 2013 to 35 percent in 2015.

Table 2.2.15: NAPE Competence Scores for Primary by class (P.3 and P.6)

2.2.4 Tertiary Education

Table 2.2.16 indicates that in 2016 the enrolment at tertiary level was about 259,000, of which 72 percent were in universities. The proportion of males (56 percent) enrolled in higher institutions was higher than that of females (44 percent). In terms of trends, enrolment at the tertiary level increased from about 201,376 in 2013 to 258,866 students in 2016

Table 2.2.16: Tertiary Enrolment by Sex, 2013-2016

The Business Technical Vocational Education and Training (BTJET) sector aims at addressing the technical skills gap in the country and provides skills to persons that completed or dropped out of school (at any level) as well as unemployed youths. The BTJET enrolment decreased to 45,153 in 2017 from 63,209 in 2016.

Table 2.2.17: Number of BTJET institutions and enrolment by sex, 2013-2017

2.2.5 Literacy

The literacy rate was obtained from household-based surveys and the 2014 National Population Household Census (NPHC) with no assessments done. The literacy rate among persons aged 10 years and above has generally increased over time from 2009 to 2017 with about seven in every ten (70 percent) of the population aged 10 years and above literate. Males (77 percent) were found to be more literate than their Female (70 percent) counterparts as presented in Table 2.2.18

Table 2.2.18: Literacy Rate for population aged 10 years and above by residence, 2009-2017

2.3 Labour Statistics

Labour statistics are vital in the measurement of economic growth and development of a nation. These statistics provide indicators on the number of persons who, during a specified period, contributed to the production of goods and services in the country and their characteristics.

2.3.1 Work and Employment

Work comprises any activity performed by persons of any sex and age to produce goods or to provide services for use by others or for own use. The concept of work is aligned with the General production boundary as defined in the System of National Accounts (SNA) 2008 and its concept of economic unit that distinguishes between:

2.3.2 Key Labour Market Indicators of the Working Population

The distribution of Uganda's working population during the period 2012/13 and 2016/17 is presented in Table 2.3.1. The total working population was estimated at 15 million in 2016/17 from about 14 million in 2012/13. In both years the proportion of the working females (nearly 51 percent) was higher than that of the males (about 49 percent).

Table 2.3.1: Key Labour Market Indicators of Working Population (14-64 years) by sex and residence ('000)

Selected Labour Market Indicators	2012/13			2016/17				Total
	Male	Female	Total	Male	Female	Rural	Urban

Source: UNHS 2012/13 & 2016/17, UBOS

The regional disaggregation of the population showed the Eastern region having the highest proportion of the working population in 2016/17 (26.4%), while the Northern region had the lowest (21.0%). Kampala City had 4.3 percent of the working population. Overall, the working population increased by eight percent between 2012/13 and 2016/17.

Table 2.3.2: Distribution of the working population by selected characteristics (14-64 years), UNHS 2009/10, UNHS 2012/13 and UNHS 2016/17

2.3.2.1 Industry of the main job for the working population

The 2016/17 Uganda National Household Survey (UNHS) revealed that the highest percentage of the working population (64.6%) was engaged in the Agriculture, forestry and fishing industry. The proportion working in the industry was higher for females (70.5%) than males (58.5%) (See Table 2.3.3). Trading was the second prominent industry of the working population with a workforce share of 12.1 percent. This pattern was similar to the one observed during the 2009/10 and the 2012/13 survey periods.

Table 2.3.3: Distribution of Industry of the main job for working population (14-64 years)

Industry	UNHS 2009/10			UNHS 2012/13			UNHS 2016/17

2.3.3 Key Labour Market Indicators of the employed population

Employment refers to the current supply of labour for the production of goods and services in exchange for pay or profit. According to the UNHS 2016/17, the total employed population was estimated at 9 million as indicated in Table 2.3.4, compared to 15 million persons who were working. (See Table 2.3.1). The difference of about 6.0 million persons depicts existence of a high number of persons in unpaid work in Uganda. Those persons are mostly subsistence activities, especially in agriculture.

Table 2.3.4: Selected Labour Market Indicators for Persons in Employment (14-64 years)

Selected Labour Market Indicators	Male	Female	Rural	Urban	Total
UNHS 2016/17					
Employed population ('000)	5,047.3	4,023.2	5,985.5	3,085.0	9,070.5

2.3.3.1 Status in employment

The information in Table 2.3.5 reveals that 38 percent of the population in employment during the period 2016/17 were paid employees while 50 percent were own account workers. The proportion of males in paid employment (46 percent) was higher than that of females (28 percent). The results also reveal that workers with education attainment of post-secondary had higher shares (63%) in wage employment compared to those with lower education categories. (Statistical Appendix Table 2.3 C).

Vulnerable employment is defined as the sum of the employment status groups of own account workers and contributing family workers¹. It is often characterised by inadequate earnings, low productivity and difficult conditions of work that undermine workers' fundamental rights. Table 2.3.5 shows that 56.8 percent of the employed persons aged 14-64 years were in vulnerable employment.

Table 2.3.5: Status in Employment for Persons in Employment (14-64 years)

	Male	Female	Rural	Urban	Total
Paid employment	46.0	28.3	31.4	51.3	38.1
Employer	5.5	2.9	3.5	5.9	4.4
Own account worker	43.8	57.6	56.6	37.0	49.9

Vulnerable employment	48.1	67.9	64.4	42.2	56.8

Source: UNHS 2016/17, UBOS

2.3.3.2 Industry of the Employed population

The findings presented in Table 2.3.6 indicate that agriculture, forestry and fishing was the predominant industry of employment with a share of 36 percent. This was followed by those in sales, maintenance, repair of vehicles and personal goods (combined as trade) which employed almost one quarter (23 percent). See Appendix Table 2.3 D for more detailed information.

Table 2.3.6: Industry for Persons in Employment (14-64 years)

Industry of employment	Male	Female	Rural	Urban	Total
Agriculture, forestry and fishing	35.5	35.9	48.0	11.7	35.7

2.3.3.3 Occupations of the Employed population

The findings in Table 2.3.7 show that, overall, service and sales workers had the highest proportion of the employed population (31 percent) followed by skilled agricultural, forestry and fishery workers (27 percent). The results further show that the proportion of persons employed in occupations requiring high qualifications such as professional occupations and technicians and associate professionals was low (9%), with no major gender disparities observed. (Appendix Table 2.3 E)

2.3.3.4 Persons in Employment Living in Poor Households

The working poor refer to working people whose expenditure (as a proxy for income) falls below the Poverty Line. According to the 2016/17 Uganda National Household Survey (UNHS), 13 percent of persons in employment were living in poor households. This was a decrease from 17 percent reported during the period 2012/13 (Table 2.3.9).

Table 2.3.9: Proportion of the Employed Population who lived in Poor Households, 2012/13 & 2016/17

2.3.3.5 Monthly wages for paid employees

Table 2.3.10 indicates that overall, the median monthly earnings from paid employment on the main job was UGX 176,000 in 2016/17, an increase from the UGX132,000 reported in 2012/13. However, in real terms (CPI 2009/10=100, CPI 2012/13=141.65 and CPI 2016/17=164.13) the overall median monthly earnings increased by 15.1 percent between the two survey periods. Appendix Table 2.3 G shows more detailed information on median monthly wages for persons aged 14-64 years in paid employment.

Table 2.3.10: Median Monthly Wages (main job) for Persons 14-64 Years in Paid Employment, 2012/13 and 2016/17

2.3.3.6 Share of Women in Employment

Figure 2.3.1 indicates that, overall, females constituted 44 percent of all persons in employment. This proportion has remained almost the same during the last two survey periods. Men outnumbered women in all the three sectors but most especially in the production with the service sector employing the highest proportion of women during both survey periods (49 percent in 2016/17 and 48 percent in 2012/13).

Figure 2.3.1: Share of Women in Employment by Status in employment and Sector

Source: Uganda National Household Surveys 2012/13 and 2016/17, UBOS

The results in Figure 2.3.2 show that as the education levels increased the share of women in employment decreased, i.e. low education levels had higher proportions of women as compared to the subsequent high ones. While almost two thirds (64 percent) of the working age population who had no formal education were women, the share decreased to

38 percent among those with the highest education level of post-secondary. See Appendix Table 2.3H for details by selected background characteristics.

Figure 2.3.2: Share of Women in Employment by Education Level Attained

2.3.4 Unemployment

The overall unemployment rate (UR) was 9.2 percent in 2016/17 with the females experiencing higher unemployment rate (14 percent) than males (6 percent). There were differentials by residence, with the levels of unemployment being higher among rural residents (10 percent) than urban residents (8 percent). The detailed unemployment rates by selected background characteristics are indicated in the Appendix Table 2.3 I

Table 2.3.11: Unemployment rate (14-64 years)

Unemployment rate	2012/13	2016/17

2.3.4.1 Key Labour Market Indicators of the Youth population

Stages of transition

The proportion of the youth (18-30 years) who transitioned either to stable or satisfactory jobs (based on those in employment) was 27 percent, showing inadequate stable or satisfactory employment opportunities for the youth in Uganda. The majority of the youth (62 percent) were in transition while about nine percent had not yet started the transition.

Labour underutilisation

Labour underutilisation focuses on issues of insufficient labour absorption and gives information that is necessary in broader labour market monitoring. The composite labour underutilisation indicator takes into account all unemployed youth, those in time related underemployment and the potential labour force as a proportion of the extended labour force. As shown in Table 2.3.12 above, the composite measure of youth labour underutilisation (LU4) was 38 percent. The unemployment rate of the youth was 13 percent which is higher than the national rate of about 10 percent.

Youth activity status shown in Table 2.3.12 above revealed that almost half (47%) of the youth were in employment with more males (54%) than the females (41%). It can be noted that 29 percent of the youth were in subsistence agriculture only while 12 percent of the youth were neither working nor in education training.

Table 2.3.12: Transition to work, inadequate employment situation, and activity status of the Youth Population (18-30 years), 2016/17

Indicator Category	2016/17		
	Male	Female	Total

2.3.5 Activities of Children

Key findings on main activities of children in Uganda are presented in this section based on the National Labour Force Survey (NLFS) 2016/17. Table 2.3.13 shows that more than one half (60 percent) of all children aged 6-17 years attended school exclusively, while another one quarter (24 percent) combined working and attending school at the same time. About one in every ten children 6-17 year-olds were neither involved in economic activities nor at school. The general proportion of children combining school with work activities reduced (from 33 percent to 24 percent) while the proportion exclusively at school increased (from 56 percent to 60 percent).

Table 2.3.13: Percent of Child (6-17 years) activities by Selected Background Characteristics

Year	Activity status	Male	Female	Rural	Urban	Total	Total Number ('000)
2016/17	Working only	6.6	5.7	6.5	4.8	6.1	768
	In school only	59.3	61.0	57.5	70.7	60.1	7,524
	Both in school and working	24.7	23.7	26.5	14.9	24.2	3,025
	Neither in school nor work	9.4	9.7	9.5	9.6	9.5	1,194
	Total	100	100	100	100	100	12,512
2011/12	Working only	5.9	4.9	5.5	4.8	5.4	605
	In school only	54.4	56.5	52.0	77.9	55.5	6,197

	Neither in school nor work	6.0	5.4	5.8	5.0	5.7	639
	Total	100	100	100	100	100	11,448

Source: NLFS 2016/17, UBOS

The estimate of child labour in this section is in accordance with national legislation and includes all at-work 5-11 year-olds, 12-13 year-olds working children except those in light work, and all 14-17 year olds in hazardous work or working excessive hours². As presented in Table 2.3.14, a total of 2 million children (5-17 years) were engaged in some form of child labour in 2016/17. These constituted 15 percent of all children nationally, dropping marginally by one percentage point from 2011/12. Additional characteristics of work that children aged 5-17 years were engaged in during the NLFS 2016/17 are presented in Appendix Table 4J.

Table 2.3.14: Children involvement in child labour by Selected Background Characteristics, 2016/17 and 2011/12

Involvement in child labour	Number				Total
	Male	Female	Rural	Urban	(Percent)
5 -11 years working	13.4	11.9	13.6	8.8	12.6
12 – 13 years	24.1	19.6	23.1	15.8	21.8
14 - 17 years	20.7	13.2	16.6	17.7	16.8

2.3.6 Employment in the Civil Service

Employment in the civil service is composed of persons employed in the traditional civil service, the teaching service (primary and secondary), police, prisons, public universities and staff in Local Governments.

2.3.6.1 Size of the civil service

The average size of the civil service in 2019 was 318,392 persons as indicated in Table 2.3.15. This was an increase of 1.9 percent compared to its size in 2018.

² A list of hazardous forms of work was compiled following the adoption of the National Labour Policy in 2006.

Table 2.3.15: Size of the Civil Service, 2015-2019

Groups	2015	2016	2017	2018	2019		
					Male	Female	Total
Traditional civil service[1]	22,455	22,965	21,734	22,145	10,086	12,476	22,562
Teaching service	164,995	159,690	159,670	159,866	64,331	98,763	162,981
Police and Prisons	49,221	53,078	53,293	52,870	11,284	40,971	52,255

The detailed monthly composition of the size of the civil service is indicated in Appendix Table Statistics Appendix Table Statistics Appendix Table 2.3 K.

2.3.6.2 Average wage bill of the civil service

The results in Table 2.3.16 indicate that the teaching service composed the majority of the civil service in 2018 (51.2%) while the public universities had the least composition of 2.2 percent during 2019. The pattern was similar to that of previous years. However, the share of the average monthly wage bill for teaching service was 39.8 percent, while that of the public universities was 11.9 percent during 2018

Table 2.3.16: Distribution of the Civil Service Groups by Wage bill, 2016 to 2019

2.3.6.3 Sex composition of the civil service

Table 2.3.17 reveals that, overall, the share of females in civil service was 37.5 percent during 2019, and the proportion was almost similar in comparison with 2018. The proportion of females is lower than that of males in all the groups and the gap is widest among the police and prisons group.

Table 2.3.17: Distribution of the Civil Service Groups by sex, 2017 and 2018

Group	2018				2019

2.4 Household Expenditure and Poverty

Consumption Expenditure per Household

This chapter provides an update on the changes in poverty and welfare dynamics using the data available for the Uganda National Panel Surveys (UNPS) for between 2005/6 and 2018/19. The chapter further provides insights into some areas of the study and is intended to provoke further analysis of the data by various stakeholders. The information provided is based on a nationally representative longitudinal data on Ugandan residents and describes the ways in which people's lives changed overtime.

2.4.1 Share of Household Expenditure by item group

The trends in the share of each item group in the total household expenditure including non-consumption expenditure are presented in Table 1.1. The results show that, overall, the largest share of household expenditure has been on food (41.5%), and this has been the case across the waves; followed by expenditure on housing, water, electricity, gas and other fuel (19.4%) and education (6.7%). Rural-urban variations show that the expenditure share of food is higher for rural areas compared to the urban areas (48% and 34% respectively).

Regional variations in the share of expenditures are evident in Table 1.2 as well. Apart from Kampala, the rest of the regions spent over 40 percent of their budget on food. Expenditure on social services like education and health across the regions in the 2018/19 wave shows that Eastern region leads in expenditure on education (9.2%), followed by Western (7.5%) and the least expenditures is observed in the Northern region at 4.4 percent. Considering the 2018/19 wave, the Northern region leads in health expenditures (4.8%), followed by western and eastern regions (4.2%) and least in Kampala at 2.2%. Across all regions, more than 80 percent of the household's expenditure was on food, housing (rent), fuels & energy, transport & communication, education, health then drinks & tobacco. See table (2.4.2)

Table 2.4.1: Percentage Household expenditure shares by broad item group, and Residence

2.4.2 Share of household food by source

Overall, 50 percent of the food consumed in households comes from own production between 2013 and 2016 though this declined to 43 percent in 2018/19 as shown in Figure 2.4.1.

Table 2.4.3 shows that the largest percentage of food (90%) consumed in Kampala are purchased from the market and this is true for urban areas. Consumption out of own production declined by six and 17 percentage points in the Northern and Eastern regions, respectively between 2015 and 2019. Receipts in form of gifts, however, increased by one and five percentage points respectively in the two regions over the same period.

Figure 2.4.1: Trend in Share of food by Source over the years 2013/14, 2015/16, and 2018/19 (%)

2.4.3 Income Mobility - Quintile Analysis

Figure 2.4.1 presents the households position on the welfare distribution from the poorest 20 percent to the richest 20 percent. This finding reveals that the level of mobility was higher among the poorest relative to the richest quintile. For instance, 37 percent of the households remained in the same quintile in both years whereas 32 percent and 31 percent moved to upper and lower quintiles respectively.

Figure 2.4.1: Consumption Expenditure Mobility by Quintile, 2015/16-2018/19(%)

2.4.4 Changes in Income Poverty Status (2015/16-2018/19)

In Uganda, poverty has been measured using monetary methods of welfare such as consumption expenditure. However, the multi-dimensional nature of poverty calls for complementary measures to fully understand poverty. This entails considering a combination of measures of wellbeing for instance material along with education, health, vulnerability and deprivation among others.

Panel surveys have demonstrated that poverty is not static. Instead, poor people and indeed household change their state depending on several factors. Some stay in poverty over an extended period of time while others move into and out of poverty overtime. This section highlights changes in poverty over the panel survey period.

Overall, 8.4 percent of the households moved out of poverty whereas 10.2 percent slipped into poverty. A large percentage (72.9%) of the households was never poor compared with the chronically poor (8.5%). In terms of rural urban divide, the proportion of the chronically poor was more in the rural areas compared to the urban areas (9.7% and 6.8% respectively). A higher percentage (85.0%) of households that were never poor was in urban areas compared with the 66.7 percent of rural areas.

Regional variation shows that the most chronically poor were in the Northern region (21.6%), followed by Eastern region (10.7%), Western (4.9%) and Central (0.5%). The largest proportion of the never poor population was in Central region (91.8%), followed by western region (81.1%), with Northern region at 48.1 percent. The most chronically poor were more likely to be those with no formal education (21.3%), or those with some primary education (9.8%). There was no difference in chronic poverty between female headed and male headed households with male headed household slightly better off. The percentage of adults in chronic poverty was marginally higher than that of youths (8.5% and 7.5% respectively). By occupation, we see that only five in every ten persons in clerical occupation are likely to be never poor compared with nine in ten among the category of professionals. (See table 2.4.4)

Table 2.4.4: Household Poverty Dynamics between the Survey Periods 2015/16 to 2018/19

2.4.5 Household Welfare Correlates

Welfare indicators play a major role in providing reliable data for monitoring changes in the welfare status of various population sub-groups. The findings from the surveys present information on vital needs and living conditions of the same households over two survey periods. The panel rounds of surveys (2015/16 to 2018/19) each asked questions on welfare correlates which were used as proxy indicators for monitoring poverty in Uganda. The welfare indicators measured included ownership of two sets of clothes, blanket and shoes by household members, average number of meals taken per day and action taken when the household last run out of salt.

Possession of Two Sets of Clothes by Household Members

Information was collected on whether every member of the household had at least two sets of clothes. Only clothes in good or average condition were considered and hence tattered clothing worn for work and school uniforms were excluded.

Table 1.5 shows that, on the overall, nine in ten households reported that every member had at least two sets of clothes in all the waves. Male headed households were more likely to have every member of household in possession of two sets of clothes in all the waves compared with their female counterparts.

By residence, households in urban areas were more likely than those in rural areas to possess at least two pairs of clothes in all the waves. The Central, Eastern and Western regions had a higher percentage of households in possession of at least two sets of clothes in all the waves compared with the Northern region.

Table 2.4.5: Possession of at Least Two Sets of Clothes by Background Characteristics (%)

Ownership of Blanket for Children less than 18 Years in the Household

Among the basic necessities of life is ownership of a blanket regardless of whether an individual is an adult or a child (under 18 years). The surveys collected information on whether each child less than 18 years in the household possessed a blanket. Ownership of a blanket only considered those that were not shared (one member per blanket).

Table 2.4.6 shows that four in every ten children owned a blanket. There is no significant difference in households in terms of possession of a blanket by household heads, except in 2013/14 where slightly more children from female headed household owned blankets compared with their male counterparts (46.9% and 42.2% respectively).

Disaggregation by place of residence shows considerable variation between urban and rural areas. In all the waves, households in urban areas were nearly twice as likely to have every child own a blanket compared with their rural counterparts. Regional differences in blanket ownership for children under 18 years for all the waves show that the central region is slightly better with every five in ten children owning a blanket (51.0%), followed by western (33.6 percent). The Northern region lags behind with about two in every ten children owning a blanket (18.3%).

Possession of at Least a Pair of Shoes

Measurement of welfare considers possession of at least one pair of shoes by every household member as one of its key components in the assessment of the household's welfare. Emphasis was put on shoes in good condition excluding gumboots, tyre shoes ('lugabire') and slippers.

The results in Table 2.4.7 show that, overall, in all the waves, more than 50 percent of the households reported that their members had at least a pair of shoes. It is key to note that ownership of a pair of shoes has been increasing over the years though the rate could be slow. In terms of gender of the household heads, more male headed households have every member in possession of at least one pair of shoes in all waves compared to their female counterparts. Within urban households, (70%) are more likely than their rural counterparts to have their members owning at least a pair of shoes. At regional level, the possession of a pair of shoes by household members was highest in Central and Western regions, with fewer proportions reported in the Northern region in all the waves.

Table 2.4.7: Possession of at Least One Pair of shoes by Household Members (%)

Action Taken when Household last run out of Salt

The surveys also sought to understand what action households took when they last run out of salt. Salt is an essential commodity to a household considering that it is affordable to acquire and it's regarded as a good input to indicators measuring welfare of households. The question only applied to households that cooked at home. The action taken when a household last run out of salt has been examined by selected background characteristics as presented in Table 2.4.8.

Overall, 69.5 percent of households indicated that they bought salt when they last ran out of one in 2018/19 compared to the 24.5 percent that borrowed from their neighbours. Comparing the panel waves, we see that the proportion of households that buy salt when they run out has consistently been increasing from 62 percent in the 2009/10 wave to the 70 percent in the 2018/19 wave. On the contrary, the proportion of the households that has been borrowing salt for their neighbours reduced from 36 percent in 2009/10 to 25 percent in 2018/19.

When we consider the sex of the household head, female headed households were more likely to borrow salt from their neighbours than male headed households and the reverse is true among households that buy salt when it's finished. By residence, the practice of borrowing salt is more pronounced in the rural areas compared to the urban areas. Purchasing of salt when finished is more prevalent in urban households compared to the rural counterparts as shown in Table 2.4.8.

Feeding Practices

Many people do not have enough to eat to meet their daily energy needs in many developing countries such as Uganda. An inquiry was made on the average number of meals (including breakfast) taken by household members per day. A meal was considered to be any substantial amount of food eaten at one time. It could be on any one of the usual occasions such as breakfast, lunch or dinner.

Table 2.4.9 shows that, over 50 percent of the households had at least three meals in a day in all the waves except 2010/11 wave where 47.1 percent reported having only one meal a day. Male headed households were more likely to take three meals per day than is the case for female headed households in across all the waves as shown in Table 1.9.

Considering rural-urban stratification, the urban households had more cases of three meals in a day compared to the rural counterparts. In terms of the regions, the Eastern region had more households reporting having eaten at least three meals a day followed by Central region and the Northern region comes last in that order for all waves.

Table 2.4.9: Number of Meals taken per day by place of Residence, region and sex of household head (%)

2.5 Health Statistics

Health statistics include both empirical data and estimates related to health, such as mortality, morbidity, risk factors, health service coverage and health systems. This section presents statistics on some of the key aspects of public health. These include status of healthcare facilities, health human resources, morbidity and other selected health sector performance indicators.

2.5.1 Health Facilities

Health facilities in Uganda include hospitals and health centres (IV, III and II). Figure 2.5.1 shows that the number of functional healthcare facilities has generally increased irrespective of the ownership status, making a total of 6,937 in 2017/18. There was an 8.3 percentage increase in 2017/18 from 6,404 facilities in 2016/17 to constituting 533 additional health facilities.

Figure: 2.5.1: Number of Functional Healthcare facilities by Financial Year and Ownership, 2011/12-2017/18

Note: financial year 2013/14 and 2014/15 had no data available. PNFP includes community owned facilities.

Source: Ministry of Health

The results in Table 2.5.1 show that the distribution of functional health care facilities is not even across the regions of the country, given that 45 percent of the health care facilities are located in the central region. The Western region has the highest number of regional referral hospitals and health centre IVs while the Eastern region has the highest number of health centre IIIs. Between 2016/17 and 2017/18, there was a reduction in the number of health centre IIs and general hospitals while there was a six-fold increase in the number of clinics. Karamoja region has the least number of health facilities (144) followed by the north eastern region.

2.5.2 Human Resources for Health

Table 2.5.2 shows that in the Financial Year 2017/18, the percentage of approved posts filled countrywide in health facilities slightly decreased to 71 percent from 72 percent in 2016/17³. Butabika National Referral Hospital, and the general hospitals recorded the highest increase (6% and 8% respectively). Mulago National Referral Hospital had the greatest decline in the number of approved posts filled (10%) between the FY2016/17 and FY 2017/18.

Table 2.5.3 provides information on staffing levels for critical cadres of human resource for health for the year 2017/18 by established norms in the public sector. Table 2.5.3 shows that staff cadre positions for Clinical officers, Laboratory Staff, Nursing Staff and Midwifery were during FY2017/2018 better filled (104%, 102%, 100% and 94% respectively) than in the previous FY. Gender differentials in the staffing levels in the clinical cadres is observed with the category of midwifery staff being predominately female (94%) and the males being more in the other areas apart from Nursing and Theatre staff.

Table 2.5.3: Staffing Levels for Critical Cadres in the Public Health Sector, 2017/18

Establishment details	Total Norms	Total filled	percent filled	Male	Female	Percent female
Clinical Officers	2,835	2,945	104	2,203	742	25
Laboratory Staff	2,993	3,038	102	2,200	838	28
Nursing Staff	13,141	13,164	100	4,001	9,163	57

Source: Ministry of Health, Human Resources for Health Audit Reports 2017/18. Over 100% is a result of creation of new districts that affect the denominator (total staffing norms) and complementary funding to contract extra health workers

2.5.3 Health Sector financing

The government budget allocation for the health sector as a percentage of the total government budget is shown in Figure 2.5.2. Government allocation on health in the year 2018/19 was 7.2 percent, up from 6.4 percent spent in FY 2017/18. The average expenditure on the health sector in the last nine years stood at 7.9 percent, 2 points short of the Health Sector Development Plan (HSDP) 2015/16-2019/20 target of 9.8 percent and much lower than the Abuja Declaration of 15 percent. Generally, the government budget allocation on health sector shows a downward trend and has no steady pattern

Figure 2.5.2 Government of Uganda health sector allocation as percentage of total government Budget

Source: Ministry of Health, Annual Health Performance reports

Generally, the per capita public health expenditure has been increasing since 2010/11 in Uganda. Figure 2.5.3 shows that per capita health expenditure in 2018/19 was UGX55,339, compared to the UGX51,637 registered in the previous financial year. This is far below the minimum recommended WHO per capita expenditure on health for developing countries (US\$ 84 per capita) per year.

Figure 2.5.3: Per capita public health expenditure, Uganda shillings 2010/11-2017/18

Source: Annual Health Performance reports

2.5.4 Leading Causes of Death

Figure 2.5.4 shows the seven leading causes of death affecting all ages that occurred in health facilities in 2015/16, 2017/18 and 2018/19. There were no reports in FY2016/17. Malaria has been the leading cause of death in all the three financial years, followed by pneumonia. Death due to Injuries, Tuberculosis and hypertension had an upward trend over the three financial years.

Figure 2.5.4: Seven leading causes of death among all ages in health facilities.

Source: Annual Health Performance reports

2.5.5 Maternal Health Care

2.5.5.1 Health Facility based Maternal Mortality

Maternal mortality is the number of women who die due to pregnancy related complications during pregnancy, delivery or 42 days after delivery of a child. Figure 2.5.5 presents the number of maternal deaths based on health facility deliveries. The facility based maternal mortality for 2018/19 was 92 deaths per 100,000 live deliveries, a decline from 104 recorded in 2017/18. Health facility based maternal mortality has been on the decline over the last seven years between 2012/13 and 2018/19.

Figure 2.5.5: Health facility Maternal Mortality in the last seven years

Source: Ministry of Health, Annual Health Sector Performance reports

2.5.5.2 Causes of Maternal Mortality

Figure 2.5.6 shows that haemorrhage still remains the leading cause of maternal illness and mortality in the country, accounting for 46 percent of the deaths in 2018/19 among mothers of reproductive age. This was followed by hypertensive disorders of pregnancy (11 percent). A trend in the causes of maternal mortality could not be provided because there has been a tremendous shift in the causes with haemorrhage being consistent as the lead cause and the other cause re-emerging as major causes.

Figure 2.5.6: Cause of Maternal Mortality in the financial year 2018/19

Source: Ministry of Health, Annual Health Performance reports

2.5.5.3 Health Facility Perinatal death

The World Health Organization (WHO) defines perinatal mortality as the "number of stillbirths and deaths in the first week of life per 1,000 total births". The number of still births is one of the key performance indicators of quality service delivery in the health sector. The number of recorded perinatal death has reduced slightly by 15 percent from 33,589 cases in 2015 to 28,649 cases in 2019.

Figure 2.5.7: Number of health facility perinatal death in Uganda, 2015-2019

Source: Ministry of Health, DHIS 2

2.5.6 Tuberculosis Detection and Treatment

Tuberculosis (TB) is a main cause of illness and death globally, accounting for an estimated 8.8 million new cases and 1.6 million deaths each year. In Uganda, the Ministry of Health has promoted new smear-positive case detection and subsequent treatment of the patients. The TB case detection rate increased from 56 percent in 2017/18 to 78 percent in 2018/19 and this is below the target of 81 percent in 2018/19. While the TB treatment success rate increased slightly to 72 percent after it had dropped to 70 percent in 2017/18 from 80 percent in 2016/17, it is below the HSDP target of 88 percent by 2018/19.

Figure 2.5.8: Countrywide TB detection and Treatment Success Rates 2011/12-2018/19

Source: Ministry of Health, Annual Health Performance reports

2.5.7 Causes of Under-five Health Facility Based Mortality

Malaria has consistently been the leading cause of death among inpatients aged below five years. In 2017/18 malaria accounted for 35 percent of the deaths but had dropped to 19 percent in 2018/19. In the financial years 2017/18 and 2018/19 neonatal conditions that include premature babies and other neonatal conditions have had an upward trend while pneumonia and anaemia have declined. Figure 2.5.7 shows that death due to neonatal conditions was the leading cause of death among inpatient children under age five.

Figure 2.5.9: Top four Leading Causes of under 5 In-Patient Mortality

Source: Ministry of Health, Annual Health Performance reports

2.5.8 New Outpatient Department utilization Rate

This indicator shows the levels of utilisation of Outpatient Department (OPD) healthcare services. It thus examines trends and variations in use of OPD services and allows comparisons between facilities, districts and programs. For the last seven years, the new OPD utilisation rates have remained slightly above the norm of 1.0 percent as observed from figure 2.5.10. In 2018/19 the OPD utilization rate stood at 1.0 percent a reduction from the previous year 2017/18. The year 2018/19 registered the lowest rate of 1.0 percent as was in 2013/14.

Figure 2.5.10: Per capita Outpatient Department Utilization Rate, 2012/13-2018/19

Source: Ministry of Health, Annual Health Performance reports

2.5.8 The cancer burden

Cancer is one of the most common Non Communicable Diseases (NCDs) caused by different risk factors. It has an incidence of 320 per 100, 000 population with 80 percent mortality rate and 20 percent survival rate according to Uganda Cancer Institute. Figure 2.5.11 shows the number of cancer patients diagnosed annually. In the year 2017/18, the number of patients were diagnosed with cancer was 25,365 lower than 41, 574 patients recorded in 2016/17.

Figure 2.5.11: Trends in Cancer burden in Uganda by year 2014/15 – 2017/18

Source: Uganda Cancer registry 2017/18

The results in Figure 2.5.12 show the cancer burden by type of cancer for the last four years and cervical cancer has been the major cause of illness among cancer patients in the country since 2014/15. However, in 2017/18 it declined to 5,170 second to prostate cancer an increase from 14,951 recorded in 2016/17. Others include breast cancer and oral cancer.

Figure 2.5.12: The cancer burden by type of cancer and financial year

2.5.9 Selected Health Sector Performance Assessment

The Ministry of Health has identified a set of indicators to assess the performance of the Health Sector at the Local Government level. Statistical Appendix Tables 2.5A and 2.5B present a trend of selected health sector indicators at district level. The indicators include:

- Deliveries in Government and PNFP health facilities. Arua, Kamwenge, Kiruhura, Kiryandongo, Mpigi, Moyo, Omoro, Sheema, Sironko, Ssembabule and Yumbe noticeably deteriorated in this category.
- Fresh still birth per 1,000 Deliveries. Amudat, Arua, Bugiri, Bukwo, Hoima, Kabarole, Kagadi, Kalangala, Kapchorwa, Kotido, Lyantonde, Mbale, Mubende and Namisindwarecorded an increase in this category.
- Percentage of pregnant women receiving two doses of SP fansidar to prevent malaria. There were declines in Arua, Kiruhura, Lamwo, Moyo and Sheema.
- Pregnant women who had 4 antenatal care visits. A decline was recorded in Arua, Kikuube, Kiruhura, Moyo, Rubirizi, Sheema and Yumbe.

2.5.10 Birth notification in health facilities

Birth notification through the Mobile Vital Registration System (MVRS) is operational in 135 hospitals. Birth notification involves transmission of information via a mobile device to a centralised system or focal individual(s) to report a birth event. It aims at ensuring that no child is left without an official identity and legal protection. Birth registration is the official recording of the birth of a child by the State. Every child born in Uganda has a right to be registered at birth, as recognised inter alia in the Convention on the Rights of the Child of 1989. The National Identification and Registration Authority (NIRA) currently has 117 registration centers for Births, Deaths and Adoptions. Figure 2.5.13 shows that over the last five years birth registration does not match the level of birth notification. The year 2019 had a reduction in both notification and registration compared to 2018.

Figure 2.5.13: Birth Notification and Registration

Source: Uganda Mobile Vital Registration System

2.5.11 Contraceptive use

One of the key interventions in the NDP III towards harnessing Uganda’s human capital is to increase access to family planning services in order to improve population health, safety and management. The contraceptive prevalence rate is

the key indicator for measuring family planning utilisation and is compiled every five years. In the interim, the number of registered family planning users in health facilities is presented in Figure 2.5.14 as illustration of the trend of progress per year. The number of family planning users peaked in 2016 and declined for the following two years and in 2019 there was a 21 percent increase from 2.8 million in 2018. Appendix Table 2.5 C gives the distribution and trend of registered family planning users by district.

Figure 2.5.14: Number of Family planning users in millions, 2015 -2019

Source: ministry of health

2.5.12 Gender Based Violence

Gender Based Violence (GBV) is an umbrella term for any harmful act that results in, or is likely to result in, physical, sexual or psychological harm or suffering to a man, woman, girl or boy on the basis of their gender, resulting from power inequities and power abuse. The NDP III attests the fact that police has invested in mobilising and empowering communities to prevent violence. GBV inflicts on health and can cause: injuries, abortions and sexually transmitted diseases, so health facilities are one of the places that handle survivors of GBV. Figure 2.5.15 shows that the number of GBV cases declined by 25 percent between 2015 and 2019. Appendix Table 2.5 D gives the distribution and trend of GBV survivors who reported to a health facility by district.

Figure 2.5.15: Number of GBV survivors reporting to health facilities, 2015 -2019

2.4 Crime Statistics

Crime statistics are very useful in implementing effective strategies on crime management and its impact on the population. This chapter presents data on various forms of crime and remedial measures as compiled by the Uganda Police Force (UPF) and the Uganda Prisons Service (UPS) respectively.

2.6.1 Annual Crime Rate

The crime Rate is the incidence of crime per 100,000 people. Figure 6.1 shows that in 2019, the Annual Crime Rate (ACR) stood at 551. This means that out of every 100,000 people, 551 were victims of crime in 2019, a slight decrease from the 612 recorded in 2018.

Figure 2.6.1: Trend in Crime rate, 2015-2019

Source: Uganda Police Force

The most common crimes reported between 2015 and 2019 by category are presented in Table 2.6.1. Common assaults were the most reported type of crime by victims. Most forms of crime were on the decrease, with significant decrease (-16.6%) observed for Criminal Trespass crimes.

Table 2.6.1: Leading Crimes by year and category

Crime Categories	2015	2016	2017	2018	2019	Annual %age change 2018 - 2019
Common Assaults	39,180	36,795	30,794	29,735	25,698	(13.6)

Thefts of Cash	9,413	9,095	7,878	7,079	6,471	(8.6)

Source: Uganda Police Force

Table 2.6.2 presents a trend analysis of reported, investigated and prosecuted crimes. The number of crimes reported to Police decreased from 238,746 in 2018 to 215,224 in 2019. However, almost three quarters of the cases (140,414 out of 215,224 crimes) were pending prosecution in 2019.

2.6.2 Victims of Crime

Table 2.6.3 shows that, overall, there were more male (141,939) than female (77,121) victims of crime in 2019. The majority of the victims, regardless of sex, were of general crimes (mainly thefts).

Table 2.6.3: Number of Victims of Reported Crime by Case, Sex and Age Group, 2019

2.6.3 Perpetrators of Crime

As indicated in Table 2.6.4, there were 90,312 adult and juvenile crime offenders recorded in 2019, with the males having a higher proportion than the females in either category. The majority of the offenders of crime (28,952) were involved in theft and only seven offenders each involved in terrorism and corruption.

Table 2.6.4: Number of Offenders/Perpetrators of Crime by Case, Sex and Age Group of Offenders, 2019

2.6.4 Serious Crimes Investigated and Prosecuted

Serious crimes as defined by the UPF include Homicides, Aggravated Robbery, Defilement, Rape, Burglary, Child Stealing and Child Trafficking. Table 2.6.5 shows that of the 46,531 serious crimes that were reported in 2019, only 14,081 were prosecuted.

Table 2.6.5: Serious Crimes Reported by Type, 2017 – 2019

2.6.5 Traffic and Road Safety

This section covers information on traffic crashes, casualties, accident victims, vehicles involved in road accidents, causes of road accidents and the time of the crash.

Reported Road Traffic Crashes

Road Traffic Crashes refer to accidents that could be fatal, serious or minor. An accident is said to be fatal if a death occurs at the scene of the accident and/or within one year as a result of injuries sustained in the accident.

A serious accident is one in which a person is admitted in the health facility as an “in-patient” or sustains injuries like fractures, concussion (temporary unconsciousness or confusion caused by a blow on the head), internal injuries, crashing, severe cuts and lacerations (deep cut or tear in the skin) whether or not one is admitted in the hospital. A minor accident is where no persons are injured at all regardless of the extent of damage on the vehicle.

Table 2.6.6 shows that a total of 12,858 road traffic crashes were recorded by the UPF in 2019. Almost half (46.6%) of the accidents in 2019 were serious.

The total number of road traffic crashes between 2018 and 2019 increased by 0.4 percent. The increase was as a result of an increase in the number of fatal accidents, whereas the minor and serious accidents recorded a decrease of 1.9 percent and 1.5 percent respectively.

Table 2.6.6: Reported road traffic crashes by outcome of crash, 2015 – 2019

Outcome	2015	2016	2017	2018	2019	Percentage Share for 2019	2018 -2019 Percentage change
Fatal	2,749	2,981	3,051	3,194	3,407	26.5	6.7
Serious	9,422	7,153	6,530	6,085	5,992	46.6	(1.5)
Minor	6,324	4,340	3,663	3,526	3,459	26.9	(1.9)
Total	18,495	14,474	13,244	12,805	12,858	100	0.4

Source: Uganda Police Force

Number of Road Accidents by Region

As presented in Table 2.6.7, Kampala Metropolitan South had the highest number of road accidents (2,587). This could be attributed to the high population of road users within the city set up. Kidepo and Sipi on the other hand had the least number of road accidents (41 and 46 respectively).

Table 2.6.7: Accident Distribution by Region in 2019

Region	Fatal	Serious	Minor	Total
Kampala Metropolitan South	246	1,130	1,211	2,587

Accident Severity Index

The Accident Severity Index is defined as the number of persons killed per 100 accidents. It is used to measure the seriousness of an accident. For every fatal or serious road traffic crash there are victims who are referred to as casualties.

Table 2.6.8 indicates that there were a total of 14,690 Casualties reported in 2019, an increase by 1.9 percent from the number of traffic casualties reported in 2018. In every 100 accidents that occurred, 26 persons died in 2019. Table 2.6.8 further indicates that most casualties (65.6%) in 2019 survived with serious injuries.

Table 2.6.8: Number of Road Traffic Casualties by Outcome of Crash, Accident Severity Index and Years

Outcome	2015	2016	2017	2018	2019	Percentage Share 2019	2018 -2019 Percentage change
Killed	3,224	3,503	3,500	3,689	3,880	26.4	5.2
Serious injury	13,736	10,981	10,420	9,541	9,635	65.6	1.0

Accident Victims

Table 2.6.9 indicates that in 2019, of the 14,690 road accident victims, passengers constituted the highest number (5,927) followed by Motorcyclists (3,796). Overall, the number of accident victims increased from 14,418 in 2018 to 14,690 in 2019.

Table 2.6.9: Number of Accident Victims by Road User Type, 2015 – 2019

Road user Type	2015	2016	2017	2018	2019
Passengers*	7,241	6,112	5,674	5,771	5,927

Timing of Road Accidents

Table 2.6.11 indicates that majority (25.8%) of road accident crashes occurred between 4:00pm-7:59pm in 2019. Occurrence of the least road accident crashes was recorded between midnight and 3.59am. This could be partly attributed to the low number of road users during such hours.

Table 2.6.11: Number of Crashes by Category and Time of Occurrence, 2019

Time	Fatal	Serious	Minor	Total	Percentage Share 2019
12.00 mid night - 3.59am	323	381	281	985	7.7
4.00am-7.59am	412	609	438	1,459	11.3

Vehicles Involved in Crashes on the Road

Table 2.6.12 shows that a total of 18,978 vehicles were involved in road accident crashes in 2019, compared to 18,526 vehicles reported in 2018. Of the vehicles involved in the crashes in 2019, motor cars and motor cycles were more affected compared to other vehicles.

Table 2.6.12: Number of Road Accidents by Type of Vehicles and Year

Type of Vehicle	2015	2016	2017	2018	2019
Motor cars	9,514	6,815	6,251	5,690	5,972

Causes of Road Accidents

From Table 2.6.13, careless driving and Reckless/dangerous driving were the major causes of road accidents, with a combined share of 79.7 percent.

Table 2.6.13: Number of Road Accidents by Causes, 2015 – 2019

Causes of Accidents	2015	2016	2017	2018	2019	Percentage Share 2019	Percentage change in 2018 - 2019
Careless Driving	8,048	6,567	5,698	5,541	5,162	40.1	-6.8

Express Penalty Scheme

The Express Penalty Scheme (EPS) was introduced in 2004 under Section 165 of the Traffic and Road Safety Act 1998 (TRS Act, 1998) to help Police manage minor traffic offences and offenders. A total number of 197,529 tickets were issued on the Express Penalty Scheme (EPS) in 2017, as presented in Table 2.6.14.

Table 2.6.14: Number of Tickets and amount paid (Uganda millions Shillings) on the express penalty scheme, 2013-2017

Year	Tickets issued	Amount paid (million)
2013	283,114	7,205
2014	188,792	9,628
2015	180,433	7,412
2016	218,287	14,806
2017	197,529	2,201

2.6.6 Prison Statistics

Prison Population

The Uganda Prisons Service compiles information on prisoners by category. These prisoners are categorised broadly into two. There are Criminal (prisoners on remand and those convicted) and Civil Prisoners (Debtors). Table 2.6.15 reflects a decrease in the percentage change in the total prison population from 13.9 percent in 2018 to 7.9 percent 2019. Additionally, 53.3 percent of the Prisoners in 2019 were convicted whereas about one percent of the prison population was as a result of failure to pay their debts. The Incarceration Rate which has been on the increase since 2014 stood at 151 prisoners per 100,000 persons in 2019.

Table 2.6.15: Prison Population by Category, 2015 – 2019

Category	2015	2016	2017	2018	2019	Percentage
CRIMINAL PRISONERS						
Remand	24,803	26,266	25,021	27,040	27,897	46.7

Source: Uganda Prisons Services

*A debtor is an individual who for failure to pay their debts has been committed to prison.

**The incarceration rate is the number of prisoners per 100,000 population.

Table 2.6.16 shows that about 97.4 percent of the prisoners in Uganda were Ugandan citizens. Rwandese accounted for 42.1 percent of the foreign nationals in the prisons, followed by Congolese. Other foreign nationals in the prisons included Somalis (less than 1%). The prison population also had Non-Africans (1.2%). See Appendix Table 2.5A

Table 2.6.16: Number of Prisoners by Category, Sex and Nationality, 2019

Table 2.6.17 shows the number of prisoners by category, sex and age group. The table shows that over 95 percent of the prisoners were male. The majority of the prisoners were convicted (52.9%) but one percent were debtors.. Age group differentials showed that most prisoners (47.1 percent) were aged 21-30 years while persons aged 60 or more years accounted for two percent.

Table 2.6.17: Number of Prisoners by Category, Sex and Age group, 2019

Age Group	Convicts			Remands			Debtors			National	(%)

Prisoners on Rehabilitation

While in prison, prisoners undergo rehabilitation such as education training (both formal and informal), skills development, as well as guidance and counseling so that they are transformed into better citizens that can adapt to life outside prison once they complete their sentence or are released from jail. Table 2.6.20 shows that 23,145 prisoners were undergoing rehabilitation in 2019.

Table 2.6.20: Number of Prisoners on Rehabilitation, 2019

Programme	Males	Females	Total
Formal Education			
Completed PLE (2019)	152	23	175
Completed UCE (2019)	72	6	78

Recidivism

Recidivism is the number of re-offenders expressed as a percentage of the total number of convicts admitted in a given period. Figure 2.6.2 shows that over time, the recidivism rate has declined from 26.0 percent in 2013/14 to 15.6 percent in 2018/19. This means that the number of habitual criminals is reducing.

Figure 2.6.2: Trend in Recidivism Rate, 2013/14 – 2018/19

Source: Uganda Prisons Service

Table 2.6.21 shows that most recidivists were in the category of rogues and vagabonds (26.0) the F/Y 2018/19. This was an increase from 22 percent during the F/Y 2017/18.

Table 2.6.21: Recidivism rate by offences committed in FY 2018/19

OFFENCES	2017/18			2018/19		
	Total Admns	Recidivists	Recidivisms rate (%)	Total Admns	Recidivists	Recidivisms rate (%)

Prison Capacity and Occupancy rate

Overcrowding in prison cells is a serious violation of prisoners' constitutional human rights since prisoners are entitled to a healthy environment. Prison capacity refers to the number of inmates a prison can hold within a space of 3.6m². Table 2.6.22 shows high levels of overcrowding in prison cells across all regions in the country. The national Occupancy Rate has been increasing over the years as seen in Table 2.6.22, bringing the value to 346 percent in 2019 and implying that 346 prisoners occupied a space meant for 100 prisoners. The details are given in statistical Appendix Table 2.6.B.

Table 2.6.22: Prison Capacity and Occupancy Rate by region, 2015 -2019

Region	Prison Capacity					Occupancy Rate

Babies staying with their Mothers in Prison

Babies need their mothers even when the mother is in jail. This is because the child needs to breastfeed and develop those early bonding attachments with their mother. In the year ending 2019, a total of 223 babies were staying with their mothers in prison. Figure 2.6.3 indicates the percentage distributing by region of the babies staying with their mothers in prison, with Central region contributing the highest proportion (33.6%) while the least was in the Eastern region (19.7%).

Figure 2.6.3: Distribution of babies staying with their mothers in prison by region, 2019

Source: Uganda Prison Services

Prison Staff strength

Prison staff are categorised as either Uniformed or Non-uniformed. Uniformed staff are those who have received specialised prisons service training and, therefore, wear the UPS uniform while Non-uniformed staff are civilians who have not received the specialised training but are either recruited directly into the service or transferred from other sections of the general public service. In 2019, the Uganda Prison Force had a total of 9,387 staff of whom 3 in every 10 were females. The distribution of staff by category is shown in Table 2.6.23.

Non-Commissioned Officers (NCOs) were the majority (7,965) among Uniformed Staff while Junior Officers (360) were the majority among the non-uniformed staff.

Table 2.6.23: Number of Prison staff by category and sex, 2019

Deaths in prison

Convicts and prisoners on remand are exposed to several health and socio-economic changes that may affect their well-being and life span while in jail. These include feeding status, access to medical treatment when sick, relationship with inmates and psychological torture, among others. Overall, Table 2.6.24 shows a decrease of 6.3 percent in the proportion of prison deaths from 2018. Details on the number of deaths in prison by district and sex are in Appendix Table 2.6C.

Table 2.6.24: Trend in death of prisoners by sex, 2015-2019

CHAPTER THREE

Production Statistics

3.1 Agriculture and Fisheries

This section presents statistics on food crop area and production, selected cash crop production, livestock, livestock products and fish catch.

3.1.1 Major Cash Crops

The traditional cash crops of Uganda include Coffee (robusta and Arabica), Tea, Cotton and Tobacco. Over the years, Robusta coffee has been produced in more quantities compared to Arabica coffee (also known as mountain coffee). In 2019, there was an increase in the volume of coffee produced from, 285 thousand tonnes to 313 thousand tonnes. However there was also an increase in the volumes of tea and cotton produced. Tea production increased by 43 percent in 2018 to 74 thousand tonnes and reduced to 60 thousand tones in 2019 while Cotton production increased to 38 thousand tonnes in 2019 from 32 thousand tonnes produced in 2018 hence registering 19 percent increment and declined to 33 thousand tonnes in 2019. Statistical Appendix Table 3.1 A presents coffee, cotton and tea produced for the period 2014 – 2019.

Figure 3.1.1: Cotton, Tea, and Coffee Production ('000 Tonnes), 2016-2019

3.1.2 Area and production of Food Crops, 2018

Uganda grows several food crops, of which 16 are major according to the Uganda Census of Agriculture (UCA) 2008/09. These include Maize, Millet, Sorghum, Rice, Cassava, Sweet potatoes, Irish potatoes, Beans, Cow peas, Field peas, Pigeon peas, Groundnuts, Soya beans, Simsim, Plantains and Coffee. Area under major crop groups in 2019 was as follows: Cereals (3.4M Ha), Roots and Tubers (2.4M Ha), Banana Food (668,000 Ha), Groundnuts and soya beans (896,000 Ha) and Beans (1 M Ha). Area planted under oil crops increased by 27.1 percent while area planted under root crops and pulses reduced by 1.0 percent and cereals by 2.4 percent.

In 2019, the production of plantains, specifically matooke, increased from 6.2 Million Metric Tonnes (MT) to 8.3 Million MT in 2019 hence registering a 28.2 percent increase. In addition, cereal production, i.e. maize, rice, sorghum, and millet increased from 4.1MT in 2018 to 4.3MT in 2019 (4.9%). There was a reduction in beans production from 727,652 MT to 627,000 MT in 2019 (13.8%). Groundnuts and Soya beans production increased by 19.3 percent and 8.7 percent respectively. See Statistical Appendix Table 3.1C

Figure 3.1.2: Production Volumes for Selected Crops (000'Tonnes), 2018-2019

Crop Area and Production by region and district, UCA 2008/09

Results from the UCA 2008/09 showed that the Eastern region was the biggest producer of Finger millet (106,838 tonnes), Maize (1,108,554 tonnes), Rice (128,195 tonnes), Sweet potatoes (847,140 tonnes) and Cassava (1,061,186 tonnes). The Northern region led in the production of Sorghum (177,088 tonnes), Field peas (10,428 tonnes), Pigeon peas (11,031 tonnes), Groundnuts (83,182 tonnes), Soyabeans (15,727 tonnes) and Simsim (93,562 tonnes) while the Western region led in the production of all types of Banana (2,883,648 tonnes) and Beans (411,945 tonnes).

In terms of districts and within regions, the highest plantain Banana production in the country was reported in the district of Isingiro (601,363 tonnes). The districts with the highest production of plantain Banana in the Central, Eastern, Northern and Western regions were Mubende (204,109 tonnes), Mbale (99,011 tonnes), Arua (17,106 tonnes) and Isingiro (601,363 tonnes) respectively.

The highest Maize production in the country was reported in the district of Iganga with 303,262 tonnes. The districts with the highest production of Maize in the Central, Eastern, Northern and Western regions were Mubende (171,089 tonnes), Iganga (303,262 tonnes), Adjumani (47,264 tonnes) and Kabarole (91,318 tonnes) respectively.

The highest Sweet Potatoes production in the country was reported in the district of Iganga with 270,853 tonnes. The districts with the highest production of Sweet Potatoes in the Central, Eastern, Northern and Western regions were Nakasongola (66,419 tonnes), Iganga (270,853 tonnes), Gulu (61,732 tonnes) and Kyenjojo (40,148 tonnes) respectively.

The highest Cassava production in the country was reported in the district of Apac with 239,932 tonnes. The districts with the highest production of Cassava in the Central, Eastern, Northern and Western regions were Masaka (64,965 tonnes), Tororo (174,962 tonnes), Apac (239,932 tonnes) and Hoima (60,932 tonnes) respectively.

Ntungamo district reported the highest Beans production in the country (137,899 tonnes). The districts with the highest production of Beans in the Central, Eastern, Northern and Western regions were Mubende (78,027 tonnes), Mbale (23,637 tonnes), Amuru (74,671 tonnes) and Ntungamo (137,899 tonnes) respectively.

The highest Groundnuts production in the country was reported in the district of Soroti (19,599 tonnes). The districts with the highest production of Groundnuts in the Central, Eastern, Northern and Western regions were Nakasongola (19,183 tonnes), Soroti (19,599 tonnes), Amuru (14,375 tonnes) and Kibaale (12,473 tonnes).

Table 3.1.1 (a): Crop Area and Production by region, UCA 2008/09

Disposition of Cereals (UCA 2008/09) and other crop production

The three most common types of disposition for cereal crops include their being sold, consumed or stored. The biggest percentage of Maize production (40.5 percent) and Rice production (54.5 percent) was sold while most of the Finger millet (37.7 percent) and Sorghum (46.9 percent) were consumed by the households.

Table 3.1.2: Cereal production (Mt) and disposition (UCA 2008/09)

Crop	Production (Mt)	Percentage disposition			
		Sold	Consumed	Stored	Used for other purposes
Maize	2,361,956	40.5	34.3	19.3	3.5
Finger millet	276,928	19.0	37.7	33.5	9.8
Sorghum	375,795	14.3	46.9	30.1	8.6
Rice	190,736	54.5	24.1	12.4	8.3

3.1.3 Fish catch by water body

Fisheries activities are mainly carried out in open water sources and provide an important source of livelihood for many people in Uganda. Open Water covers 37,495.81 square square kilometres of Uganda’s total surface area (15.5 percent). Lakes Victoria, Albert and Kyoga are the three major contributors to fresh water fish production in the country.

Since 2017, Lake Albert has continued to be the biggest contributor to fresh water fish production, accounting for 43.0 percent in 2018. This surpassed Lake Victoria (39.9%) which was the biggest contributor in the earlier years for the period under review while Lake Kyoga was the third largest contributor to fish catch (11.6%) as shown in Figure 3.1.3 and Table 3.1.E.

Figure 3.1.3 F: Proportion of fish catch by water body, 2018

Table 3.1 E: Fish catch by Water Body ('000'tonnes), 2014 – 2018

Water Body	2014	2015	2016	2017	2018
Lake Victoria	245,000	238,630	252,804	133,231	138,037
Lake Albert	152,000	149,040	148,159	171,767	148,640
Lake Kyoga	38,000	41,768	40,710	41,540	40,133
Lake Edward, George, & Kazinga Channel	6,246	6,354	6,638	3,070	3,074

Lake Wamala	4,590	4,186	3,959	5,062	4,303
Other Waters	10,500	9,760	9,883	9,320	8,820
Total	461,726	454,860	467,528	366,531	345,803

Source: Fisheries Department, Ministry of Agriculture, Animal Industry and Fisheries (MAAIF).

3.1.4 Livestock

The number of cattle increased from 14.2 million in 2017 to 14.6 million in 2018, registering a 2.7 percent increase. In 2018 the goat, sheep, pigs and poultry numbers increased by 2.4 percent, 3.1 percent, 3.3 percent and 2.8 percent compared 2017 increase of 1.97, 3.20, 0.54 and 2.8 to respectively as shown in Fig 3.1.4 A and Statistical Appendix Table 3.1 F

Figure 3.1.4 A: Livestock Numbers 2016- 2018

Source: MAIF

Number of Cattle and Poultry by breed in 2014 - 2018

The indigenous breeds continue to be dominant over the exotic ones for both cattle and poultry, as seen in Table 3.1.3. Out of the 14.6 million cattle in Uganda, 9 in every 10 (13.6 million) are indigenous. And out of the 42.9 million poultry in the country, (87.7%) were indigenous while the rest were exotic (Table 3.1.3).

3.2 Industry Statistics

3.2.1 Index of Production (Manufacturing)

The Index of Production (IoP) for the manufacturing sector measures changes in the volume of goods produced by the manufacturing sector in the economy. Monthly data are compiled from manufacturing establishments that contribute about 80 percent of the manufacturing value added. The index is computed for eight broad categories as shown in Table 3.2.1 and the details shown in Statistical Appendix Tables 3.2 A (i) and (ii). The overall, Index of Production for manufacturing sector recorded 276.27 for the year 2019 as compared to 275.95 in 2018. See Table 3.2.1.

Table 3.2.1: Index of Production, Annual Production levels (2002=100), 2015 – 2019

Description	Weight	Years					Annual Percentage Changes	
		2015	2016	2017	2018	2019	2019	2018
Total Manufacturing	1,000	224.34	234.67	245.24	275.95	276.3	0.1	13.3
Food Processing	400	193.35	211.57	203.37	259.3	233.5	-10.0	28.3
Drinks & Tobacco	201	290.07	282.89	313.34	331.97	360.9	8.7	7.9
Textiles, Clothing & Foot Wear	43	125.93	153.37	166.97	165.61	155.7	-6.0	-0.8

Bricks & Cement	75	289.3	290.01	295.26	336.43	345.5	2.7	13.9
Metal Products	83	166.97	162.94	169.4	154.69	150.5	-2.7	-9.2
Miscellaneous	66	200.09	214.24	204.58	230.62	239.9	4.0	14

Source: Uganda Bureau of Statistics

Table 3.2.2 shows that the volume of production for the manufacturing sector in general recorded a 0.1 percent increase in 2019 from a 13.3 percent increase in 2018. This was due to a significant increase in categories of Drinks and Tobacco (8.7%) and Chemicals, Paint, Soap & Foam Products (16.5%). However, there were significant decreases in 'Food Processing' and 'Sawmilling, Paper and Printing' categories (10.0% and 10.5%) respectively. See Table 3.2.2.

Table 3.2.2: Index of Production, Annual Percentage Changes (2002=100), 2015 – 2019

Description	Weight	2015	2016	2017	2018	2019

3.3 ENERGY

Introduction

This section presents statistics on locally produced or imported energy sources and their use in Uganda. The section also provides statistics and information on import and sales of petroleum products as well as generation, distribution and prices of electricity in the country.

3.3.1 Import of Petroleum products

The main petroleum products include Petrol (PMS), Diesel (AGO), Kerosene (BIK) and Jet fuel. The total Import of petroleum products increased by 4.5 percent in 2019 compared to 2018, from 2,103,939 cubic meters in 2018 to 2,198,739 cubic meters in 2019. Analysis by product shows that the import volume of petrol and Diesel increased by 8.2 percent and 4.9 percent respectively, while, jet fuel and Kerosene reduced by 18.8 percent and 7.3 percent respectively in 2019 compared to 2018 as shown in Table 3.3.1.

Table 3.3.1: Annual imports of petroleum products (cubic meters), 2015-2019

YEAR	2015	2016	2017	2018	2019	Annual Percentage volume changes
AGO	807,772	857,031	945,084	982,220	1,030,058	4.9
PMS	754,398	811,712	894,072	930,542	1,006,824	8.2
JET FUEL	-	120,902	125,962	133,519	108,391	-18.8
BIK	60,346	59,874	56,527	57,658	53,466	-7.3
TOTAL	1,622,516	1,849,520	2,021,645	2,103,939	2,198,739	4.5
Annual percentage Changes	0	14.0	9.3	4.1	4.5	0

3.3.2 Petroleum Sales

A total of 2.2 billion litres of selected petroleum products were sold in 2019, reflecting a 3.7 percent increase compared to 2.1 billion litres of sale in 2018. The product with the highest sold was AGO (diesel), accounting for 46.4 percent, followed by Petrol (PMS) with 45.4 percent, Jet Fuel (5.9%) and BIK (Kerosene) with 2.4 percent.

Annual performance by product showed that the highest increase in sales was in Petrol (PMS) with 9.1 percent, followed by diesel (1.84%) while BIK (Kerosene) and Jet Fuel registered the decrease in sales (12.99% and 10.1% respectively) in 2019 compared to the fuel sales of 2018 (Table 3.3.2).

Table 3.3.2: Annual sales of selected petroleum products in million litres, 2015-2019

Petroleum Product	2015	2016	2017	2018	2019	Annual percent Change	Percentage contribution of sales during the year
Petrol	780	795	904	926	1010	9.0	45.4
Diesel	827	870	937	1013	1031	1.8	46.4
Kerosene	61	57	56	60	53	-13.0	2.4
Jet Fuel	133	125	128	145	130	-10.1	5.8
Total	1801	1848	2024	2144	2224		
Annual percentage Change		2.6	9.5	5.9	3.7

3.3.3: Annual Average Retail Prices for Petroleum Products

Table 3.3.3 shows that there was a general increase in the price level of petroleum products in 2019 compared to 2018 prices. Analysis by products shows that there was a 2 percent increase in the average price of Petrol and 5 percent increase for both Diesel and Kerosene from 2018 (Table 3.3.3).

Table 3.3.3: Average Retail Prices per litre of selected Petroleum Products (Ugx), 2015-2019

Product	2015	2016	2017	2018	2019
Petrol	3,592	3,366	3,549	4,023	4,085
Annual %age change	-3.0	-6.3	5.4	13.4	1.5
Diesel	2,891	2,640	3,022	3,590	3,777
Annual %age change	-10.0	-8.7	14.5	18.8	5.2
Kerosene	2,684	2,475	2,574	3,005	3,142
Annual %age change	-6.0	-7.8	4.0	16.7	4.6

3.3.3 Electricity

3.3.4.1: Installed Capacity

Installed capacity is the maximum output of electricity that a generator can produce under ideal conditions. The total installed capacity of electricity power sources increased by 27.5 percent from 983.55MW in 2018 to 1254.007MW in 2019 as shown in Table 3.3.4. This increase was as a result of the commissioning of new small hydro power generating plants by 35.0 percent and 24.5 percent increase in Solar Power generating plants (These new plants include Isimba HPP, Siti II Small Hydro Power, Achwa II and Emerging Power U Ltd (Mayuge/Bifulubi) as shown in Appendix Table 3.3B.

Figure 3.3.4: Installed Capacity (MW), 2015 – 2019

Power Source	2016	2017	2018	2019	Annual Percentage Change by Power source
Total Installed Capacity	895.5	937.8	983.55	1,254.00	27.5
Hydro Electricity	695	706.8	743.88	1,004.20	35.0
Thermal Electricity	136	136	101.6	101.6	0.0
*Bagasse Electricity	64.5	76.4	96.2	96.2	0.0
Solar PV	-	18.6	40.83	50.8	24.4
Biomass			1.04	1	-4.1
Total	895.5	937.8	983.55	1,253.00	27.5
Annual Percentage Change	0	4.7	4.9	27.5	

Source: Electricity Generating Authority

3.3.4.2 Electricity Generation, Purchased and Sold.

Electricity Generated refers to the amount of electricity that a generator produced over a specific period of time. Figure 3.3.1 shows that the total amount of Electricity generated increased by 9.2 percent from 4,038.8 GWh in 2018 to 4,410.9 GWh in 2019 whereas the total number of units of electricity purchased by Uganda Electricity Transmission Company (UETCL) from the generating companies increased by 7.5 percent from 4,078 GWh in 2018 to 4,384 GWh in 2019. The total number of units of electricity sold by Uganda Electricity Transmission Company increased by 7.5 percent from 3,929 GWh in 2018 to 4,225 GWh in 2019. For details, see Appendix Table 3.3C, Table 3.3D and Table 3.3E.

Figure 3.3.1: Total Units of Electricity Generated, Purchased and Sold (GWh), 2015-2019

3.3.4.3: Number of Electricity Consumers

Figure 3.3.6 shows that the total number of electricity consumers in 2018 increased by 14.6 percent from 1,372,166 consumers to 1,572,605 consumers in 2019. This was due to an increase in UMEME customers by 14.0 percent, Kyegegwa Rural Electricity Cooperative Society (KRECS) by 57.7 percent and the North West Service Territory (Nwst) by 22.6 percent as shown in Figure 3.3.6 below. For more details, see Statistical Appendix Table 3.3 G.

Figure 3.3.6: Total Number of Electricity Consumers, 2015-2019

3.3.4.4 Annual Average Weighted Tariffs,

Figure 3.3.7 shows that the annual average weighted domestic tariff increased by 1.9 percent from 663.2 Ug.Shs/kwh recorded in 2018 to 675.5 Ug.Shs/kwh in 2019. Additionally, the annual average weighted commercial tariff increased by 1.3 percent from 623.9 Ug.Shs/kwh in 2018 to 631.8 Ug.Shs/kwh in 2019. Furthermore, the annual average weighted industrial tariff decreased by 2.2 percent from 378.9 Ug.Shs/kwh in 2018 to 370.6 Ug.Shs/kwh in 2019. For more details, see Statistical Appendix Table 3.3G, Table 3.3H and Table 3.3I

Figure 3.3.7. The annual average Weighted Domestic, Dommercial and large Industrial Tariffs from 2015 to 2019 in Ugx/kWh .

3.4 Building and Construction Statistics

3.4.1: Building Statistics

This section presents statistics on building plans submitted, approved, deferred or rejected and occupational permits issued in the country from selected Town Councils and Municipalities for the period of 2015 to 2018.

Buildings are classified on the basis of their purpose. The buildings are either residential, commercial or mixed- use (both residential and commercial on the same building), industrial, institutional and other use. Residential buildings include apartments, bungalows and dormitories. Commercial buildings include warehouses, shops, shopping malls, gas stations, markets, pharmacies, offices and supermarkets. Industrial buildings include factories, food mills, sawmills, power plants, bakeries and breweries. Institutional buildings include libraries, college, child development, primary/secondary schools, institutes, universities, hospitals, health centers, nursing home, clinics, Police, Barracks and Prisons. Other structures include banks, youth/child centers, museums, court halls, churches, mosques, temples, shrines, beauty salons, gym, sports club and those not anywhere categorized.

Data was collected from twenty five (25) Municipalities and sixty (60) Town Councils in 2014, twenty five (25) Municipalities and sixty (60) Town Councils in 2015, thirty five (35) Municipalities and ninety (90) Town Councils in 2016, 40 Municipalities and 115 Town Councils in 2017, thirty nine (39) Municipalities and 156 Town Councils in 2018 and 50 Municipalities and 230 Town Councils in 2019. This shows an increase of 129.4% in coverage in Town Councils and Municipalities since 2014 because more small urban centers have been upgraded to Town Councils or Municipalities. Details are shown in tables 3.4.b to 3.4 e in appendix.

3.4.2: Building Plans submitted

During 2019, the majority of Building Plans submitted were for residential structures (59.1%), followed by commercial structures (28.8%) and institutional structures (3.7%) while other building categories registered less than 2 percent (Figure 3.4.2. and Appendix Table 3.4.1).

Figure 3.4.2: Percentage Distribution of Plans Submitted to selected Municipalities and Town Councils

3.4.3: Plans Approved

Statistics on Building Plans Approved in 2019 show that 58 percent were Residential buildings, 29.7 percent were Commercial buildings, 5.4 percent were mixed-use and 4.0 percent were Institutional buildings. Comparing plans approved in 2018, 57.7 percent were residential buildings, 29.5 percent were commercial building, 5.3 percent were for mixed-use while 4.0 percent were institutional plans. The Industrial building categories registered less than 2 percent in both 2019 and 2018 as shown in Figure 3.4.3 and Appendix Table 3.4 b

Figure 3.4.3: Percentage Distribution of Plans Approved in selected Municipalities and Town Councils

3.4.4: Occupational Permits Issued

An Occupation Permit is a certificate of occupancy issued by the Local Government certifying a building's compliance with applicable building codes and laws, qualifying it to be in a condition suitable for occupancy. In 2019, 77.0 percent of all the Occupation Permits were for Commercial buildings, almost nine percent were for Residential Buildings while four percent were for Industrial buildings (Fig 3.4.4 and Appendix Table 3.4c).

Figure 3.4.4: Percentage Distribution of Occupation Permits issued by selected Urban Councils

3.4.5: Plans Deferred

Deferred plans refer to submitted plans that are returned to the owners when they miss some details such as a land title. Of all plans deferred in 2019, almost seventy percent were for Residential buildings while 18.6 percent were for Commercial buildings (Figure 3.4.5 and Appendix Table 3.4d).

Figure 3.4.5: Percentage Distribution of deferred plans by Urban Councils in 2019

3.4.6 Plans Rejected

Rejected plans are plans that are completely disallowed for example if the proposed building is to be constructed in a wetland or forest reserve or does not have parking for vehicles. Figure 3.4.6 shows that of all plans rejected in 2019, 40.3 percent were for residential buildings while 35.3 percent were for commercial buildings. Details are shown in Appendix Table 3.4 e

Figure 3.4.6: Percentage Distribution of Rejected plans by Urban Councils in 2019

3.4.7 Cement Consumption

Table 3.4.7 shows the Production, Imports, Exports and Net Domestic Supply (NDS) of cement in the economy. Total Net Domestic Supply of cement registered a 21 percent increase in 2019, with 2,684.8 thousand tonnes from 2,217.1 thousand tonnes in 2018. Cement imports decreased to 13.6 thousand tonnes in 2019 from 52.7 thousand tonnes in 2018, while Exports increased to 400.7 thousand tonnes in 2019 from 392.9 thousand tonnes in 2018 representing a 1.9 percent increase.

Table 3.4.7: Production, Imports, Exports and Net Domestic Supply of Cement ('000 Tonnes)

	2015	2016	2017	2018	2019
Production	2,330.5	2,493.5	2,510.5	2,557.2	3,071.8
Imports	335.1	307.8	284.3	52.7	13.6
Exports	431.5	359.3	296.3	392.9	400.7
Net Domestic Supply (NDS)	2,234.2	2,442.0	2,498.5	2,217.1	2,684.8
Annual percentage Change in NDS	8.8	9.3	2.3	(11.3)	21.1

3.5 Mineral Statistics

This section presents statistics on production of minerals in Uganda. Mineral statistics are categorised into two - metallic minerals and non-metallic minerals.

Metallic minerals are those that contain metals in their chemical composition and are a potential source of metal while non-metallic minerals are the others that do not contain extractable metals in their chemical composition.

3.5.1: Mineral Production by Quantity

During 2019, there was an increase in the production of Limestone by 5 percent. However, the rest of the minerals experienced decline in production. For instance, production of Tin reduced by 72 percent, Gold by 41 percent, Kaolin by 40 percent and Wolfram by 23 percent (Appendix Table 3.5.1).

Table 3.5.1: Annual mineral Production by Quantity (Tonnes), 2015-2019

Mineral	2015	2016	2017	2018	2019	2018-2019 Percentage Changes
Non Metallic						
Limestone	979,660	1,203,074	1,231,926.00	894,001	942,477	5.4

Source: Ministry of Energy and Mineral Development

3.5.2: Mineral Production by Value

The Table 3.5.2 below shows the value of production for selected minerals in Uganda from 2015 to 2019. The results show that there was a 1.9 percent decrease in the total value of the minerals produced, from 151 billion shillings in 2018 to 148 billion shillings in 2019. This was mainly contributed by decreases in the production of Tin by 54.7 percent, Kaolin by 39.5 percent and Wolfram by 23.1 percent. See table 3.5.2

Table 3.5.2: Annual value of Mineral Production Value (UGX '000,000), 2015 – 2019

Mineral	2015	2016	2017	2018	2019	Contribution by product in 2019	2018-2019 Percentage Change
Non Metallic

3.6 Transport and Communication Statistics

This section presents Transport and Communication statistics. The statistics provided on transport include road, water, rail and air services, while those on communication include Internet subscription, post and telecommunications and Mobile Money transactions.

3.6.1 Newly registered motor vehicles

Registration of new vehicles is conducted by the Uganda Revenue Authority for private vehicles while the Ministry of Works and Transport (MoWT) registers Government owned vehicles.

Table 3.6.1 presents statistics on newly registered motor vehicles and motorcycles from 2015-2019 for privately owned vehicles. Overall, the number of newly registered motor vehicles and motor cycles increased by only 0.1 percent in 2019 compared to 1.4 percent increase in 2018.

Table 3.6.1 Private Newly registered motor vehicles / Motorcycles from 2015-2019

Category	2015	2016	2017	2018	2019
Newly Registered Cars	43,337	33,750	42,005	43,764	38,182

3.6.2 Transport Licensed Vehicles for Public Use.

During 2019, there was a notable increase in the vehicles licensed to transport tourists by 17.6 percent, from 501 in 2018 to 589 in 2019. Similarly, the Public Service Vehicles Operators category also registered a 39.0, 53.4 and 10.4 percent increase in the number of Certificate of Fitness licenses issued to Boda-bodas, Country tax and Driving Instructors License sub-groups respectively as shown in Table 3.6.2 below. This was as a result of introducing periodic inspection of all vehicles in the country using modern automated equipment to ensure roadworthiness by the Government.

Table 3.6.2: Number of Licensed Public vehicles 2015 – 2019

Category	2015	2016	2017	2018	2019	2018-2019 Percentage Change
Tourist	38	125	197	501	589	17.6
Public Service Vehicles Operators						
license	15,316	11,119	17,325	18,528	16,049	-13.4

3.6.3 Air Transport

This sub-section presents data on the movement of commercial aircraft, passengers and cargo through Entebbe International Airport and aircraft movement over Uganda's air space.

3.6.3.1 Aircraft Movement

Table 3.6.3.1 below shows that there was 1.3 percent increase in the aircraft movement at Entebbe Airport in 2019 compared a eight percent raise registered in 2018. This was as a result of increased number of commercial aircrafts landings and over flights by 1.3 percent and 1.5 percent respectively in 2019 as shown in Table 3.6.3.1.

Table 3.6.3.1: Aircraft Movements at Entebbe International Airport 2014 – 2019

Aircraft Movement	2015	2016	2017	2018	2019
Commercial Aircraft Landings	27,650	28,347	29,323	32,383	32,798
Percentage Change	2.8	2.5	3.4	10.4	1.3

Percentage Change	-0.1	3.9	1.8	8.1	1.3

Source: Civil Aviation Authority

3.6.3.2 Passenger Air transport

The total number of passengers passing through Entebbe International Airport increased by 7.2 percent from 1.69 million in 2018 to 1.83 million in 2019. This was mainly attributed by the two percent increase in the number of domestic passengers from 26,780 in 2018 to 27,316 in 2019 as shown in Table 3.6.3.2.

Table 3.6.3.2: Number of Passengers through Entebbe International Airport from 2014-2019

Passengers	2015	2016	2017	2018	2019
International	1,505,505	1,532,329	1,625,878	1,670,232	1,802,107

Annual Change (%)	4.9	1.9	6.1	3.2	7.2

Source: Civil Aviation Authority

3.6.3.4 Volume of Cargo through Entebbe International airport

The volume of cargo increased by 2.2 percent from 63,353 tonnes in 2018 to 64,731 tonnes in 2019. This was as a result of an increase in the volume of cargo loaded by 4.4 percent and increase in the volume of cargo off-loaded by one percent in 2019.

Also during the period, the volume of mails decreased by nearly one percent in 2019. This was attributed to by the decrease of mail off-loaded by nearly one percent while loaded mails increase by 5.4 percent as shown in table 3.6.3.3.

Table 3.6.3.3 Volume of Cargo through Entebbe International Airport, tonnes 2015 – 2019

	2015	2016	2017	2018	2019	2018-2019 Percentage Change

3.6.4 Water Passenger Transport

In 2019, there was a 6.4 percent increase in total number of passengers transported using registered ferry operators from 4.3 million in 2018 to 4.5 million passengers in 2019. Analysis by transporter noted that, 84.4 percent of the passengers were transported by Uganda National Roads Authority ferries with 3.6 million passengers followed by Kalangala infrastructure services ferry with 14.4 percent while MV Kalangala registered the lowest passengers with only 1.2 percent as shown in table 3.6.4.1 below.

Table 3.6.4.1: Number of passengers transported using registered ferry operators, from 2016 to 2019

Ferry Category	2016	2017	2018	2019	2018-2019 Percentage Changes	2019 percentage Contribution
Uganda National Roads Authority	3,171,272	3,321,643	3,604,781	3,840,899	6.1	84.4
Kalangala Infrastructure Services	630,682	626,884	623,473	655,351	4.9	14.4

3.7 Communication Statistics

This section presents statistics on telephone usage, internet market and mobile money transactions.

3.7.1 Mobile Money Transactions

The total number of mobile money registered customers increased by almost 9.1 percent from 24.5 Million customers in 2018 to almost 26.7 Million customers in 2019. The number of transactions (information exchange) increased by 51.2 percent from 1,878.7 million transactions in 2018 to 2,840.9 million in 2019. The value of the transactions increased by 2.8 percent from 71,100 trillion shillings in 2018 to 73,091 trillion shillings in 2019 as shown in Table 3.7.4.

Table 3.7.4: Mobile Money Transactions, 2015-2019

Subscribers	2015	2016	2017	2018	2019
Mobile money registered customers (number '000)	19,634	21,585	23,363	24,466	26,691
Annual Percentage Change	12.2	2.3	8.2	4.7	9.09

Transactions (Value bn Shs)	32,506	43,831	63,093	71,100	73,091
Annual Percentage Change	35.1	34.8	43.9	12.7	2.80

Source: Uganda Communications Commission

3.7.2 Postal and Courier Services

The total volume of letters handled by Posta Uganda decreased by 28 percent in 2019, from 1,140,623 letters in 2018 to 819,574 letters in 2019. The most contributing factor to the decrease was volume of ordinary letters received from East Africa, Europe and America, which recorded a decline of 40 percent. However, the volume of domestic letters increased by 36 percent from 196,641 to 267,620. It was also noted that the volume of domestic registered mails and volumes of Express Mail Services (EMS) items also dropped by 5.4 and 34.6 percent respectively. On the other hand, the volume of incoming ordinary parcels handled, volume of registered letters posted and volume of registered letters received increased by 17.3, 20.6 and 33.1 percent respectively, as shown in Table 3.7.5 below.

Table 3.7.5: Postal Statistics 2015 – 2019

3.8 Migration and Tourism

This section presents a summary of international movement of persons across gazetted points of entry and exit, tourism statistics such as occupancy levels for hotels and other accommodation establishments, as well as visitors to national parks and Uganda Wildlife Education Centre (UWEC). The information on international arrivals and departures is majorly based on the arrival/departure declaration cards filled at the 22 gazetted border points augmented with data from Personal Identification Secure Comparable Evaluation System (PISCES). However, the arrival and departure data for 2019 is from PISCES data for eight points of entry and exit. The points are Elegu, Malaba, Busia, Entebbe, Mutukula, Mirama Hills, Katuna and Mpondwe. These posts constitute 90 percent of the expected travellers.

3.8.1 International Arrivals and Departures

Uganda recorded a total of 2.3 million travellers in 2019 through its eight major border posts. Of these 1.0 million persons were arrivals and 1.2 million persons were departures. The number of departures marginally exceeded the number of arrivals by about 194,000 travellers in 2019. The number of arrivals and departures by quarter are in Appendix Table 3.6A and 3.6B.

Table 3.8.1: International Arrivals and Departures ('000s), 2015 – 2017, 2019

Period	Arrivals		Departures		Net Movement*	Gross Movement**
	Number ('000s)	Annual %age Change	Number ('000s)	Annual %age Change	Number ('000s)	Number ('000s)
2015	1,730	1.8	1,710	7.1	20	3,440
2016	1,802	4.1	1,887	10.3	-85	3,688
2017	1,927	6.9	1,933	2.5	-6	3,861
2019	1,040	-	1,234	-	194	2,274

*Net movement = Arrivals less departures

**Gross movement = Arrivals plus Departures

For the year 2018, the PISCES data did not give a comprehensive picture for the year so it was omitted.

Source: Uganda Bureau of Statistics

Arrivals From and Departures to the EAC- Pattern States

The East African Community (EAC) Common Market Protocol guarantees free movement of persons who are citizens of Partner States within the EAC territory. Statistics on arrivals and departures within the region are, therefore, important in monitoring the implementation of the EAC Common Market Protocol. The number of arrivals in 2019 from EAC member states to Uganda was 403,000 and departures were 308,000 travellers. In 2019, most of the arrivals and departures were from Kenya (60%) followed by Rwanda (15%). The two countries accounted for 75 percent of the arrivals and departures.

Table 3.8.2: Arrivals from and Departures to the EAC Pattern States ('000s), 2015 – 2019

Arrivals and Departure by Residential status and port of entry, 2019

Table 3.8.3 shows that 63 percent of the total arrivals and 61 percent of total departures were of non-residents. Entebbe International Airport had the highest volume of arrivals and departures while Mpondwe had the lowest volume.

Table 3.8.3: Total Arrivals and Departures by Entry/Exit points and residence status, 2019

Entry/Exit Point	Arrivals				Departures			
	Resident	Non Resident	Total	Percent	Resident	Non Resident	Total	Percent

Source: Ministry of Internal Affairs.

The monthly distribution of movements throughout the year 2019 showed that there is no clear pattern in the arrivals and departures of travellers (Statistical Appendix Table 3.6C – Table 3.6F). Statistical Appendix Table 3.6C for Entebbe Airport shows that the peak period was between January March which accounted for 35 percent of the total travellers through Entebbe International Airport.

Malaba and Busia had a total of about 576,000 travellers and its peak was realised in the second quarter of the FY 2019/2020 (October, November and December) during this period it accounted for 27 percent of the total travelers through Busia and Malaba (Statistical Appendix Table 3.6D)

Visitor (Tourists) Arrivals

A visitor is a traveller taking a trip to a main destination outside his/her usual environment, for less than a year, for any main purpose (business, leisure or other personal purpose) other than to be employed by a resident entity in the country or place visited. Similarly, a visitor is considered a tourist (overnight visitor) if his/her trip includes an overnight stay or as a same day visitor (excursionist) (IRTS 2008)

Table 3.8.4 shows that in 2019, out of about 1,040,000 total arrivals registered at the eight ports of entry/exit, about 657,037 (63%) were visitors, the visitor arrivals were less than the visitor departures with a negative net movement of about 89,000 travellers. The record for 2019 can not be compared to the previous years because it is based on PISCES while the earlier years were based on arrival and departure declaration cards. See appendix 3.6 G

Table 3.8.4: Visitor Arrivals and Departures by Residence, 2015 – 2019

Year	Visitor Arrivals ('000s)	Visitor Departures ('000s)	Tourists Net Movement ('000s)
2015	1,303	1,310	-7
2016	1,323	1,359	-37
2017	1,402	1,370	32
2019*	657	746	-89

Country of Origin for Visitor Arrivals.

Table 3.8.5 shows that 72.6% of the visitor arrivals in 2019 were from the African continent followed by Asia (10%), Europe (9%) and America (5%). Details of the specific countries of origin are in Appendix Table 3.8 G. On the other hands, visitors from the EAC countries accounted for 61 percent of all visitor arrivals, Kenya accounted for 37 percent followed by Tanzania with 9 percent and the least number of visitors from the EAC was from Burundi.

Table 3.8.5: Percent distribution of Visitor Arrivals by Place of Origin, 2015 – 2019

Country of Residence	2015	2016	2017	2019
EAC	69	67	68	61
Kenya	31	27	24	37
Tanzania	7	7	6	9
Rwanda	23	27	32	7
South Sudan	4	3	3	4
Burundi	4	4	3	4

Visitor Arrivals by Mode of Travel

Air and road transport are the two major types of mode of transport used by visitors arrivals. Very few travellers use water transport on Lake Victoria and Lake Albert.

Figure 3.8.1 shows the number of arrivals by mode of transport between 2015 to 2019. Road transport is the most commonly used mode of international arrivals in Uganda. Out of the 657,000 visitor arrivals in 2019, about 60 percent used road transport and the remaining 40 percent came in through Entebbe International Airport.

Figure 3.8.1: Visitor Arrivals by Mode of Transport ('000s), 2015– 2019

Source: Uganda Bureau of Statistics and 2019 is from Ministry of Internal affairs.

Age-Sex Composition of Visitor Arrivals.

Males consistently dominated the visitor arrivals into Uganda since 2015 to 2019. In 2019, males accounted for 69 percent of the visitor arrivals. In 2019, the majority (48 percent) of the visitor arrivals were in the age group of 20-39 years, followed by the age group 40-59 years (37 percent). Visitor arrivals aged below 20 years and 60 and above years accounted for only 12 percent in 2019 of the total visitor arrivals for further information see Statistical Appendix 3.6H.

Figure 3.8.2: Visitor Arrivals by Sex composition, 2019

Source: Ministry of Internal affairs,

Purpose of Visit.

The main reason for visitors to Uganda in 2019 was visiting friends and relatives (28%). Only 20% came to Uganda for business and professional activities.

Figure 3.8.3: Purpose of Visit to Uganda, 2019

3.8.2 Wildlife Tourism

Uganda has twelve national parks and three active game reserves. These offer a wide range of tourism products including gorilla tracking, nature guided walks, village walks, butterfly and bird watching, rare fauna and flora species. Figure 3.8.4 shows that the total number of Visitors (citizens and foreigners) to the National parks of Uganda annually has had an upward trend since 2015, however, a slight reduction by about 1,000 persons was observed in 2019. This reflected a decrease of about 0.3 percent from 325,345 in 2018 to 323,861 in 2019.

On the other hand, the number of visitors to the Uganda Wildlife Education Centre (UWEC) had an upward trend from 2015 to 2019. UWEC receives more visitors compared to the National Parks. UWEC had a 5 percent increase between 2018 and 2019.

Figure 3.8.4: Visitors to National Parks and UWEC (000's), 2015 – 2019

Source: Uganda Wildlife Authority and Uganda Wildlife Education centre

Table 3.8.6 shows that Murchison Falls National Park has been the most visited park since 2017. The table also shows that the visitors have increased by one percent since 2018. According to the table, Queen Elizabeth National Park was the second most visited national park but that its total number of visitors in 2019 decreased by 10 percent from 2018. Bwindi Impenetrable Forest, according to the table, was the third most visited national park but its total number of visitors in 2019 reduced by three percent from 2018. These three parks collectively accounted for 67 percent of the visitors to all the National Parks in 2019.

Tables 3.8 6: Visitors to National Parks (Citizens and Foreigners), 2015 – 2019

National Parks	2015	2016	2017	2018	2019
Murchison Falls	65,366	75,360	93,256	102,305	103,665
Queen Elizabeth	72,964	85,905	81,660	86,875	77,995
Bwindi Impenetrable	16,476	19,522	26,576	37,514	36,341
Lake Mburo	24,979	26,012	30,403	35,206	33,188
Semliki	10,389	8,214	12,850	16,628	22,577
Kibaale	10,463	11,760	15,728	18,843	19,521
Kidepo Valley	5,663	7,824	11,018	12,056	12,648
Mgahinga Gorilla	2,648	3,840	5,505	6,781	7,593
Rwenzori Mountains	3,343	3,192	3,633	5,146	6,043
Mount Elgon	2,669	3,335	4,391	3,405	3,519

Figure 3.8.5 shows the distribution of visitors to the national parks in 2018 and 2019 by category. Figure 3.8.5 shows that foreign non-residents constituted the highest percentage (48 percent) of visitors to national parks in 2019 followed by Ugandan students (24 percent) while foreign residents were the least frequent among the visitors (3 percent) .Appendix Table 3.6 J provides details on number of visitors to the national parks by month and year of visit for the period 2015-2019

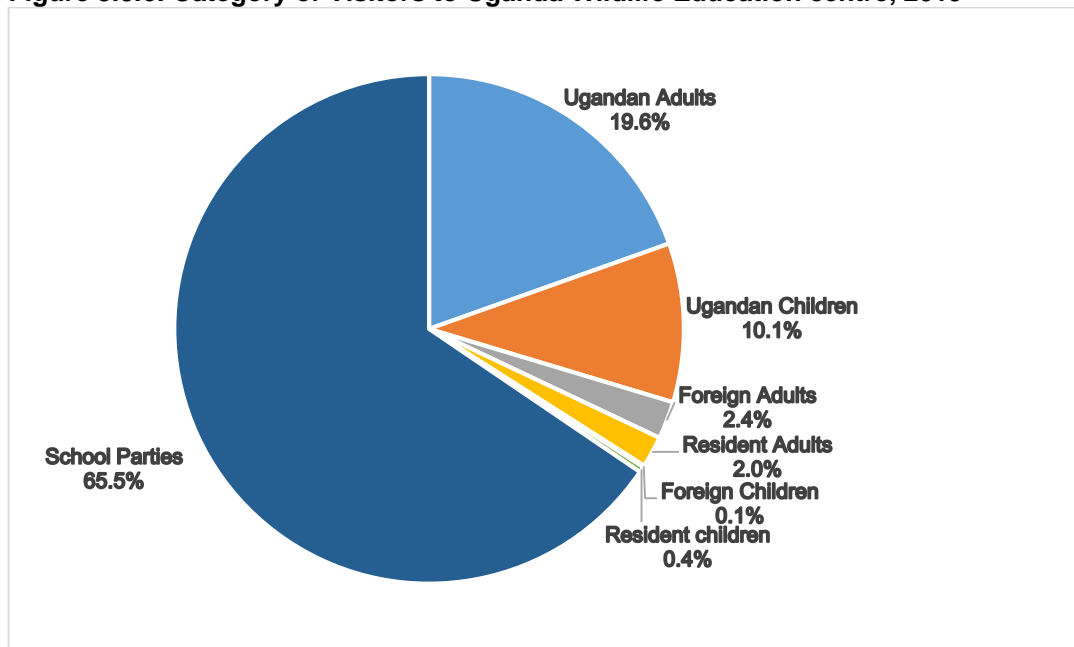

Figure 3.8.5: Category of Visitors to National parks, 2018-2019 (%)

Source: Uganda Wildlife Authority

Figure 3.8.6 shows that UWEC is mainly visited by Ugandans constituting 95 percent and this pattern has been like this since 2015 as seen in Appendix Table 3.6 M.

Figure 3.8.6: Category of Visitors to Uganda Wildlife Education centre, 2019

Source: Uganda Wildlife Authority

3.8.3 Accommodation Statistics

Accommodation is one of the most important sectors of the Tourism Industry in any country. In this subsection information is presented on room occupancy and bed occupancy aspects of accommodation.

Room occupancy refers to the number of rooms occupied in relation to the available rooms whereas Bed occupancy refers to number of beds occupied in relation to the available beds in a given reference period (month, quarter or year).

The overall room and bed occupancy rates stood at 50.9 percent and 46.7 percent respectively for the period January to December 2018, the room occupancy rates was highest in the 1st quarter of FY 2018/19 and lowest in the 3rd quarter 2017/18. However, the bed occupancy rate were highest in the third quarter of Financial Year 2017/18 (50.8 percent) reducing to 44.9 percent in the quarter four (FY 2017/18) as indicated in Table 3.8.6 below.

Table 3.8.6: Overall Occupancy rates for the period January – December 2018

Occupancy Rate (%)	Quarters (Percent)				
	FY 2017/18		FY 2018/19		Overall (Jan-Dec 2018)
	Qtr3 (Jan-Mar)	Qtr4 (Apr-Jun)	Qtr1 (Jul-Sept)	Qtr2 (Oct-Dec)	
Room Occupancy	48.4	50.9	52.9	51.5	50.9
Bed Occupancy	50.8	44.9	46.3	45.4	46.7

Source: Uganda Bureau of Statistics

Room Occupancy Rates by Region

The highest level of room occupancy rates for the four quarters covered were registered in the Eastern region (54.9%), followed by Northern and Kampala regions (52.6% and 52.0% respectively). Western region (47.6%) had

the lowest occupancy rate. Kampala room occupancy rates declined from 56.8 percent in the fourth quarter to 44.8 percent in the second quarter of FY 2018/19.

Table 3.8.7: Room Occupancy by F/Y Quarters and Region

Region	Room Occupancy Rate (%)				
	FY 2017/18		FY 2018/19		2018
	Qtr3 (Jan-Mar)	Qtr4 (Apr-Jun)	Qtr1 (Jul-Sept)	Qtr2 (Oct-Dec)	Overall (Jan-Dec 2018)
Central	48.0	46.3	49.5	52.1	48.7
Eastern	49.0	51.1	54.3	62.3	54.9
Kampala	49.7	56.8	56.3	44.8	52.0
Western	44.0	50.1	51.8	46.2	47.6
Northern	49.4	51.8	54.3	56.5	52.6
Total	48.4	50.9	52.9	51.5	50.9

Source: Uganda Bureau of Statistics

Like for the room occupancy rates, the eastern sub-region registered the highest overall bed occupancy rate (50.3 percent) for 2018 followed by Kampala sub-region (47.7%). The bed occupancy rate in eastern region increased from 49.0 percent in the 1st quarter (FY2018/19) to 60.5 percent in the 2nd quarter of FY2018/19, posting a 11.5 percentage point increment.

All regions registered an increase in the bed occupancy rates between the 3rd quarter of the FY 2017/18 and the 2nd quarter of the financial years FY2018/19.

Table 3.8.8: Bed Occupancy by Quarters and Region

Region	Bed Occupancy Rate (%)				
	FY 2017/18		FY 2018/19		2018
	Qtr3 (Jan-Mar)	Qtr4 (Apr-Jun)	Qtr1 (Jul-Sept)	Qtr2 (Oct-Dec)	Overall (Jan-Dec 2018)
Central	37.6	42.6	42.2	43.9	42.9
Eastern	51.1	42.4	49.0	60.5	50.3
Kampala	30.3	49.4	53.2	38.1	47.7
Western	43.2	43.0	35.4	46.3	42.0
Northern	41.5	45.0	46.6	47.8	44.8
Total	37.8	44.9	46.3	45.4	43.8

CHAPTER FOUR

Macroeconomic Statistics

4.1 National Accounts

National accounts defines the implementation of complete and consistent accounting techniques for measuring the economic activity of Uganda. The compilation of National Accounts Statistics follows the System of National Accounts (SNA) 2008.

The Gross Domestic Product (GDP) preliminary estimates indicate that the economy grew by **2.9 percent** during the Fiscal Year (FY) 2019/20. This is a much slower growth compared to the **6.8 percent (revised)** growth registered in FY 2018/19. The size of the economy in real terms increased to Uganda shillings 126,559 billion in FY 2019/20, down from Uganda shillings 123,043 billion in 2018/19.

In nominal terms, total gross value added increased to Uganda shillings 138,841 billion in 2019/20 from Uganda shillings 131,406 billion in 2018/19, increasing the GDP per capita to 910 USD in 2019/20 from 884 USD in 2018/19. The Services sector continued to be the biggest contributor to GDP, contributing 43.0 percent from 43.2 percent in 2018/19.

Figure 4.1: GDP by economic activity, Current Prices 2015/16 to 2019/20

4.1.1 Sectoral Performance

In terms of sector contribution to overall GDP, the agriculture sector contributed 24.0 percent in 2019/20 compared to 23.1 percent in the FY 2018/19, which is a 0.9 percentage point increase in the share to GDP. The contribution of the industry sector slowed down to 26.2 percent in 2019/20 from 26.3 percent in 2018/19. The services sector continued to dominate the contribution to GDP, representing 43.0 percent from 43.2 percent in 2018/19.

Table 4.1: Contribution to GDP, 2015/16 – 2019/20

	2015/16	2016/17	2017/18	2018/19	2019/20
Agriculture, forestry and fishing	22.8	23.5	23.2	23.1	24.0
Industry	26.3	26.0	26.1	26.3	26.2
Services	44.2	43.5	43.5	43.2	43.0
Taxes on products	6.8	7.0	7.2	7.5	6.8

Source: Uganda Bureau of Statistics

4.1.1.1 Agriculture sector performance

The Agriculture sector is comprised of Cash crops, Food crops, Livestock, Agriculture support services, Forestry and Fishing activities. The gross valued added for the sector grew by 4.8 percent in 2019/20 compared to the growth of 5.4 percent registered in 2018/19. The performance in agricultural activities is largely attributed to the good performance in food crop growing activities which registered a growth of 4.5 percent when compared to the 1.5 percent growth in 2018/19, Livestock growing activities grew by 7.9 percent in 2019/20 compared to 7.3 percent in 2018/19. The weather was favourable for the most part of the financial year 2019/20.

However, fishing activities registered a slower growth of 1.9 percent in 2019/20 compared to 41.4 percent recorded in the previous FY, leading to a slower growth in the Agriculture sector during FY 2019/20.

Figure 4.2 Agriculture sector Gross Value Added and growth rate, 2015/16 – 2019/20

Cash crops growing activities

Cash crop growing activities registered a growth of 7.2 percent in 2019/20 compared to 4.2 percent growth in 2018/19. Performance in cash crops is attributed to the growth in Robusta and Arabic coffee which respectively grew by 19.7 percent and 4.7 percent in 2019/20 from a slower growth of 2.9 percent and 2.8 percent registered in the previous fiscal year.

Cocoa growing activities' value added registered a growth of 12.2 percent in 2019/20 compared to 12.8 percent growth recorded in 2018/19. Similarly, Flower growing activities grew by 4.3 percent in 2019/20 following a slower

growth of 1.7 percent in the previous financial year. Sugarcane growing activities registered a slow growth of 2.4 percent in 2019/20 compared to 23.2 percent growth recorded in 2018/19. The strong growth in these Cash crop activities was undermined by the poor performance in Tea growing activities which declined by 12.6 percent in 2019/20 from a growth of 4.9 percent in the previous period.

Cotton growing activities declined by 4.9 percent in 2019/20 following an earlier decline of 5.0 percent in 2018/19. In addition to these declines, Tobacco growing activities declined by 41.8 percent in 2019/20 from minus 4.7 percent in 2018/19.

Food crops growing activities

The value added for food crops growing activities grew by 4.5 percent in 2019/20 compared to a growth of 1.5 percent recorded in 2018/19. The growth is attributed to the conducive weather conditions during the course of the year. Food crops that performed well included bananas, beans, fruits and vegetables which respectively grew by 4.8 percent, 2.0 percent, 5.4 percent and 3.8 percent in 2019/20 from minus 4.7 percent, 1.4 percent, 2.4 percent and 2.7 percent recorded in 2018/19

Rice growing activities registered a growth of 18.8 percent from an 8.2 percent growth in the previous financial year. In addition, Groundnuts and millet recorded a growth of 12.0 percent and 39.3 percent in 2019/20 following an earlier growth of 6.4 percent and 40.3 percent respectively in 2018/19. Potatoes and Cassava growing activities respectively registered slow growth of 0.0 percent and 0.8 percent in 2019/20 compared to 8.0 percent and 3.2 percent in 2018/19. However, there was a contraction in Irish potatoes, Millet and Maize growing activities which declined by 1.2 percent, 1.1 percent and 0.2 percent in 2019/20 respectively.

Livestock rearing & keeping activities

Livestock rearing activities include the rearing of indigenous and exotic cattle, sheep, goats, chicken, pigs, rabbits, bees/honey as well as other animals. Livestock rearing activities grew further by 7.9 percent in 2019/20, the highest growth recorded in the last 10 years. The strong growth is largely attributed to chicken rearing activities which grew by 11.4 percent in 2019/20 compared to 9.8 percent growth registered in the previous year.

Other activities which registered a growth include rearing of sheep and indigenous cattle which respectively registered a stable growth of 14.9 percent and 4.3 percent in 2019/20. The overall livestock rearing activities contributed 3.8 percent in 2019/20 from a share of 3.4 percent registered in 2018/19.

In nominal terms, the activity GVA amounted to Uganda Shillings 5,265 Billion in 2019/20 from Uganda Shillings 4,488 Billion in 2018/19.

Forestry activities

Forestry activities registered a growth of 3.3 percent in 2019/20 following an earlier growth of 3.6 percent in 2018/19. The slow growth was attributed to forestry logging activities which grew by 4.7 percent in 2019/20 from an earlier growth of 6.0 percent in the previous fiscal year. In addition to that, wood fuel activities and other forestry activities respectively registered slow growth of 2.7 percent and 4.9 percent in 2019/20 compared to 2.8 percent and 6.3

percent growth recorded in 2018/19. Wood fuel which is comprised of firewood and charcoal burning activities contributed 70.9 percent to the forestry activities' value added in 2019/20.

Fishing activities

Fishing activities comprise both formal and informal fishing activities from fresh water bodies. The water bodies include Lake Victoria with a share of 54.5 percent, Lake Albert (31.9 percent), Lake Kyoga (8.3 percent), Lake Edward/George (1.4 percent), Albert Nile (1.1 percent), Lake Wamala (0.8 percent) and other water bodies (2.0 percent). Fishing activities from the above mentioned water bodies registered a slower growth of 1.9 percent in 2019/20 following a strong growth of 41.4 percent registered 2018/19. The activity contributed 2.6 percent to total GDP at current prices compared to 2.3 percent recorded in 2018/19.

4.1.1.2 Industry sector performance

The Industry sector comprises of mining and quarrying, manufacturing, electricity, water and construction activities. The overall industry sector registered a slowdown in growth by 2.2 percent in 2019/20 compared to the growth of 10.1 percent in 2018/19. This was mainly attributed to the slow growth in manufacturing activities (1.3 percent in 2019/20 compared to 7.8 percent in the previous year), mining & quarrying activities (2.8 percent in 2019/20 compared to 33.4 percent in the previous year) and construction activities which registered a growth of 5.4 percent compared to 14.2 percent growth recorded in 2018/19.

4.3 Industry sector Gross Value Added and growth rate, 2015/16 – 2019/20

Mining and Quarrying activities

Mining and quarrying activities registered a growth of 0.2 percent in 2019/20 following a strong growth of 33.4 percent registered in 2018/19. The slow growth was largely due to the contraction in informal mining activities by 2.5 percent in 2019/20 from a strong growth of 65.2 percent recorded in 2018/19

Manufacturing activities

Manufacturing activities grew by 1.3 percent in 2019/20 following a strong growth of 7.8 percent registered in 2018/19. This was due to the slowdown in manufacturing of processed & preserved meat from 21.0 percent in

2018/19 to 13.9 percent in 2019/20. In addition, manufacture of grain mill & starch products, fabricated metal, furniture and soft drinks respectively declined by 2.7, 4.0, 6.7 and 8.2 percent in 2019/20 compared to a growth of 8.5, 7.7, 11.8 and 17.1 percent recorded in 2018/19.

Other activities that registered significant declines included manufacture of printed and recorded media which declined by 6.2 percent in 2019/20 from a growth of 5.4 percent in 2018/19 and manufacture of plastics which declined by 1.4 percent in 2019/20 following an earlier growth of 11.2 percent in 2018/19.

Manufacture of leather and related products declined further by 25.3 percent following a decline of 8.9 percent in 2018/19.

Despite the poor performance in the in the above mentioned manufacturing activities, there was notable growth in the manufacture of prepared animal feeds of 22.3 percent in 2019/20 from 10.9 percent growth in the previous year. Similarly, other foods grew by 21.9 percent in 2019/20 from a growth of 13.6 percent recorded on 2018/19. Manufacture of coffee registered a strong growth of 23.5 percent in 2019/20 following an earlier decline of 25.9 percent in 2018/19. The total Manufacturing activity contributed 15.9 percent to GDP in 2019/20 from 15.5 percent in 2018/19.

Electricity Activities

Electricity activities registered a growth of 4.7 percent in 2019/20 compared to a slower growth of 2.5 percent registered in 2018/19. The good performance in electricity activities is attributed to the strong growth in electricity generation activities which grew by 6.0 percent in 2019/20 from a 1.7 percent growth registered in 2018/19. In addition to that, electricity transmission and distribution activities grew by 2.0 and 4.4 percent in 2019/20 following a growth of 10.1 percent in transmission and a decline of 1.0 percent in distribution activities respectively in 2018/19. The overall Electricity activities contributed 1.3 percent to GDP, similar to the contribution of 2018/19.

Water activities

Water activities which comprise of both formal and informal water activities registered a growth of 4.1 percent compared to a 4.7 percent growth in 2019/20. The performance in water activities was attributed to the growth in formal water activities which grew by 2.0 percent in 2019/20 following an earlier growth of 6.7 percent registered in 2018/19. Informal water activities with a share of 87 percent of total water activities maintained a growth of 4.4 percent in 2019/20. The overall water activities contributed 2.2 percent to GDP in 2019/20 from 2.3 percent recorded in 2018/19.

Construction activities

Construction activities comprise of construction of buildings (traditional and non-traditional), civil engineering and specialized construction activities. The activity grew by 3.8 percent in 2019/20 compared to a strong growth of 14.2 percent registered in 2018/19. Civil works activities registered a growth of 6.5 percent in 2019/20 following a strong growth of 10.5 percent in the previous year. Traditional dwellings continued to grow by 1.6 percent in 2019/20, similar to the previous year.

In addition to that, construction of modern dwellings registered a growth 4.8 percent in 2019/20 from 11.9 growth recorded in the previous year. Construction of other buildings grew by 2.6 percent in 2019/20 from 17.4 growth registered earlier in 2018/19. The overall construction sector contributed 5.5 percent to total GDP in 2019/20 compared to a share of 5.9 recorded in 2018/19.

4.1.1.3 Services sector performance

The service sector comprises of trade & repairs, transport & storage, accommodation & food services, information & communication, financial & insurance services, real estate activities, professional, scientific and technical activities, administrative & support activities, public administration, education, human health and social work activities, arts, entertainment and recreation, other services activities and activities of households as employers.

The services sector registered a growth of 2.9 percent in 2019/20 compared to 5.7 percent in 2018/19, contributing 43.0 percent to GDP. The slower growth over the period was recorded in real estate activities from 10.2 percent in 2018/19 to 5.1 percent in 2019/20 and education from 7.4 percent in 2018/19 to a decline of 4.0 percent in 2019/20. In addition, trade and repairs which constitutes 20 percent of the sector declined by 0.4 percent in 2019/20 compared to an increase of 4.9 percent recorded in 2018/19. Other services that recorded decline include; arts, entertainment and recreation (8.7 percent), accommodation and food services (8.5 percent) and transport & storage (1.3 percent). However, remarkable growth in services was registered in information and communication (21.9 percent), public administration (16.2 percent) and professional, scientific and technical activities (7.4).

Figure 4.4 Services sector Gross Value Added and growth rate, 2015/16 – 2019/20

Trade & repairs activities

The activity declined by 0.4 percent in 2019/20 compared to an increase of 4.9 percent registered in 2018/19, contributing 20.0 percent to total services value added. The decline was registered in wholesale (3.5 percent) and sale and repairs of motor vehicle (9.5 percent) which combined contribute more than half to the subsector. Retail trade maintained a growth of 4.0 percent in 2019/20

Transport and storage activities

Transport and storage activities declined by 1.3 percent in 2019/20 compared to an increase of 1.3 percent recorded in 2018/19, contributing 8.1 percent to total services value added. This was due to the continued decline in passenger transport by road of 2.1 percent in 2019/20. In addition, freight transport by road registered a slow growth of 0.4 percent in 2019/20 compared to 3.9 percent in 2018/19. Ware housing and postal activities respectively declined by 2.5 percent and 30.7 percent in 2019/20 from a growth of 1.3 percent and 7.9 percent recorded in 2018/19.

Accommodation and food service activities

This activity declined by 8.0 percent in 2019/20 compared to an increase of 3.0 percent recorded in 2018/19, contributing 6.0 percent to total services value added. This was due to the continued decline in accommodation from 0.9 percent in 2018/19 to 12.1 percent in 2019/20. Similarly, food service declined by 3.4 percent in 2019/20 compared to an increase of 9.0 percent recorded in 2018/19

Information & communication services activities

This activity grew by 21.9 percent in 2019/20 compared to a decline of 0.6 percent recorded in 2018/19, contributing 3.5 percent to total services value added. This was mainly due to the continued growth in information services from 9.0 percent in 2018/19 to 24.1 percent in 2019/20. In addition, broadcasting and programming services grew by 60.1 percent in 2019/20 from a decline of 4.0 percent recorded in 2018/19.

Financial and insurance activities

This activity grew by 9.8 percent in 2019/20 compared to 9.4 percent recorded in 2018/19, contributing 6.4 percent to total services value added. The strong growth over the period was due to the good performance registered in FISM from a decline of 2.7 percent in 2018/19 to a growth of 20.3 percent 2019/20. Commercial bank activities recorded a slow growth of 7.8 percent in 2019/20 compared to 8.0 percent recorded in 2018/19. However, central banking activities and auxiliary services respectively declined from a growth of 7.2 percent and 4.6 percent in 2018/19 to a decline of 11.2 percent and 9.9 percent in 2019/20.

Real estate activities

Real estate activities grew by 5.1 percent in 2019/20 compared to 10.2 percent recorded in 2018/19, contributing 14.8 percent to total services value added. The slow down over the period was mainly due to the slow growth recorded in real estate with own/leased property from 10.8 percent in 2018/19 to 5.6 percent in 2019/20 and this constitutes over 90 percent of real estate activities.

Professional, scientific & technical activities

This activity grew by 4.9 percent in 2019/20 compared to 2.9 percent recorded in 2018/19, contributing 4.9 percent to total services value added. The increase in growth over the period was mainly due to growth recorded in scientific research and development and architecture & engineering services where each grew at 4.1 percent in 2019/20 compared to a decline of 20.9 percent in 2018/19

Administrative & support activities

This activity grew by 7.4 percent in 2019/20 compared to 17.5 percent growth recorded in 2018/19, contributing 4.3 percent to total services value added. The slow down over the period was mainly due to the slow growth recorded in security and investigation activities from 19.1 percent in 2018/19 to 9.8 percent in 2019/20. In addition, office administration & business support services registered a slow growth of 10.0 percent in 2019/20 from 23.1 percent recorded in 2018/19. However, travel, tour and reservation services declined by 23.1 in 2019/20 compared to a growth of 14.4 percent recorded in 2018/19.

Public administration, defence and compulsory social security activities

This activity grew by 16.2 percent in 2019/20 compared to 3.2 percent recorded in 2018/19, contributing 6.5 percent to total services value added. The increase in growth over the period was mainly due to growth recorded in public administration and defence from 3.9 percent in 2018/19 to 18.1 percent in 2019/20 and this constitutes over 90 percent of the subsector. However, compulsory social security services continued to decline by 2.2 percent in 2019/20 from a decline of 3.1 percent recorded in 2018/19.

Education activities

This activity declined by 4.0 percent in 2019/20 compared to a growth of 7.4 percent recorded in 2018/19, contributing 9.7 percent to total services value added. The poor performance over the period was mainly due to the decline recorded in secondary, technical and vocational education services of 9.7 percent in 2019/20 compared to an increase of 9.5 percent in 2018/19 and this level of education constitutes over 43 percent of the education activities.

In addition, pre-primary and primary education declined by 3.5 percent in 2019/20 compared to a growth of 6.6 percent recorded in 2018/19 while higher and adult education grew by 13.8 percent in 2019/20 compared to 8.1 percent in 2018/19.

Human Health and Social Work Activities

Human health and social work activities grew by 2.4 percent in 2019/20 compared to 5.4 percent recorded in 2018/19, contributing 7.6 percent to total services value added. The slow growth was due to the decline in private health services by 5.8 in 2019/20 despite an increase in public health services from 3.9 percent in 2018/19 to 5.2 percent in 2019/20. In addition, social work activities recorded a slow growth from 14.8 percent in 2018/19 to 12.5 percent in 2019/20.

Arts, entertainment & recreation activities

This activity declined by 8.7 percent in 2019/20 compared to an increase of 21.2 percent recorded in 2018/19, contributing 0.4 percent to total services value added. This was due to the decline in creative arts & entertainment, gambling & betting as well as sports, amusement and recreation which respectively declined by 36.2 percent, 27.0 percent and 4.8 percent in 2019/20 compared to a growth of 6.7 percent, 20.0 percent and 34.8 percent recorded in 2018/19

Other Services activities

This activity grew by 3.3 percent in 2019/20 compared to 2.1 percent recorded in 2018/19, contributing 5.9 percent to total services value added. This was due to the growth in activities of membership organisations and other personal service activities which respectively grew by 7.5 percent and 2.7 percent in 2019/20 from 6.4 percent and 1.6 percent growth recorded in the previous period

Activities of households as employers

This activity remained stable at 2.8 percent in 2019/20, contributing 1.8 percent to total services value added.

Taxes on products

Taxes on products comprise of value added tax, taxes and duties on imports and exports and excise duties on sale of specific products. Taxes on Products declined by 1.3 percent following an earlier growth of 5.8 percent in 2018/19.

Taxes on products contributed 6.8 percent to GDP in 2019/20 compared to 7.5 percent recorded in 2018/19.

4.1.2 GDP by Expenditure

GDP by expenditure approach measures the allocation of total production during the year among alternative expenditures. The expenditure approach, therefore, takes into account three main aggregates which are Final Consumption Expenditure (Household, Government, Non-Profit Institutions Serving Households (NPISH), Gross Capital Formation, and the Net Exports (Exports less Imports). Below is an explanation of the expenditure sectors of GDP.

Final Consumption Expenditure (FCE)

The Final Consumption Expenditure (FCE) recorded a strong growth of 9.5 percent in FY 2019/20, compared to 6.7 percent in FY 2018/19. In nominal terms, FCE was recorded at 103,460 billion shillings, contributing 81.0 percent to GDP (expenditure on GDP) in FY 2019/20 compared to 80.3 percent in FY 2018/19

Households Final Consumption Expenditure (HFCE)

The household final consumption expenditure accounted for about 82.6 percent of the final consumption expenditure in FY 2019/20. The HFCE grew by 3.2 percent in FY 2019/20 compared to 6.3 percent recorded in FY 2018/19. In nominal terms, the HFCE was estimated at 92,935 billion shillings in FY 2019/20, contributing 66.9 percent to GDP (expenditure on GDP) in FY 2019/20

Government Final Consumption Expenditure (GFCE)

The government final consumption expenditure accounted for about 11.8 percent of the final consumption expenditure in FY 2019/20. The GFCE recorded a strong growth of 12.8 percent in FY 2019/20 compared to 7.2 percent recorded in FY 2018/19. In nominal terms, the GFCE was estimated at 13,234 billion shillings in FY 2019/20 up from 11,590 billion shillings recorded in FY 2018/19, contributing 9.5 percent to GDP in FY 2019/20

Gross Fixed Capital Formation (GFCF)

Gross fixed capital formation consists of expenditure on the following; Dwellings, Other buildings and structures, Buildings other than dwellings, Other structures, Land improvements, Machinery and equipment, Transport

equipment, ICT equipment, Other machinery and equipment, Research and Development, Mineral exploration and evaluation, Computer software and databases, Computer software and databases.

The GFCF recorded a slow growth of 0.9 percent in FY 2019/20 compared to 10.6 percent recorded in FY 2018/19, contributing 23.6 percent to the total GDP by expenditure in FY 2019/20. This was due to the decline in acquisition of assets for information, communication & technology, machinery & equipment by 3.1 percent in 2019/20 from a growth of 7.8 percent recorded in 2018/19. In addition, there was a slower growth in construction in 2019/20 where buildings and other structures respectively grew by 4.8 percent and 3.2 percent in 2019/20 compared to 12.0 percent and 16.2 percent in 2018/19. In nominal terms, the GFCF was estimated at 32,833 billion shillings in FY 2019/20 from 32,820 billion shillings in FY 2018/19

Exports and Imports of Goods and Services

The net flow of goods and services between Uganda and the outside world indicate that the net export of goods and services improved in nominal terms, from shillings minus 6,793 billion in 2018/19 to shillings minus 6,491 billion in 2019/20. This was due to a growth registered in Export of goods and services of 3.3 percent in FY 2019/20 despite the decline in imports by 9.7 percent over the period.

The growth in exports was due to the good performance in goods which grew by 13.5 percent in 2019/20 compared to 6.4 percent in the previous period. However, services registered a decline of 17.1 percent in 2019/20 compared to a growth of 0.2 percent in 2018/19.

The decline in Imports was attributed to the contraction of services by 29.2 percent in 2019/20 compared to a growth of 16.2 percent recorded the previous FY.

4.1.3 GDP by Institutional sectors

The Gross Domestic Product (GDP) is disaggregated by the five (5) institutional sectors namely; Household/informal production, General Government, Non-Profit institutions serving households, Financial and Non-financial corporations. The economy grew at 2.9 percent in 2019/20 from 6.8 percent in 2018/19. This was due the slow growth registered by Non-Financial corporations and household sectors which respectively grew by 0.5 percent and 3.4 percent in 2019/20 compared to 6.3 percent and 7.3 percent in 2018/19. Significant growth was registered by the General Government sector which grew by 12.9 percent in 2019/20 compared to 4.5 percent recorded in 2018/19. In terms of contribution, the household/informal production sector continued to be the main contributor, contributing 51.4 percent to overall GDP.

Figure 4.5 GDP by institutional sectors and growth rate, 2015/16 – 2019/20

Household/Informal production

The households sector covers people living independently in residential accommodation and those living in communal establishments. The households sector also includes self-employed (market producers) who do not form part of quasi-corporations, as well as individuals or groups of individuals who produce goods and non-financial services for their own final use.

The Household sector was estimated at 71.35 Trillion shillings in FY 2019/20, contributing 51.4 percent to GDP. In real terms, the sector grew by 3.4 percent from 61.17 Trillion shillings in FY 2018/19 to 63.26 Trillion shillings in FY 2019/20. The sector was mainly driven by food crop growing activities (22.7 percent) followed by manufacturing activities (17.2 percent), trade & repair services (7.9 percent) and Livestock activities (7.4 percent), respectively.

General Government

The sector includes government departments and agencies, central government, local governments, the state education system, the National Health Service, the armed forces and the police. Non-departmental public bodies are also included in the general government sector

In nominal terms, general government was estimated at 7.06 Trillion shillings in FY 2019/20, contributing 5.1 percent to GDP. In real terms, the sector grew by 12.9 percent from 5.79 Trillion shillings in FY 2018/19 to 6.54 Trillion shillings in FY 2019/20

The sector was mainly driven by public administration (54.7 percent) followed by Education (27.0 percent), construction services (10.2 percent) and Health services (8.1 percent).

Non-Profit institutions serving households

Non-profit institutions serving households (NPISH) are institutions that provide goods and services, either free or below the market prices. They mainly derive their income from grants and donations and are not controlled by

government for example charitable organisations, trade unions, religious organisations, associations and political parties

The NPISH sector was estimated at 2.64 Trillion shillings in FY 2019/20, contributing 1.9 percent to GDP. In real terms, the sector grew by 11.3 percent from 2.29 Trillion shillings in FY 2018/19 to 2.54 Trillion shillings in FY 2019/20. The sector was mainly driven by human health and social work services (63.1 percent) followed by other service activities (23.1 percent), Professional, Scientific & Technical services (7.7 percent) and education (6.0 percent).

Financial corporations

The financial corporations sector consists of institutional units that are independent legal entities and market producers, and whose principal activity is the production of financial services. Such institutional units comprise all corporations and quasi corporations that are principally engaged in financial intermediation and auxiliary financial activities

Financial Corporations sector was estimated at 3.84 Trillion shillings in FY 2019/20, contributing 2.8 percent to GDP. In real terms, the sector grew by 9.8 percent from 3.23 Trillion shillings in FY 2018/19 to 3.55 Trillion shillings in FY 2019/20

Non-Financial corporations

The sector produces goods and services for the market and do not, as a primary activity, deal in financial assets and liabilities. This sector includes both public and private retailers, manufacturers, utilities, business service providers (such as accountancy and law firms), caterers, haulage companies, airlines, construction companies and farms among others.

Non-Financial Corporations sector was estimated at 44.54 Trillion shillings in FY 2019/20, contributing 32.1 percent to GDP. In real terms, the sector grew marginally by 0.5 percent from 42.32 Trillion shillings in FY 2018/19 to 42.53 Trillion shillings in FY 2019/20

The sector was mainly driven by manufacturing (22.0 percent) followed by Trade & repairs services (14.1 percent), Real estate activities (10.0 percent), education (8.4 percent) and construction services (8.5 percent)

4.1.4 Balance of Payments

Balance of payments (BoP) statement summarises all transactions between a country's residents and its non-residents involving goods, services and income; financial claims on liabilities to the rest of the world; and transfers such as gifts. Within the BoP, there are three separate categories under which different transactions are categorized: the current account, the capital account and the financial account. The overall BoP balance stood at a deficit of 69 million US dollars in 2018/19 following a previous surplus of 161 million US dollars recorded in 2017/18 (See Appendix Table 4.1 M (i))

Current Account Balance

The current account is the sum of the balance of trade (goods and services exports less imports), net income from abroad and net current transfers. The current account balance registered a deficit of 2,753 million US dollars in

2018/19 compared to a deficit of 1,822 million US dollars recorded in 2017/18 translating into about 51.1 percent deficit over the period. This was mainly attributed to the growing deficit noted in net exports of goods from 2,083 million US dollars in 2017/18 to 2,866 million US dollars in 2018/19 and services from 388 million US dollars in 2017/18 to 720 million US dollars in 2018/19. Despite the slight improvement, net primary income still recorded deficit from 926 million US dollars in 2017/18 to 916 million US dollars in 2018/19 (See Appendix Table 4.1 M (i))

Capital and Financial Account Balance

The capital account combined with the financial account represents the transfer of capital to help pay for the current account, which includes the trade of goods and services. Capital account measures the inflow and outflow of short-term and long-term capital transfers. These are mainly non produced and nonfinancial assets such as land, leases, licenses, grants, market assets like trade names, copyrights etc. The capital account balance declined by 5.4 percent from 105 million US dollars surplus recorded in 2017/18 to 100 million US dollars recorded in 2018/19.

Financial account components include direct investment, portfolio investment and reserve assets, which are broken down by sector. The financial account shows a net borrowing position of 2,430 million US dollars in 2018/19 up from 1,124 million US dollars recorded in 2017/18. This was attributed to a drop in portfolio investment from 330 Million US dollars in 2017/18 to 168 Million US dollars in 2018/19 and direct investment from 929 Million US dollar deficit in 2017/18 to 1,217 Million US dollar deficit in 2018/19. (See Appendix Table 4.1 M (i))

4.2 Price Statistics

4.2.1 Consumer Price Index (CPI)

This section presents statistics on Consumer Price Indices (CPIs) for goods and services consumed by households within Uganda. The national CPI covers eight urban centres of Kampala, Jinja, Mbale, Masaka, Mbarara, Gulu, Arua and Fort Portal. Apart from Kampala, each of the urban centres has an independent consumption basket of goods and services. Kampala is decomposed into 3 consumption baskets. These are, Kampala High Income (KHI), Kampala Middle Income (KMI) and Kampala Low Income (KLI). Therefore, the Uganda National CPI is a composition of 10 consumption baskets.

4.2.1.1 Headline Inflation

Headline Inflation is the measure of the relative change in prices of all goods and services for all the 10 consumption baskets. The Calendar Year (CY) 2019 registered a higher annual average inflation of 2.9 percent compared to the annual average inflation of 2.6 percent recorded for CY 2018, as shown in Figure 4.2.1. The increase recorded in CY 2019 was majorly attributed to the Energy fuel and Utilities category that registered an increase in inflation to 4.2 percent in CY 2019 compared to 10.7 percent recorded for CY 2018, (See Statistical Appendix Table 4.2 C).

Figure 4.2.1: Headline Index and Annual Average Inflation 2014 –2019

Masaka recorded the highest annual average inflation of 4.5 percent in 2019 compared to 2.1 percent recorded in 2018. This was followed by Gulu that registered an annual average inflation of 3.6 percent in 2019 compared to 0.6 percent recorded for the 2018. The lowest annual average inflation for the 2019 Calendar Year was recorded in Fort Portal at 0.5 percent compared to 2.1 percent that was observed in 2018.

The Financial Year 2018/19 registered an annual average inflation of 3.1 percent compared to the 3.4 percent annual average inflation recorded during the 2017/18 Financial Year, (see Statistical Appendix Table 4.2 A).

4.2.1.2 Core Inflation

Core Inflation, sometimes referred to as Underlying Inflation, measures relative changes in the prices of all goods and services in the consumption expenditure basket excluding fresh fruits, fresh vegetables, dried vegetables and fresh milk. Also excluded are tobacco leaves, electricity, petrol, diesel, paraffin, charcoal, propane gas, metered water and un-metered water. The annual average Core Inflation increased to 3.6 percent in 2019 from the 2.4 percent recorded during the 2018 CY as shown in Figure 4. 2.3. The increase in Core inflation was attributed to increases in prices of miscellaneous goods and services Communication, Education, and Clothing and footwear during the Calendar Year 2019 compared to 2018 Calendar Year, (See Statistical Appendix Tables 4.2 A& 4.2 E).

The annual average core inflation for the 2018/19 Financial Year increased to 3.8 percent from the 2.7 percent recorded during the 2017/18 Financial Year (see Statistical Appendix Table 4.2 A).

Figure 4.2.3: Headline, Core, Food Crops and EFU Average Annual Inflation 2014 – 2019

4.2.1.3 Food Crops Inflation

As shown in Figure 4.2.3, the annual average Food Crops inflation for CY 2019 decreased to minus 3.2 percent from minus 1.5 percent recorded for the CY 2018. The decrease in the annual average food crops inflation is attributed to a bumper harvest experienced during the CY 2019, which led to good supplies of fresh food products on the market.

The 2018/19 Financial Year, registered a lower annual average food crops inflation of minus 4.4 percent compared to the 3.2 percent recorded for 2017/18 Financial Year (see Statistical Appendix Table 4.2 A).

4.2.1.4 Energy, Fuel and Utilities (EFU) Inflation

EFU is comprises of Petrol, Diesel, Charcoal, Firewood, Kerosene, Liquefied gas propane, Electricity, Water charges from NWSC and Water Charges – other sources. During the 2019 Calendar Year, the EFU registered a decrease in the annual average inflation to 4.2 percent from 10.7 percent recorded during the 2018 Calendar Year, (see Statistical Appendix Table 4.2 A).

The 2018/19 Financial Year registered a lower annual average inflation of 7.3 percent compared to 11.1 percent registered in 2017/18 Financial Year, (see Statistical Appendix Table 4.2 A).

4.2.1.5 Major Inflation drivers during the Calendar Year 2018

During CY 2019, the national annual average Index rose by 2.9 percent. The main driver was miscellaneous goods and services that registered 6.8 percent in 2019 compared to 1.8 percent recorded for 2018. Other drivers were food and non-alcoholic beverages that registered minus 0.2 percent in 2019 compared to minus 1.2 percent in 2018, and communication registered 1.9 percent in 2019 compared to minus 2.1 percent in 2018, (See Statistical Appendix Table 4.2 E).

4.2.2 Producer Price Index – Manufacturing & Utilities

The Producer Price Index for Manufacturing and Utilities (PPI-M&U) is an index that measures changes in the prices of a basket of products either as they leave their place of production (Output Price Index) or as they enter the production process (Input Price Index). The current computed PPI-M&U is an Output Price Index valued at Basic prices with a base period of July 2009 to June 2010. It covers two sectors; the Manufacturing Sector both for Local and Export Market (Combined) and Utility Sector at Local Market.

4.2.2.1 PPI-M&U (Combined) Annual Percentage Changes, (Calendar) Year 2015-2019.

The PPI-M&U (Combined) decreased on average by 2.3 percent to 178.05 for the 2019 calendar year from 182.17 recorded in 2018 Calendar Year (CY). The drop in the producer prices was due to a price reduction in PPI-Manufacturing Sector by 2.6 percent. The reduction in producer prices under the Manufacturing Sector was mainly driven by the Food Products (-5.2 percent), Beverages (-0.2 percent), Chemical Products (-3.3 percent) and Leather Products (-19.6) as represented in Table 4.2.1 below and Statistical Appendix-Table 4.2 P.

Table 4.2.1 PPI-M&U (Combined) Annual Percentage Changes, Calendar Year 2015-2019; July 2009 to June 2010=100

Industry Group	Base period Weights	2015	2016	2017	2018	2019
Index						
PPI-Manufacturing and Utilities	1000.00	166.47	173.40	184.41	182.17	178.05
PPI-Manufacturing Indices	921.40	167.47	174.02	184.61	181.51	176.77
PPI-Utilities Indices	78.60	154.12	166.06	182.12	189.15	191.31
Annual Percentage change						
PPI-Manufacturing and Utilities Changes	1000.00	7.9	4.2	6.3	-1.2	-2.3
PPI-Manufacturing changes	921.40	7.4	3.9	6.1	-1.7	-2.6
Food Products	364.96	7.8	5.4	9.5	-4.8	-5.2

4.2.2.2 PPI-M&U (Combined) Annual Percentage Changes, (Fiscal) Year 2014/15-2018/19.

The PPI-M&U (Combined) registered an annual average decrease of 3.0 percent from an average index of 184.85 in Financial Year (FY) 2017/18 to 179.31 in the FY 2018/19. The contributor to price decline is the annual average price decline under the Manufacturing Sector of 3.5 percent. For FY 2018/19, the price decline in the Manufacturing Sector was mainly due to Food Products (-7.8 percent), Beverages (-1.1 percent), Other Non-Metallic Mineral products (-5.4 percent) and Leather Products (-12.7) as represented in Table 4.2.2 below and Statistical Appendix-Table 4.2 S.

Table 4.2.2: PPI-M&U (Combined) Annual Percentage Changes, Fiscal year 2014/15 to 2018/19; July 2009 to June 2010=100

Industry Group	Base period weights	2014/15	2015/16	2016/17	2017/18	2018/19

4.2.2.4 PPI-M (Local) Annual Percentage Changes, (Fiscal) year 2014/15 to 2018/19

In 2018/19 FY, the PPI-M (Local) on average rose by 0.5 percent from an average index of 171.90 in FY 2017/18 to 172.69. The Annual increment of 0.5 percent was mainly attributed to the observed price increment in Other Non-metallic Mineral Products (1.6 percent), Beverages (1.2 percent) and Chemicals Products (0.6 percent).

However, Food Products (-2.7 percent) registered a price decrease as represented in Table 4.2.4 and Statistical Appendix-Table 4.2 R.

4.2.2.5 PPI-M (Export) Annual Percentage Changes, (Calendar) Year 2015-2019.

The PPI-M (Export) for the CY 2019 decreased by 8.5 percent from an annual average of 212.70 in 2018 to 194.63. The Annual decline was recorded under all industry groups with main contributors being the reduction in prices of Food (-8.6 percent), Other Non-metallic Mineral Products (-19.5), Leather Products (-23.7 percent) and Chemical Products (-8.0) as represented in Table 4.2.5 and Statistical Appendix-Table 4.2 R.

Table 4.2.5 PPI-M (Export) Annual Percentage Change, calendar year 2015-2019; July 2009 to June 2010=100

4.2.2.6 PPI-M (Export) Annual Percentage Changes, (Fiscal) Year 2014/15 to 2018/19

The PPI-M (Export) on average registered an annual decrease of 11.9 percent from 225.28 annual average index in the FY 2017/18 to 198.51 in FY 2018/19. The contributors to the 11.9 percentage decline in the prices were Food Products (-14.6 percent), Other Non-metallic Minerals Products (-31.3 percent), Leather (-15.6), Beverages (-6.1 percent). However, Tobacco (0.7percent) and Chemicals (2.4 percent) registered a rise in prices as represented in Table 4.2.6 and Statistical Appendix - Table 4.2 U.

4.2.3 The Producer Price Index-Hotels & Restaurants

The producer Price Index for Hotels and Restaurants (PPI-H&R) measures the average change in the prices that Hotel and Restaurant Service providers receive for their services.

It is an Output Price Index designed to reflect the price trend of a constant well-defined and representative basket of services provided by hoteliers. The Index is divided into two sub-sectors namely; Accommodation and Catering Services. The Catering services are further divided into two categories; Food and snacks and Drinks as shown in Table 4.2.7. The prices collected exclude all taxes and other levies. The base period for this index is the first quarter of 2008 and covers a sample of 100 hotels and restaurants across the country.

4.2.3.1 Annual Average Producer Price Changes

The Annual Average Producer Prices for Hotels and Restaurants Sector rose by 1.8 percent in the year 2019, compared with the previous increase of 5.7 percent for the year 2018. Accommodation and Catering Services Producer Prices sub-sectors also rose by 0.7 and 2.7 percent respectively. The rise in the Catering Services subsector was mainly attributed to a 3.0 percent rise in prices of Drinks and 1.0 percent rise in prices of Food and Snacks as shown in Table 4.2.7 and Statistical Appendix Table 4.2Z.

Table 4.2.7: PPI-H&R: Annual Percentage Changes Calendar Year, 2015-2019

Industry Group	Weights	2015	2016	2017	2018	2019

4.3 External Trade

The section presents merchandise imports and exports flows between Uganda and the rest of the world as compiled from customs department of the Uganda Revenue Authority (URA) and non-customs data sources. The complementary non-customs data sources include Commodity Authorities and the Informal Cross Border Trade (ICBT) survey. The data compiled from customs and commodity authorities is herein referred to as formal exports and imports, whereas data collected from ICBT survey is referred to as informal exports and imports. The informal trade transactions are the ones that do not go through official clearance and documentation processes required by the customs laws. ICBT survey provides informal trade flows between Uganda and her neighbors that is Kenya, Rwanda, DRC, South Sudan and Tanzania. It covers 20 border posts and four bus terminals in Kampala.

The compilation of External Trade Statistics is based on the General Trade System and coded according to Harmonised Commodity Description and Coding System Classification (HS Codes) 2017 and the Standard International Trade Classification (SITC Rev4).

4.3.1 Summary of External Trade Statistics

During Calendar Year (CY) 2019, total export earnings (Formal and Informal exports combined) increased by 12.7 percent to US\$ 4,095.7 million from US\$ 3,633.9 million recorded in 2018. Similarly, the total imports bill increased by 14.2 percent to US\$ 7,753.8 million in 2019 from US\$ 6,789.4 million registered in 2018. The overall annual trade deficit increased to US\$ 3,658.1 million in 2019 compared to the value of US\$ 3,155.5 million recorded in 2018. (See Table 4.3.1)

Uganda was a net informal exporter recording a trade surplus throughout the period under review. The highest trade surplus, estimated at US\$ 486.6 million, was registered during 2018 while the least surplus was recorded of US\$ 334.8 million in 2015.

Table 4.3.1: Summary of External Trade Statistics Flows (US\$ Million), 2015-2019

Trade Flow	2015	2016	2017	2018	2019
Informal Exports	399.1	419.2	549.0	546.6	531.9
Formal/Official exports.	2,267.0	2,482.3	2,901.6	3,087.4	3,563.8

% change (imports)		-12.5	16	19.6	14.2
% change (total trade)		-5.6	17.1	14.2	13.7
% change (trade balance)		-31.9	11.7	41.8	15.9

Source: Uganda Bureau of Statistics

4.3.2 Exports

In 2019, Formal exports accounted for US\$ 3,563.8 million while informal exports were worth US\$ 531.9 million. For the period under review, Formal exports progressively increased from US \$ 2,267.0 million in 2015 to US\$ 3,563.8 million in 2019.

4.3.3 Exports by Destination

The African continent remained the main destination of Uganda's exports, followed by Europe and then the Middle East during the period under review. In 2019, total exports to the African continent stood at US\$ 1,874.4 million accounting for 45.7 percent, dropping from US\$ 2,146.8 million recorded in 2018, with a market share of 59.1 percent. The Common Market for Eastern and Southern Africa (COMESA) regional bloc was the main destination accounting for 32.2 percent of total formal exports revenue. In the COMESA bloc, the leading export destination country in 2019 was the Democratic Republic of Congo (DR Congo) accounting for 14.1 percent, followed by Kenya with 13.2 percent, See Appendix Tables 4.3 F and 4.3 G.

The Middle East ranked second as final destination of Uganda's exports accounting for 30.1 percent in 2019 compared to 16.5 percent in 2018. The main export destination in the Middle East sub-continent was United Arab Emirates whose export revenue increased to US\$ 1,196.0 million in 2019 from US\$ 562.4 million during 2018 accounting for 29.2 percent of the total exports in 2019.

The European continent ranked third as destination of Uganda's exports, accounting for 16.0 percent in 2019 compared to 15.7 percent in 2018. The European Union (EU) bloc was the main destination for Uganda's exports in Europe, much as its market share decreased to 12.5 percent during 2019 from 14.8 percent registered in 2018. The major destinations in the EU bloc were Italy, Netherlands, Belgium and Germany, representing about 9.8 percent of the market share in 2019, See Appendix Table 4.3 G.

The Asian continent's market share in 2019 averaged at 7.0 percent from 2015 to 2019 with main export destinations being India (1.4%), China (1.0%) and Hong Kong (1.0%). It is important to note that, with proper export promotion strategy; these countries could absorb more exports since they are among the main sources of Uganda's imports to narrow the trade deficits.

4.3.4 Performance of Formal Commodity Exports

Gold and Gold compounds were Uganda's leading commodity export whose revenue significantly increased to US\$ 1,257.8 million in 2019 from US\$ 515.6 million registered in 2018. Its share to the total formal exports increased from 16.7 percent in 2018 to 35.3 percent in 2019. Coffee ranked second with a slight increase in its value to US\$ 438.5 million in 2019 from US\$ 436.1 million in 2018, as indicated in Appendix Table 4.3 A. Coffee's share to total formal export earnings decreased from 14.1 percent in 2018 to 12.3 percent in 2019. Fish and Fish products ranked third as its export value increased from US\$ 169.9 million in 2018 to US\$ 174.2 million in 2019. Petroleum Products was ranked fourth and its export receipts increased to US\$ 127.1 million in 2019 from US\$ 122.3 million in 2018, See Appendix Tables 4.3 A and 4.3 B.

4.3.5 Imports

The total Formal import bill in 2019 stood at US \$ 7,696.0 million and informal bill was worth US \$ 57.8 million compared to that of US\$ 6,729.4 million and US\$ 60.0 million respectively as recorded in 2018. The total imports bill increased significantly by 14.2 percent to US\$ 7,753.8 million in 2019 from US\$ 6,789.4 million registered in 2018.

4.3.6 Total Imports by Regional blocs

During the period under review, the Asian continent was the main source of Uganda's merchandise imports, with an import bill of US\$ 3,043.7 million in 2019 compared to US\$ 2,966.6 million recorded in 2018. However, its market share to total imports decreased from 43.7 percent in 2018 to 39.3 percent in 2019.

The African continent ranked second with imports worth US\$ 2,099.4 million in 2019, representing 27.1 percent compared to US\$ 1,448.3 million in 2018. Imports from the COMESA regional bloc drastically increased to US\$ 1,011.4 million in 2019 from US\$ 770.2 million in 2018, while those from other Africa (besides COMESA) increased from US\$ 678.1 million in 2018 to US\$1,088.0 million in 2019

The Middle East ranked third much as its import bill to total Imports decreased to 17.1 percent in 2019 from 21.6 percent realized in 2018, See Appendix Tables 4.3 L and 4.3 M. The EU bloc came fourth with import expenditure decreasing from US\$ 600.5 million in 2018 to US\$ 559.5 million in 2019. The European Union (EU) market share has consistently been decreasing throughout the period under review from 11.4 percent in 2015 to 7.2 percent in 2019.

The five main countries where Uganda imported her merchandise in 2019 constituted a market share over 54.0 percent, with the rest of the countries taking the remainder. These were; China, India, United Arab Emirates, Kenya and Tanzania. Amongst them, China was the leading country of origin for Uganda's merchandise imports with an imports bill worth US\$ 1,256.6 million in 2019 representing a share of 16.2 percent. This was a rise compared to US\$ 1,184.4 million recorded in 2018. Similarly, India whose share was 11.0 percent, ranked second and recorded an increase in import bill estimated at US\$ 855.1 million in 2019 compared to US\$ 816.9 million recorded in 2018. United Arab Emirates came third with a percentage share of 10.6 percent and its import bill rose to US\$ 822.4 million in 2019 from US\$ 784.1 million recorded in 2018. Kenya followed with a share of 10.2 percent and its import bill increased from US\$ 540.8 million in 2018 to US\$ 792.0 million in 2019. Imports from Tanzania were worth an imports bill of US\$ 540.8 million, See Appendix Table 4.3 L and Table 4.3 M.

4.3.7 Main Products Formally Imported

Non-monetary gold was the main imported product into the country with the imports expenditure drastically increasing from US\$ 334.5 million in 2018 to US\$ 1,317.3 million in 2019. The proportion of Non-monetary gold imports to total formal imports represented 17.1 percent in 2019, compared to a share of 5.0 percent recorded in 2018. Petroleum products (which include petrol, diesel, paraffin, aviation fuel etc.) came second with import expenditure decreasing from US\$ 1,291.2 million in 2018 to US\$ 1,227.6 million in 2019. The proportion of petroleum products to total imports stood at 16.0 percent during 2019 compared to 19.2 percent share in 2018. Motor vehicles came third with imports bill increasing to US\$ 514.8 million in 2019 from US\$ 497.1 million recorded in 2018. The increases in vehicle imports have direct implication on demand for petroleum products, hence the need to build a refinery in Uganda to curtail future demand for these products. Iron and steel imports came fourth, although their imports bill decreased to US\$ 356.2 million in 2019 from US\$ 367.5 million in 2018. The other products which contributed significantly to the country's import bill during 2019 were; Medical Products and Pharmaceuticals (US\$ 306.3 million), Plastics in primary forms (US\$ 278.3 million), machinery for particular industries (US\$ 264.2 million), and vegetable fats and oils (196.9 million) among others, See Table 4.3.2; Appendix Table 4.3.N and Table 4.3 O.

Table 4.3.2: Annual Formal Imports of Main Commodities by SITC (US\$ million), 2015 -2019

SITC	Description	2015	2016	2017	2018	2019
97	Gold, non-monetary (excl. gold ores and concentrates)	0.0	0.0	0.0	334.5	1,317.3

4.3.8 Total Trade Balance performance

The country continued to experience trade deficits, with a 15.9 percent increase registered in 2019 compared to the 41.8 increase attained in 2018. The deficit generally fluctuated throughout the period under review, with the lowest trade deficit of US\$ 1,992.8 million being registered in 2016, while the highest of US\$ 3,658.1 million in 2019. (See table 4.3.1)

4.3.9 Informal Exports and Imports

This section presents informal trade flows highlighting the nature of products transacted, the direction of trade and performance of border posts as recorded during ICBT survey.

Informal exports stood at US\$ 531.9 million in 2019, representing a decrease of 2.7 percent from US\$ 546.6 million recorded in 2018. Similarly, informal imports registered a decrease of 3.7 percent from US\$ 60.0 million in 2018 to US\$ 57.8 million in 2019. (See table 4.3.1)

4.3.10 Informal Exports by Country of Destination

During 2019, informal exports were mainly destined to the DR Congo and Kenya in the form of manufactured products. In addition, Agricultural products like maize, beans and banana were majorly destined to Kenya, See Appendix Table 4.3 Q.

Figure 4.3.2: Informal Exports by country of destination (US\$ Million), 2015 to 2019

Exports to D.R Congo increased from US\$ 269.8 million in 2018 to US\$ 329.8 million in 2019. This was followed by Kenya, whose Export receipts values decreased to US\$ 97.5 million in 2019 from US\$ 150.0 million in 2018. Informal export trade with Rwanda declined drastically to US\$ 11.0 million 2019 from US\$ 49.5 million due to closure of the Uganda Rwanda border for some months.

There was a significant fall in informal exports due to insecurity that affected movement of goods and people to South Sudan in 2016 to US\$ 41.6 million from US\$ 78.8 million in 2015. However, from 2017 informal export receipts have steadily increased from US\$ 47.8 million to US\$ 61.6 million in 2019, See Appendix Table 4.3 P.

4.3.11 Performance of Informal Exports by Border Station

Mpondwe border post has been the leading exit point for Uganda's informal merchandise exports for the period under review. In 2019, the Export receipts through Mpondwe increased to US\$ 189.9 million from US\$ 149.3 million in 2018. This was followed by Busia with export receipts estimated at US\$ 84.1 million (15.8 percent share), Elegu with US\$ 59.8 million (11.2 percent share) and Paidha with US\$ 53.9 million (10.1 percent share), See Table 4.3.3 below.

The four border posts of Mpondwe, Busia, Elegu and Paidha had a combined share of over 72.9 percent of the total informal export revenue in 2019.

Table 4.3.3: Informal Exports by Border Station ('000 US \$), 2015- 2019

Customs/Year	2015	2016	2017	2018	2019
Mpondwe	118,355	137,054	171,745	149,303	189,943

4.3.12 Informal Imports by Country of origin

The DR Congo was the leading source of Uganda's informal imports in 2019, followed by Kenya and then Tanzania as shown in Table 4.3.4.

Informal imports from Rwanda reduced drastically from US\$ 4.8 million 2018 to US\$ 1.7 million in 2019. The reduction was mainly attributed to the closure of the Rwanda-Uganda border. Informal imports from South Sudan remained generally low with values estimated at US\$ 4.0 million in 2019 compared to US\$ 3.7 million recorded in 2018. It is important to note that, informal imports have been low on account of customs increased efforts by the Uganda

Revenue Authority (URA) in collecting taxes on all goods entering the country, thus forcing importers of most goods to formally declare them.

Table 4.3.4: Annual Informal imports by country of origin ('000 US \$), 2015 to 2019

Country/Year	2015	2016	2017	2018	2019
DR Congo	18,271	20,267	28,709	23,294	23,513
Kenya	31,872	26,612	27,352	24,968	23,324
Rwanda	1,164	2,495	3,187	4,830	1,687

South Sudan	10,694	12,986	19,111	3,670	3,952
Grand Total	64,269	64,870	80,679	59,988	57,763

Source: Uganda Bureau of Statistics

4.3.13 Performance of Informal Imports by Border Stations

Throughout the period under review, Busia and Mpondwe have remained as the main entry points for Uganda's informally imported commodities, registering import bills estimated at US\$ 15.7 million and US\$ 8.9 million respectively in 2019 (Table 4.3.5). During 2019, Busia border accounted for 27.3 percent, followed by Mpondwe border but with a slight reduction in its share accounting for 5.4 percent of the total informal imports bill in 2019 compared to 16.9 percent in 2018. Other leading Import entry points included Paidha, Malaba, Elegu and Kikagati. On the other hand, inflows through Cyanika, Katuna, Mirama Hills and Ntoroko borders reduced in 2019. This was mainly due to the restrictions imposed by the government of Rwanda on her nationals crossing to Uganda during the temporary closure of Katuna border post. The decrease in informal imports through Ntoroko was due to restriction on previously informally imported fish maws that must now be declared formally and yet they attract a high tax levy compared to the previous year.

Table 4.3.5: Annual Informal Imports by Border Stations ('000 US \$), 2015 -2019.

Customs	Year				
	2015	2016	2017	2018	2019

4.4 Government Finance Statistics (GFS)

4.4.0 Introduction

This section provides information on the fiscal operations of the General Government. Fiscal operations include the revenue, expenditure and financing of government institutional units. Government revenue is further analyzed by type of revenue while Government expenditure is analyzed by economic and functional classification according to GFS Manual 2014. The fiscal statistical information is critical in guiding policy and decision makers to analyze the impact of the fiscal operations at the level of a government, institutional sector and other sectors of the economy.

Government Finance Statistics (GFS) coverage is currently restricted to the General Government sector which comprises of Central Government and Local Government (127 Districts, 41 Municipalities and 357 Town councils) and also non-profit institutions that are controlled and financed by the government (Extra budgetary units).

4.4.1 Central Government Revenue.

In the FY 2018/19, the net Central Government revenue (excludes tax refunds and government taxes) was Shs 17,839.3 billion compared to Shs.15, 281.1 billion collected in the FY 2017/18. This was about 16.7 percent increment in the net central government revenue.

In FY 2018/19, the largest contributor to the Central Government revenue was the Tax revenue accounting for 90.6 percent while non-tax revenue contributed only 9.4 percent.

Among the tax revenue, the taxes on goods and services had the largest contribution of 8,451.1 billion accounting for 47.4 of the total revenue in the FY 2018/19, followed by Taxes on Income, Profits, and Capital gains with shs. 4,892.2 billion accounting for 27.4 percent of the total revenue while the lowest contribution to the tax revenue was taxes on permission to use goods or perform activities accounting for only 0.8 percent of the total revenue. (See figure 4.4.1)

Among the non-tax revenue, the largest contribution to the total Central Government revenue was from grants received by Government, accounting for 6.7 percent of the total revenue in the FY 2018/19. The Central Government grants increased to shs 1,201.6 billion in FY 2018/18 from shs 774.2 billion in FY 2017/18 indicating a 55.2 percent increase in grants.

Figure 4.4.1: Trends in Central Government Revenue by type in Billion Shillings, 2015/16 -2018/19.

Table 4.4.1: General Government Expenditure for FYs 2017/18 and 2018/19 in million shillings.

Sector	2017/18	Percent	2018/19	Percent
Local Government Expenditure	3,208,888	15.1	3,775,287	15.3
Central Government excluding Transfers to Local Government and arrears	17,980,584	84.9	20,967,950	84.7
Grand Total	21,189,473	100	24,743,236	100

Source: Uganda Bureau of Statistics

General Government Expenditure (excluding arrears) for the FY 2018/19 was shs. 24,743.2 billion compared to shs. 21,189.4 billion in the FY 2017/18. In the FY 2018/19, Local Government Expenditure accounted for 15.3 Percent of the total General Government expenditure while Central Government Expenditure (excluding arrears and Local Government Transfers) accounted for 84.7 percent. [See table 4.4.3 and Appendix Tables 4.4 C (a & b), 4.4 D (a & b), & 4.4 J (a & b)].

Table 4.4.2: Functional classification of General Government Expenditure for FY 2017/18 and FY 2018/19, Million shillings.

Functional classification	Million shs		Percent	
	2017/18	2018/19	2017/18	2018/19
General Public Services	5,737,424	6,762,547	27.1	27.3
Defense	1,795,882	2,406,383	8.5	9.7
Public order and safety	1,253,137	1,507,342	5.9	6.1
Economic Affairs	7,353,614	8,258,833	34.7	33.4

Education	2,342,682	2,606,366	11.1	10.5
Social Protection	388,848	390,564	1.8	1.6
Total	21,189,473	24,743,236	100	100

Source: Uganda Bureau of Statistics

From table 4.4.2 above, there was a 15.7 percent increase in the General Government Expenditure in comparison to the expenditure 18,376.5 billion spent in FY 2016/17. Economic affairs sector took the highest expenditure of General Government expenditure and this is mainly attributed to the development of transport sector and the Fuel & Energy affairs sector. [See table 4.4.3 and Appendix Tables 4.4 C (a & b), 4.4 D (a & b), & 4.4 I (a & b)].

4.4.2 Central Government Expenditure

Central government expenditure excluding transfers to Local Government increased by 16.6 percent from Shs. 17,980.6 billion for the FY 2017/18 to Shs. 20,968 billion for FY 2018/19. Recurrent expenditure increased by 12.3 percent in comparison to FY2017/18 while development expenditure increased by 35.8 percent and the donor expenditure increased by 8.6 percent.

In the FY 2018/19, the recurrent expenditure was Shs. 9,852.8 billion accounting for 46.9 percent of the Central Government Expenditure while, development expenditure and donor expenditure were shs. 5,558.4 billion and shs. 5,556.8 billion respectively and they both accounted for about 26.5 percent of the total Central Government expenditure.

General public services accounted for the highest percentage of the recurrent expenditure (48.4 percent) while Economic affairs accounted for the highest percentage of both the development (61.0 percent) and donor (58.0 percent) expenditure. The high expenditure in this sector was mainly attributed to investment in the transport sector. [See table 4.4.3 and Appendix Tables 4.4 C (a & b) & 4.4 D (a & b)].

Table 4.4.3 Summary of Central Government Expenditure by Functional Classification for FYs 2017/18 - 2018/19

Functional Expenditure	Shs. Million		Percentage share	
	2017/18	2018/19	2017/18	2018/19'

Source: UBOS

Note: Central government expenditure excludes transfers to Local government.

4.4.3 Local Government Revenue

During the FY 2018/19, total Local government revenue was shs. 4,084.4 billion of which 3,559.9 billion was revenue for the districts while 524.5 billion was revenue for Municipalities. Grants remained the major source of Local government revenue accounting for 95.4 percent of total Local Government revenue. Locally raised revenue accounted for only 4.6 percent of the total Local Government revenue of which raised taxes accounted for 1.5 percent while the other non-tax revenue accounted for 3.0 percent. *[See Appendix Tables 4.4 I (a&b)].*

4.4.4 Local Government Expenditure

In FY 2018/19, Local Government total expenditure rose to 3,775.2 billion from 3,208.8 billion in the FY 2017/18 which was a 17.7 percent increase in local government expenditure. The Education sector took the largest proportion of Local government expenditure accounting for 39.4 percent of the total government expenditure, followed by public administration accounting for 31.4 percent of total Local Government expenditure. The Health sector accounted for 13.5 percent of the total Local Government expenditure. The smallest expenditure at the Local Government was in the Social Protection sector. *[See Appendix Tables 4.4 J (a&b)].*

4.5 Banking and Currency

This section presents Statistics on the performance of the banking sector for the period June 2018 - June 2019.

4.5.1 Depository Corporations Survey

The Depository Corporation Survey covers Credit and Micro-Finance deposit taking institutions as well as deposits excluded from broad money. These deposits comprise of loan insurance fund held by individuals at credit institutions (CIs) and Micro Deposit Taking Institutions (MDIs).

The Net Foreign Assets (NFA) which shows a country's level of indebtedness, declined by 7.2 percent from UGX 14,953 billion shillings as at June 2018 to UGX13,870 billion shillings as at June 2019. The Net Domestic Assets (NDA) grew by 35.1 percent from UGX7,795 billion shillings in June 2018 to UGX10,535 billion in June 2019. Domestic claims and claims on other sectors each increased from UGX16,836 billion to UGX20,084 billion and UGX14,120 billion to 16,112 billion over the period under review, respectively.

Money Supply

Money supply indicates the total stock of money circulating in an economy. It includes currency notes, money in deposits and liquid assets. The Money supply denoted as (M1) includes money in circulation and local currency deposits in banks. M1 increased by 6.1 percent from 9,446 billion shillings in June 2018 to 10,018 billion shillings in June 2019. This was attributed to the increase in currency in the hands of the people and transferable deposits from 3,760 billion shillings in June 2018 to 3,993 billion shillings in June 2019 and 5,686 billion shillings in June 2018 to 6,025 billion shillings in June 2019 respectively.

The Money supply denoted as (M2) includes M1 plus savings and time deposits. M2 increased by 8.2 percent from 15,968 billion shillings in June 2018 to 17,279 billion shillings in June 2019

The Money supply denoted as (M3) is the broadest level of money supply. It includes money supply M2 and foreign currency deposits. M3 increased by 7.3 percent from 22,749 billion shillings in June 2018 to 24,405 billion shillings in June 2019. This is partly due to a 5.1 percent increase in foreign currency deposits from 6,780 billion shillings in June 2018 to 7,126 billion shillings in June 2019 (see Appendix Table 4.5A)

4.5.2 Commercial Banks Assets and Liabilities

The total assets of commercial banks in shillings increased by 10.4 percent from 27,685 billion shillings as at June 2018 to 30,559 billion shillings as at June 2019. Particularly, assets in loans, advances and overdrafts increased from 12,784 billion shillings in June 2018 to 14,151 billion shillings in June 2019. On the other hand, deposit assets dropped from 2,968 billion shillings in June 2018 to 2,663 billion shillings in June 2019

Total Commercial bank liabilities increased by 11.7 percent from 22,904 billion shillings as at June 2018 to 25,591 billion shillings as at June 2019. Additionally, total Capital increased from 4,564 billion shillings in June 2018 to 4,968 billion shillings in June 2019, translating into a 8.8 percent increase over the period.

Overall, net capital increased from 4,053 billion shillings in June 2018 to 4,594 billion shillings in June 2019. This represents a 13.4 percent increase in net capital.

Total deposit liabilities increased by 10.1 percent from 19,100 billion shillings in June 2018 to 21,031 billion shillings in June 2019. This was attributed to an increase in demand, savings and time deposits over the period by 7.6 percent, 10.0 percent and 15.8 percent respectively (See Appendix Table 4.5B & C)

4.5.3 Commercial Banks outstanding Loans and Advances

The total outstanding loans and advances in local currency to the private sector increased by 13.8 percent from 7,780 billion shillings in June 2018 to 8,853 billion shillings in June 2019. Sectors that registered notable increase in loans and advances as at June 2019 include manufacturing (31.3 percent), agriculture (27.1 percent), business services (22.8 percent) as well as building, mortgage and construction (20.5 percent) respectively. Although mining and quarrying declined by 46.1, loans and advances to the private sector generally increased over the period. Loans and advances to Trade (18.4 Percent), Building, mortgage and construction (17.8 percent) and personal and household (27.5 percent) continued to dominate accounting for over 60 percent of the total loans and advances to private sector

On the other hand, foreign currency denominated loans and advances to the private sector (in shillings) grew by 5.9 percent from 5,004 billion shillings in June 2018 to 5,298 billion shillings in June 2019. Over 65 percent of the total loans disbursed as at June 2019 went to the manufacturing (22.9 percent), trade (20.5 percent) and Building, mortgage and construction (25.3 percent). This implies that more forex loans were advanced to the Building, mortgage and construction sector as opposed to the shilling denominated loans which were advanced to the personal and household sector over the period under review. (See Appendix Table 4.5D & E)

4.5.4 Structure of Interest Rates

The Central Bank Rate (CBR), which is the rate at which commercial banks can borrow from the Central Bank increased to 10.0 percent in June 2019 from 9.0 percent in June 2018. In the same way, Commercial bank rate increased to 15.0 percent in June 2019 from 14.0 percent in June 2018. On annualised basis, the CBR averaged 9.7 percent in 2019 compared to an average of 9.3 percent recorded in 2018. Additionally, Rediscount rate; the rate of discounting a short term negotiable debt instrument for a second time increased to 13.7 percent in 2019 from 13.3 percent recorded in 2018.

Figure 4.5A: Annualised Average Interest Rates (Percent), 2014-2019

Treasury bills are government bonds or debt securities with maturity of less than a year. The 91 days Treasury Bills rate decreased to 9.0 percent in June 2019 from 9.2 percent in June 2017. Similarly the 182 days Treasury Bills rate

slightly decreased to 10.1 percent in June 2019 from 10.2 percent in June 2018. Likewise, 364 days Treasury Bills rate decreased to 10.3 percent in June 2019 from 11.2 percent in June 2018.

Deposit rate (foreign currency) decreased to 1.4 percent in June 2019 from 1.6 percent in June 2018 while lending rate decreased from 8.4 percent in June 2018 to 6.4 percent in June 2019. On annualised basis, foreign currency deposit and lending rates increased to 1.4 and 8.0 percent in 2019 from 1.3 and 7.8 percent in 2018 respectively (See Appendix 4.5F & G)

4.5.5 Exchange Rates

The average buying rate for foreign exchange (US dollar) appreciated from 3,707 shillings in 2018 to 3,690 shillings in 2019. Likewise, the average selling rate depreciated from 3,730 shillings in 2018 to 3,709 shillings in 2019. The Bureau mid-rate also appreciated from an average of 3,719 shillings in 2018 to an average of 3,699 shillings in 2019. Furthermore, the interbank mid-rate (official) appreciated from an average of 3,728 shillings in 2018 to an average of 3,704 shillings in 2019.

Table 3.5: Annual Foreign Exchange Rates (Uganda shillings per US\$), 2014-2019.

Exchange rates	2014	2015	2016	2017	2018	2019
Buying rate (weighted)	2,590	3,226	3,407	3,596	3,707	3,690
Selling rate (weighted)	2,599	3,242	3,422	3,643	3,730	3,709
Bureau mid-rate	2,595	3,234	3,414	3,620	3,719	3,699
Inter-bank mid-rate	2,600	3,246	3,420	3,611	3,728	3,704

Source: Bank of Uganda

Total volume of foreign exchange purchases across commercial banks (Inter-bank) and forex bureau's increased by 7.9 percent from 11,197 million US dollars in 2018 to 12,085 million US dollars in 2019. In the same way, total volume of foreign exchange sales across commercial banks (Inter-bank) and forex bureau's increased by 4.9 percent from 10,672 million US dollars in 2018 to 11,197 million US dollars in 2019

Figure 4.5B: Volume of purchases and sales of foreign exchange, 2014 to 2019

Purchase of forex has continued to outweigh total sales with a difference of 888 million US dollars. Notably, growth in purchases was higher than that of sales in 2019. The low sales of forex can partly be explained by the continued loss of value (depreciation) of the local currency against the US dollar in the last two years (See Appendix 4.5H & I)

4.6 Insurance

This section presents statistics on life and non-life insurance services and the number of insurance policies issued between 2012 and 2018.

4.6.1 Life Insurance Incomings and Outgoings

Life insurance refers to all policies that cover human related risks. Life policies issued include; Individual, Group, Medical and Deposit Administrative Plan (DAP).

Life insurance Gross premium incomings increased by 28.7 percent in 2018 from UGX168 billion to UGX217 billion in 2017. This was attributed by the increase in premium incomings; Life individual from UGX71 billion in 2017 to UGX102 billion in 2018, Life group that had declined by 12.0 percent in 2017 registered an increase of 23.2 percent from UGX53 billion to UGX66 billion in 2018 and Medical cover from UGX23 billion in 2017 to UGX32 billion in 2018. However, DAP insurance category declined by 17.9 percent in gross premium incomings in the same period from UGX20 billion in 2017 to UGX16 billion in 2018. (See Table 4.6 A).

The Life insurance for reinsurance outgoings category increased from UGX23 billion in 2017 to UGX34 billion in 2018 representing a 47.7 percent increase. The main contributor to the increase was the medical insurance category that increased from UGX10 billion in 2017 to UGX18 billion in 2018. The life individual insurance category grew from UGX1 billion in 2017 to UGX2 billion in 2018 (see Statistical Appendix Table 4.6 B).

The Net Incurred claims on life insurance registered a 31.4 percent increase in 2018 compared to the 26.2 percent increase registered in 2017. The value of life insurance paid and outstanding claims increased from UGX43 billion in 2017 to UGX57 billion in 2018. The paid and outstanding claims on the Life group insurance category registered an increase of 78.8 percent in 2018 from an earlier decrease of 30.3 percent. While the Life individual insurance category recorded an increase of 10.3 percent in 2018. (See Appendix Table 4.6 D).

4.6.2 Non-Life Insurance Incomings and Outgoings

Non-life insurance refers to policies that cover non-human related risks. These policies include fire, marine/aviation, motor, and miscellaneous accidents.

The value of non-life Insurance premium incomings increased from UGX292 billion in 2017 to UGX333 billion in 2018, representing a growth of 13.8 percent. The category for miscellaneous accidents that had declined by 8.5 percent in 2017 registered an increase of 33.2 percent from UGX44 billion to UGX59 billion in 2018, fire insurance recorded 6.0 percent increase from UGX85 billion to UGX95 billion; the motor insurance category recorded a 11.9 percent increase from UGX129 billion to UGX144 billion in 2018; However, marine category in the non-life insurance premium incomings recorded a decline of 0.9 percent in 2018. (Appendix Table 4.6E).

The outgoings in form of reinsurance registered a growth of 16.1 percent in 2018 from UGX117 billion to UGX136 billion in 2018. The major contributors to the growth were: miscellaneous accidents that increased by 29.0 percent in 2018 from an earlier decline of 14.3 percent that is from UGX22 billion to UGX28 billion, reinsurance for fire from

UGX64 billion to UGX75 billion in 2018, Marine/Aviation from UGX20 billion to 22 billion in 2018. (See Statistical Appendix Table 4.6 F).

Non-Life premium income grew by 13.6 percent in 2018 from UGX171 billion to UGX195 billion in 2018. Similarly, miscellaneous accidents increased by 41.6 percent with UGX33 billion in 2018. The Motor insurance and marine aviation categories also registered growths of 10.1 percent and 2.3 percent respectively in 2018. (See Appendix table 4.6 G).

The Net incurred claims on non-life insurance decreased by 5.8 percent in 2018 from an earlier growth of 7.1 percent in 2017. The value of non-life paid and outstanding claims declined from UGX61 billion to UGX57 billion in 2018. The main drivers for the decrease were miscellaneous accidents which declined by 82.8 percent and marine/aviation by 40.0 percent. However, Fire and motor insurance registered increases of 30.7 percent and 15.7 percent respectively in 2018. (See Appendix Table 4.6 H).
