GRAPHICAL ILLUSTRATION OF MALTA BY NUTS CLASSIFICATION

STATISTICAL REGIONS AND DISTRICTS OF MALTA

The Nomenclature of Territorial Units for Statistics (NUTS) is a hierarchical classification which divides the economic territory of the European Union for the purpose of producing regional statistics that are comparable across the European Union - NUTS 1 to 3 levels. To meet the demand for statistics at a local level, Eurostat has created a system of Local Administrative Units (LAUs) that is compatible with NUTS.

Director General

June 2022

FOREWORD

A reference point for those looking for valuable data at a regional level, Regional Statistics MALTA 2022 Edition continues on the previous editions presenting regional statistics on diverse socio-economic and environmental aspects. The publication focuses mainly on developments in the Gozo and Comino region and compares these developments with other statistics produced for the other five districts on the mainland.

Eight statistical domains, namely, demography, education, labour market, economy, transport, tourism, agriculture and fisheries, and resources, are once again looked into, thus providing continuity from previous editions. Most of the results presented in this publication were compiled using harmonised and consistent methodologies that allow for comparisons to be made both longitudinally and cross-sectionally at national and district levels. As such, users can observe trends over the years, analysing changes occurring in the socio-economic scenario in Malta, and Gozo and Comino. The detailed commentaries accompanied by statistical tables, charts, and maps, further allow for such analysis since they provide a holistic picture while illustrating key findings. The harmonisation in methodology proves extremely important in this edition since one will be able to see the impact COVID-19 had on different socio-economic spheres. Users of this publication are encouraged to use discretion when interpreting results and/or using this data, particularly for sectors that were largely impacted by COVID-19.

The small size of the Maltese islands presents various challenges when it comes to the collection and production of regional statistics. On one hand, one finds the issue of restrictive sample sizes, which would have a direct impact on the reliability of the data produced, while on the other hand, statistical confidentiality may prohibit detailed disaggregation of results. In order to overcome these challenges, the NSO is using more administrative registers that allow for a more refined production of statistics.

In view of this, the NSO is always very grateful for the support shown by its various data sources. I am also very grateful for the effort put forward by the Regional, Geospatial, Energy, and Transport Unit, together with all the other Units and staff at the NSO, who made the collection, compilation and dissemination of this publication possible.

DEMOGRAPHY

This chapter provides salient statistics on the regional demographic structure of MALTA. The first section comprises demographic aspects related to population size and structure, births, deaths and marriages while the second section considers the demographic and socioeconomic characteristics of households. The final section provides a regional analysis of social protection beneficiaries for a selection of benefits.

1.1 POPULATION

The number of inhabitants living in MALTA as at the end of 2020 amounted to 516,100 with 481,537 and 34,563 residing in the Malta, and Gozo and Comino regions respectively (**Table 1.1.1**). Persons between 30 and 39 years of age accounted for the highest share, 17.8 per cent, of the population of the Malta region with 33,815 and 15,894 persons living in the Northern Harbour and Northern districts respectively. Additionally, in the Gozo and Comino region, persons having the age of between 30 and 39 years, also accounted for the highest share that of 14.9 per cent of the population of the Gozo and Comino region (**Table 1.1.2**).

The population pyramid in **Chart 1.1.1** shows the age and sex structure of the MALTA population by region in 2020. It shows left-to-right symmetry suggesting almost equal female-male distribution in both regions across most of the ages, except for the 75 years of age and older where there was a broader share of females than males and which happened to be more pronounced in the Gozo and Comino region. The age demographic structures differed between the two regions. The population in the Malta region showed relatively higher concentration in the 20 to 39 years of age with a relatively equal female-male distribution. However, the age structure of the population of the Gozo and Comino region displayed a higher proportion of persons over the 50 years of age with a relatively equal female-male distribution.

During the period 2014 to 2020, the population of the Malta region increased every year with an overall growth of 73,579 inhabitants. In particular, the Northern Harbour district registered the highest population growth of 29.0 per cent, followed by the Northern district registering a growth of 27.4 per cent, while the least growth was recorded in the Southern Harbour district, registering a growth of 6.3 per cent. Similarly, the population of the Gozo and Comino region increased every year where there was an overall population growth of 2,830 inhabitants. (Table 1.1.5 and Chart 1.1.2)

CHART 1.1.1 – Distribution of population by age, sex and region (NUTS 3): 2020

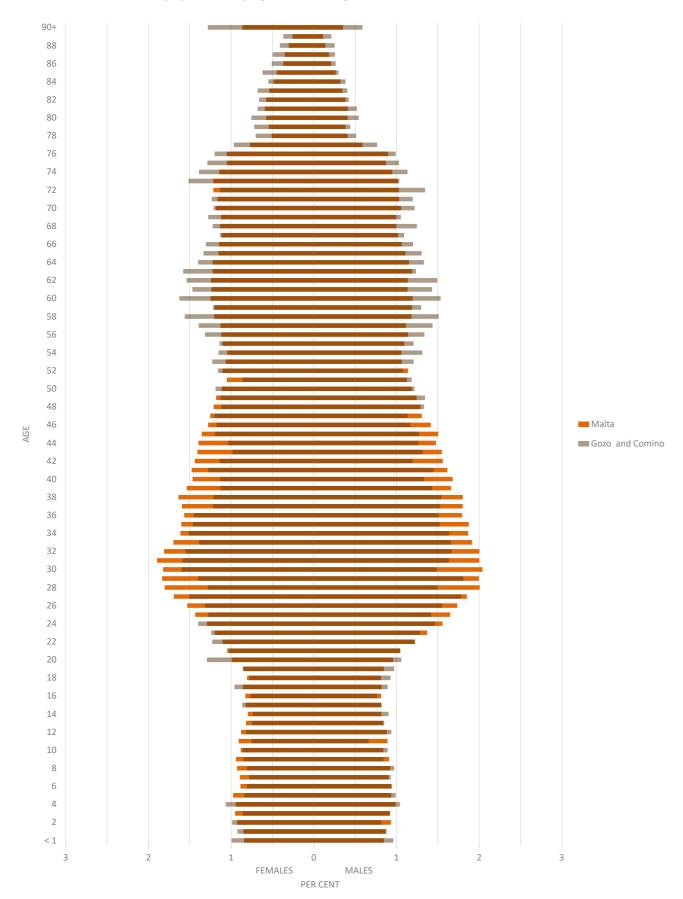

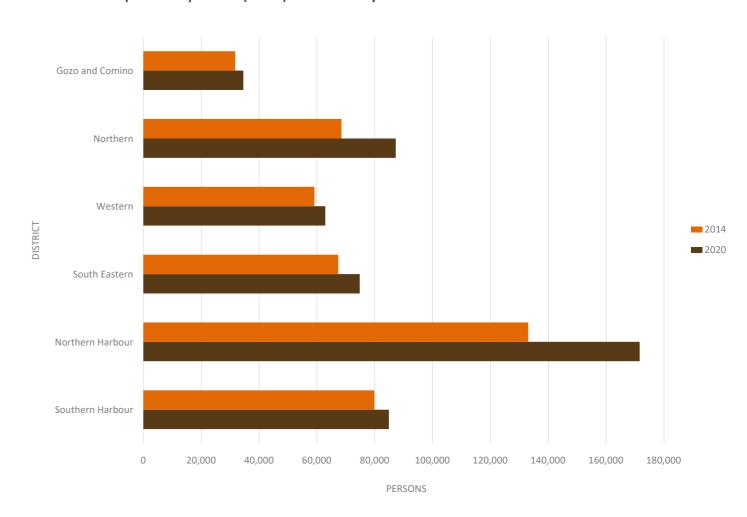

CHART 1.1.2 – Population by district (LAU 1) and selected years

Over the seven-year period, the highest increases in population were experienced in the elderly population cohorts of both regions. In particular, persons of between 70 and 79 years of age accounted for the largest growth in the Malta region, while in Gozo and Comino region, the largest increase was recorded amongst those persons aged 90 years and over. The population of between 10 and 19 years of age registered the largest decrease in both regions. The population of the 0-9 years of age registered an increase of 12.1 per cent in the region of Malta, while it recorded an increase of 13.8 per cent in the region of Gozo and Comino. (Charts 1.1.3 and 1.1.4)

Did you know?

In 2020, persons aged between 20 and 39 years accounted for almost one third of the population of both Malta and Gozo and Comino regions, comprising 32.5% and 28.4% respectively.

CHART 1.1.3 – Changes in population structures in Malta region by age group and selected years

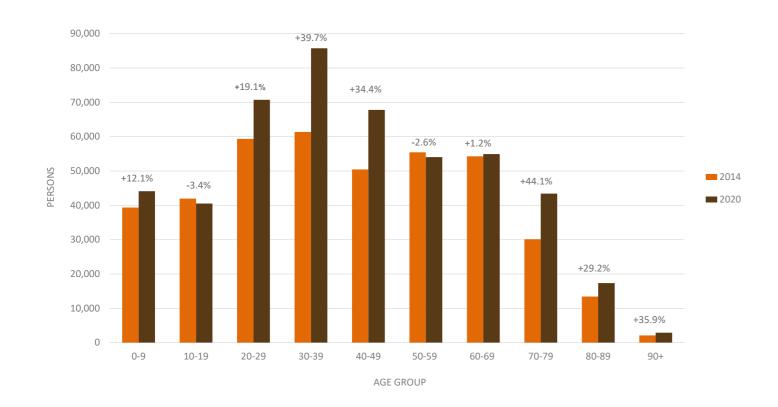

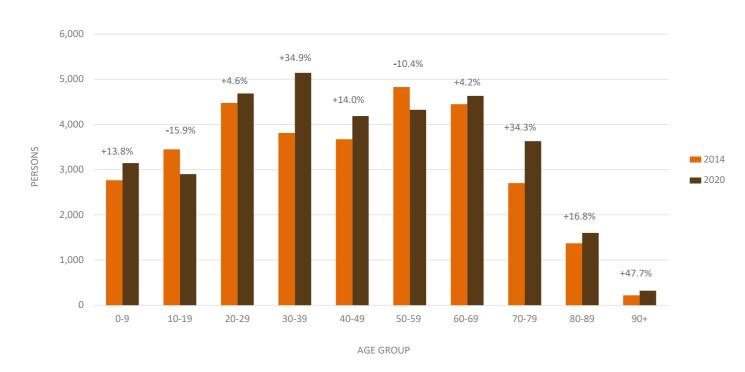

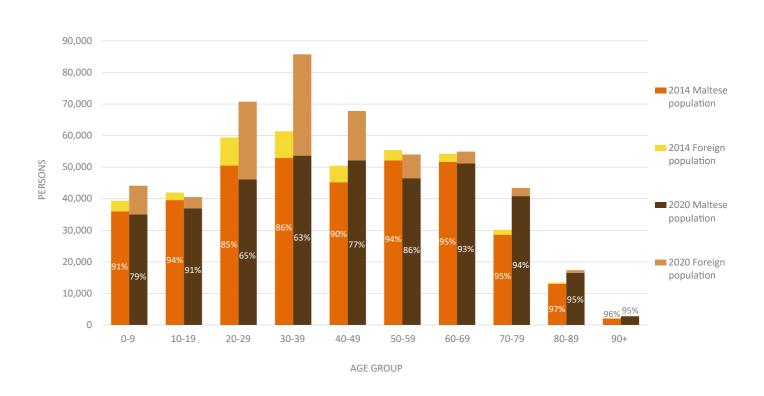

CHART 1.1.4 - Changes in population structures in Gozo and Comino region by age group and selected years

During 2020, total foreign population in MALTA reached 103,718 with the majority of foreigners being aged between 30 to 39 years (31.7 per cent) and 62,067 (59.8 per cent) being males. On a regional level, foreigners between 20 and 39 years of age comprised the biggest share in both Malta and Gozo and Comino regions, with 56.8 and 39.3 per cent respectively. In both regions, the smallest share was attributed to the elderly population (80 years and over). (Table 1.1.3) Almost half of the foreigners resided in the Northern Harbour district (49.6 per cent), followed by the Northern district (23.3 per cent). Foreigners residing in the Gozo and Comino region/district accounted for only 3.8 per cent. (Table 1.1.4)

The foreign population in MALTA increased quite significantly over the seven-year period in both regions. The most notable difference occurred within the population of 30-39 years of age, where the increase from 2014 to 2020 totalled 23,604 and 690, in the Malta and Gozo and Comino region respectively. The only decrease within the foreign population was in the age cohort of 60 to 69 years in the Gozo and Comino region, highlighting a slight drop of 55 inhabitants. (Charts 1.1.5 and 1.1.6)

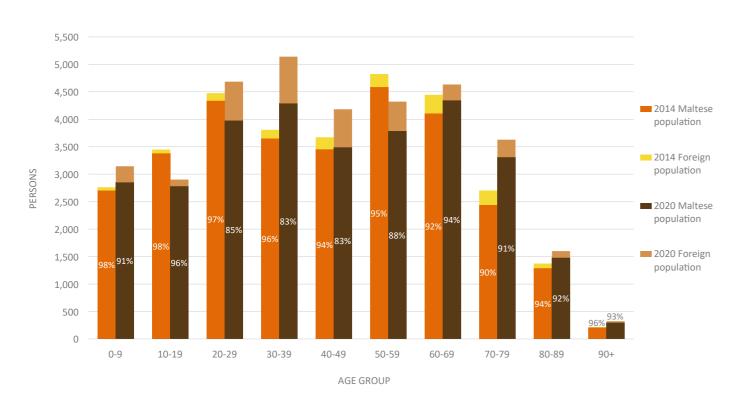

CHART 1.1.5 – Maltese and foreign population structures in Malta region by age group and selected years

Did you know?

In 2014, there was approximately one foreigner for every 11 residents in Malta region, while during 2020 this has changed to one foreigner per five inhabitants. For the Gozo and Comino region, while in 2014 there was one foreign resident for every 20 persons, in 2020, one in every nine inhabitants is considered to be a foreigner.

CHART 1.1.6 – Maltese and foreign population structures in Gozo and Comino region by age group and selected years

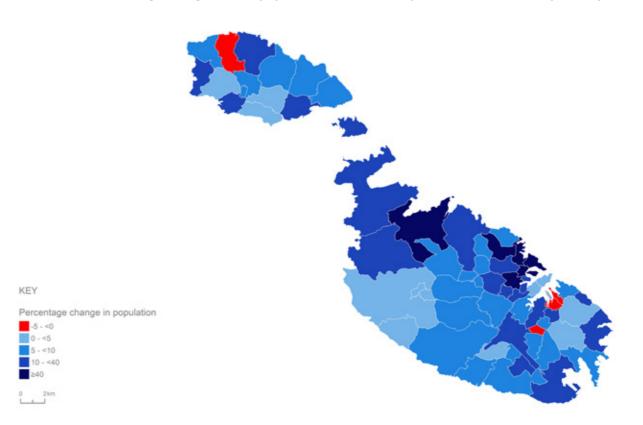

Map 1.1.1 presents information on the change in total population, comprising of Maltese and foreign residents, between the years 2014 and 2020 at locality level (LAU 2). The highest population growth rates in the Malta region were registered in the localities of L-Imsida, San Pawl II-Baħar, II-Gżira, San Ġiljan, Is-Swieqi and Tas-Sliema, while the localities of II-Birgu, Bormla and Santa Luċija recorded negative growth rates. In the Gozo and Comino region, Iż-Żebbug, II-Munxar, San Lawrenz and Għajnsielem and Comino registered the highest percentage increases in population, while L-Għasri recorded a slight decline during the period under review.

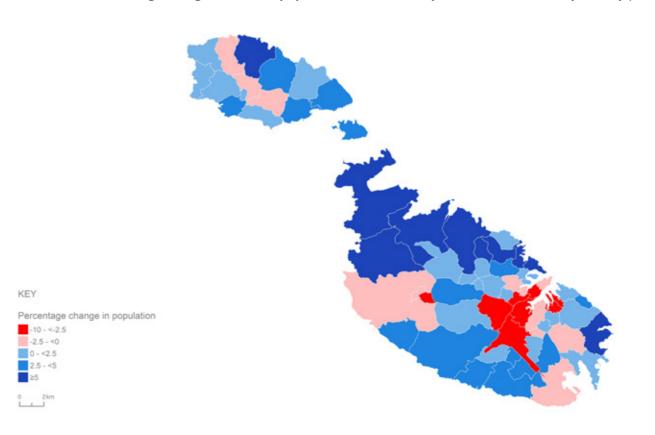

Map 1.1.2 illustrates the percentage change in Maltese population between the years 2014 and 2020 at locality level. Is-Swieqi registered the highest Maltese population growth rate, followed by San Ġiljan and Tas-Sliema. Most of the localities registered increases of less than 5 per cent while 21 localities recorded declines in the Maltese population.

Map 1.1.3 provides information on the percentage of foreigners to the total population of each locality for the year 2020. In the localities of L-Imsida, San Pawl II-Baħar, II-Gżira, Tas-Sliema and San Ġiljan, foreigners accounted to more than 40 per cent of total population, while the localities of Ħad-Dingli, L-Imtarfa and Santa Luċija amongst other localities had the lowest percentage of foreigners out of the total population residing in each of the localities.

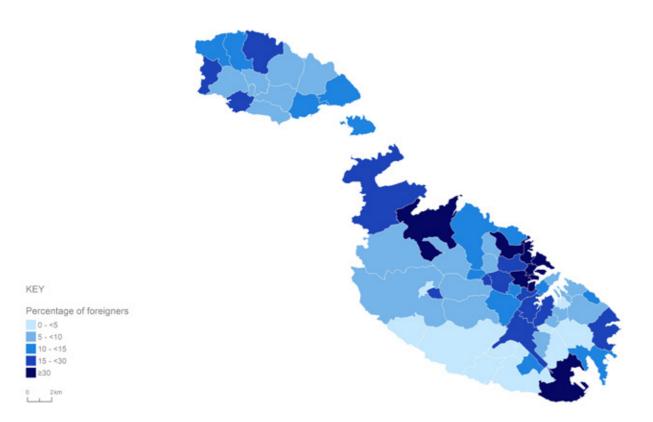

MAP 1.1.1 – Percentage change in total population between the years 2014 and 2020, by locality (LAU 2)

MAP 1.1.2 - Percentage change in Maltese population between the years 2014 and 2020, by locality (LAU 2)

MAP 1.1.3 – Percentage of foreigners to the total population of each locality (LAU 2): 2020

During 2020, total resident live births in the Malta region increased by 0.9 per cent over the previous year, with the Northern Harbour and Northern districts registering 1,248 and 908 live births respectively. The Gozo and Comino region registered an increase of 9.0 per cent (Table 1.1.6). There were 3,756 deaths recorded in the region of Malta during 2020, highlighting an increase of 10.5 per cent over the previous year. The Northern Harbour district accounted for 31.0 per cent, while deaths in the Gozo and Comino region increased by 13.9 per cent over 2019 (Table 1.1.7). During the period under review, the largest increases in natural population growth were registered in the Northern and South Eastern districts while that for the Southern Harbour district was negative for all years. The natural population growth for the region of Gozo and Comino was positive for all years except for 2015 (Chart 1.1.7).

In 2020, there were 1,157 marriages registered in MALTA. This reflects a total drop of 1,517 marriages when compared to 2019, with a decrease of 1,424 marriages registered in Malta region and a decrease of 93 marriages in the region of Gozo and Comino. (Table 1.1.8)

As of 2020, the highest old-age dependency ratio was registered in the Southern Harbour district with 35.8 per cent, followed by the Gozo and Comino region/district (34.3 per cent). This means that in these districts there were approximately three working-age adults for every person aged 65 years or more. On the other hand, the least old-age dependency ratio was at 21.2 per cent and was registered in the Northern district, implying that there were slightly fewer than five adults of working age for every person aged 65 years or more. (Table 1.1.9)

CHART 1.1.7 - Natural change in total population by district (LAU 1) and year

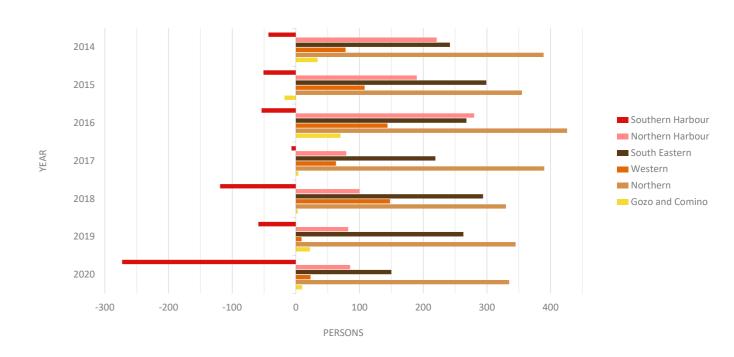

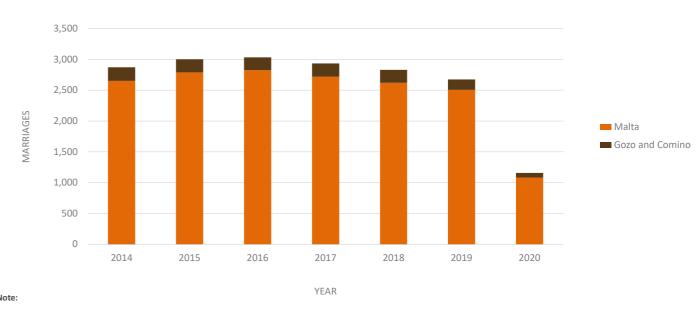

CHART 1.1.8 - Distribution of registered marriages by region (NUTS 3) and year

1. Data from 2017 onwards includes same-sex marriages. Refer to methodological note 2.

Notes:

METHODOLOGICAL NOTES

1. Population figures are in accordance with the 'usual residence' definition.

2. Definitions:

Usual residence refers to the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage. This definition is in line with the European Regulation (EC) No. 1260/2013. The following persons alone shall be considered to be usual residents of a specific geographical area:

- (a) those who have lived in their place of usual residence for a continuous period of at least 12 months before the reference time; or
- (b) those who arrived in their place of usual residence during the 12 months before the reference time with the intention of staying there for at least one year.

Usually resident population refers to all persons who have their usual residence in a Member State at the reference time. Unless otherwise stated, all figures in this chapter refer to this reference population.

Total population includes both Maltese and foreign residents.

Maltese population includes Maltese residents only.

Live births resident in Malta includes all babies whose parent(s) is(are) resident in Malta at the time of birth. Therefore, the definition excludes babies born to mothers who are resident abroad.

Total deaths: all registered resident Maltese and foreign deaths in Malta and Gozo. These counts exclude deaths of tourists, but include Maltese residents who die abroad and whose death is subsequently registered in Malta. This definition excludes still births.

Total registered marriages: all marriages registered in Malta and Gozo and occuring in the reference year. These include marriages between non-resident foreign spouses and same-sex marriages following the amendment to the Marriage Act which came into force as at 1st September

- 3. All population components are based on definitions provided for in the European Regulation (EU) No. 1260/2013 on European demographic statistics.
- 4. Old-age dependency ratio is calculated as follows:

Number of elderly people (aged 65 years or more)

Number of working-age people (aged 15 - 64 years)

^{1.} Totals may not add up due to rounding.

^{2.} The old-age dependency ratio is the ratio of the number of elderly people at an age when they are generally economically inactive (aged 65 years or more) compared to the number working-age people (aged 15-64 years). Refer to methodological note 4. $\,$

The number of households in 2020 was of 206,868 in MALTA of which 93.3 per cent resided in Malta region and 6.7 per cent resided in the Gozo and Comino region. Being the most densely populated districts, the Northern Harbour and Northern districts accounted for 56.4 per cent of the total households in Malta region with 71,646 and 37,170 households respectively. The number of households increased year-on-year in both regions during the period 2015 to 2020. (Table 1.2.1 and Chart 1.2.1)

CHART 1.2.1 – Percentage distribution of households by district (LAU 1) and selected years

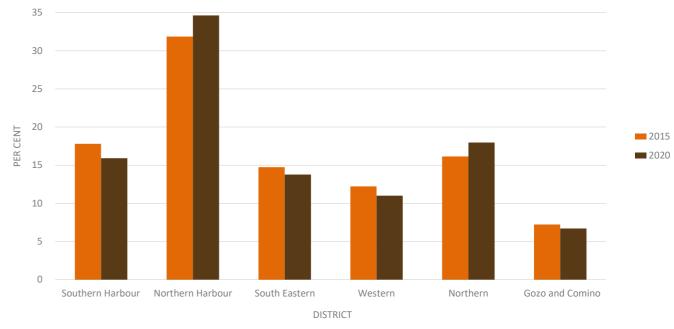

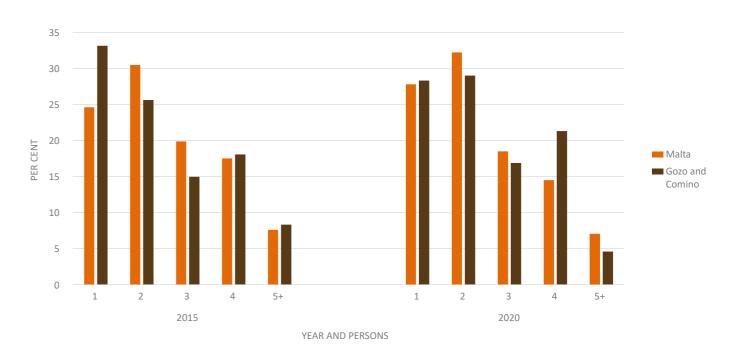

CHART 1.2.2 – Distribution of households by household size, region (NUTS 3) and selected years

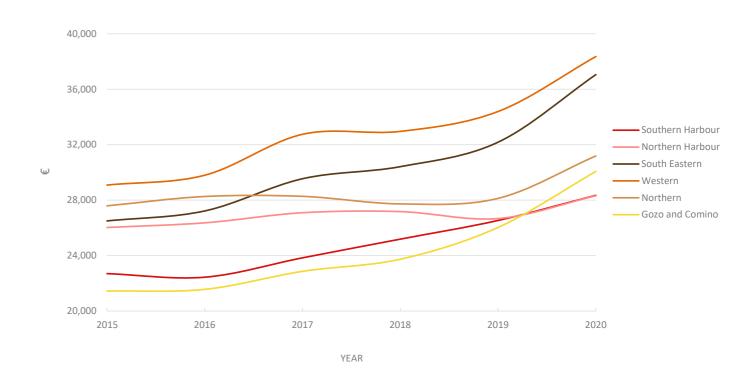

In 2020, the most common household size for people living in the Malta region was the two-person (32.2 per cent), the same applies for the Gozo and Comino region (29.0 per cent) (Table 1.2.2 and Chart 1.2.2). The total number of persons residing in private households in MALTA during 2020 was of 505,014, of which 470,997 lived in Malta region and 34,017 resided in Gozo and Comino region. In comparison to 2015, this reflected an increase of 16.9 per cent in MALTA. An increase of 17.2 per cent was observed in the Malta region, while Gozo and Comino registered an increase of 14.0 per cent. The largest increases in the number of persons residing in private households recorded in 2020 over 2015 were registered in the Northern and Northern Harbour districts with growth rates of 24.8 per cent and 21.6 per cent respectively. (Table 1.2.3)

In 2020, the average household disposable income stood at €31,352 in the region of Malta, an increase of 9.3 per cent over the previous year, while in the region of Gozo and Comino the average household disposable income stood at €30,070, an increase of 15.5 per cent over 2019. The average household disposable income was highest in the Western district at €38,365 and lowest in the Northern Harbour district. (Table 1.2.4 and Chart 1.2.3)

The Statistics on Income and Living Conditions survey showed that in 2020, 85,369 persons living in private households in MALTA were at-risk-of-poverty, with 94.8 per cent residing in Malta region and 5.2 per cent residing in the Gozo and Comino region. This translates into at-risk-of-poverty rates of 17.2 and 12.9 per cent for the regions of Malta and Gozo and Comino respectively. When compared to 2019, increases in the number of persons at-risk-of-poverty in 2020 were registered in the Southern Harbour, Northern and Western districts at 40.7, 17.9 and 10.2 per cent respectively. Meanwhile, the number of persons at-risk-of-poverty in the South Eastern, Northern Harbour and Gozo and Comino districts decreased by 27.6, 7.2 and 4.2 per cent respectively. (Table 1.2.5)

CHART 1.2.3 – Average household disposable income by district (LAU 1) and year

Did you know?

When compared to 2015, the at-risk-of-poverty rate in the Malta region increased from 16.4% to 17.2% in 2020, whereas in the Gozo and Comino region, this went down from 20.0% to 12.9%.

METHODOLOGICAL NOTES

- 1. The Statistics on Income and Living Conditions (SILC) survey is an annual enquiry conducted by the National Statistics Office (NSO) among persons residing in private households in Malta and Gozo. This survey is carried out under EU regulation (EU. No. 1177/2003). The main scope of this survey is to enable the compilation of statistics on income distribution and indicators on monetary poverty. SILC also serves to produce reliable quantitative information on social exclusion and material deprivation.
- 2. Definitions:

The gross household income includes:

- Gross employee cash or near cash income;
- Gross non-cash employee income (only company car and associated costs included);
- Gross cash benefits or losses from self-employment (including royalties);
- Unemployment benefits;
- Old-age benefits;
- Survivors' benefits;
- Sickness benefits;
- Disability benefits;
- Education-related allowances;
- · Income from rental of property or land;
- Family/Children related allowances;
- Social exclusion not elsewhere classified;
- Housing allowances;
- · Regular inter-household cash transfers received;
- Interests, dividends, profits from capital investments in unincorporated business;
- Income received by people aged under 16;
- Income received from individual private pension plans.

The **total disposable income** of a household is calculated by deducting:

- regular inter-household cash transfers paid,
- tax on income, and,
- social insurance contributions

from the total gross household income.

Equivalent household size is calculated according to the "modified OECD" equivalence scale which gives:

- a weight of 1.0 to the first adult;
- a weight of 0.5 to any other household member aged 14+;
- a weight of 0.3 to each child.

The resulting figure, which is the sum of these weights, is attributed to each member of the household.

Equivalised disposable income (referred to also as national equivalised income) is defined as the household's total disposable income divided by its "equivalent size", to take account of the size and composition of the household, and is attributed to each household member. For example a household with 2 adults and 2 children aged less than 14, would have an equivalised household size of (1+0.5+0.3+0.3) = 2.1. If the total disposable income earned by the household is €20,000, then the household equivalised income would result in (€20,000/2.1) = €9,523.

The at-risk-of-poverty threshold is also referred to as the at-risk-of-poverty line or, simply, the poverty line. This is equivalent to 60 per cent of the median national equivalised income of persons living in private households.

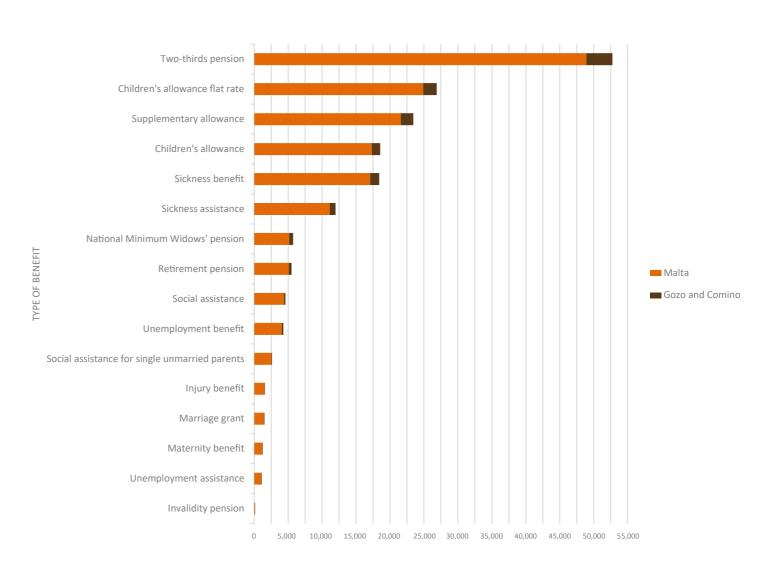

The at-risk-of-poverty rate refers to the share of persons with an equivalised disposable income below the at-risk-of-poverty threshold.

The selection of social benefits shows that the two-thirds pension had the highest number of beneficiaries in both regions during the years under consideration, with 92.7 per cent of the recipients were in the Malta region and 7.3 per cent in the Gozo and Comino region during 2020. In the Malta region, the children's allowance flat rate and the supplementary allowance were the two other benefits which had the largest number of beneficiaries in 2020; at 24,872 and 21,582 recipients respectively (Table 1.3.1 and Chart 1.3.1). Yet, the corresponding outlay on these two benefits was of only 9.1 and 4.7 per cent of the total social expenditure of the selected benefits (excluding the two-thirds pension benefit), in the region of Malta. The national minimum widows' pension and the retirement pension benefits had the highest percentage distribution of the selected social protection benefits expenditure (excluding two-thirds pension benefit), in the region of Malta in 2020. (Chart 1.3.2)

CHART 1.3.1 – Social protection beneficiaries by type of benefit and region (NUTS 3): 2020

BENEFICIARIES

CHART 1.3.2 - Percentage distribution of selected social protection benefits expenditure in the regions of Malta and Gozo and Comino (NUTS 3): 2020

1. Excluding two-thirds pension benefit.

In the Gozo and Comino region, the children's allowance flat rate benefit and the supplementary allowance followed the two-thirds pension in terms of the number of beneficiaries during 2020, benefitting 1,997 and 1,861 recipients respectively (Table 1.3.1 and Chart 1.3.1). The corresponding expenditure on these benefits was of just 10.1 and 5.3 per cent of the total social expenditure of the selected benefits (excluding the two-thirds pension benefit), in the region of Gozo and Comino. In 2020, the national minimum widows' pension and the retirement pension benefits had the highest percentage distribution of the selected social protection benefits expenditure (excluding the two-thirds pension benefit) in the Gozo and Comino region. (Chart 1.3.2)

Map 1.3.1 provides information on the expenditure per capita on the selected benefits in each locality in 2020. The expenditure per capita on the selected benefits was highest in the localities of L-Imdina, Il-Birgu and Santa Lucija where the expenditure per capita was greater than €2,000 in each of the localities. In contrast, the expenditure per capita was less than €900 in the localities of Is-Swieqi, San Pawl II-Baħar, L-Imsida, L-Imtarfa, San Ġiljan and II-Gżira. In the region of Gozo and Comino, the expenditure per capita on the selected benefits was highest in Ir-Rabat and L-Għasri with expenditure per capita exceeding €1,500 in each of the localities.

KEY Expenditure per capita (€) ≤900 901 - 1,300 1,301 - 1,500 1,501 - 2,000

Did you know?

During 2020, the Southern Harbour district registered the highest expenditure per capita reaching €1,643, while the least expenditure per capita was recorded in the Northern district at €1,030.

METHODOLOGICAL NOTES

- 1. Table 1.3.1 provides a selection of benefits.
- 2. Definitions:
 - **Two-thirds pension:** pension related to earnings, payable to persons who retired after January 1979. This scheme provides for a pension equivalent to two-thirds of the insured person's pensionable income. Maximum and minimum rates apply.
 - Retirement pension: payable on reaching pension age. The rates and types of categories vary according to various statutory conditions.
 - **Invalidity pension:** payable to persons deemed permanently incapable of suitable full-time or regular part-time employment. Rates vary according to different conditions.
 - National minimum widows' pension: payable to widows, irrespective of age, who are not gainfully occupied, who are occupied but earning
 less than the national minimum wage and are in receipt of a service pension, or who are carrying out gainful activities but have the care and
 custody of children under 16 years of age. Rates may vary according to conditions outlined in the Social Security Act. Reference to 'widow'
 includes 'widower'.
 - Injury benefit: This benefit is payable for injury at work or contraction of industrial disease. Maximum entitlement is limited to 12 months.
 - Marriage grant: a one-time payment payable on marriage to persons normally resident in Malta. To be eligible a person must be employed, self-employed or self-occupied for at least six months at any time prior to his/her marriage.
 - Maternity benefit: payable to local residing pregnant citizens of Malta in respect of the last eight weeks of pregnancy and the first six weeks after childbirth. This benefit is only payable if the female is not entitled to maternity leave from her employer, if employed.
 - Sickness benefit: comprises an entitlement of 156 days but may be extended to 312 days in certain cases. The first three days of
 each new claim for this benefit are not reimbursed.
 - **Unemployment benefit:** payable to unemployed persons for a period of 156 days. This benefit is considered as a short-term benefit. Subsequently, unemployed persons may qualify for long-term benefits under the 'Social Assistance' category.
 - Children's allowance: payable to married couples, cohabiting couples, civil union couples, single parents, separated parents or returned migrants who have the care and custody of children under the age of 16 and whose annual household income is below the threshold as established in the Social Security Act (Cap. 318).
 - Children's allowance flat rate: payable to married couples, cohabiting couples, civil union couples, single parents, separated parents or returned migrants who have the care and custody of children under the age of 16 and whose annual household income exceeds the threshold as established in the Social Security Act (Cap. 318).
 - Sickness assistance: entitlement is subject to the satisfaction of the Director of Social Security that the claimant or a member of his/her household is suffering from a disease that can only be cured or alleviated by a special diet/regimen that incurs exceptional expenditure.
 - Social assistance: payable to heads of households who are either unemployed or seeking employment and whose relative financial means are below those established by the Social Security Act. This benefit is also payable to single or widowed males/females who lack financial resources and who are caring for an elderly or handicapped relative on a full-time basis. Social Assistance also includes payments made to persons who satisfy the Director of Social Security that they are no longer capable of employment but do not have sufficient means to support their family.
 - **Social assistance for single unmarried parents:** payable to a single parent whose income falls below a certain level. The person's earned income together with the Social Assistance entitlement for two persons should not exceed the National Minimum Wage.
 - Unemployment assistance: heads of household who are registering under Part 1 of the Unemployment Register may be entitled to unemployment assistance after the period covered by the unemployment benefit has elapsed.
 - Supplementary allowance: payable to households whose total income falls below the level established by the Social Security Act.

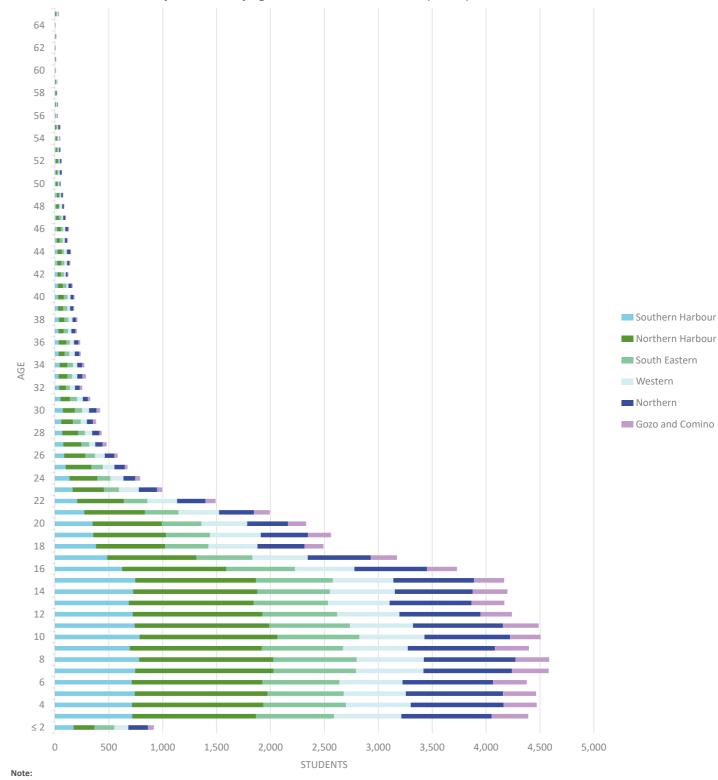

EDUCATION

This chapter provides a regional perspective to the natural progression of students through different levels of the education system in MALTA. The data presented is split into non-compulsory and compulsory education, covering state, independent and church institutions. Schooling is compulsory between the ages of 5 and 16. Non-compulsory education is divided into pre- and post-compulsory; the former comprising kinder level, whereas the latter includes post-secondary and tertiary education. Students and graduates are analysed by the place of residence and location of school.

During the scholastic year 2019/20, there was a total of 84,957 students attending non-compulsory and compulsory education in MALTA. Chart 2.1 illustrates a demographic summary of the overall student body both in terms of student age, and in terms of the student's district of residence. Most students were aged between 3 and 17 years, comprising 75.3% of the total student body. The Northern Harbour district represented the highest share of students almost across all ages. (Chart 2.1)

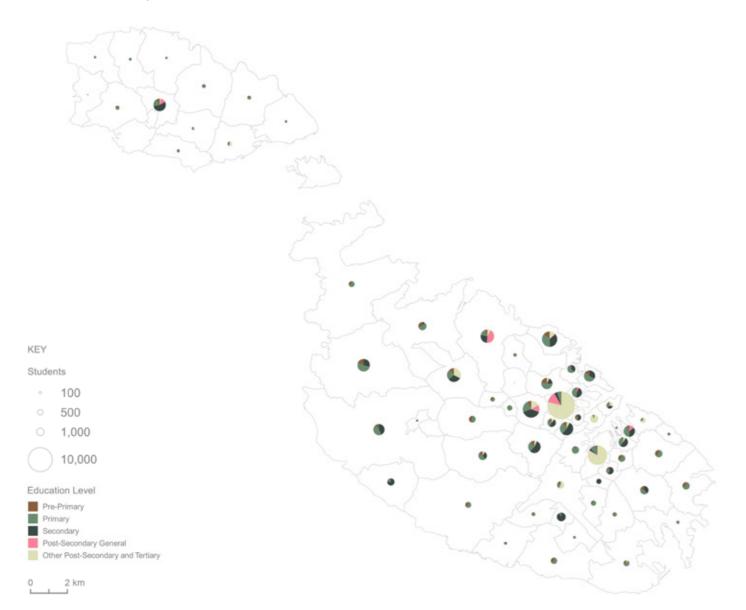

CHART 2.1 – Student body in MALTA by age and district of residence (LAU 1): 2019/20

^{1.} Student body in the above chart refers to persons in non-compulsory and compulsory education. Data excludes students not residing in Malta or whose residence is unspecified.

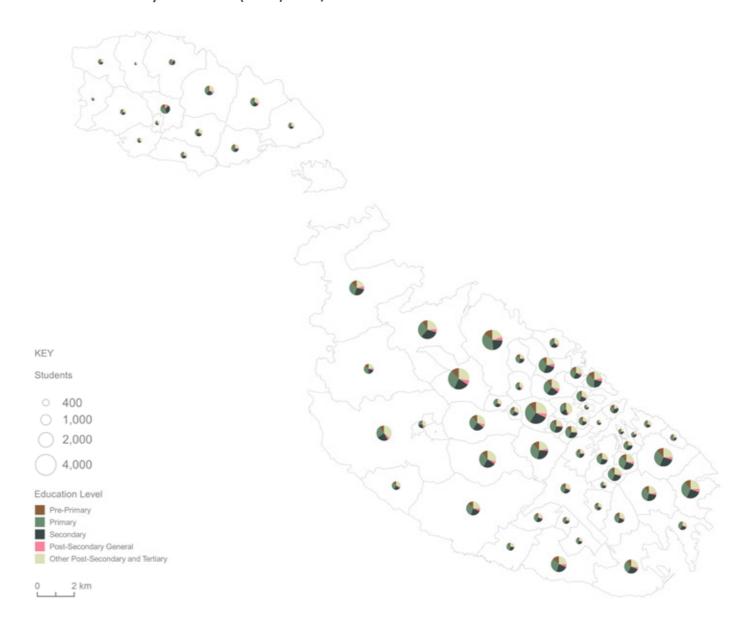

MAP 2.1 – Student body by educational level/institution and locality of residence (LAU 2): 2019/20

MAP 2.1.1 – Locality of institution (LAU 2): 2019/20

Map 2.1.1 shows a considerable concentration of institutions in the Harbour districts which cater for students at post-secondary and tertiary levels. On the contrary, the majority of localities have institutions at primary and secondary levels.

MAP 2.1.2 - Locality of residence (LAU 2): 2019/20

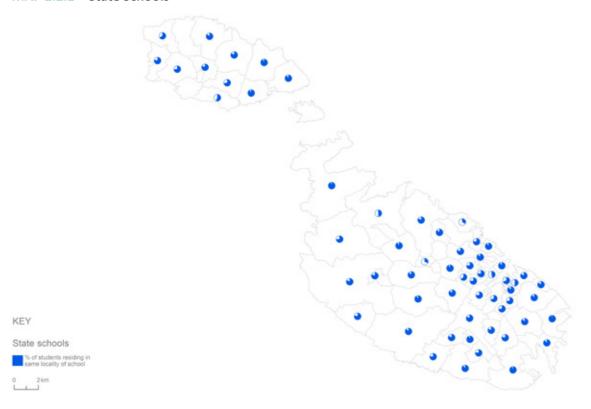

Map 2.1.2 shows the student population resident in each locality by education level. The size of the circle is by and large reflected by the population size of each locality, however, the composition varies especially with respect to post compulsory levels.

PRE-PRIMARY LEVEL

As at end of March 2020, the share of pre-primary students attending state and independent schools amounted to 72.2 and 18.1 per cent respectively, as the remaining attended church schools. The most common age in state and independent schools at pre-primary level was that of 3 years and younger, whereas in the case of church schools, mostly were 4, 5 and 6 years old (Table 2.6).

MAPS 2.2 - Pre-primary children by locality (LAU 2) and type of school: 2019/20

MAP 2.2.1 - State Schools

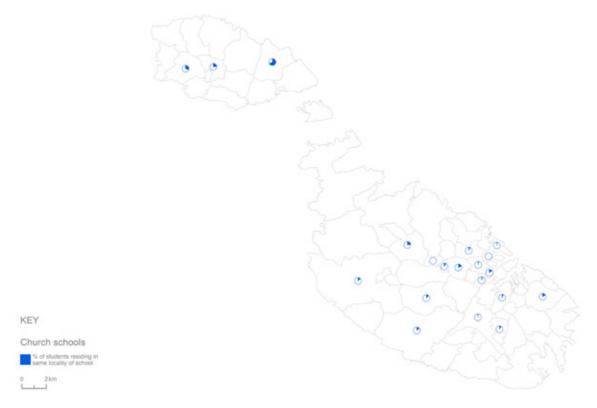

The largest proportion of pre-primary students resided and attended school in the Northern Harbour district (**Table 2.1**). While most students attending state schools resided in the same locality of the school, the contrary prevailed in the case of church and independent schools. Students who attended schools in the Northern Harbour district were mainly enrolled in state and independent schools at 56.6 and 30.8 per cent respectively. The choice for pre-primary education in the Gozo and Comino district was limited to state and church schools, the former comprising 71.1 per cent of the total. (Maps 2.2 and Table 2.6)

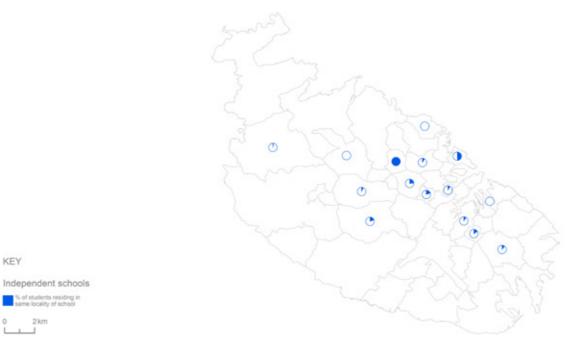

Did you know?

In 2020, the proportion of young children between the age of 3 and the age for starting compulsory primary education (5 years) who participated in early childhood education stood at 67.0% in Gozo and Comino and 60.2% in the Malta region.

MAP 2.2.2 - Church Schools

MAP 2.2.3 – Independent Schools

Note:

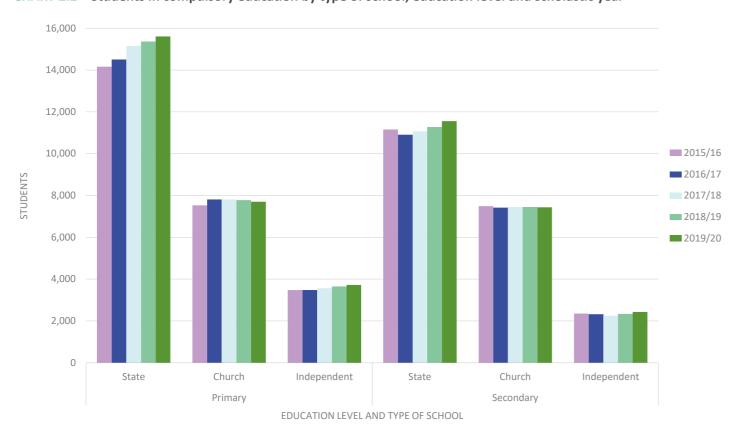

1. Gozo and Comino district is omitted from the map as no presence was registered

PRIMARY AND SECONDARY EDUCATION

Compulsory education comprises of a six-year primary cycle and five-year secondary cycle. During scholastic year 2019/20, the number of children and adolescents in compulsory education amounted to 48,465 students. State schools accounted for 56.1 per cent of total student body. The spread of students in compulsory education was 55.8 per cent in primary level and 44.2 per cent in secondary level of education. (Table 2.2)

The concentration of students in compulsory education prevailed in institutions located within the Northern Harbour district; with primary and secondary levels comprising 33.5 and 47.8 per cent of the total student body in primary level and total student body in secondary level respectively (Table 2.2).

CHART 2.2 - Students in compulsory education by type of school, education level and scholastic year

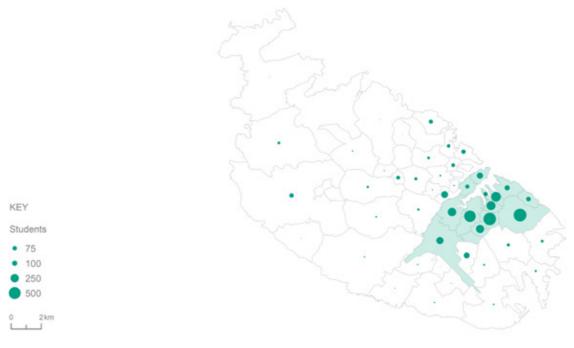

Did you know?

During academic year 2019/20, more than half of the total student body (57.0%) attended compulsory education, with 27,035 students attending primary level education and 21,430 students enrolled in secondary level education.

MAP 2.3.6 - Gozo and Comino

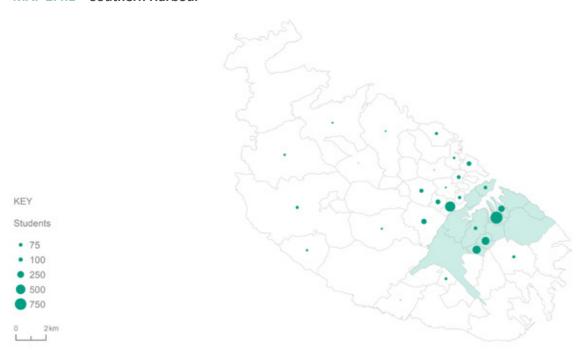

Total students enrolled in primary education were 27,035 students as at March 2020. State schools remained the most popular at 57.7 per cent of total student body in primary level. The majority of church and independent institutions were located within the Northern Harbour district (Table 2.7). Most of the students in primary education attended school in the same district of residence (Table 2.3 and Maps 2.3). The primary schools in the Gozo and Comino district dispersed almost in all localities to cater for all the students residing in this district.

Total students enrolled in secondary education were 21,430 students. Of these, 53.9 per cent attended state schools, followed by church schools at 34.7 per cent (Table 2.8). The behaviour of primary education students was similar to secondary students, in that most students attended institutions in the same district of residence. Due to the fact that secondary education institutions were less when compared to primary institutions, this could have resulted in more students leaving their district of residence and attending school in another district (Table 2.4). On the contrary, Gozo and Comino district catered for almost all its secondary students. (Maps 2.4)

POST-SECONDARY GENERAL EDUCATION

In March 2020, students in post-secondary general education amounted to 4,760 students, of which 76.5 per cent attended state-run institutions (**Table 2.9 and Chart 2.3**). Most institutions were in the Northern Harbour district at 53.9 per cent (**Table 2.5**). Maps 2.5 show the district of residence and the locality of the institution at post-secondary general level, illustrating that students residing in Malta region attended mostly institutions located in L-Imsida and In-Naxxar. On the other hand, the post-secondary institution in Ir-Rabat, Għawdex catered for the large majority of students residing in Gozo and Comino region/district. (**Table 2.9**).

Did you know?

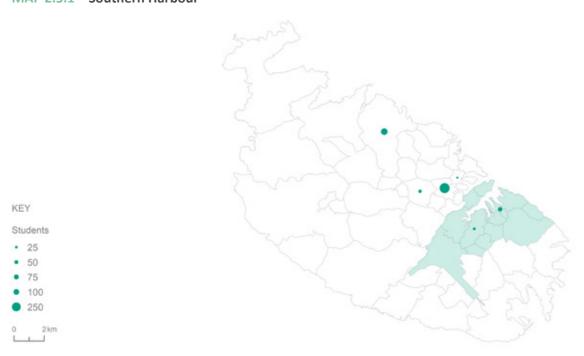

From the scholastic year 2015/16 onwards, the total number of students following courses at post-secondary general education have been on the decline. Indeed, students enrolled in this level of education reached 5,472 during acadmenic year 2015/16, and went down to 4,760 in 2019/20, corresponding to a drop of 13.0%.

OTHER POST-SECONDARY AND TERTIARY EDUCATION

'Other post-secondary' education refers to students following courses in Malta College of Arts, Science and Technology (MCAST), Institute of Tourism Studies (ITS), University of Malta, and public and private institutions which offer courses at ISCED levels 2 to 4. Tertiary level education refers to students enrolled at MCAST, ITS, University of Malta, and public and private institutions which provide courses at ISCED levels 5 to 8, covering short-cycle tertiary education, Bachelor's level, Master's level, Doctoral level or an equivalent level.

Did you know?

The proportion of students following courses at the University of Malta relative to the total student body decreased from 13.2% in the scholastic year 2018/19 to 12.6% in 2019/20.

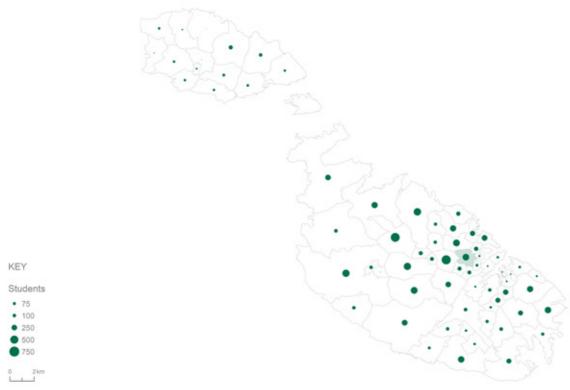

ENROLMENTS

During academic year 2019/20, the number of students attending full-time or part-time courses at other post-secondary or tertiary institutions amounted to 21,914 (Tables 2.10 and 2.11). This reflects an increase of 4.4 per cent on the previous academic year 2018/19. The majority of the students followed courses at the University of Malta, MCAST and ITS, with 10,676, 6,682 and 533 enrolments respectively.

Maps 2.6 and 2.7 depict the student body according to locality of residence for each of the three University of Malta campuses (L-Imsida, Valletta and Ix-Xewkija), the four vocational MCAST campuses (Raħal Ġdid, II-Mosta, Ħal Qormi and Għajnsielem) and the ITS campus of Ħal Luqa. The vocational MCAST campus located in II-Kalkara and the ITS campus located in II-Qala are being omitted due to the very small number of students attending these campuses. Students registered with a foreign address or whose residence was unspecified were not included in the maps.

The majority of students following other post-secondary and tertiary education were females at 55.0 per cent of the student body in scholastic year 2019/20 (excluding those students whose residence and/or MQF level was unspecified). This implied an increase of 5.4 per cent when compared to situation in 2018/19, with female students being predominant in MQF levels 4 to 7. The remaining 45.0 per cent of the total in 2019/20 comprised of male students, who registered an increase of 0.6 per cent when compared to same reference years (Table 2.10 and Chart 2.4).

CHART 2.4 - Students at other post-secondary and tertiary institutions by MQF level, sex and scholastic year

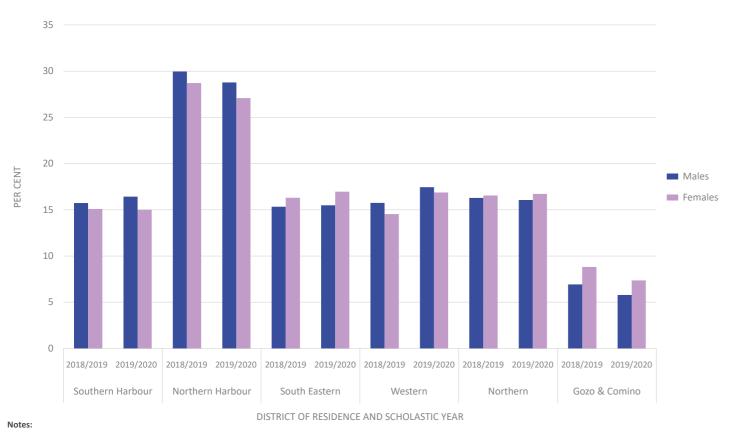

Note:

1. The above chart excludes courses with unspecified MQF level and students not residing in Malta or whose residence is unspecified.

Excluding only those students whose residence is unspecified, when compared to 2018/19, the majority of districts registered an increase in the number of student enrolments, except for male students in the Northern district, and female and male students residing in the Northern Harbour and Gozo and Comino districts (**Table 2.11**). The largest share of male and female students hailed from the Northern Harbour district at 28.8 and 27.1 per cent respectively (**Chart 2.5**).

CHART 2.5 - Percentage distribution of students at other post-secondary and tertiary institutions by sex and district of residence (LAU 1): 2018/19 and 2019/20

- The above chart excludes students not residing in Malta or whose residence is unspecified.
- 2. Courses MQF unspecified are being included in the districts data.

FIELD OF STUDY

The three most popular fields of study in academic year 2019/20 were Business, administration and law, at 25.0 per cent, Health and welfare at 17.7 per cent and Education at 10.6 per cent of total student body. This distribution resembled the situation in academic year 2018/19; where the first two fields of study referred to above were also the most popular. The field with the highest percentage increase in popularity between 2018/19 and 2019/20 was that of General programmes (128.6 per cent), followed by Education (46.7 per cent). On the other hand, the fields of study related to Health and welfare and Engineering, manufacturing and construction have experienced the largest decreases in popularity at 7.7 and 7.3 per cent respectively (Table 2.11).

Did you know?

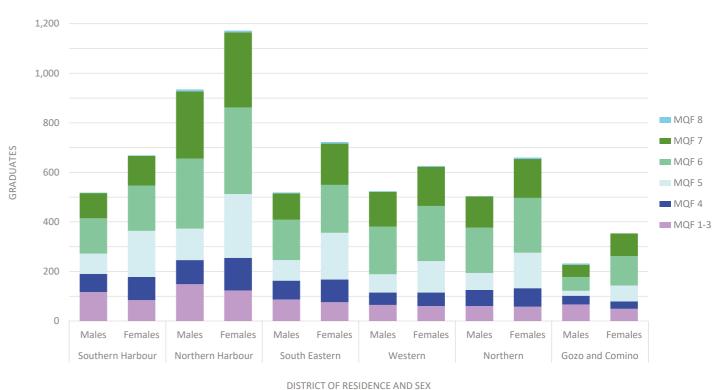

During academic year 2019/20, almost one in every four Gozo and Comino students attended courses related to Health and welfare, while the most popular field of study amongst students residing in Malta region was Business, administration and law (25.4%).

GRADUATES

Graduates from other post-secondary and tertiary education amounted to 7,435 during academic year 2019/20 (excluding those students whose residence and/or MQF level was unspecified), a decrease of 5.8 per cent when compared to 2018/19. Female graduates outnumbered male graduates in all MQF levels, except for MQF levels 1 – 3 (Chart 2.6). The majority of graduates (31.0 per cent) obtained a Bachelor's degree or equivalent MQF level 6, followed by MQF levels 7 – 8 at 24.7 per cent during academic year 2019/20. When compared to 2018/19, these constitute a decrease of 6.1 per cent at MQF level 6 and an increase of 1.7 per cent at MQF levels 7 – 8 (Table 2.12).

- Regional Statistics MALTA 2022 Edition

CHART 2.6 - Graduates from other post-secondary and tertiary institutions by MQF level, sex and district of residence (LAU 1): 2019/20

1. The above chart excludes courses with unspecified MQF level and graduates not residing in Malta or whose residence is unspecified.

Did you know?

During academic year 2019/20, the proportion of graduates relative to enrolments in the Gozo and Comino region (41.1%) exceeded that of Malta region (34.2%), with 6.9 percentage points.

The majority of graduates resided in the Northern Harbour district followed by the South Eastern district at 28.4 and 16.7 per cent respectively. The field of Business, administration and law was the most popular field of study amongst both male and female graduates, followed by Information and communication technologies for male graduates and Health and welfare for female graduates (Table 2.13).

Map 2.8 shows the graduates from other post-secondary and tertiary institutions by MQF level and locality of residence. The map shows that the six most popular localities of residence of graduates were, Birkirkara, Il-Mosta, Ħaż-Żabbar, Marsaskala, Ħal Qormi and San Pawl Il-Baħar. Graduates whose residence and/or MQF level was unspecified were not included in the map.

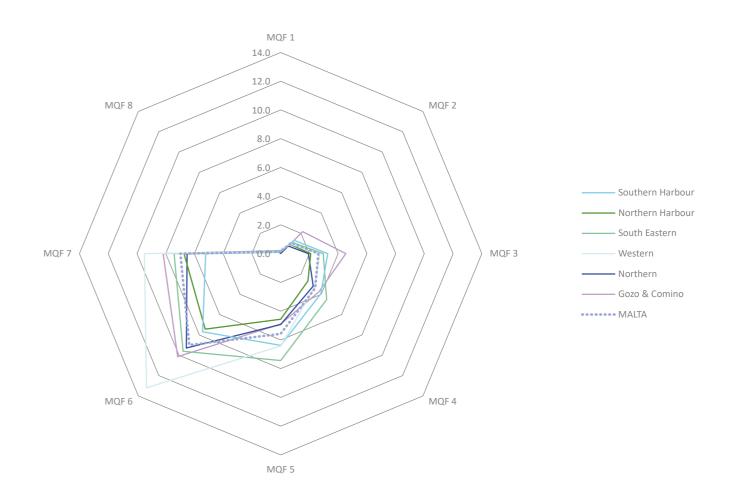

MAP 2.8 – Graduates from other post-secondary and tertiary education by locality of residence (LAU 2) and MQF level: 2019/20

REGIONAL AND DISTRICT ANALYSIS OF GRADUATES PER 1,000 POPULATION

Chart 2.7 illustrates graduates from other post-secondary and tertiary education. To facilitate regional analysis and feature situations in smaller districts, comparisons were conducted per 1,000 inhabitants to standardise relationship between graduates and population across the different regions and districts. Disparities in educational attainment across districts prevailed mostly in MQF levels 6 and 7, with disparities narrowing down at lower MQF levels and uppermost level.

CHART 2.7 – Graduates per 1,000 population by MQF level and district of residence (LAU 1): 2019/20

The share of graduates at MQF levels 6 and 7 per 1,000 inhabitants is highest in the Western district at 13.2 and 9.5 respectively; followed by Gozo and Comino district at MQF level 6 with a share of 10.1 and at MQF level 7 with a share of 8.2. The lowest share with regards to MQF level 6 was in the Northern Harbour with a share of 7.4, while that of MQF level 7 was in the Southern Harbour district at 5.2. Uppermost share in respect to MQF level 8 was registered in the Gozo and Comino district at 0.3 per 1,000 inhabitants.

Charts 2.8 and 2.9 depict the share of graduates per 1,000 inhabitants by MQF level and region for males and females respectively. Females outperformed males in all MQF levels, except for levels 1-3. The highest gender discrepancies were recorded in MQF levels 5 and 6 respectively.

CHART 2.8 – Female graduates per 1,000 population by MQF level and region (NUTS 3): 2019/20

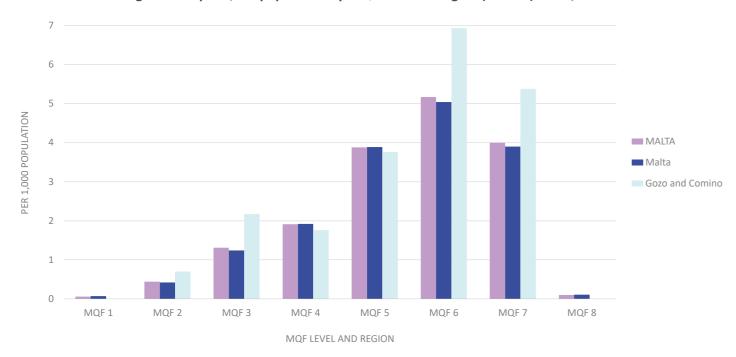

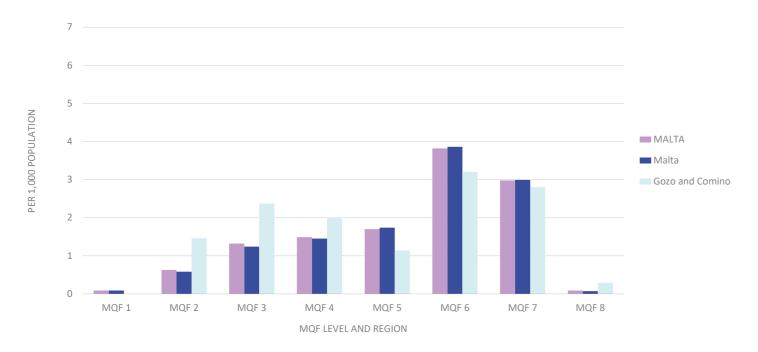

CHART 2.9 – Male graduates per 1,000 population by MQF level and region (NUTS 3): 2019/20

The region of Gozo and Comino observed the highest gender discrepancy across the majority of MQF levels, particularly at MQF levels 5 and 6. In addition, female graduates in Gozo and Comino region surpassed those in Malta region across MQF levels 2, 3, 6 and 7. On the contrary, in the case of males, the share of male graduates per 1,000 male population is higher in Gozo and Comino region across MQF levels 2, 3, 4 and 8.

METHODOLOGICAL NOTES

- 1. Education statistics are processed by the National Statistics Office (NSO) on an annual basis in accordance with European Regulations (EC) 452/2008 and (EU) 912/2013. These regulations establish the basis of information to be collected from educational institutions at all levels of education and all economic sectors. By adhering to these regulations, all education statistics collected and processed by the NSO are comparable to other European countries following the same regulatory standards.
- 2. Data collection is carried out during the second quarter of each academic year. The reference period for the information provided being the end of March of the reference academic year.
- All information required for pre-primary to secondary State administered educational institutions is obtained from register data provided directly from MEDE. Questionnaires for pre-primary, primary and secondary non-State, and for post-secondary and tertiary educational institutions are sent via email.
- Provision of education for early years in Malta consists of the non-compulsory and compulsory sectors. For the purpose of this publication, the non-compulsory sector at the lower levels comprises pre-primary education for four to five-year-olds, Kinder 1 and Kinder 2. Children who attend a childcare centre are being excluded from the total children in pre-primary level. Compulsory education is sub-divided into a six year primary cycle (5 to 10 years) and five years of secondary education (11 to 16 years).
- 5. Student figures in primary and secondary levels include students attending special schools.
- Data includes students enrolled in formal education with a minimum duration of one semester of full-time study (or the equivalent in part-time) and that are delivered in Malta. This publication excludes short courses (duration of less than the equivalence of one full-time semester), and courses not delivered in Malta.
- 7. For the purpose of this publication 'post-secondary general level' refers to students enrolled at ISCED 3 in Sixth Forms: Junior College, Sir M.A. Refalo, Giovanni Curmi Higher Secondary, St. Edwards College, St. Martin's College, Verdala International School, QSI International School of Malta, Russian Boarding School Malta Crown Ltd, De La Salle College, St. Aloysius College, St. Thomas More College, ALP+, GEM16+ Education Programme Centre.
- For the purpose of this publication 'other post-secondary' refers to students enrolled / graduates in MCAST, ITS, University of Malta, and public and private institutions offering courses at ISCED levels 2 to 4.
- 9. Tertiary level refers to students enrolled / graduates at MCAST, ITS, University of Malta, and public and private institutions offering courses at ISCED levels 5 to 8.
- 10. The Institute of Tourism Studies has relocated campus from Pembroke to Hal Luqa.
- 11. For the purpose of this publication, the public and private institutions which offer courses at 'other post-secondary' and tertiary level are: Academy of Business Leaders Malta, Agency for the Welfare of Asylum Seekers, Agenzija Żgħażagħ, American University of Malta, Avanza Academy, Centre for Child Development, Education and Care Studies: CDEC, College of Remote and Offshore Medicine Foundation, Domain Academy, EAPTI - Gestalt Psychotherapy Training Institute Malta, EEC-ITIS Malta Tourism & Languages Institute, European Forensic Institute Limited, European Graduate School, Future Focus, Global College Malta, Global Connect Academy, Global Institute of Theology, Idea Leadership and Management Institute, IFT Malta, IJF Academy Foundation, Institute for Education, International School of Beauty Therapy, ITS, Jobsplus, Johane Casabene Dance Conservatoire, Learning Works Ltd, Learnkey Institute, London School of Commerce, Malta Business School, Malta City College, Malta Institute of Management, Malta Leadership Institute, MCAST, Middlesex University Malta, MISCO Consulting Ltd, Outlook Coop, Pegaso International, Queen Mary University of London Malta Limited, Saint Martin's Institute of Further Education, Saint Martin's Institute of Higher Education, STC Higher Education, Support & Supply Management Group Ltd, Transcontinental Institution of Higher Education, UCM United Campus of Malta Higher Education Institution Foundation, and University of Malta.

12. Definitions:

- Formal education is an institutionalised, intentional and planned type of education which is provided by public organisations and recognised private bodies. It consists primarily of initial education designed for children and young people before their first entry to the labour market. It also includes other types of education such as vocational, special needs and adult education provided they are recognised as part of the formal education system by the relevant national education authorities.
- Graduates refer to students who successfully complete an educational programme during the reference year and are awarded a
- Compulsory education covers education from primary to upper secondary levels from Year 1 to Form 5, where under Maltese Law, school is mandatory up to the age of 16.
- General education programmes are designed to develop learners' general knowledge, skills and competencies, as well as literacy and numeracy skills, often to prepare students for more advanced education programmes at the same or higher MQF levels and to lay the foundation for lifelong learning.

- Vocational education programmes are designed for learners to acquire the knowledge, skills and competencies specific to a particular occupation, trade or class of occupations or trades. Vocational education may have work-based components. Successful completion of such programmes leads to labour market-relevant vocational qualifications acknowledged as occupationally-oriented by the relevant national authorities and/or the labour market.
- Age is calculated as at 1 January of the reference academic year.

Fields of study

ISCED Fields of Education and Training classifies educational programmes and related qualifications by fields of study. A field is the broad domain, branch or area of content covered by an education programme or qualification.

ISCED Fields of Education and Training 2013 classification:

- 00 Generic programmes and qualifications
- 01 Education
- 02 Arts and humanities
- 03 Social sciences, journalism and information
- 04 Business, administration and law
- 05 Natural sciences, mathematics and statistics
- 06 Information and communication technologies
- 07 Engineering, manufacturing and construction
- 08 Agriculture, forestry, fisheries and veterinary
- 09 Health and welfare
- 10 Services
- Malta Qualifications Framework (MQF) The level descriptors of the Malta Qualifications Framework (MQF) were originally introduced by Legal Notice 347 of 2005. These represent neutral reference points to be used for all qualifications, be they academic, vocational, formal, informal and non-formal. The level descriptors are useful for education and training providers, and for employers. The MQF is structured as follows:

MALTA QUALIFICATIONS FRAMEWORK

[(Regulation 3(1)]

The Malta Qualifications Framework shall be represented as follows:

8	DOCTOR /	AL DEGREE	8		
7	MASTER'	'S DEGREE	7		
	POSTGRADU	ATE DIPLOMA			
	POSTGRADUAT	TE CERTIFICATE

LABOUR MARKET

This chapter analyses the situation of the regional labour market for the years 2018 to 2020 by sex. It presents regional employment by industry NACE A*10/11 by place of residence and by place of work. Full-time employment is subdivided into private and public sectors whereby the former is further divided into self-employed and employees. Part-time employment is also segregated into self-employed and employees. Analysis on unemployment and average annual basic salary is provided at district level.

TOTAL EMPLOYED PERSONS IN MALTA AND GOZO AND COMINO REGIONS (NUTS 3)

In 2020, total employed persons (full-time and part-time as a primary job) in MALTA amounted to 264,977, an increase of 0.8 per cent when compared to the previous year. The shares of the Gozo and Comino region by place of residence and place of work stood at 6.9 and 5.4 per cent respectively.

Employed persons in Malta region (by place of work), exceeded the total number of employed persons resident in Malta region (by place of residence). The contrary prevailed in the case of Gozo and Comino region. The difference represents the net balance of commuter workers across the respective regions. Commuter workers were predominantly Gozo and Comino residents working in the Malta region, accounting to 3,642 employed persons during 2020. This implied that one out of every five employed persons resident in Gozo and Comino region worked in the Malta region and 50.7 per cent were females. (Tables 3.1 and 3.2)

In 2020, the highest proportion of employed persons in MALTA were in wholesale and retail trade; repair of motor vehicles and motorcycles; transportation and storage; accommodation and food service activities (G, H and I) and the public administration and defence; compulsory social security; education; human health and social work activities (O, P and Q) at 25.0 and 23.4 per cent respectively (Tables 3.1 and 3.2).

Malta region had the highest proportion of employed persons in the wholesale and retail trade; repair of motor vehicles and motorcycles; transportation and storage; accommodation and food service activities (G, H and I), while in the Gozo and Comino region the majority worked in the public administration and defence; compulsory social security; education; human health and social work activities (O, P and Q) (Tables 3.1 and 3.2).

Did you know?

During 2020, the largest share of employed persons in Malta region worked in the *wholesale and retail trade; repair* of motor vehicles and motorcycles; transportation and storage; accommodation and food service activities (G, H and I), of which 63.9% were males. In the Gozo and Comino region, most of the employed persons worked in the *public* administration and defence; compulsory social security; education; human health and social work activities (O, P and Q) with the majority of them (55.7%) being females.

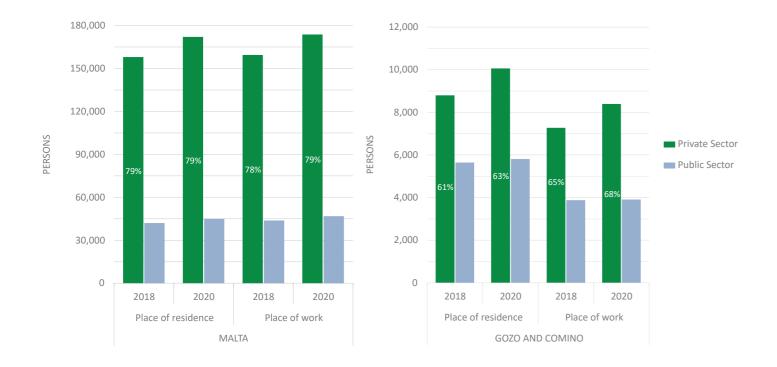

FULL-TIME EMPLOYMENT IN MALTA REGION

By place of residence

In 2020, Malta residents who worked on a full-time basis reached 217,036, an increase of 1.4 per cent when compared to 2019 (Table 3.3). The private sector amounted to 79.3 per cent of the total, while the remaining worked in the public sector (Chart 3.1).

CHART 3.1 – Full-time employment by region (NUTS 3), sector and location

By place of work

Full-time employment in Malta region in 2020 stood at 220,596, reflecting an increase of 1.4 per cent over 2019. Full-time employment in the private sector accounted for 78.8 per cent of the total, the remaining 21.2 per cent being in the public sector (Table 3.4 and Chart 3.1). The males who worked in the private sector accounted for 49.8 per cent of total full-time employment in Malta region (Chart 3.2). The highest proportion of full-time employment in Malta region was registered in the wholesale and retail trade; repair of motor vehicles and motorcycles; transportation and storage; accommodation and food service activities (G, H and I) which accounted to 23.6 per cent of the total (Chart 3.3).

CHART 3.2 – Percentage distribution of full-time employment in persons by region of work (NUTS 3), sector and sex: 2020

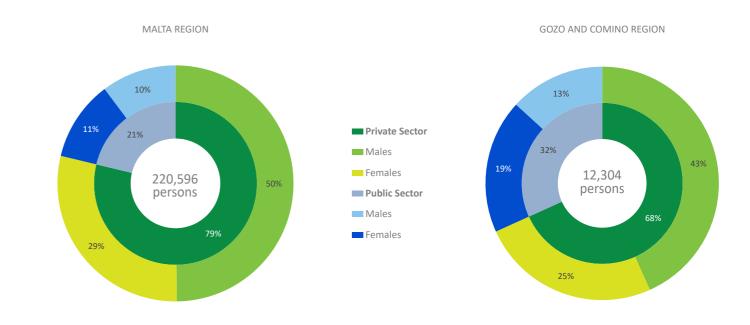

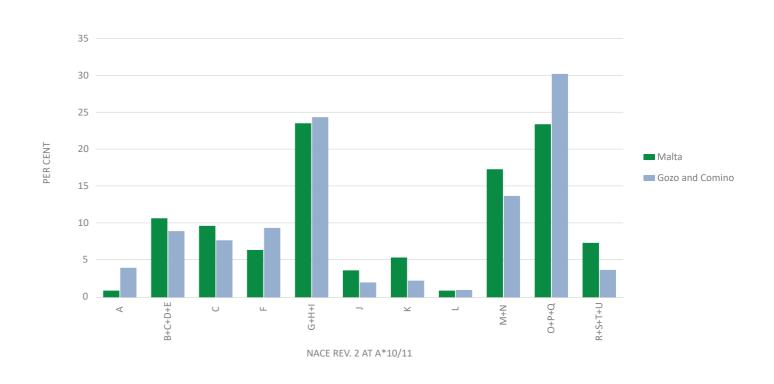

CHART 3.3 – Percentage distribution of full-time employment by region (NUTS 3), industry and place of work: 2020

FULL-TIME EMPLOYMENT IN GOZO AND COMINO REGION

By place of residence

In 2020, Gozo and Comino residents with a full-time job totalled 15,864, reflecting an increase of 3.1 per cent when compared to 2019. The private sector accounted to 63.4 per cent of the total (Table 3.3 and Chart 3.1).

The largest share of Gozo and Comino residents with a full-time job in the public sector was in the *public administration and defence; compulsory social security; education; human health and social work activities* (O, P and Q), amounting to 80.9 per cent of total public sector. On the other hand, the largest proportion of full-time employed Gozo and Comino residents in the private sector worked in the *wholesale and retail trade; repair of motor vehicles and motorcycles; transportation and storage; accommodation and food service activities* (G, H and I), accounting to 31.1 per cent of total private sector (Chart 3.4a). In addition, both the males and females who were Gozo and Comino residents and worked full-time were predominantly employed in the *public administration and defence; compulsory social security; education; human health and social work activities* (O, P and Q) (Chart 3.4b).

CHART 3.4a – Full-time employment of Gozo and Comino residents by sector, industry and place of residence: 2020

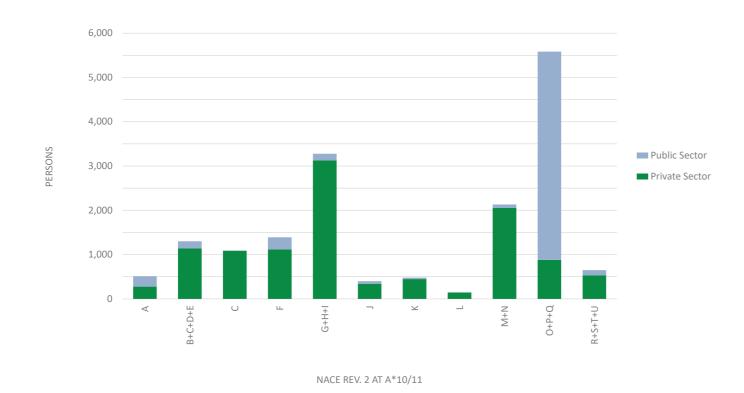

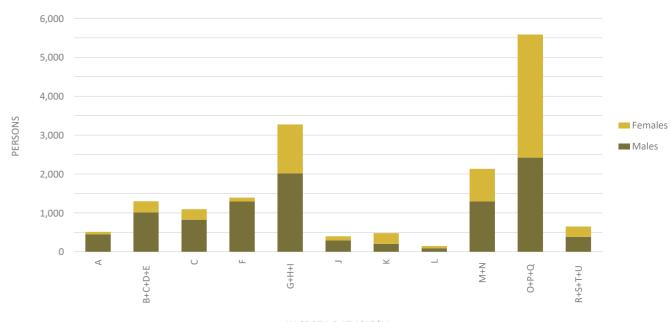

CHART 3.4b - Full-time employment of Gozo and Comino residents by sex, industry and place of residence: 2020

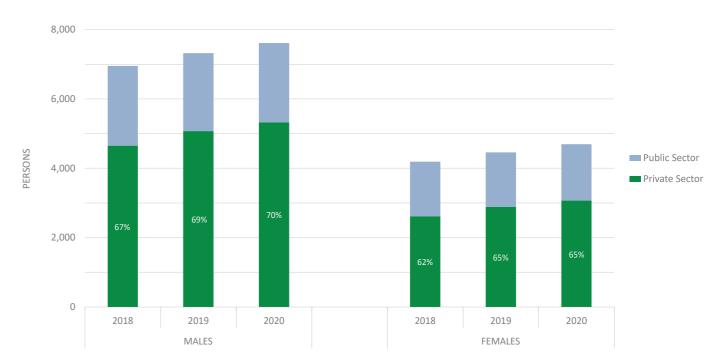

NACE REV. 2 AT A*10/11

By place of work

In 2020, full-time employment in Gozo and Comino region amounted to 12,304, an increase of 4.4 per cent when compared to 2019 (Table 3.4). Full-time employment in the private sector accounted for 68.2 per cent of the total and the males who worked in this sector accounted for 43.3 per cent of total full-time employment in Gozo and Comino region (Charts 3.1, 3.2 and 3.5).

CHART 3.5 - Full-time employment in Gozo and Comino region by sector, sex and year

The largest share of full-time employment in the private sector was in the wholesale and retail trade; repair of motor vehicles and motorcycles; transportation and storage; accommodation and food service activities (G, H and I) at 34.3 per cent. In the public sector, the share of public administration and defence; compulsory social security; education; human health and social work activities (O, P and Q) accounted for 76.9 per cent (Chart 3.6a). Full-time males in the Gozo and Comino region were predominantly employed in the wholesale and retail trade; repair of motor vehicles and motorcycles; transportation and storage; accommodation and food service activities (G, H and I) while the females were mainly employed in the public administration and defence; compulsory social security; education; human health and social work activities (O, P and Q) (Chart 3.6b).

CHART 3.6a - Full-time employment in Gozo and Comino region by sector, industry and place of work: 2020

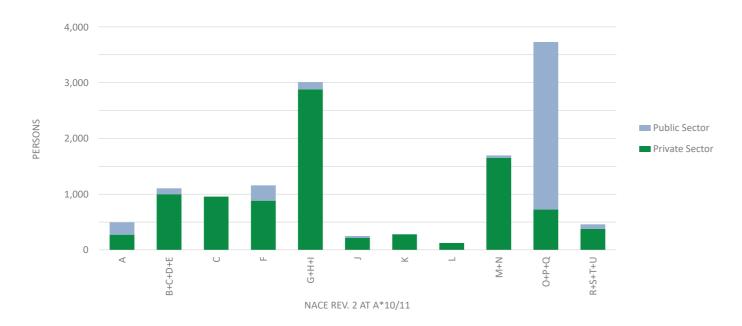

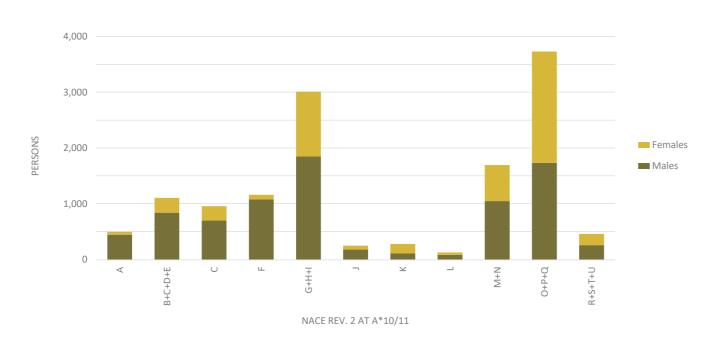

CHART 3.6b - Full-time employment in Gozo and Comino region by sex, industry and place of work: 2020

FULL-TIME GOZO AND COMINO RESIDENTS WORKING IN MALTA REGION

In 2020, Gozo and Comino residents employed on a full-time basis in Malta region totalled 3,284, of which, 54.5 per cent worked in the public sector and the remaining worked in the private sector (Tables 3.3, 3.4 and Charts 3.7a-b). The males who worked in the private sector accounted for 28.9 per cent of the total full-time employment of Gozo and Comino residents in Malta region while the females who worked in the public sector accounted for 33.1 per cent of the total (Chart 3.7b).

CHART 3.7a - Full-time employment of Gozo and Comino residents in Malta region by sector, sex and year

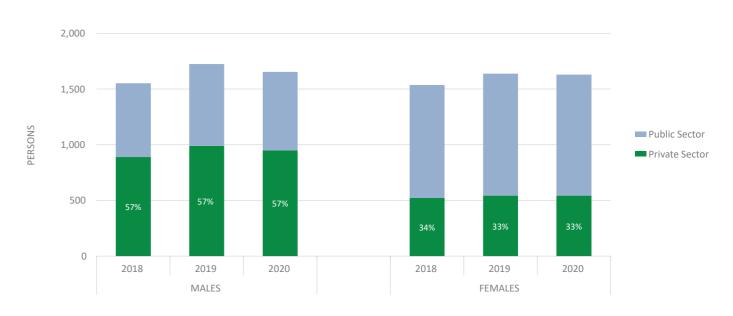

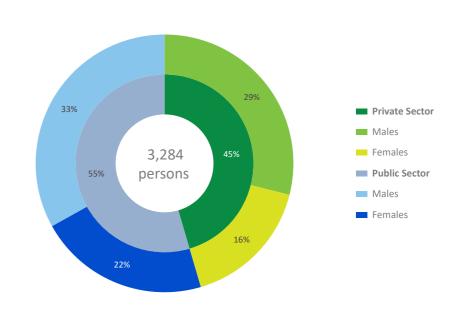

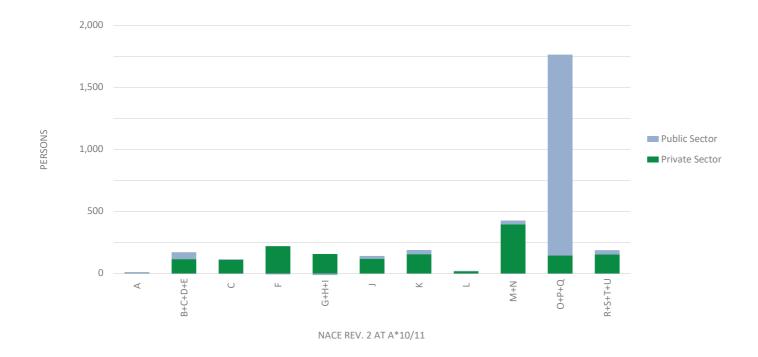

CHART 3.7b – Percentage distribution of full-time employment of Gozo and Comino residents in Malta region by sector and sex: 2020

During the same year, 90.5 per cent of those working within the public sector worked in the *public administration and defence;* compulsory social security; education; human health and social work activities (O, P and Q) while 26.7 per cent of those in the private sector worked in the *professional, scientific and technical activities; administrative and support service activities* (M and N) (Chart 3.8a). In addition, both the full-time males and females who were Gozo and Comino residents and worked in Malta region were predominantly employed in the *public administration and defence; compulsory social security; education; human health and social work activities* (O, P and Q) (Chart 3.8b).

CHART 3.8a - Full-time employment of Gozo and Comino residents in Malta region by sector and industry: 2020

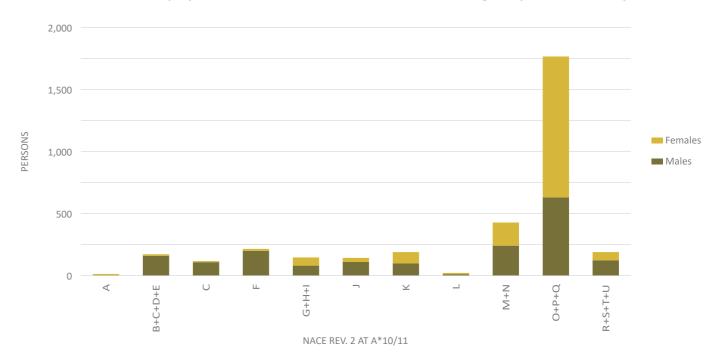

Did you know?

During 2020, approximately one in every six employed males resident in Gozo and Comino region worked on a full-time basis in the Malta region, whereas a quarter of the total full-time employed females who resided in the Gozo and Comino region travelled to Malta for work.

CHART 3.8b - Full-time employment of Gozo and Comino residents in Malta region by sex and industry: 2020

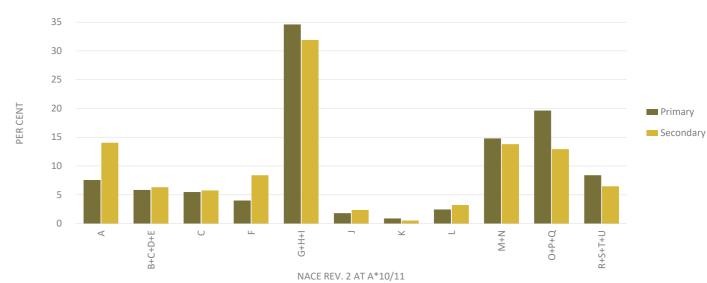

— Regional Statistics MALTA 2022 Edition -

PART-TIME EMPLOYMENT OF GOZO AND COMINO RESIDENTS

The percentage distribution of the part-time employment differed throughout all economic activities. In 2020, total part-time employment of Gozo and Comino residents amounted to 5,406 of which, 56.2 per cent were part-time secondary employment and the remaining were part-time primary (Table 3.3). The largest share of part-time employment of Gozo and Comino residents was registered in wholesale and retail trade; repair of motor vehicles and motorcycles; transportation and storage; accommodation and food service activities (G, H and I), contributing to 33.1 per cent of the total. This featured in both part-time primary and secondary (Chart 3.9).

CHART 3.9 – Percentage distribution of part-time employment of Gozo and Comino residents by type, industry and place of residence: 2020

EMPLOYMENT IN JOBS

In 2020, jobs by full-time private sector employees in Malta and Gozo and Comino regions accounted for 53.2 and 35.6 per cent of total jobs respectively. Full-time self-employed jobs in Malta and Gozo and Comino regions accounted for 8.9 and 12.7 per cent of total jobs respectively. Total part-time employment in Malta and Gozo and Comino regions was of 59,111 and 5,048 respectively, accounting for 21.1 and 29.1 per cent of total jobs within the respective region. The differences in the distribution of jobs (by sector, type and sex) by place of residence and place of work were mainly attributable to the significant amount of Gozo and Comino residents working in Malta region (Tables 3.3, 3.4 and Charts 3.10 and 3.11).

CHART 3.10 – Percentage distribution of part-time employment in jobs by region of work (NUTS 3), sector and sex: 2020

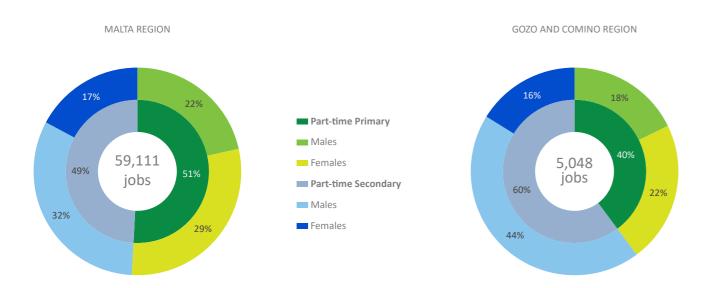

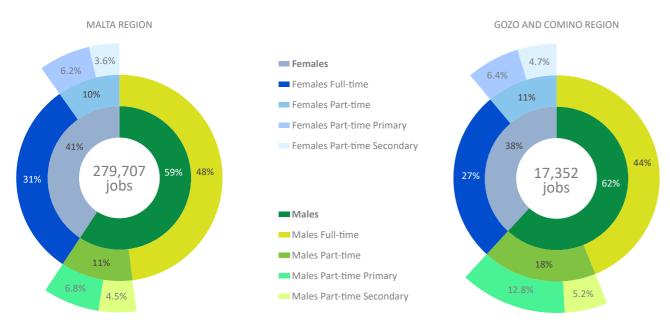

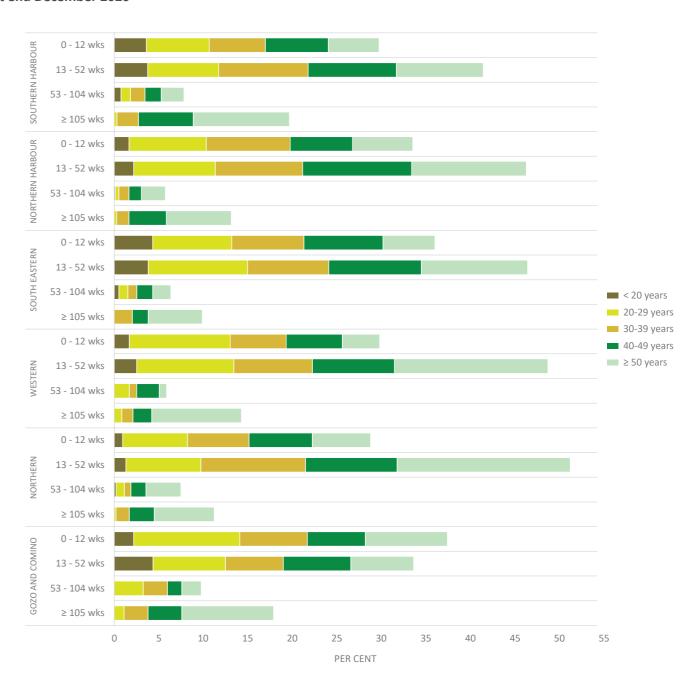

CHART 3.11 – Percentage distribution of employment in jobs by region of work (NUTS 3), sex and type: 2020

PERSONS REGISTERING FOR WORK, BY DISTRICT (LAU 1)

In 2020, the largest share (28.0 per cent) of unemployed persons resided in the Northern Harbour district, amounting to 774 persons, followed by the Southern Harbour district (23.8 per cent). The largest proportion of unemployed persons featured in the 50 years and over age bracket, accounting to 30.8 per cent of the total. In terms of unemployment duration, the Gozo and Comino district had the longest unemployment duration of 0 to 12 weeks, while the Southern Harbour, Northern Harbour, South Eastern, Western and Northern districts registered the highest proportions in the 13 to 52 weeks cohort. (Tables 3.5, 3.6 and Chart 3.12)

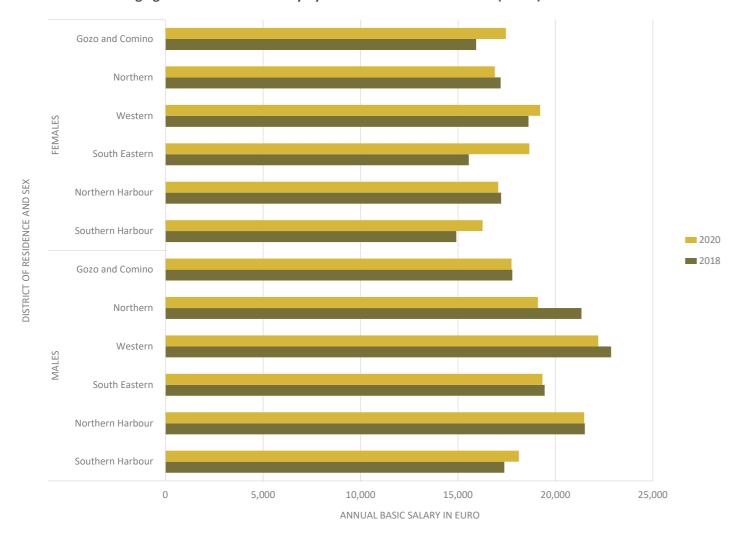

CHART 3.12 – Percentage distribution of registered unemployed by district (LAU 1), age and duration of unemployment as at end December 2020

AVERAGE GROSS ANNUAL BASIC SALARY, BY SEX AND DISTRICT (LAU 1)

The average gross annual basic salary for employees was estimated at €18,913 in 2020. Average gross annual basic salaries varied both by sex and district of residence; for males the average gross annual basic salary was of €20,051 whilst for females this was recorded at €17,454. The highest average gross annual basic salary for both males and females was registered in the Western district. (Table 3.7 and Chart 3.13)

CHART 3.13 – Average gross annual basic salary by sex and district of residence (LAU 1): 2018 and 2020

Did you know?

In 2020, the discrepancy between the average gross annual basic salary for the males and females was more pronounced in the Malta region rather than in the Gozo and Comino region. Indeed, while for Malta region, male employees earned on average €2,735 more than female employees, in Gozo and Comino region the difference was of €281 more for male employees.

Notes:

- 1. Gross annual basic salary refers to the gross annual basic salary received by employees before any social contributions and tax deductions. This amount excludes payments for overtime, allowances and bonuses.
- 2. The total average gross annual basic salary is calculated by taking the mean of the gross annual basic salary for the total employees. In addition, the average gross annual basic salary at district level is calculated by taking the mean of the gross annual basic salary for employees within each respective district.

METHODOLOGICAL NOTES

- 1. The data provided in this chapter is based on the latest data published by the National Statistics Office i.e. News Release 179/2021 Regional Labour Supply by Place of Residence and Work: 2018-2020 (https://nso.gov.mt/en/News_Releases/Documents/2021/10/News2021_179.pdf). The information contained in this chapter is subject to revision.
- 2. This chapter takes on board updates to administrative records resulting from late submissions to engagement and termination forms and the updating of employment records following the cleaning exercise undertaken by Jobsplus. Consequently, time-series was restored from 2013 onwards and is available on the online version of the News Release 179/2021: https://nso.gov.mt/en/News_Releases/View_by_Unit/Unit_02/Regional_and_Geospatial_Statistics/Pages/Regional-Labour-Supply-by-Place-of-Residence-and-Work.aspx
- 3. Full-time and part-time status is determined by the employer's declaration (or that made by a self-employed person) in the engagement form which is required to be sent to Jobsplus upon commencement of employment.
- 4. (a) Employment by **place of work** takes into account those persons who effectively work in the regions of Malta and Gozo and Comino respectively, irrespective of their locality/region of residence.
- (b) Employment by place of residence is based on employee residence as declared by the employer upon engagement with Jobsplus.
- (c) Gozo and Comino residents Commuter Workers (employed persons) is calculated using the following formula: Gozo and Comino Total employed persons by place of residence (Table 3.1) Gozo and Comino Total employed persons by place of work (Table 3.2) Maltese residents working in the Gozo and Comino region.
- (d) Gozo and Comino residents Commuter Workers (full-time employment) is calculated using the following formula: Gozo and Comino full-time employment by place of residence (Table 3.3) Gozo and Comino full-time employment by place of work (Table 3.4) Maltese residents working in the Gozo and Comino region.

During 2020, the total number of Maltese residents working in Gozo and Comino region amounted to 276.

Data for commuter workers should not be compared with previous publications due to revisions and changes in methodology.

- 5. During the course of 2014 persons working with the public transport operator were shifted from the private sector to the public sector. As from January 2015, those persons were considered to be part of the private sector.
- 6. Public sector employees working in the economic activity: electricity, gas, steam and air conditioning supply (NACE 35) were reclassified to employment activities (NACE 78). In view of this reclassification, there was a shift in employment figures from the economic activity aggregate 'electricity, gas, steam and air conditioning supply' to the 'administrative and support service activities' aggregate. This reclassification was taken on board from August 2014 onwards.
- 7. Transport Malta was reclassified from transportation and storage activities (NACE 49-53) to public administration and defence; compulsory social security activities (NACE 84) as from 2010.
- 8. Employers recruiting domestic workers for personal services (not as a commercial activity) have been transferred from NACE divisions 86 and 88 to NACE division 97. Within the latter division, a household employer is defined as a person who pays an individual to perform duties in or around his home. Household employees may include nannies, care workers and private nurses. This change came into effect from December 2017.
- 9. Registered Unemployed provides data on the number of persons actively seeking work through Jobsplus. The data includes Part I and Part II of the unemployment register:
 - (a) Part I of the unemployment register includes new job seekers who have left school, re-entrants into the labour market and individuals who have been made redundant by their former employers.
 - (b) Part II of the unemployment register includes workers who have been dismissed from work due to disciplinary action, left work out of their own free will, refused work or training opportunities or were struck off the register after an inspection by the Law Enforcement personnel.
- 10. Labour Supply comprises the full-time gainfully occupied population and the registered unemployed population.
- 11. The gross annual basic salary refers to the gross annual basic salary received by employees before any social contributions and tax deductions. This amount excludes payments for overtime, allowances and bonuses.
- 12. The industry classification of this chapter is being published at NACE Rev. 2 at A*10/11.

ECONOMY

This chapter provides a summary of recent developments in the Maltese economy, highlighting major changes in regional economic statistics by industry NACE A*10/11 during the period 2015 – 2020. Macroeconomic activity and economic growth within each respective region are measured by Gross Value Added (GVA) at basic prices and Gross Domestic Product (GDP) at market prices, based on the production approach. The prevailing economic activity within the regions is explained by the respective GDP per capita.

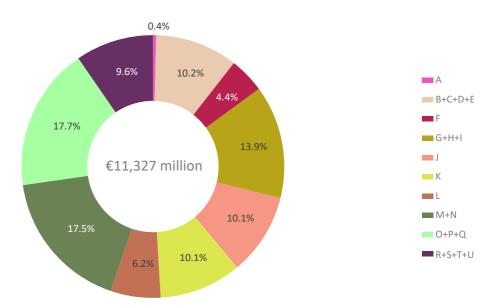

GROSS VALUE ADDED

In 2020, the GVA at basic prices in the regions of Malta, and Gozo and Comino was estimated at €11,326.6 million and €506.9 million respectively; reflecting corresponding decreases of 5.7 and 5.6 per cent over 2019 (Table 4.1).

MALTA REGION

Most industries registered decreases in GVA during 2020. The industries of wholesale and retail trade: repair of motor vehicles and motorcycles; transportation and storage; accommodation and food service activities (G, H and I) registered the largest drop of 34.7 per cent over 2019 and accounted for 13.9 per cent of the total GVA. The industries comprising public administration and defence; compulsory and social security; education; human health and social work activities (O, P and Q) contributed to the largest share of the GVA (17.7 per cent). These industries registered a growth in GVA of 2.9 per cent when compared to 2019 (Table 4.1, Charts 4.1a and 4.1b).

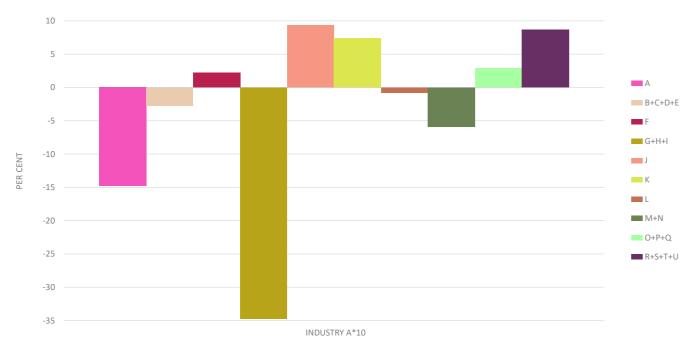

CHART 4.1a - Industry contribution to GVA of Malta region A*10: 2020

Did you know?

Between 2015 and 2019, the industries of wholesale and retail trade; repair of motor vehicles and motorcycles; transportation and storage; accommodation and food service activities (G, H and I) contributed to the highest share in the GVA of Malta region, accounting for an average of 20.6%. During 2020, these industries registered a decrease of 34.7% from 2019 and contributed to the second highest share in the GVA of Malta at 13.9%. In 2020, the industries of public administration and defence; compulsory social security; education; human health and social work activities (O, P and Q) topped the biggest share at 17.7%.

CHART 4.1b - Year-on-year changes in GVA of Malta region by industry A*10: 2020

During 2020, the industries of public administration and defence; compulsory social security; education; human health and social work activities (O, P and Q) accounted for the highest share of the GVA of MALTA contributing to 16.9 per cent. Similarly, the industries comprising professional, scientific and technical activities; administrative and support service activities (M and N) contributed to the second largest share of the GVA of MALTA, accounting for 16.8 per cent in 2020. Conversely, the agriculture, forestry and fishing industries contributed the least to the GVA of MALTA during the period under review, contributing to 0.4 per cent (Table 4.1a). Analyses of the contributions to GVA by industry and by region (NUTS 3) are illustrated in Charts 4.2 and 4.3.

CHART 4.2 - Regional contribution to GVA (B.1g) by industry A*10/11: 2020 (NUTS 3)

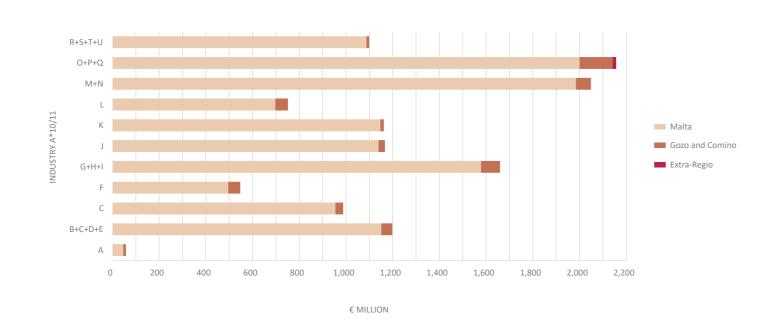

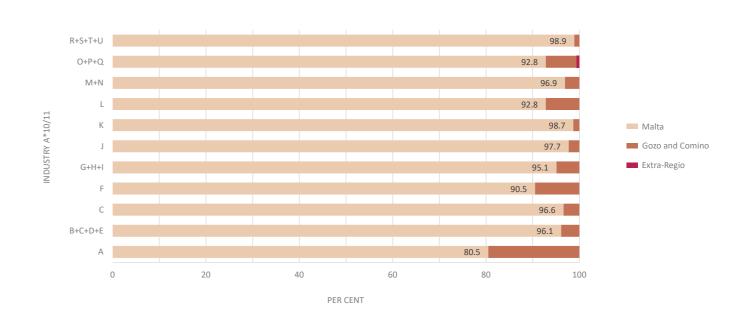

CHART 4.3 - Distribution of regional GVA (B.1g) by industry A*10/11: 2020 (NUTS 3)

GOZO AND COMINO REGION

Similar to Malta region, the majority of industries registered decreases in GVA in 2020 when compared to the previous year. The industries comprising wholesale and retail trade; repair of motor vehicles and motorcycles; transportation and storage; accommodation and food service activities (G, H and I) registered the largest drop of 29.7 per cent over 2019 and accounted for the second highest share of the GVA at 16.0 per cent. The industries of public administration and defence; compulsory social security; education; human health and social work activities (O, P and Q) accounted for the highest share of the GVA at 28.2 per cent and have registered an increase of 4.4 per cent over 2019 (Table 4.1, Charts 4.4a and 4.4b).

During 2020, the industries of public administration and defence; compulsory social security; education; human health and social work activities (O, P and Q) accounted for the highest share of the GVA of MALTA, contributing to 1.2 per cent. Similarly, the industries comprising wholesale and retail trade; repair of motor vehicles and motorcycles; transportation and storage; accommodation and food service activities (G, H and I) contributed to the second largest share of the GVA of MALTA, accounting for 0.7 per cent. In contrast, the industries of agriculture, forestry and fishing (A) and arts, entertainment and recreation; repair of household goods and other services (R, S, T and U) contributed the least to the GVA of MALTA, both contributing to 0.1 per cent in 2020 (Table 4.1a, Charts 4.2 and 4.3).

Did you know?

Across the 5-year period under review, the industries of *public administration and defence; compulsory social security;* education; human health and social work activities (O, P and Q) recorded year-on-year increases in the GVA of the Gozo and Comino region. Moreover, these industries accounted for the highest share of the Gozo and Comino region, contributing to an average of 26.9%.

CHART 4.4a – Industry contribution to GVA of Gozo and Comino region A*10: 2020

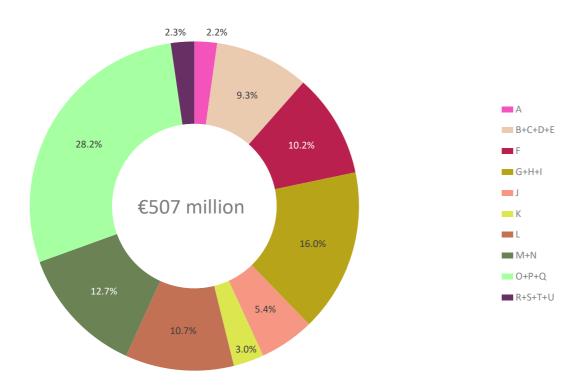

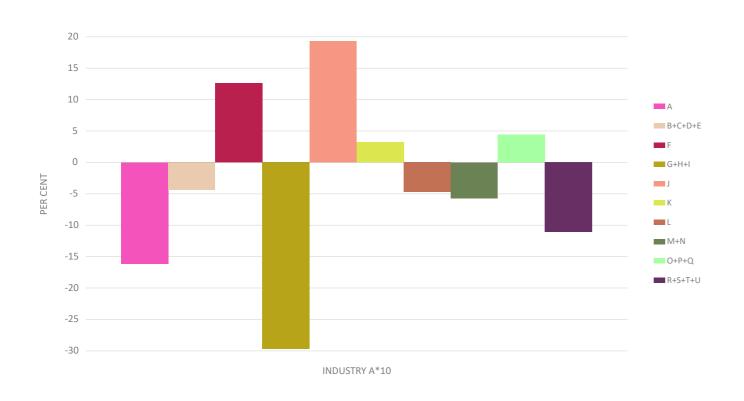

CHART 4.4b – Year-on-year changes in GVA of Gozo and Comino region by industry A*10: 2020

GROSS DOMESTIC PRODUCT

In 2020, GDP at market prices in the regions of Malta, and Gozo and Comino was estimated at €12,510.2 million and €559.9 million respectively, corresponding to a contribution of 95.6 and 4.3 per cent to national GDP at market prices. Even though employment in jobs increased year-on-year in both regions, employment growth lagged GDP growth during the period under consideration, except for 2016 where employment growth was slightly greater than GDP growth in both regions, and for 2020 where the rate of change in GDP was negative in both regions. (Table 4.2, Charts 4.5 and 4.6)

CHART 4.5 – GDP and Employment: Malta region year-on-year change

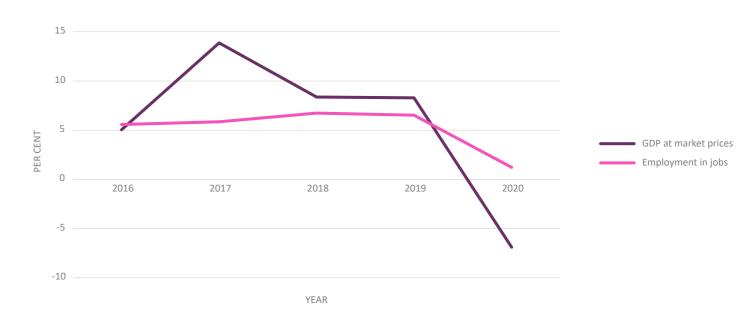

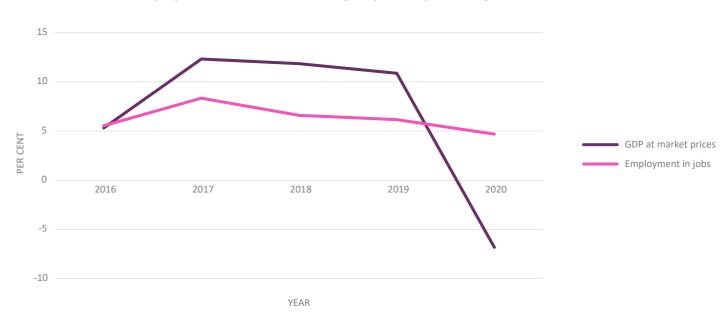

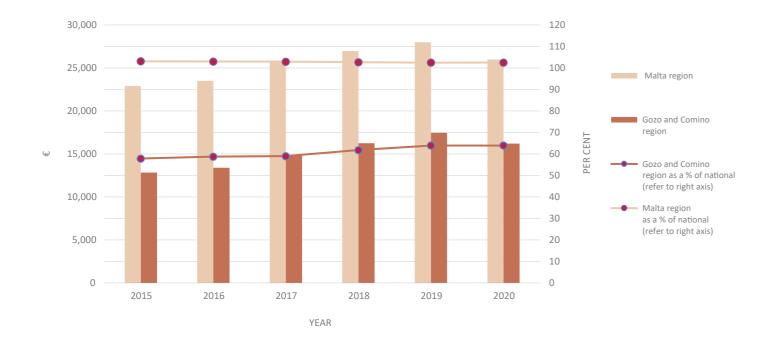

CHART 4.6 – GDP and Employment: Gozo and Comino region year-on-year change

During 2020, GDP per capita at market prices decreased in both regions. The per capita GDP at market prices for the Malta region as a percentage of the national was 102.5 per cent while that of the Gozo and Comino region was of 63.9 per cent. The per capita regional GDP does not reflect the income available to the private households of each respective region, but it strictly relates to the economic activity prevailing in each of the regions (Table 4.2, Chart 4.7).

CHART 4.7 – Per capita regional GDP at market prices by year (NUTS 3)

ACTIVE BUSINESS UNITS

In 2020, total active business population at the local unit level within the statistical business register in MALTA amounted to 52,852, an increase of 1.4 per cent, or 744 active units, over 2019 (Table 4.3, Maps 4.1a – 4.1b).

Most of the business units (93.9 per cent) employed between 0 to 9 persons (micro). The population of small (10 - 49) and medium (50 - 249) enterprises accounted for 2,667 (5.0 per cent) and 498 (0.9 per cent) units respectively. The large businesses employing 250 persons or more accounted for the remaining active units. During 2020, the highest overall change in the number of active enterprises at local unit level occurred amongst businesses employing between 10 and 49 persons, which declined by 3.9 per cent when compared to 2019.

On a regional level, in 2020, the largest drop in the number of active businesses at local unit level in the Malta region was attributed to the population of small (10-49) enterprises, registering a drop of 4.2 per cent. On the other hand, active businesses that employed 0-9 persons increased by 1.8 per cent from the previous year. In the Gozo and Comino region, the number of active businesses at local unit level increased for the micro (0-9) and small (10-49) enterprises, by 56 and three units respectively. Similar to 2019, during 2020 there were 14 active businesses at local unit level which employed 50-249 employees in the Gozo and Comino region, while there were no large active businesses which employed over 250 persons. **(Table 4.3)**

Did you know?

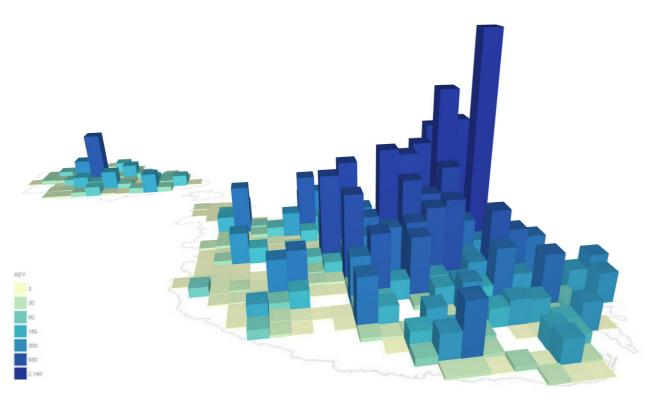

During the period under review, Malta's GDP per capita at market prices as a percentage of the national decreased slightly from 103.1 in 2015 to 102.5 in 2020. On the other hand, for the Gozo and Comino region, the per capita GDP as a percentage of the national increased from 57.8 in 2015 to 63.9 during 2020.

Did you know?

During 2020, more than one third of the total active businesses at local unit level operated in the Northern Harbour district (35.0 per cent), whereas the Gozo and Comino district accounted for the least share at 7.6 per cent.

MAP 4.1 – 1km² grid showing active businesses at local unit level: 2020

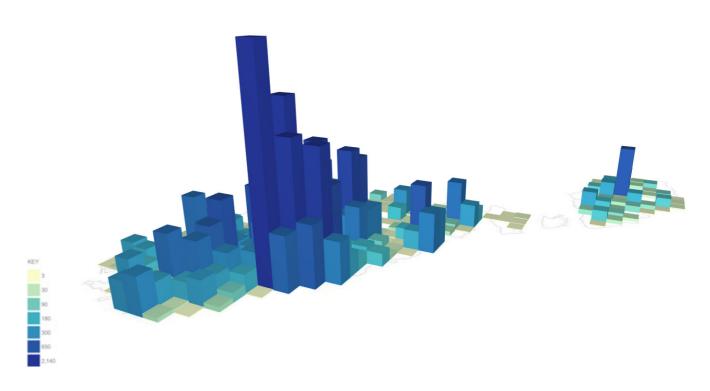

MAP 4.1a – A bird's eye view of the 1km² grid as from the Maltese Southern Coast

Notes

- 1. The data in the map excludes government entities.
- 2. Data for 2020 should be considered as provisional with a cut-off date of 24th March 2022.
- 3. Each grid cell represents an area of 1km
- Each grid cell shows the count of BRs in that particular area. Grid cells containing less than three BRs are omitted.

MAP 4.1b - A bird's eye view of the 1km² grid as from the Maltese Eastern Coast

Note

- 1. The data in the map excludes government entities.
- 2. Data for 2020 should be considered as provisional with a cut-off date of 24th March 2022.
- 3. Each grid cell represents an area of 1km².
- 4. Each grid cell shows the count of BRs in that particular area. Grid cells containing less than three BRs are omitted.

METHODOLOGICAL NOTES

- 1. All data in this chapter is in line with the European System of Accounts (ESA 2010) (ISBN 978-92-79-31242-7) and the manual on Regional Accounts Methods (ISBN 978-92-79-32357-7). The European System of National and Regional Accounts is an internationally compatible accounting framework for a systematic and detailed description of a total economy (whether this is a region, a country, or a group of countries), its components, and its relations with other total economies. Regional accounts are a regional specification of the corresponding accounts of the total economy.
- 2. The estimates of the national Gross Value Added (GVA) correspond to the news release *Gross Domestic Product: Q2/2020 NR142/2020* for 2015 and *Gross Domestic Product: Q3/2021 NR217/2021* for 2016-2020. Data in this publication should be considered as final for 2015 and provisional for 2016 to 2020.
- 3. Revised data for 2013 and 2014 are available on the online Excel version of the news release *Regional Gross Domestic Product: 2015-2020* at: https://nso.gov.mt/en/News Releases/View by Unit/Unit 02/Regional and Geospatial Statistics/Pages/Regional-Gross-Domestic-Product.aspx
- 4. **GVA estimates in this chapter are based on the Production Approach.** The estimates of regional GVA at basic prices using the Production Approach is equivalent to the difference between output at basic prices and intermediate consumption at purchasers' prices of industries physically located in each of the respective regions. Regional GDP is defined as regional GVA plus taxes less subsidies on products. **Regional GDP** is not a measure of income or financial well-being but strictly relates to the economic activity prevailing in a particular region.
- 5. The nomenclature of territorial units for statistics (NUTS) provides a uniform breakdown of the economic territory of the European Union. The NUTS is the territorial classification for the compilation of regional accounts. The economic territory of a country can be divided into regional territories and the extra-regio territory. For the purpose of regional accounts, MALTA is divided as follows:

	NUTS 1	NUTS 2	NUTS 3
MALTA	мто	MT00	
Malta			MT001
Gozo and Comino			MT002
Extra-Regio	MTZ	MTZZ	MTZZZ

The regional territory includes the region that is part of the geographic territory of a country and any free zones, including bonded warehouses and factories under customs control in the region. The extra-regio territory is made up of parts of the economic territory of a country that cannot be attached directly to a single region.

- 6. Data users must be aware that the industrial activities of the General Government at national level are spread over 21 different NACE categories (at A88 divisions) and include local councils and extra-budgetary units that are financially dependent on Government. NACE 84 is the largest division and, in terms of GVA, represented approximately 39.8 per cent of the General Government sector in 2020.
- 7. Employment data provided by JobsPlus for the period 2013-2020 are subject to revision.

TRANSPORT

This chapter focuses on regional land and sea transport statistics, covering period 2016 – 2021. The first section deals with road transport statistics covering rate of motorization, stock of licensed vehicles, road traffic accidents and contraventions. The section related to sea transport statistics starts with information on fishing vessels and concludes with inter-island statistics on passenger and vehicle movements aboard trips operated by Gozo Channel Co. Ltd and the fast ferries.

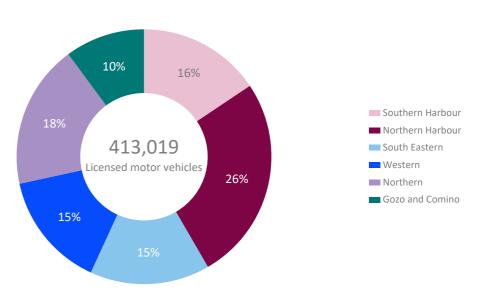

STOCK OF LICENSED MOTOR VEHICLES: 2021

As at the end of 2021, the number of licensed vehicles in MALTA amounted to 413,019. The largest proportion of the stock was recorded in the Northern Harbour district, 26.0 per cent of the total licensed motor vehicles (Table 5.1.1 and Chart 5.1.1). This district registered the highest numbers of route buses, motorcycles/ E-bikes/ PA-bikes, passenger cars and Goods-carrying vehicles. The South Eastern district had the highest number of licensed coaches and private buses and E-kick scooters, 30.6 and 50.2 per cent of the total respectively. On the other hand, Gozo and Comino district had the highest recorded number of agricultural vehicles and Quad and ATV's. The Northern district had the highest number of Special purpose vehicles (SPV's) and road tractors (Table 5.1.1).

Passenger cars totalled 313,177 or 75.8 per cent of the total number of licensed vehicles. In 2021, newly licensed motor vehicles amounted to 21,034; of these 11,417 were newly licensed 'new' vehicles and 9,617, were newly licensed 'used' ones (Tables 5.1.3 -

CHART 5.1.1 – Motor vehicle stock distribution by district (LAU 1): 2021

Did you know?

Between 2018 and 2021, the newly licensed motor vehicles have decreased by 23.2 per cent in the Malta region, whereas in the Gozo and Comino region, newly licensed motor vehicles went up by 12.6 per cent

DRIVING LICENCES: 2021

By the end of 2021, the total number of driving licence holders amounted to 272,333 or an increase of 2.4 per cent over 2020. The largest number – 71,698 or 26.3 per cent of the total – was registered in the Northern Harbour district. Gozo and Comino district accounted for 9.5 per cent of the total. (Table 5.1.6)

On a gender basis, there were 159,139 male and 113,194 female driving licence holders. The majority of driving licence holders were aged between 40 and 59 years (Table 5.1.7).

TRANSPORT INDICATORS: 2020/21

As at end of 2020, the number of vehicles per 1,000 residents went up to 780 from 773 in 2019. The number of vehicles to 1,000 driving licence holders stood at 1,513 by the end of 2020. Gozo and Comino district registered the highest ratio of vehicles, 1,179 per 1,000 total residents, while the Northern Harbour district registered the lowest ratio with 618 vehicles per 1,000 residents. On the other hand, in 2020 the Gozo and Comino district registered the highest ratio of vehicles, 1,619 per 1,000 driving licence holders, while the South Eastern district registered the lowest ratio with 1,441 vehicles per 1,000 driving licence holders. The number of vehicles per household in 2020 has decreased from two to one in the Northern Harbour district, whereas it remained consistent with those of the previous year across all the remaining districts (Table 5.1.8).

In 2021, the average age of passenger cars in MALTA stood at 14.98 years. The Southern Harbour district had the highest average age of passenger cars, 16.24 years, followed by the Gozo and Comino district of 15.81 years (Table 5.1.9).

During the year 2021, the number of public transport commuters totalled to 35,207,171. October registered the highest number of commuters with 3,680,910 or 10.5 per cent of the total. To the contrary, April registered the least number of commuters totalling 2,140,943. The largest proportion of public transport commuters (96.0 per cent) pertained to Malta region and the remaining 4.0 per cent to Gozo and Comino region. (Table 5.1.10)

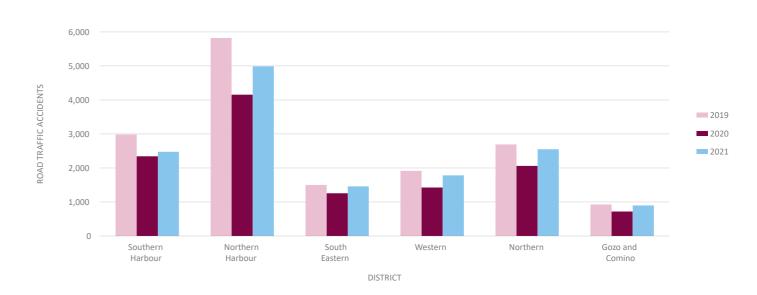

Did you know?

In Malta region, the number of passenger cars per 1,000 total residents has declined to 584 in 2020 from 600 in 2018, while during the same period, the number of passenger cars per 1,000 total Gozo and Comino residents increased from 719 in 2018 to 781 in 2020.

TRAFFIC ACCIDENTS: 2021

In 2021, the number of reported traffic accidents reached 14,135, an increase of 2,185 cases, or 18.3 per cent over the previous year. The largest increase was recorded in the Northern Harbour district, up by 833 cases. The Northern Harbour district was also the district to register the most accidents: 4,985 cases or 35.3 per cent of total accidents. Gozo and Comino district had the lowest registered accidents, 895 cases. (Table 5.1.11 and Chart 5.1.2a)

CHART 5.1.2a - Road traffic accidents by district (LAU 1) and year

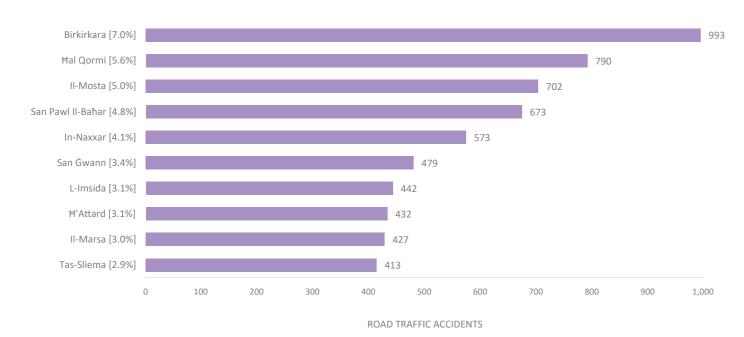

The number of traffic casualties amounted to 1,532 in 2021, up by 32.9 per cent over 2020 (Table 5.1.12). Of these casualties, 1,015 were drivers of whom 768 suffered slight injuries and 204 suffered grievous ones, while injuries sustained by five drivers proved fatal. During the same period 209 passengers and 99 pedestrians suffered slight injuries, while 51 passengers and 66 pedestrians suffered grievous ones. Moreover, injuries sustained by four pedestrians eventually proved fatal, thus raising the total number of fatalities in 2021 to nine. Once again, while the Northern Harbour district was the district with the highest reported traffic casualties, 453 cases or 29.6 per cent of the total traffic casualties, Gozo and Comino had 164 cases or 10.7 per cent of the total traffic casualties. (Tables 5.1.13–5.1.16)

Did you know?

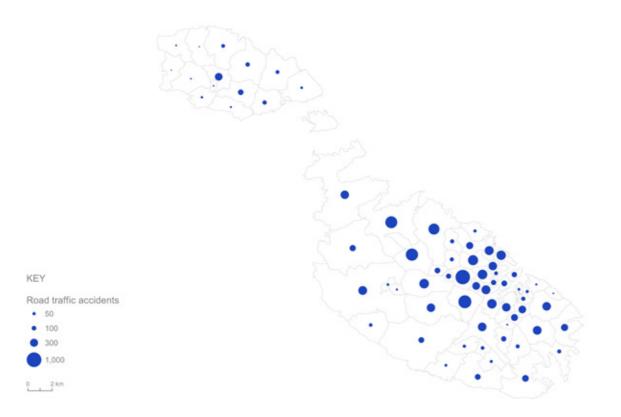

During 2021, the proportion of the grievous injuries relative to the total injuries sustained amounted to 21.6% and 26.2% in the Malta and Gozo and Comino regions respectively. In contrast, the corresponding ratios in 2017 were 16.4% and 19.7% respectively.

Birkirkara was the locality with the highest rate of traffic accidents, with 993 cases. Hal Qormi and Il-Mosta followed, with 790 and 702 reported accidents respectively. (Chart 5.1.2b and Map 5.1.1)

CHART 5.1.2b - Top 10 localities for road traffic accidents: 2021

MAP 5.1.1 - Road traffic accidents by locality (LAU 2): 2021

CONTRAVENTIONS: 2021

In 2021, traffic-related contraventions issued by the Police amounted to 86,677, or 102.7 per cent more than 2020, with the majority being issued in the Northern Harbour district (**Table 5.1.17 and Chart 5.1.3a**). San Giljan was highest in terms of contraventions issued by the Police, with 7,919 contraventions (**Chart 5.1.3b and Map 5.1.2**).

CHART 5.1.3a – Contraventions issued by the Police by district (LAU 1) and year

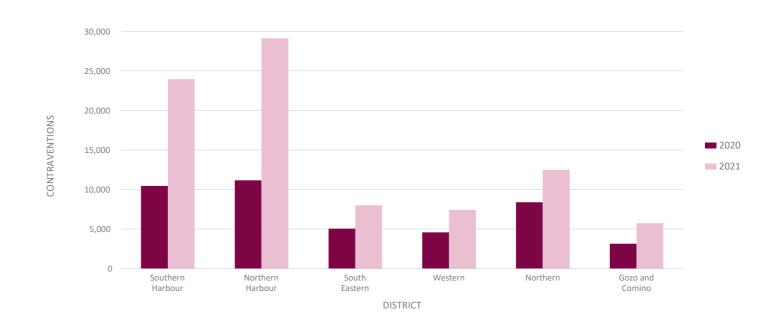

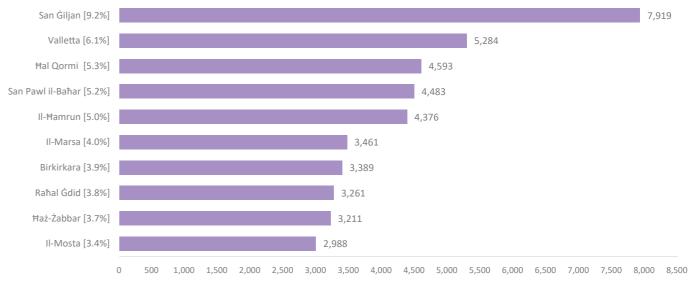

CHART 5.1.3b – Top 10 localities for transport-related contraventions issued by the Police: 2021

CONTRAVENTIONS

On the other hand, traffic-related contraventions issued by the Local Wardens amounted to 230,360, an increase of 43.8 per cent when compared to 2020. The majority (40.8 per cent) of the contraventions were also issued in the Northern Harbour district (Table 5.1.18 and Chart 5.1.4a). San Pawl II-Baħar was the locality with the highest tally of contraventions issued by Wardens, with 19,729 or 8.6 per cent of the total (Chart 5.1.4b and Map 5.1.2).

CHART 5.1.4a - Contraventions issued by Local Wardens by district (LAU 1) and year

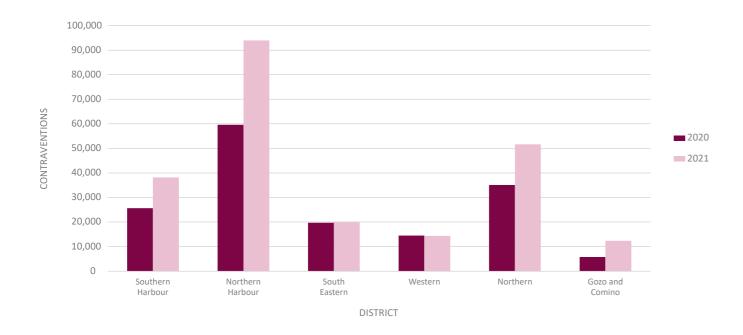

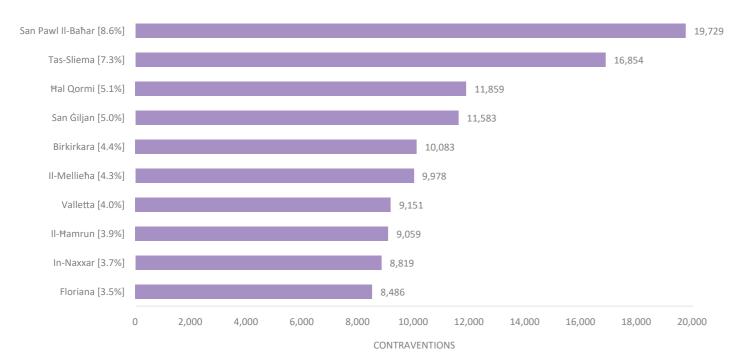

CHART 5.1.4b - Top 10 localities for transport-related contraventions issued by Local Wardens: 2021

In 2021, traffic-related contraventions issued by Transport Malta amounted to 10,596, with the majority being issued in the Northern Harbour district (Table 5.1.19 and Chart 5.1.5a). San Pawl II-Baħar was highest in terms of contraventions issued by Transport Malta, with 1,331 contraventions (Chart 5.1.5b and Map 5.1.2).

CHART 5.1.5a - Contraventions issued by Transport Malta by district (LAU 1) and year

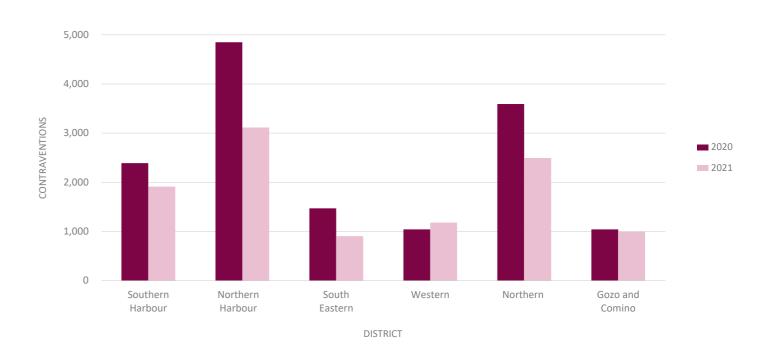

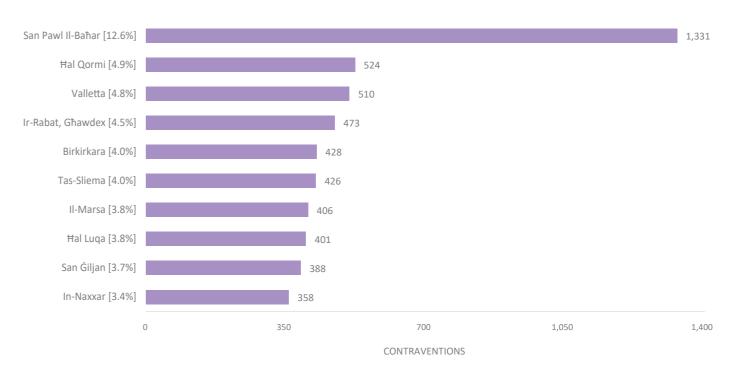

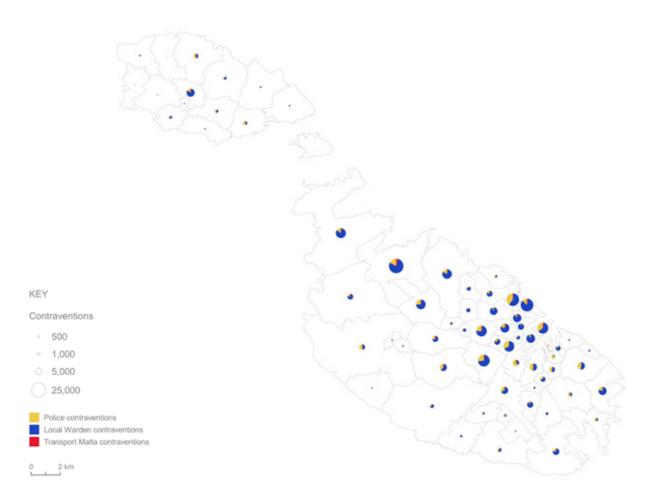

CHART 5.1.5b - Top 10 localities for transport-related contraventions issued by Transport Malta: 2021

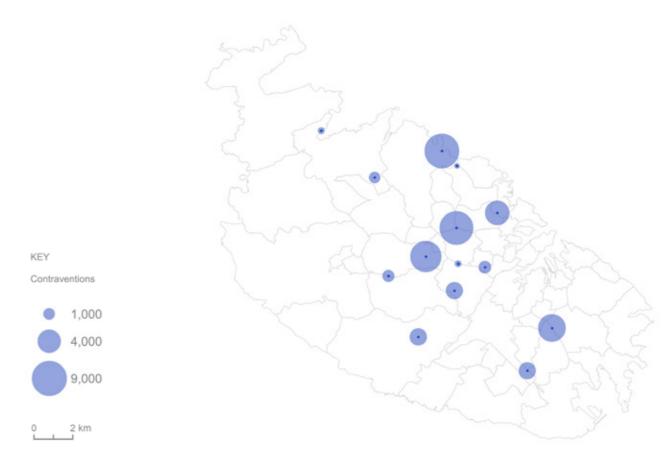

MAP 5.1.2 – Contraventions issued by the Police, Local Wardens and Transport Malta by locality (LAU 2): 2021

In 2021, speed camera contraventions totalled 45,504. The camera which caught the most over-speeding vehicles was the one installed in Triq in-Nutar Zarb, H'Attard, totalling 7,197 contraventions (Map 5.1.3).

MAP 5.1.3 – Speed camera contraventions by locality (LAU 2): 2021

Note

- $1. \ \mbox{One point can include two speed cameras which are opposite in the same street.}$
- The only point located on Naxxar's coastline includes the three speed cameras along Triq il-Kosta.
 Gozo and Comino district is omitted from the map as there are no speed cameras.

VEHICLES STOLEN: 2021

In 2021, a total of 243 vehicles were stolen. The highest number of stolen vehicles was recorded in the Northern Harbour district (83) with 34.2 per cent of the total. On the other hand, Gozo and Comino had the lowest number of reported stolen vehicles (6). (Table 5.1.20)

METHODOLOGICAL NOTES

Road Transport

1. Any vehicle-related and driving licences data are based on data provided by Transport Malta.

2. This data may be subject to revision.

3. Definitions of road vehicles:

Stock of road vehicles
Number of road vehicles registered at a given date in a country and licensed to use

roads open to public traffic.

Road vehicle A vehicle running on wheels and intended for use on roads.

Motor vehicle categories and classifications

Agricultural Motor vehicle, normally a tractor, designed exclusively or primarily for agricultural

purposes; licensed to use roads open to public traffic.

Coach and private bus Passenger road motor vehicle designed to carry more than 24 persons (including

driver), and with a provision to carry seated and standing passengers.

Minibus/mini-coach Passenger road motor vehicle designed to carry 10-23 seated or standing persons

(including the driver).

Route busBus licensed to operate on established bus routes.

Motorcycle

Two-, three- or four-wheeled road motor vehicle not exceeding 400kg of unladen weight. All such vehicles with a cylinder capacity of 50cc or over are included, as are

those under 50cc which do not meet the definition of moped.

E-Bicycle/PA-Bicycle Cycle with supportive electrical power unit. Due to the negligible number of powered

bicycles, such data is included with motorcycles.

E-Kick Scooter A stand-up device that has a handlebar, a deck and small hard wheels powered by an

electric motor and which also allows for human propulsion.

Moped Two-, three- or four-wheeled road motor vehicle which is fitted with an engine having

a cylinder capacity of less than 50cc and a maximum authorised design speed in accordance with national regulations. In this chapter, mopeds are included together

with motorcycles.

Quad (Quadricycle)/ATV (All-Terrain Vehicle)

Four-wheeled road motor vehicle not exceeding 400kg of unladen weight. All such vehicles with a cylinder capacity of 50cc or over are included, as are those under 50cc

which do not meet the definition of moped.

Passenger car road motor vehicle, other than a moped, motorcycle or Quad/ATV, intended for the

carriage of passengers and designed to seat no more than nine persons (including the driver). This category includes passenger cars, vans designed and used primarily for transport of passengers, taxis, hire cars, ambulances, motor homes (not caravans),

hearses and microcars.

Goods-carrying vehicle Road motor vehicle designed, exclusively or primarily, to carry goods. This category

includes: (i) light goods road motor vehicles with a gross vehicle weight of not more than 3,500kg designed exclusively or primarily to carry goods, such as vans and pickups; (ii) heavy goods road motor vehicles with a gross vehicle weight above 3,500kg

designed to carry goods.

Road tractor Road motor vehicle designed, exclusively or primarily, to haul other road motor vehicles

which are not power driven (mainly semi-trailers).

Special purpose vehicle

4. Definition of Driving Licences categories:

•

C1E

other special purpose road motor vehicles.

Motorcycles and motor tricycles with a power exceeding 15 kW.

(a) Motorcycles with a cylinder capacity not exceeding 125 cubic centimetres, of a power not exceeding 11 kW and with a power/weight ratio not exceeding 0.1 kW/kg.

Road motor vehicle for purposes other than the carriage of passengers or goods. This

category includes: fire brigade vehicles; mobile cranes; self-propelled rollers; bulldozers with metallic wheels or track; vehicles for recording film, radio and TV broadcasting;

mobile library vehicles; mobile kiosks; towing vehicles for vehicles in need of repair and

(b) Motor tricycles with a power not exceeding 15 kW.

Motorcycles of a power not exceeding 35 kW and with a power/weight ratio not exceeding 0.2 kW/kg and not derived from a vehicle of more than double its power.

Two-wheel vehicles (mopeds) or three-wheel vehicles with a maximum design speed of not more than 45 km/h.

Light quadricycles with a maximum design speed of not more than 45 km/h, and a power output not exceeding 4 kW in the case of other internal combustion engines, or whose maximum continuous rated power does not exceed 4 kW in the case of an electric motor.

(a) Motor vehicles with a maximum authorised mass not exceeding 3,500 kg and designed and constructed for the carriage of no more than eight passengers in addition to the driver, motor vehicles in this category may be combined with a trailer having a maximum authorised mass which does not exceed 750 kg.

(b) Without prejudice to the provisions of type-approval rules for the vehicles concerned, motor vehicles in this category may be combined with a trailer with a maximum authorised mass exceeding 750 kg, provided that the maximum authorised mass of this combination does not exceed 4,250 kg. Where such a combination exceeds 3,500 kg it shall be driven only after a test of skills and behaviour in accordance with Annex V of the Directive.

(c) Motor tricycles with a power exceeding 15 kW (provided that the holder of the licence is at least 21 years of age).

Quadricycles

Without prejudice to the provisions of type-approval rules for the vehicles concerned, combination of vehicles consisting of a tractor vehicle in category B and a trailer or semi-trailer where the maximum authorised mass of the trailer or semi-trailer does not exceed 3,500 kg.

Motor vehicles other than those in categories D1 or D, whose maximum authorised mass is over 3,500 kg and which are designed and constructed for the carriage of no more than eight passengers in addition to the driver. Motor vehicles in this category may be combined with a trailer having a maximum authorised mass which does not exceed 750 kg.

Motor vehicles other than those in categories D1 or D, the maximum authorised mass of which exceeds 3,500 kg, but does not exceed 7,500 kg, and which are designed and constructed for the carriage of no more than eight passengers in addition to the driver; motor vehicles in this category may be combined with a trailer having a maximum authorised mass not exceeding 750 kg.

(a) Without prejudice to the provisions of type-approval rules for the vehicles concerned, combinations of vehicles where the tractor vehicle is in category C1 and its trailer or semi-trailer has a maximum authorised mass of over 750 kg provided that the authorised mass of the combination does not exceed 12,000 kg.

166

Vehicle Registration and Administrative System Database. It is the only register that

contains the complete details of all vehicles registered and licensed in Malta.

	(b) Without prejudice to the provisions of type-approval rules for the vehicles concerned, combinations of vehicles where the tractor vehicle is in category B and its trailer or semi-trailer has an authorised mass of over 3,500 kg, provided that the authorised mass of the combination does not exceed 12,000 kg.
CE	Without prejudice to the provisions of type-approval rules for the vehicles concerned, combinations of vehicles where the tractor vehicle is in category C and its trailer or semi-trailer has a maximum authorised mass of over 750 kg.
D	Motor vehicles designed and constructed for the carriage of more than eight passengers in addition to the driver; motor vehicles which may be driven with a category D licence may be combined with a trailer having a maximum authorized mass which does not exceed 750 kg.
D1	Motor vehicles designed and constructed for the carriage of no more than 16 passengers in addition to the driver and with a maximum length not exceeding 8 metres. Motor vehicles in this category may be combined with a trailer having a maximum authorised mass not exceeding 750 kg.
D1E	Without prejudice to the provisions of type-approval rules for the vehicles concerned, combinations of vehicles where the tractor vehicle is in category D1 and its trailer has a maximum authorised mass of over 750 kg.
DE	Without prejudice to the provisions of type-approval rules for the vehicles concerned, combinations of vehicles where the tractor vehicle is in category D and its trailer has a maximum authorised mass of over 750 kgs.
F	Driving licences which before the 19th January 2013, were in category F were changed to category D1.
	As from the 19th January 2013:
	Provided that persons who before the 19th January 2013, held a category F, driving licence may continue to drive motor vehicles which can carry up to 18 passengers until their category F licence expires.
G	Agricultural tractors on roads in Malta only.

- 6. Contraventions data is supplied by Loqus.
- 7. Theft of vehicles data is compiled and provided by the Police Department.

Traffic accidents and injuries

5. VERA

- 8. Traffic accidents data is compiled from administrative information provided by the Police Department and the Malta Insurance Assocatio (Guard and Warden Service House Limited).
- 9. The type of casualty (slight or grievous) is determined by the Health Department. The definitions of deaths caused by road accidents refer to the European Conference for Ministers of Transport (ECMT) and United Nations Economic Commission for Europe (UNECE).
- 10. Minor traffic accidents which are either not reported or directly reported to Insurance Agencies by means of the Traffic Accident Form (i.e. no Police or Wardens are called on the accident scene and are settled by the completion of the relevant form) are not accounted for.
- 11. A fatal injury is defined by UNECE as "Any person who was killed outright or who died within 30 days as a result of the accident".

168

FISHING VESSELS: 2021

As at the end of 2021, the stock of fishing vessels stood at 2,741. MPVs comprised the largest proportion of fishing vessels with 1,214, or 44.3 per cent of the total. The largest share of fishing vessels was registered in the South Eastern district accounting for 28.7 per cent of the total. Fishing vessels registered in the Gozo and Comino district amounted to 20.6 per cent of the total (Table 5.2.1).

SEA TRANSPORT BETWEEN MALTA AND GOZO AND COMINO REGIONS: 2021

During 2021, trips between Malta and Gozo continued to increase, up by 9,401 or 32.4 per cent over 2020. Vehicle movements between the islands increased by 175,491 or 11.3 per cent over the previous year, while the number of passengers went up by 677,711 or 18.0 per cent. (Table 5.2.2)

During the year 2021, passenger traffic originating from Cirkewwa was busiest on Fridays and Saturdays, whereas highest numbers from Mgarr were recorded on Sundays and Mondays (Tables 5.2.3, 5.2.4 and Charts 5.2.1a–c).

In June 2021 the fast ferry service between Mgarr and Valletta was introduced. Total passengers making use of the fast ferry service from June to December amounted to 364,672, whereas total trips amounted to 8,028. (Table 5.2.5 and Map 5.2.1).

Did you know?

The majority of passengers utilised the fast ferry service during the months of August and September, accounting for 145,006, or 39.8% of the total passengers. The month of December recorded the least number of passengers, reaching only 26,716, or 7.3% of the total.

CHART 5.2.1a - Scheduled sea transport between Mgarr and Cirkewwa by day of the week, terminal and year

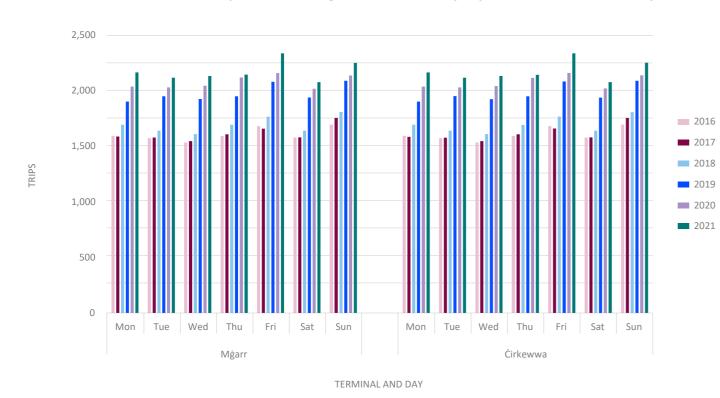

CHART 5.2.1b – Vehicle crossings between Mgarr and Cirkewwa by day of the week, terminal and year

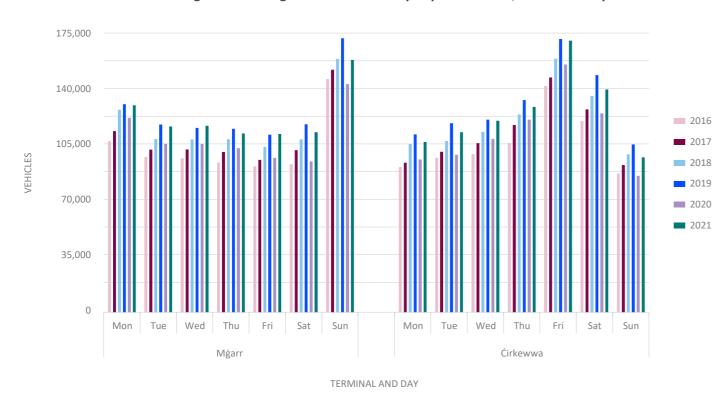

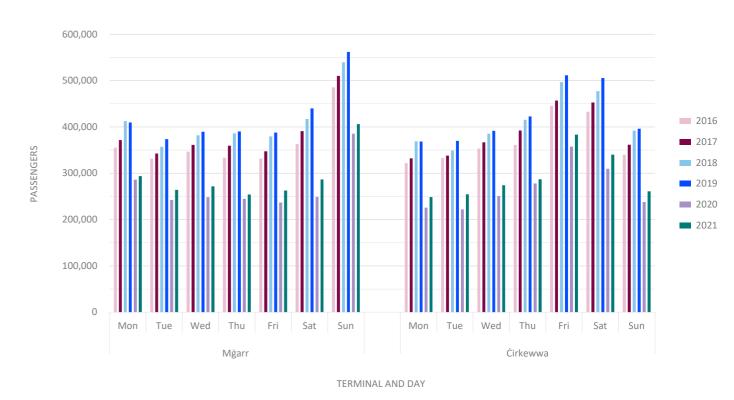

CHART 5.2.1c - Passenger movements between Mgarr and Cirkewwa by day of the week, terminal and year

MAP 5.2.1 - Distribution of trips between Malta and Gozo during 2021

YACHT MARINAS: 2021

In 2021, the Creek Developments plc yacht marina had the largest berthing capacity of 742 berths. This was followed by the Mgarr Harbour Marina with 282 berths. (Table 5.2.6)

METHODOLOGICAL NOTES

Fishing vessels

1. The data regarding fishing vessels is supplied by the Department of Fisheries and Aquaculture

2. Definitions of fishing vessels:

(i) As stated in SL 425.07 – Fishing Vessels Regulations

MFA Professional Fishing Vessels - Full-time
MFB Professional Fishing Vessels - Part-time

MFC Non-Commercial Fishing Vessels i.e. recreational

ii) As stated in the report entitled "The Maltese Fishing Industry - year 2000" drafted by Michael Darmanin, Senior Fisheries Officer,

Luzzu The most traditional fishing vessel. It is pointed at both ends, and is painted in folkloristic bright colours.

Kajjik Differs from the luzzu in being generally smaller (average length 4.6 metres) and being flat ended at the stern.

Previously, they were made of wood, but in recent years, fibre-glass has been the hull material of choice.

(iii) As stated from "The Fishing Industry in Malta Past-Present-Future" - Stanley Farrugia Randon

Firilla Almost identical in design to the luzzu but, the bulwark (tappiera) is secured to the outside of the kontrarota.

The stem posts found at each end of this boat are also much higher than those of the luzzu and it has a wider

appearance.

Bimbu Has a stern resembling that of a lanca while its bow resembles that of a luzzu.

Trawler A fishing trawler, also known as a dragger, is a commercial fishing vessel designed to operate fishing trawls.

Trawling is a method of fishing that involves actively dragging or pulling a trawl through the water behind one

or more trawlers.

Freigatina A common term referring to a small boat which in shape is similar to a kajjik or luzzu.

MPV Multi Purpose Vessel is a seagoing ship that is built for the carriage of a wide range of cargoes.

Auxiliary Vessel An Auxiliary Vessel is a vessel that is designed to operate in a number of roles supporting other vessels. Their

roles may include replenishment, transport, repair, harbour, research and others.

Other Any vessel that is not listed above and also include dinghy, longliners, recreational fishing vessel, 'lanca' and

'skuna'.

Sea Transport between Malta and Gozo regions

3. The source of the data included in this publication is administrative information provided by the Gozo Channel Co. Ltd. and Transport Malta.

4. The fast ferry service operating between Mgarr and Valletta commenced on 1 June 2021.

5. The table below illustrates the passenger and vehicle capacity of each Gozo Channel vessel:

Carrying capacity		
Vessel	Vehicles	Passengers
MV Gaudos	72	900
MV Malita	138	900
MV Ta' Pinu	138	900
MV Nikolaos	160	650 (Summer) / 350 (Winter)

Periods when vessels were out of service for docking purposes:

MV Gaudos: 04/01/2021 - 11/02/2021.

MV Malita: 09/01/2019 - 31/01/2019,
06/02/2019 - 13/02/2019,
07/03/2019 - 08/03/2019,
and 25/11/2019 - 02/12/2019.

//V Ta' Pinu: 06/01/2020 - 10/02/2020.

MV Nikolaos started operating on 13/06/2019.

MV Nikolaos was put temporarily out of service as from 27/04/2020 until 02/07/2020.

6. The table below illustrates the passenger capacity of each fast ferry service vessel:

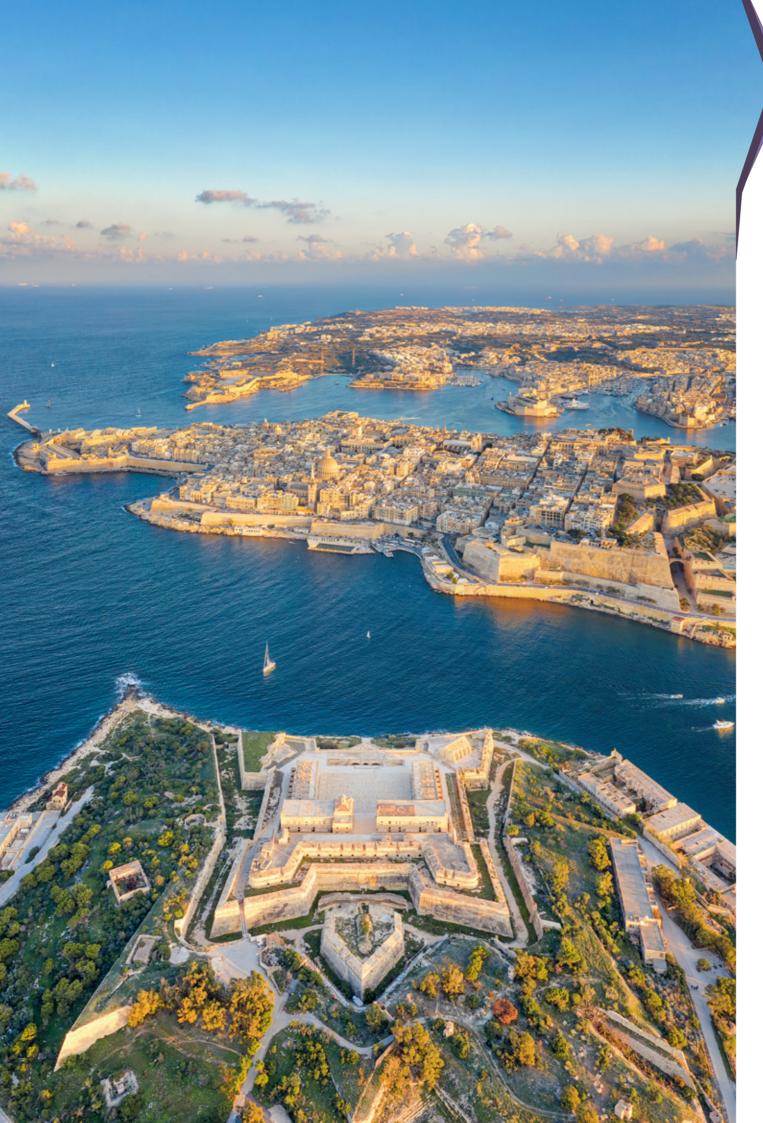

Carrying capacity	
Vessel	Passengers
Your Wisdom (Gozo Fast Ferry Ltd)	296
Your Faith (Gozo Fast Ferry Ltd)	296
San Pawl (Virtu Ferries Ltd)	316
San Frangisk (Virtu Ferries Ltd)	316

- 7. Data for passengers travelling between Mgarr and Cirkewwa comprises of foot and vehicle passengers and vehicle drivers. The fast ferry service does not allow for the transport of vehicles, only foot passengers are included.
- 8. Different approaches to data collection are being applied at the Mgarr and Cirkewwa Harbours with regards to the Gozo Channel service. While the data source for the Mgarr side is the Automated Ticketing System (ATS), data for the Cirkewwa side is dependent on the manual clicking system

TOURISM

This chapter presents a regional dimension of tourism statistics in MALTA for the years 2017 – 2021, mainly based on survey data collected from ongoing direct enquiries with industry operators and visitors. The content is structured in three distinct sections: (i) the performance of collective accommodation establishments as reported by operators; (ii) regional tourism demand comprising domestic and inbound tourism as declared by visitors; and (iii) main characteristics of cruise passengers.

6.1 SUPPLY-SIDE SURVEY (OPERATORS)

NATIONAL OUTLOOK OF THE COLLECTIVE ACCOMMODATION

On a national level, in 2021, total guests reached 981,993, an increase of 39.1 per cent over the same period in 2020. Of this total, 75.0 per cent were non-resident guests while the remaining 25.0 per cent were resident guests. Total nights spent increased by 56.6 per cent, surpassing 4.6 million, with the majority (85.4 per cent) being non-resident guest nights. (Table 6.1.1 and Charts 6.1.1a, 6.1.1b)

CHART 6.1.1a – Total guests in collective accommodation by type, region (NUTS 3) and year

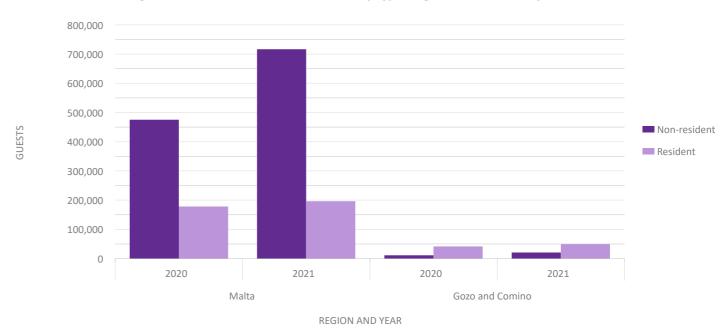

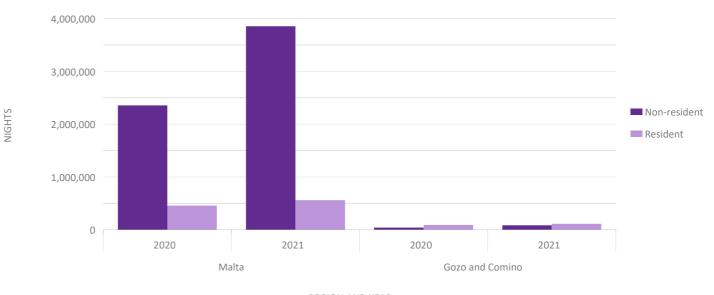

CHART 6.1.1b – Total guest nights in collective accommodation by type, region (NUTS 3) and year

Other collective accommodation, comprising of guesthouses, hostels and tourist villages registered an increase over 2020 of 62.0 per cent in guests and 54.8 per cent in nights spent. In 2021, the largest share of guests and guest nights were reported in 4-star hotels, accounting for 434,690 guests or 44.3 per cent of the total guests and 2,062,474 or 44.7 per cent of total guest nights. Guests in 5-star hotels registered the largest increase in both guests and nights spent over 2020, by 49.4 and 91.4 per cent respectively. (Table 6.1.1 and Charts 6.1.2a, 6.1.2b)

CHART 6.1.2a – Total guests in collective accommodation by type of accommodation and year

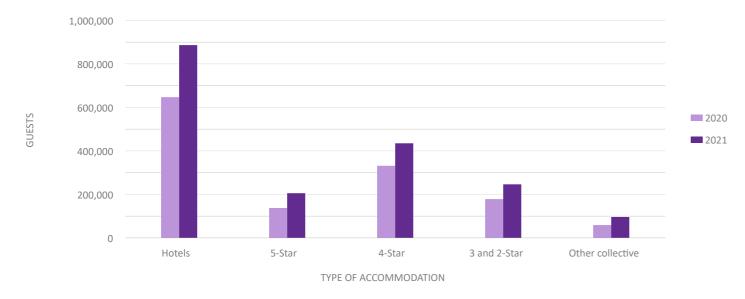

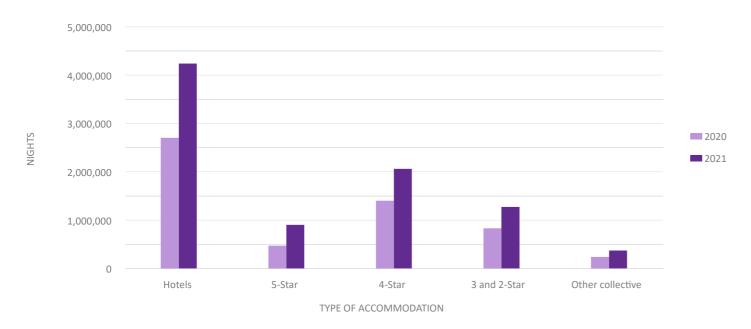

CHART 6.1.2b – Total guest nights in collective accommodation by type of accommodation and year

The net use of bed-places increased by 7.7 percentage points to 33.1 per cent. In 2021, the average length of stay in collective accommodation establishments stood at 4.7 nights, reflecting an increase of 0.5 nights when compared to 2020. (Table 6.1.1)

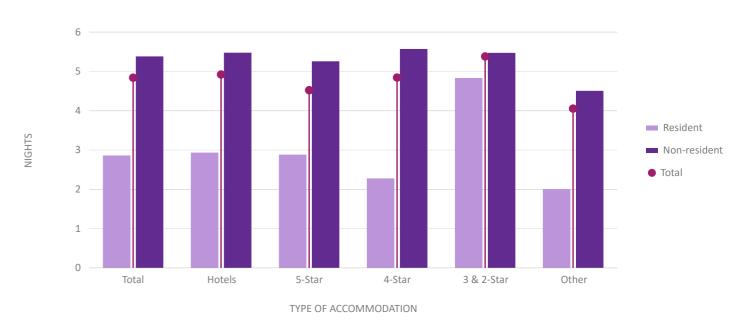

Active collective accommodation establishments during peak month (as at 31 August 2021) totalled 214, with a net capacity of 43,073 bed-places. (Table 6.1.1)

REGIONAL OUTLOOK OF THE COLLECTIVE ACCOMMODATION (NUTS 3)

Total guests in Malta region reached 912,349, up by 39.6 per cent over 2020. Additionally, an increase of 57.1 per cent was recorded in the number of guest nights. Increases were registered across all hotel categories and 'other' collective accommodations. Compared to the previous year, the average length of stay increased by 0.5 of a night to 4.8. The longest average length of stays of non-resident guests and resident guests to Malta region were reported in the 4-star and 3 and 2-star hotel categories respectively. The net occupancy rate increased from 25.3 to 33.1 per cent. (Table 6.1.2 and Charts 6.1.3a, 6.1.4)

Total guests in Gozo and Comino region increased by 33.4 per cent to 69,644, while total nights spent went up by 47.1 per cent to 195,620 when compared to the previous year. Similar to Malta region, for the case of Gozo and Comino region, all categories registered increases in both guests and nights spent over 2020. The 'other collective' accommodation category registered the largest increases in both guests (77.5 per cent) and nights spent (80.2 per cent) over 2020. The average length of stay increased slightly to 2.8 from 2.5 in 2020. On average, the longest duration of visit of both non-resident and resident guests to Gozo and Comino region were reported in the 5-star hotel category. The net occupancy rate increased from 26.4 to 34.5 per cent. (Table 6.1.3 and Charts 6.1.3b, 6.1.4)

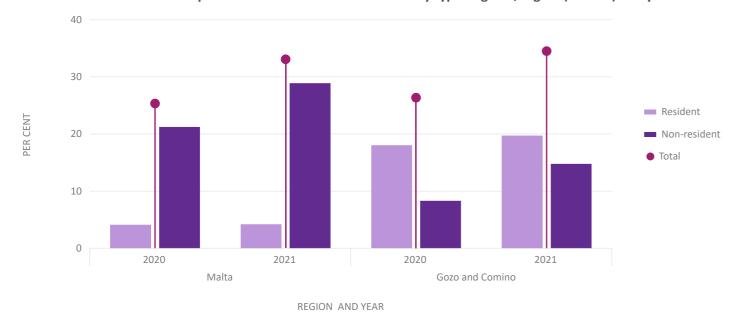

CHART 6.1.3a – Average length of stay in collective accommodation in Malta region by type of accommodation and guest: 2021

 $CHART\,6.1.3b-Average\,length\,of\,stay\,in\,collective\,accommodation\,in\,Gozo\,and\,Comino\,region\,by\,type\,of\,accommodation\,and\,guest:\,2021$

CHART 6.1.4 - Net use of bed-places in collective accommodation by type of guest, region (NUTS 3) and year

Did you know?

Between 2018 and 2021, the largest proportion of guests in collective accommodation in Gozo and Comino region shifted from 3 & 2-star hotels in 2018 (34.4%) to 4-star hotels in 2021 (35.1%). During the same period under review, 4-star hotels were the most popular for guests in collective accommodation in Malta region.

DISTRICT ANALYSIS OF THE COLLECTIVE ACCOMMODATION (LAU 1)

In 2021, the largest share of guests was recorded in the Northern Harbour district, tallying to 428,561 or 43.6 per cent of total guests. This was followed by the Northern district. Guests in Gozo and Comino district accounted for just 7.1 per cent of the total guests. All districts registered an increase in guests when compared to 2020. (Table 6.1.4)

Furthermore, in 2021, collective accommodation in the Northern Harbour and Northern districts comprised 85.1 per cent of the non-resident guests, at 47.9 and 37.1 per cent respectively. Non-resident guests in Gozo and Comino district accounted for just 2.8 per cent (Table 6.1.4 and Chart 6.1.5a). On the other hand, most resident guests were registered in the Northern district amounting to 41.0 per cent of total resident guests. Gozo and Comino district's share of resident guests accounted for 20.1 per cent of total resident guests. (Table 6.1.4 and Chart 6.1.5b)

Most guest nights were spent in the Northern Harbour district amounting to 2.1 million or 44.8 per cent of the total. This was followed closely by the Northern district. The share of guest nights in Gozo and Comino accounted for 4.2 per cent of the total guest nights. All districts registered increases in guest nights over 2020, with the largest increase (88.8 per cent) being registered in the South Eastern district. (Table 6.1.4)

The Northern Harbour district took the largest proportion of non-resident guest nights, comprising 47.3 per cent of total. The share of the Gozo and Comino district with respect to non-resident guest nights accounted for just 2.1 per cent of the total (Table 6.1.4 and Chart 6.1.6a). Most resident guest nights were spent in the Northern district accounting for 47.8 per cent of total resident guest nights, while Gozo and Comino accounted for 16.6 per cent of total resident guest nights. (Table 6.1.4 and Chart 6.1.6b)

CHART 6.1.5a - Non-resident guests in collective accommodation by district (LAU 1) and year

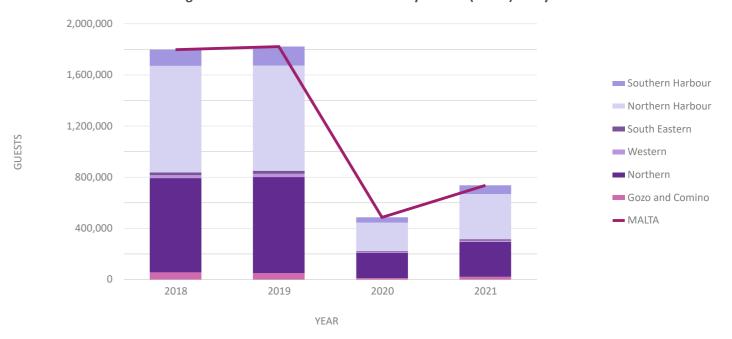

CHART 6.1.5b - Resident guests in collective accommodation by district (LAU 1) and year

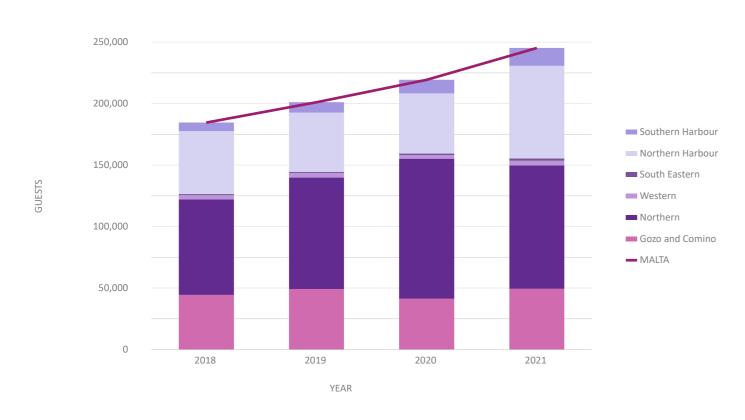

CHART 6.1.6a – Non-resident nights in collective accommodation by district (LAU 1) and year

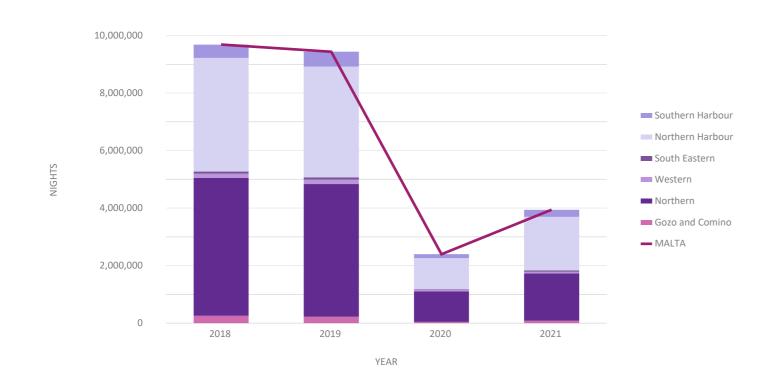

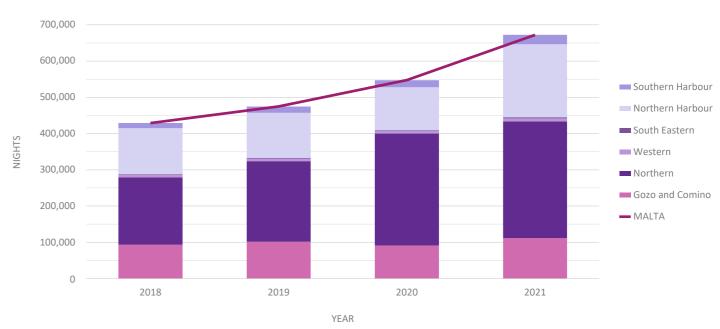

CHART 6.1.6b - Resident nights in collective accommodation by district (LAU 1) and year

The Northern district had the longest average length of stay, 5.3 nights, followed by the Northern Harbour and Western districts, both of which had an average length of stay of 4.8 nights. Most districts registered an increase in the average length of stay, except for the Western district which decreased by one night, and the South Eastern district which remained at 3.2 nights. (Table 6.1.4) The longest average duration of stay of both non-residents and residents was reported in the Northern district. (Table 6.1.4 and Charts 6.1.7a-b)

CHART 6.1.7a – Average length of stay in collective accommodation of non-resident guests by district (LAU 1) and year

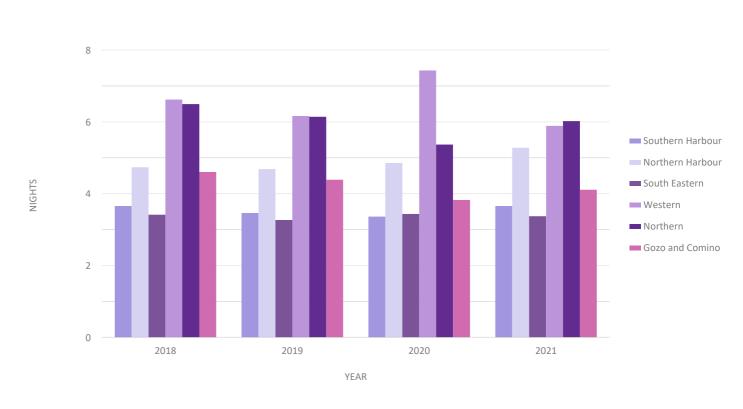

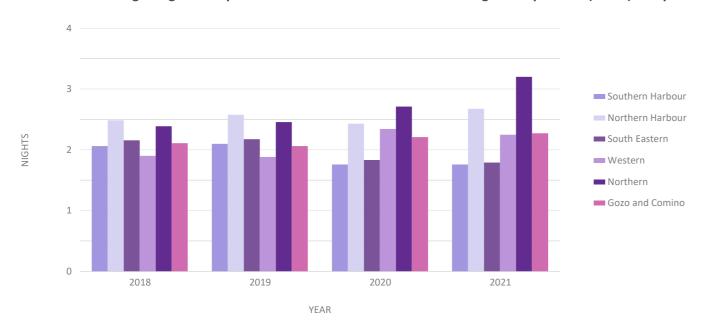

CHART 6.1.7b - Average length of stay in collective accommodation of resident guests by district (LAU 1) and year

The highest net occupancy rate was recorded in the Gozo and Comino district at 34.5 per cent, followed by the Northern district at the rate of 34.3 per cent. All districts registered higher occupancy rates when compared to 2020. Highest occupancy rates in collective accommodation by non-resident and resident guests were reported in the Northern Harbour district (29.8 per cent) and in Gozo and Comino (19.7 per cent) respectively. (Table 6.1.4 and Charts 6.1.8a, 6.1.8b)

CHART 6.1.8a - Net use of bed-places in collective accommodation by non-resident guests by district (LAU 1) and year

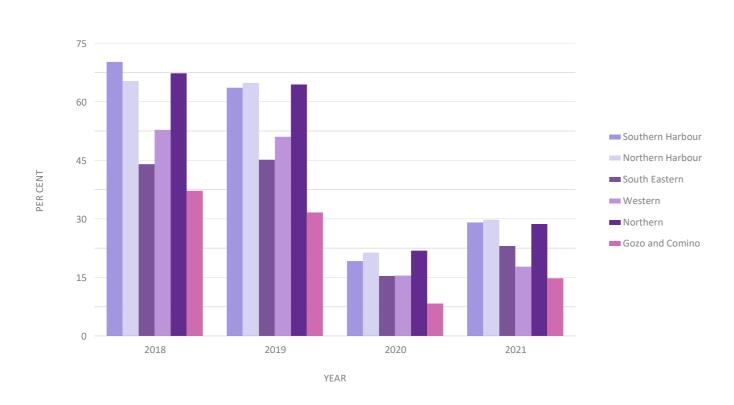

CHART 6.1.8b - Net use of bed-places in collective accommodation by resident guests by district (LAU 1) and year

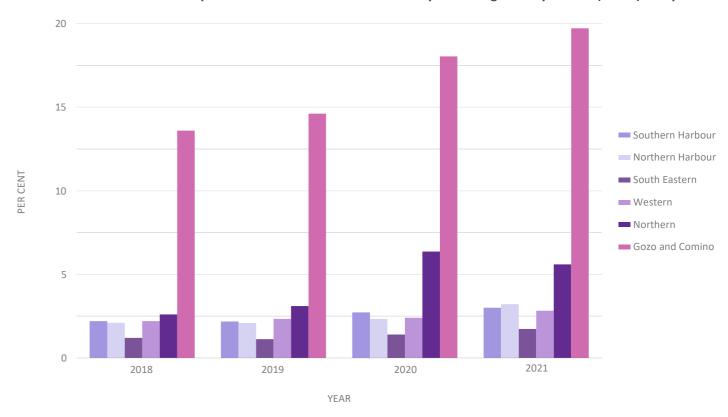

CHART 6.1.9a – Net use of bedrooms in collective accommodation by non-resident guests by district (LAU 1) and year

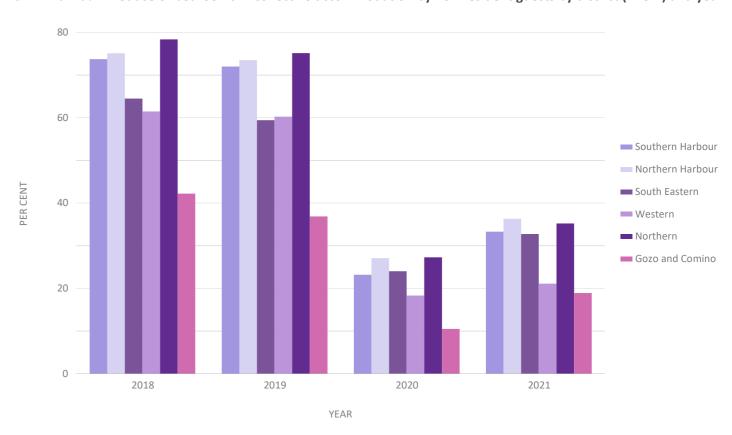

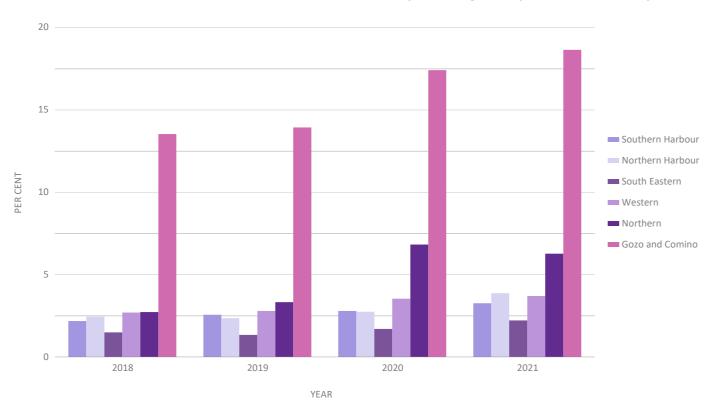

CHART 6.1.9b - Net use of bedrooms in collective accommodation by resident guests by district (LAU 1) and year

In 2021, at 36.9 per cent, the Northern Harbour district recorded the largest share in terms of active collective accommodation establishments, followed by the Northern district which accounted for 21.5 per cent of the total. Gozo and Comino district accounted for 11.7 per cent of the total active collective accommodation establishments. (Table 6.1.4)

On the other hand, the largest proportion of bed-places was registered in the Northern district, at 44.7 per cent of the total bed-places, followed by the Northern Harbour district at 42.1 per cent. The net capacity of active collective accommodation establishments in Gozo and Comino district accounted for 4.2 per cent of total bed stock of the collective accommodation. (Table 6.1.4)

Did you know? —

During 2021, although the majority of guest nights were registered in the Northern Harbour district (44.8%), the Northern district recorded the longest average length of stay at 5.3 nights.

SELF-CATERING ESTABLISHMENTS IN GOZO AND COMINO REGION

As at end of 2021, total registered self-catering accommodation accounted for 79.5 per cent of total bed stock in Gozo and Comino region. This consisted of 1,314 self-catering accommodation premises, with a net capacity of 7,019 bed-places. Bed stock of other self-catering establishments, comprising of apartments and villas with pool, accounted for more than half of the total active holiday furnished premises. (Table 6.1.5 and Chart 6.1.10)

CHART 6.1.10 – Distribution of bedstock by type of accommodation in Gozo and Comino region: 2021

METHODOLOGICAL NOTES

Collective Accommodation Establishments Survey (Accomstat)

- 1. The data provided in this chapter is based on the latest data published by the National Statistics Office i.e. News Release 033/2022 Collective Accommodation Establishments: Q4/2021 (https://nso.gov.mt/en/News Releases/Documents/2022/02/News2022 033.pdf). The information contained in this chapter is subject to revision.
- 2. The objective of this monthly survey is to estimate the utilisation rate of bed-places of all active collective accommodation establishments in Malta and Gozo and Comino. The variables include:
 - Number of residents;
 - Number of non-residents;
 - Nights spent by residents;
 - Nights spent by non-residents;
 - Number of room nights sold to non-residents;
 - Number of room nights sold to residents;
 - Number of bedrooms;
 - Number of bed-places:
 - Number of days the establishment was closed during the reference month.

The collection of the above variables and the calculation of occupancy levels are in line with Regulation (EU) No. 692/2011.

- 3. The survey is distributed monthly to all collective accommodation establishments, namely hotels, guesthouses, hostels and tourist villages.
- 4. The Malta Tourism Authority (MTA) classification of all accommodation categories are found in Legal Notice 351 of 2012. (https://legislation.mt/ eli/ln/2012/351/eng/pdf)
- 5. Users are advised that comparisons between non-resident arrivals recorded in the Inbound Tourism survey (Tourstat, demand-side) and the Collective Accommodation survey (Accomstat, supply-side), should be undertaken in the knowledge that discrepancies will be found. These are mainly due to differences in definitions and methodologies. For more details, one can consult Concept 15.4 of the NSO's metadata file (https:// metadata.nso.gov.mt/reports.aspx?id=35).
- 6. In view of the COVID-19 situation, guests accommodated in any collective accommodation establishment, and for which their stay was related to health or safety reasons (not related to tourism purposes), have been considered out-of-scope for tourist accommodation statistics and therefore, not recorded for March 2020 - December 2021.

7. Definitions:

- Bedroom: a unit formed by one room or group of rooms constituting an indivisible rental whole in an accommodation establishment or dwelling.
- Bed-place: in an establishment, this is determined by the number of persons who can stay overnight in the establishment, not taking into account any extra beds that may be provided to clients on request.
- Residents: A person is considered to be a resident of Malta/Gozo and Comino if:
 - (a) S/he has lived for most of the past 12 months in Malta/Gozo and Comino;
 - (b) S/he has lived in Malta/Gozo and Comino for less than 12 months but intends to return within a year to settle here.
- Non-residents: foreigners who do not necessarily follow the definition of a tourist and check into/out of a collective accommodation establishment.
- **Total guests:** the sum of residents and non-residents.
- Total nights spent: the total number of nights which a guest actually spends or is registered to spend in a collective accommodation establishment.
- Net use of bed-places: the net occupancy rate calculated for all active accommodation establishments, net of seasonal closures and other temporary closures. The occupancy of bed-places is calculated by dividing the total nights during the reference period by the number of bed-places and the number of days when the bed-places are actually available for use during the reference period. The result is then multiplied by 100 to express the occupancy rate as a percentage.
- Average length of stay: the number of nights spent divided by the number of guests during a specified reference period.

6.2.1 DOMESTIC TOURISM

Domestic tourism as compiled by the National Tourism Survey, comprises the activities of:

- i) Malta residents visiting Gozo and Comino region; or
- ii) Gozo residents visiting Malta region; and

staying for not more than 12 consecutive months for personal, business or other purposes.

Domestic tourism trips: (i) conducted within same region of residence; and (ii) made routinely by respective residents, at least once a week, are excluded.

In 2020, domestic tourist arrivals reached 360,460, an increase of 51.9 per cent when compared to 2019. The largest share was registered in the 25-44 age bracket (50.6 per cent) and it accounted for the highest increase (78.0 per cent) over 2019. Domestic tourists aged 65 years and over experienced a decrease of 9.0 per cent over 2019. The majority of domestic tourists travelled for holiday purposes (79.8 per cent) and spent 1-3 nights (80.6 per cent). In 2020, the average length of stay increased by 0.4 of a night over 2019 to 3.0 nights. (Table 6.2.1.1)

CHART 6.2.1.1a – Domestic and inbound tourists by region (NUTS 3): 2020

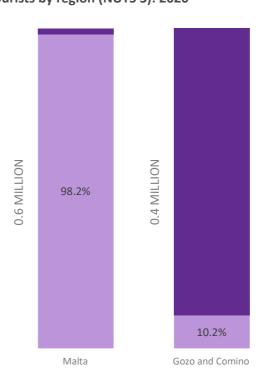

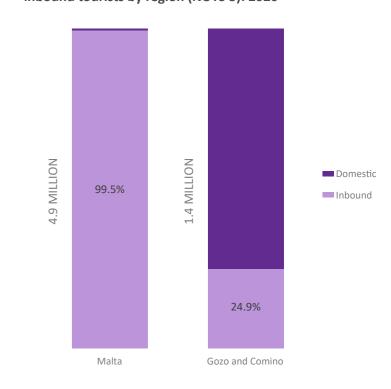

CHART 6.2.1.1b – Nights spent by domestic and inbound tourists by region (NUTS 3): 2020

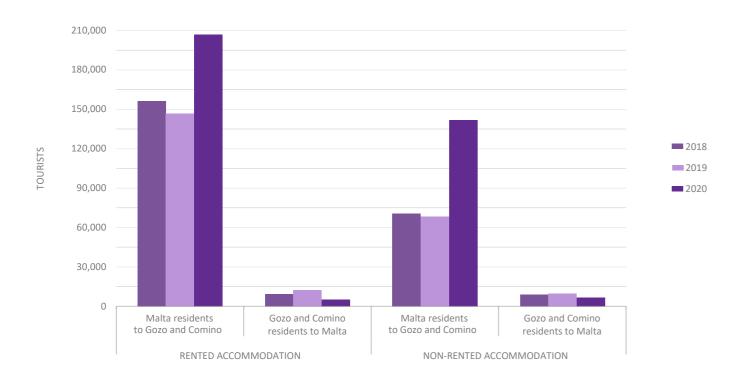

DOMESTIC TOURISM TO GOZO AND COMINO REGION

Domestic tourists to Gozo and Comino region assumed a share of 89.8 per cent of total tourism demand within the same region. In 2020, Gozo and Comino region received 348,489 domestic tourists, an increase of 61.9 per cent over 2019. (Table 6.2.1.1 and Chart 6.2.1.1a)

CHART 6.2.1.2a - Domestic tourists by type of accommodation, region (NUTS 3) and year

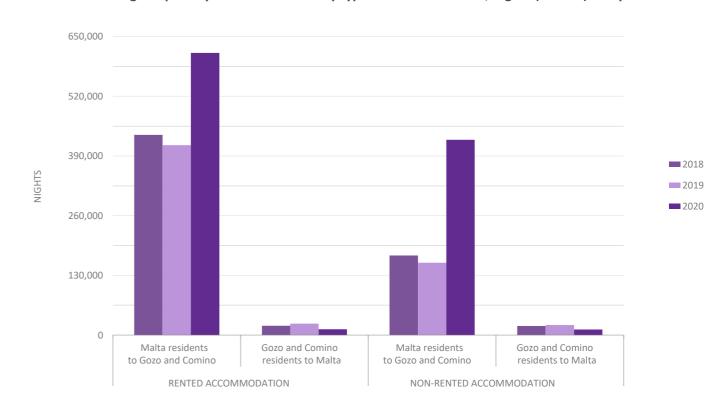

Domestic tourists to Gozo and Comino region, who stayed in non-rented accommodation establishments amounted to 141,708, an increase of 107.4 per cent over 2019. More than half of the domestic stays in rented accommodation (71.6 per cent) were in non-collective accommodation establishments. (Table 6.2.1.2 and Chart 6.2.1.2a)

Domestic tourist nights spent in Gozo and Comino region totalled 1,040,040, an increase of 82.0 per cent over 2019. This accounted for 75.1 per cent of total overnights spent in Gozo and Comino region (Chart 6.2.1.1b). The majority of nights (59.1 per cent) were in rented accommodation, of which 77.0 per cent were spent in non-collective accommodation. (Table 6.2.1.3 and Chart 6.2.1.2b)

Did you know?

During 2020, domestic tourism across regions stood at 360,460 total arrivals, an increase of 51.9% over 2019. Malta residents travelling to Gozo and Comino region accounted for the highest proportion at 96.7% of total domestic tourists.

CHART 6.2.1.2b - Nights spent by domestic tourists by type of accommodation, region (NUTS 3) and year

Domestic tourism expenditure in Gozo and Comino region was estimated at €57.8 million, an increase of 61.2 per cent over 2019. The highest percentage increase (77.4 per cent) was recorded in the 'accommodation' category. (Table 6.2.1.4)

DOMESTIC TOURISM TO MALTA REGION

Gozo and Comino residents who travelled to Malta region in 2020 as domestic tourists totalled 11,971, a decrease of 45.5 per cent over 2019. (Table 6.2.1.1) The largest proportion (57.3 per cent) of the Gozo and Comino residents who travelled to Malta region stayed in non-rented accommodation. (Table 6.2.1.2 and Chart 6.2.1.2a)

Domestic tourist nights spent in Malta region amounted to 24,828 nights, a decrease of 46.8 per cent over 2019. Nights spent in rented accommodation accounted for 50.3 per cent of total domestic tourist nights. (Table 6.2.1.3 and Chart 6.2.1.2b)

In 2020, domestic tourism expenditure in Malta region was estimated at €1.6 million, a decrease of 53.6 per cent over 2019. (Table 6.2.1.4)

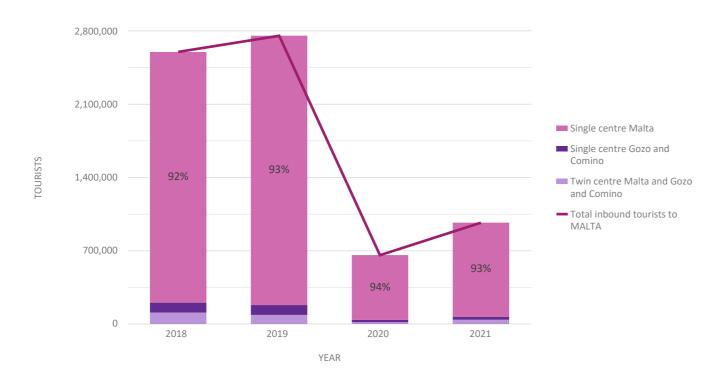

Did you know?

During 2020 total expenditure by Malta residents as domestic tourists in the Gozo and Comino region was 1.6 times more than during 2019. On the contrary, total spending by Gozo and Comino residents as domestic tourists within the Malta region accounted for only half of the total expenditure in 2019.

211

6.2.2 INBOUND TOURISM

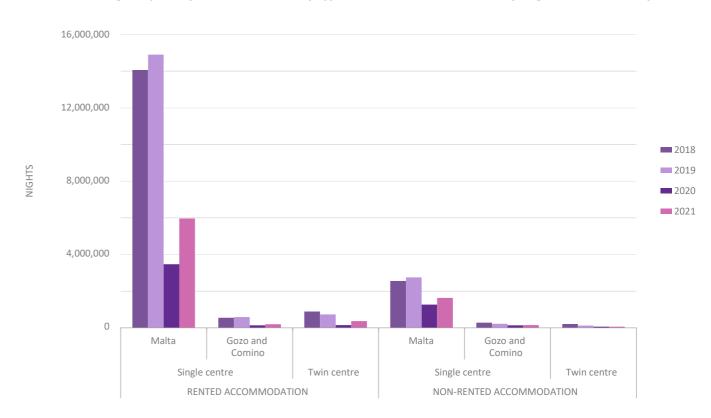

CHART 6.2.2.1 - Inbound tourists by itinerary, region (NUTS 3) and year

In 2021, inbound tourist arrivals increased by 47.0 per cent, reaching 968,136 tourist arrivals. Single centre destination inbound tourism accounted for the majority of the trips, 95.8 per cent, the rest being twin centre destination trips. (Tables 6.2.2.1, 6.2.2.2 and Chart 6.2.2.1)

Total nights spent by inbound tourists to MALTA reached almost 8.4 million, an increase of 60.5 per cent over 2020. Inbound tourist nights in the Malta region accounted for 94.0 per cent of the total, while the Gozo and Comino region accommodated the remainder. In 2021, Gozo and Comino region registered an increase of 46.8 per cent, reaching over 0.5 million nights. Nights spent by single centre inbound tourists accounted for 94.8 per cent of total nights spent in MALTA. The remaining 5.2 per cent were nights spent on twin centre destination trips. (Tables 6.2.2.1, 6.2.2.8 and Charts 6.2.2.2, 6.2.2.3b)

CHART 6.2.2.2 – Nights spent by inbound tourists by type of accommodation, itinerary, region (NUTS 3) and year

In 2021, total expenditure by inbound tourists to MALTA reached an estimate of €870.7 million, an increase of 91.3 per cent over 2020. Package and non-package expenditure constituted 20.7 and 37.7 per cent of the total respectively, while 'other expenditure' accounted for the remaining 41.6 per cent. Accommodation expenditure amounted to 61.6 per cent of the total non-package expenditure. Expenditure by inbound tourists on single centre destination trips accounted for 94.9 per cent of total. (Table 6.2.2.9)

INBOUND TOURISM TO MALTA REGION AS A SINGLE CENTRE DESTINATION

CHART 6.2.2.3a – Inbound tourism by itinerary and region (NUTS 3): 2021

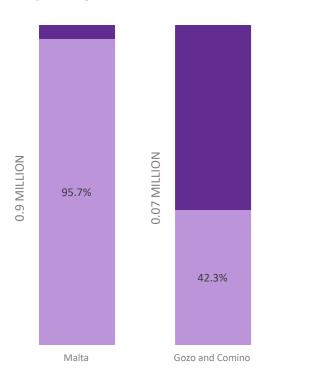

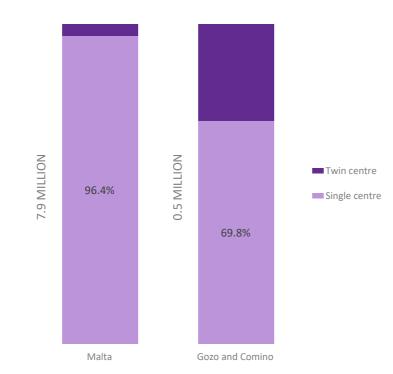

CHART 6.2.2.3b - Nights spent by inbound tourists by itinerary and region (NUTS 3): 2021

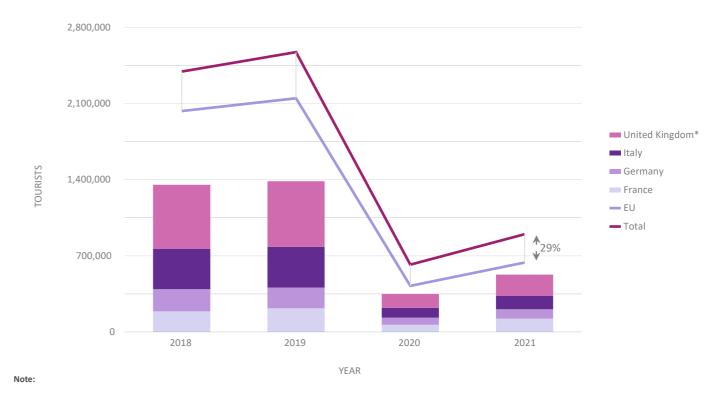

Malta region recorded the highest demand in terms of inbound tourist arrivals. In 2021, inbound tourists to Malta region as a single centre destination reached almost 0.9 million, an increase of 45.0 per cent over 2020. (Tables 6.2.2.1, 6.2.2.3 and Charts 6.2.2.1, 6.2.2.3a)

Most of the inbound tourists were aged between 25 and 44 (42.2 per cent) and came from EU Member States (71.1 per cent), with the strongest market being Italy. With regards to Non-EU countries, most of the inbound tourists came from the UK, accounting for 75.8 per cent of the total inbound tourists from Non-EU countries. Over three-fourths of single centre trips (0.7 million) to Malta region were done for holiday purposes. First-time tourists accounted for 72.5 per cent while the remainder were repeat tourists. When compared to 2020, non-package trips increased by 47.8 per cent, implying that 75.9 per cent of trips in 2021 were non-package; the package trips increased by 36.9 per cent when compared to 2020. (Table 6.2.2.3 and Charts 6.2.2.4 – 6.2.2.6)

Did you know?

Out of the 0.9 million inbound tourists visiting Malta as a single centre destination during 2021, 72.5% were first-time visitors, whereas 53.2% spent at least 7 nights.

CHART 6.2.2.4 - Inbound tourists to Malta region as a single centre destination by main markets and year

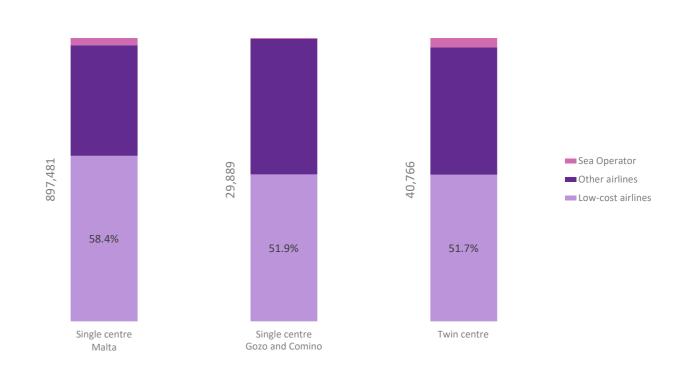

CHART 6.2.2.9 – Inbound tourists to Malta region as a single centre destination by type of accommodation and year

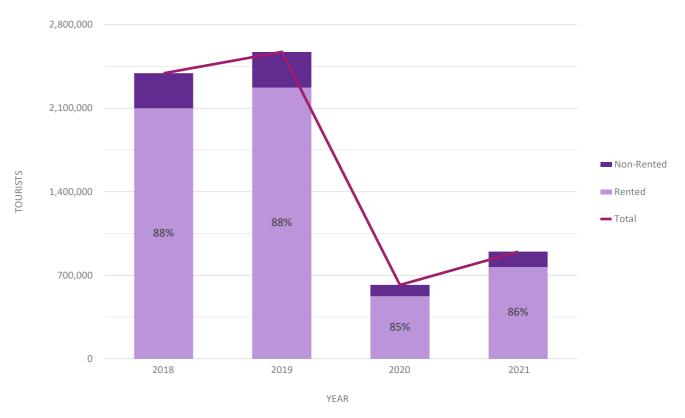

CHART 6.2.2.10a - Average length of stay of inbound tourists to MALTA by region (NUTS 3): 2021

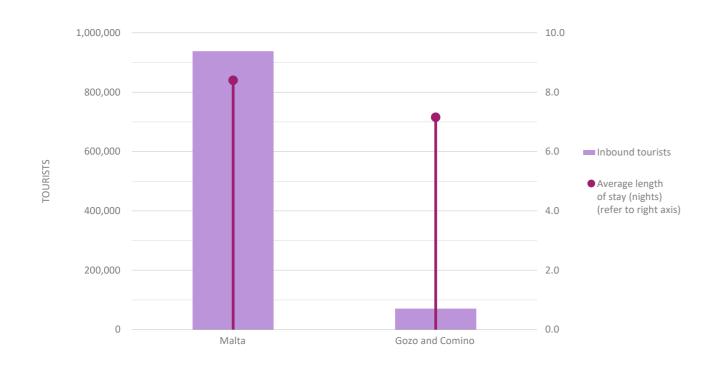

CHART 6.2.2.10b – Average length of stay of inbound tourists to MALTA by itinerary: 2021

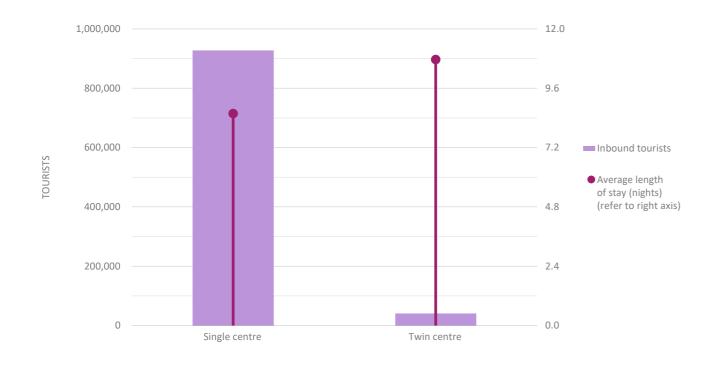

CHART 6.2.2.10c - Average length of stay of inbound tourists to Malta region by itinerary: 2021

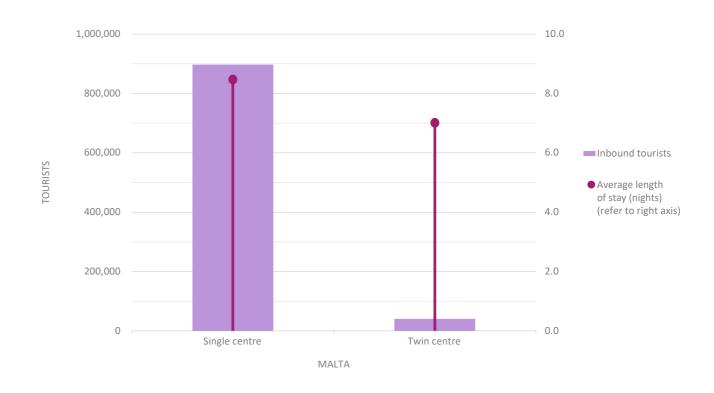

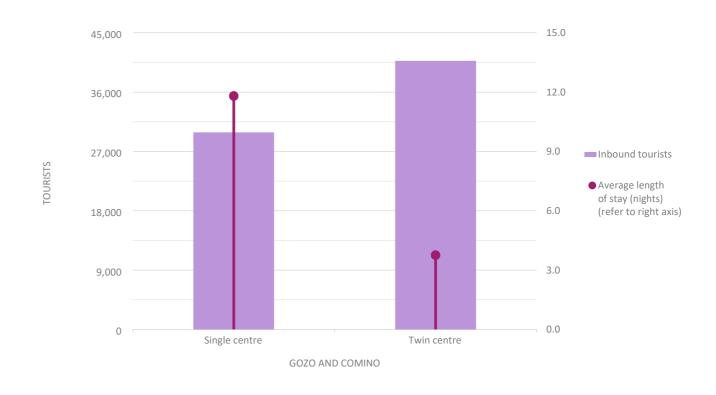

CHART 6.2.2.10d - Average length of stay of inbound tourists to Gozo and Comino region by itinerary: 2021

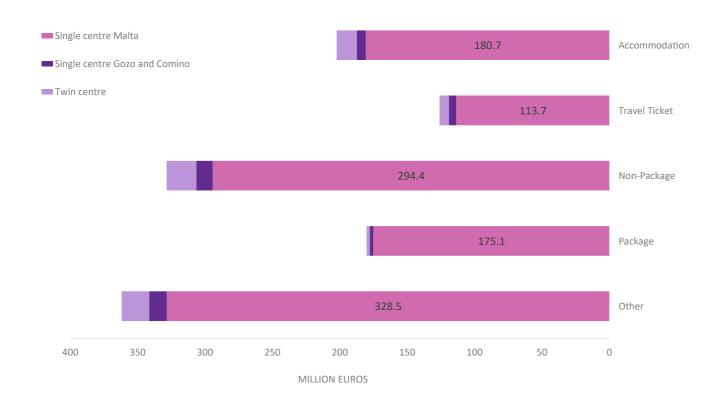

More than half of the single centre inbound tourists, 58.4 per cent, travelled by low-cost airlines and 39.1 per cent by other airlines. In 2021, travelling by other airlines registered the largest increase of 49.9 per cent, followed by travelling by low-cost airlines which registered an increase of 42.6 per cent when compared to 2020. (Table 6.2.2.3 and Charts 6.2.2.7, 6.2.2.8)

Single centre inbound tourists to Malta region who stayed in rented accommodation reached almost 0.8 million, or 85.5 per cent, while the remaining 14.5 per cent opted to stay in non-rented accommodation. The majority of those staying in the rented accommodation, 77.5 per cent, preferred to stay in collective accommodation. (Table 6.2.2.3 and Chart 6.2.2.9)

In 2021, the average length of stay stood at 8.5 nights, up by 0.8 of a night. The largest percentage increase (73.4 per cent) was registered in the category of single centre inbound tourists to Malta region who spent 7 nights or more. (Table 6.2.2.3)

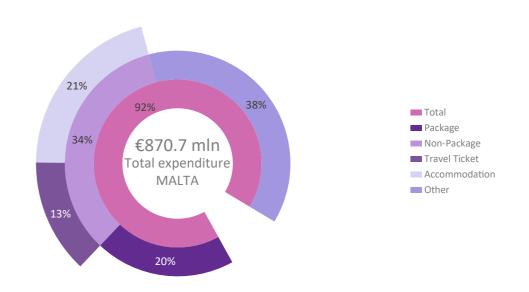

Nights spent by inbound tourists to Malta region as a single centre destination went up by 60.4 per cent when compared to 2020, amounting to 7.6 million nights. (Table 6.2.2.8 and Chart 6.2.2.2)

CHART 6.2.2.11a - Expenditure of inbound tourists by category and itinerary: 2021

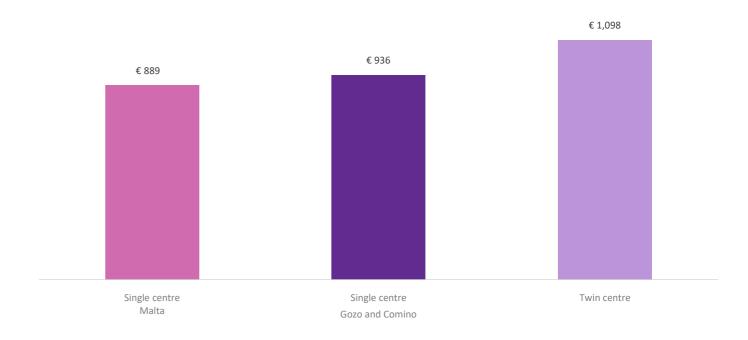

Total expenditure by inbound tourists to Malta as single centre destination, reached €798.0 million. The largest proportions of total package and non-package expenditure were spent by single centre tourists to Malta region. The non-package expenditure by single centre inbound tourists to Malta region was higher compared to the package component. (Table 6.2.2.9 and Charts 6.2.2.11a, 6.2.2.11b)

CHART 6.2.2.11b - Expenditure by inbound tourists to Malta region as a single centre destination: 2021

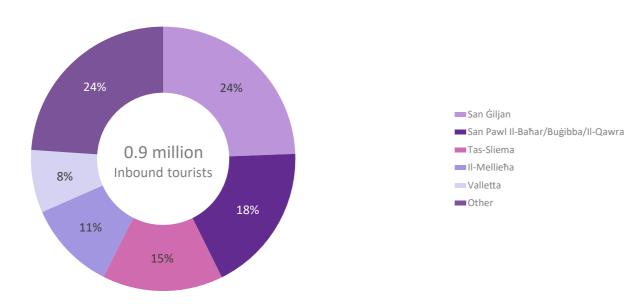

In 2021, total expenditure per capita of inbound tourists that visited Malta region as a single centre destination rose from €680 in 2020 to €889. The largest increase was in the "package" expenditure per capita category which went up from €528 to €810. (Table 6.2.2.10 and Charts 6.2.2.7, 6.2.2.12)

CHART 6.2.2.12 - Per capita expenditure of inbound tourists by itinerary: 2021

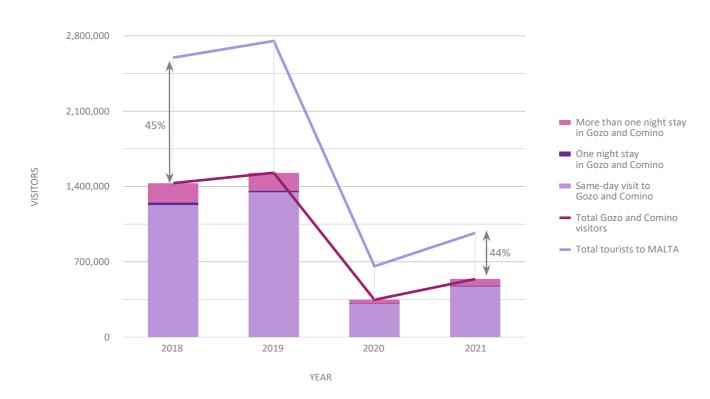

During 2021, the top five places where single centre inbound tourists to Malta region stayed longest included San Ġiljan, San Pawl Il-Baħar/Buġibba/Il-Qawra, Tas-Sliema, Il-Mellieħa and Valletta (Chart 6.2.2.13).

CHART 6.2.2.13 – Top 5 localities where inbound tourists who visited Malta region as a single centre destination stayed longest: 2021

TOTAL VISITORS TO GOZO AND COMINO REGION

CHART 6.2.2.14 - Total inbound visitors to Gozo and Comino region by year

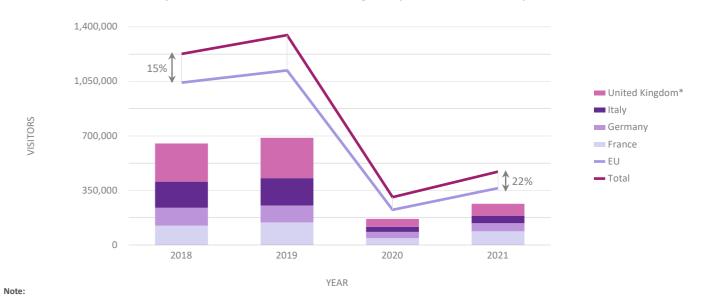

Visitors to Gozo and Comino region comprise same-day visitors as well as inbound tourists that visit the region as a single or twin centre destination. In 2021, total visitors to Gozo and Comino reached 541,173, up by 55.9 per cent from 2020. Approximately one-eighth of total visitors to Gozo and Comino (70,655) were inbound tourists, an increase of 77.9 per cent when compared to 2020. Tourism activity in Gozo and Comino remained highly skewed towards same-day visitors. (Tables 6.2.2.4, 6.2.2.5 and Chart 6.2.2.14)

SAME-DAY VISITORS TO GOZO AND COMINO REGION

Same-day visitors to Gozo and Comino accounted for 86.9 per cent of the total inbound visitors to Gozo and Comino, totalling to 470,518 visitors (Table 6.2.2.5 and Chart 6.2.2.14).

CHART 6.2.2.15 - Same-day visitors to Gozo and Comino region by main markets and year

1. * Refer to methodological note 15.

CHART 6.2.2.16 - Same-day visitors to Gozo and Comino region by age group and year

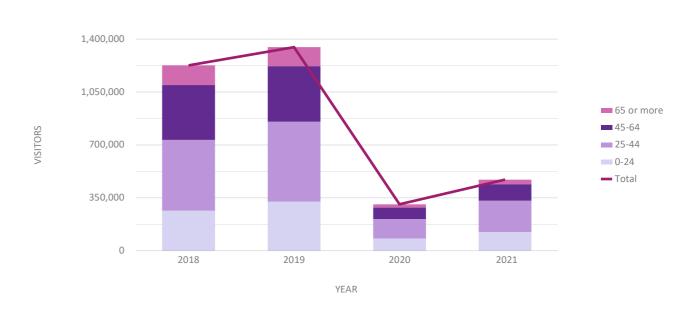

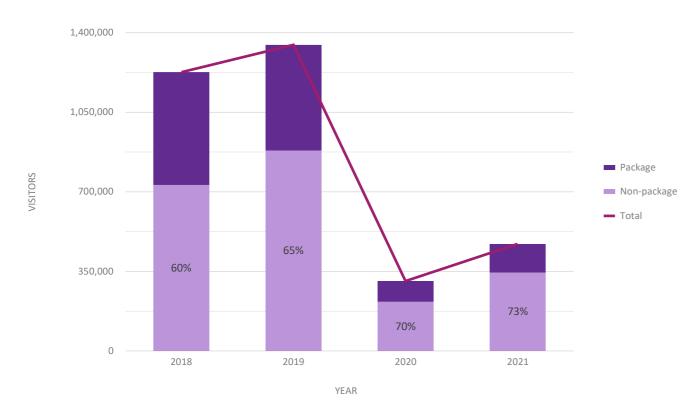

CHART 6.2.2.17 - Same-day visitors to Gozo and Comino region by organisation of stay and year

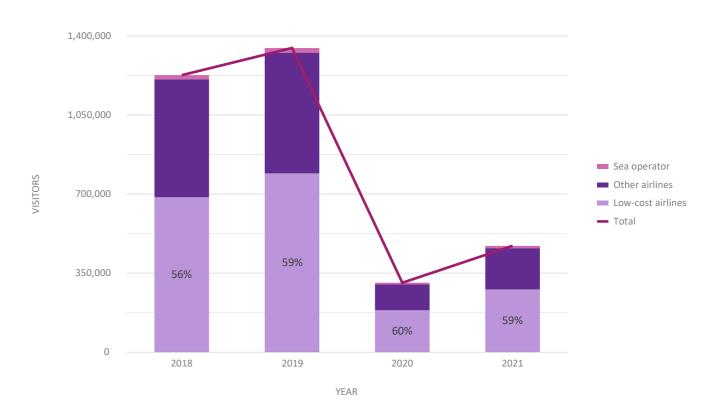

The majority came from EU Member States (77.6 per cent), with one of the major markets being France and visited MALTA on a non-package trip (73.3 per cent). The UK was the strongest market in Non-EU countries, accounting for 74.8 per cent of total same-day visitors from Non-EU countries in 2021. Most same-day visitors were aged between 25 and 44 (44.1 per cent). Same-day visitors to Gozo and Comino on package organised trips increased by 37.6 per cent, whereas same-day visitors on a non-package stay went up by 59.6 per cent when compared to 2020. (Table 6.2.2.5 and Charts 6.2.2.15 - 6.2.2.17) In 2021, 83.2 per cent of the same-day visitors to Gozo and Comino visited MALTA for the first time. The remaining 16.8 per cent were repeat tourists, 18.6 per cent of which visited MALTA twice a year or more. (Table 6.2.2.5)

Since 2018, same-day visits to Gozo and Comino region by tourists travelling by low-cost airlines accounted for the highest share. In 2021, these stood at 277,700, or 59.0 per cent of the total same-day visitors to Gozo and Comino. (Table 6.2.2.5 and Chart 6.2.2.18)

Did you know?

From 2020 to 2021, the portion of first-time tourists visiting Gozo and Comino as same-day visitors increased by 55.3%, whereas the share of repeat tourists went up by 42.9%.

CHART 6.2.2.18 - Same-day visitors to Gozo and Comino region by mode and type of travel to MALTA and year

Inbound tourists to Gozo and Comino region as a single centre destination

In 2021, the Gozo and Comino region recorded an increase in terms of total inbound tourist arrivals of 77.9 per cent over the previous year, totalling 70,655. (Tables 6.2.2.1, 6.2.2.4, 6.2.2.6 and Charts 6.2.2.1, 6.2.2.3a).

Inbound tourists who visited Gozo and Comino region as a single centre destination amounted to 29,889, an increase of 44.7 per cent over 2020. This accounted for 42.3 per cent of the total inbound tourists to Gozo and Comino region. (Table 6.2.2.1, 6.2.2.6 and Chart 6.2.2.3a). While the majority came from EU Member States (61.5 per cent), the strongest market in 2021 was the UK. Most were aged between 45 and 64 (38.3 per cent). Trips for holiday purposes accounted for 75.4 per cent of the total and another 18.0 per cent were undertaken to visit relatives and friends. (Table 6.2.2.6).

CHART 6.2.2.19 - Inbound tourists to Gozo and Comino region as a single centre destination by main markets and year

1. * Refer to methodological note 15.

CHART 6.2.2.20 - Inbound tourists to Gozo and Comino region as a single centre destination by age group and year

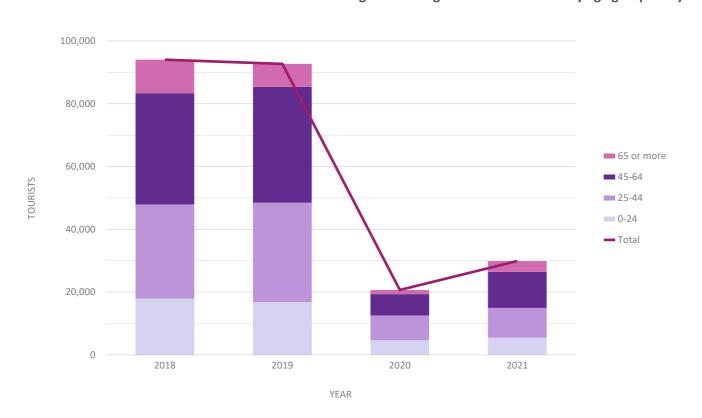

CHART 6.2.2.21 - Inbound tourists to Gozo and Comino region as a single centre destination by organisation of stay and year

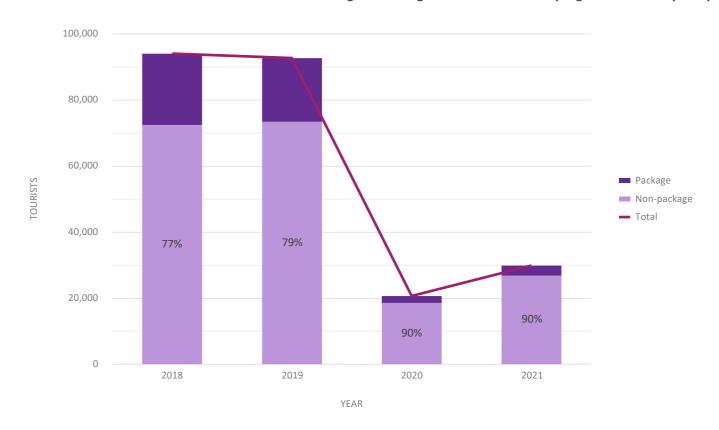

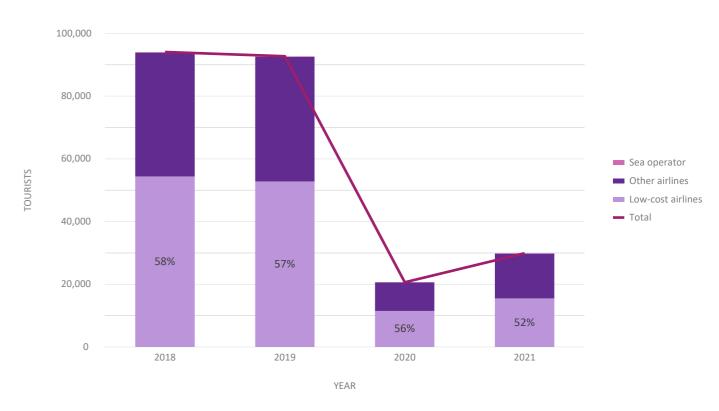

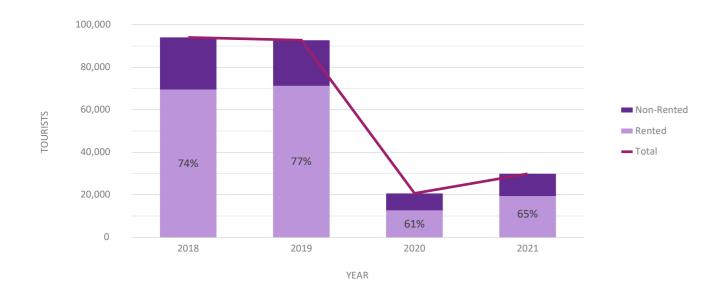

CHART 6.2.2.22 – Inbound tourists to Gozo and Comino region as a single centre destination by mode and type of travel to MALTA and year

Non-package trips accounted for 89.7 per cent or 26,803 inbound tourists to Gozo and Comino region, an increase of 44.4 per cent over the previous year. The single centre package trips to Gozo and Comino region decreased by 46.8 per cent over 2020. (Table 6.2.2.6 and Chart 6.2.2.21) More than half of the single centre inbound tourists to Gozo and Comino region, 53.5 per cent were repeat tourists. Slightly over half (51.9 per cent) of the single centre inbound tourists to Gozo and Comino region travelled by low-cost airlines, 47.8 per cent by other type of airlines and the remaining by sea. Single centre trips by other airlines posted an increase of 57.2 per cent in 2021. (Table 6.2.2.6 and Charts 6.2.2.8, 6.2.2.22)

The majority of single centre tourists to Gozo and Comino region, 64.7 per cent, stayed in rented accommodation, with 63.9 per cent of them opting to stay in non-collective accommodation. (Table 6.2.2.6 and Chart 6.2.2.23)

CHART 6.2.2.23 – Inbound tourists to Gozo and Comino region as a single centre destination by type of accommodation and year

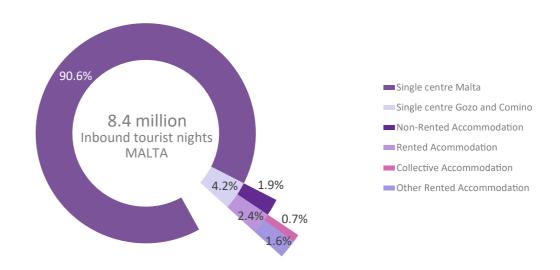

Most of the inbound single centre trips to Gozo and Comino region were within the bracket of 7 nights or more. In 2021, the average length of stay of single centre inbound tourists to Gozo and Comino region decreased to 11.8 nights from 12.9 nights in 2020. (Table 6.2.2.6 and Chart 6.2.2.10d)

Did you know? -

Between 2018 and 2021, the per capita expenditure of inbound tourists in Gozo and Comino as a single centre destination was highest during 2021, reaching €936, while the lowest per capita expenditure was registered during 2019 (€826).

CHART 6.2.2.24 – Nights by inbound tourists to Gozo and Comino region as a single centre destination by type of accommodation: 2021

Nights spent by inbound tourists to Gozo and Comino region on single centre trips went up by 32.1 per cent when compared to 2020, amounting to 352,843 nights. (Tables 6.2.2.1 and 6.2.2.8) The largest share of single centre nights in Gozo and Comino region, 55.9 per cent, were spent in rented accommodation with 69.5 per cent spent in non-collective accommodation. (Table 6.2.2.8 and Charts 6.2.2.2, 6.2.2.24).

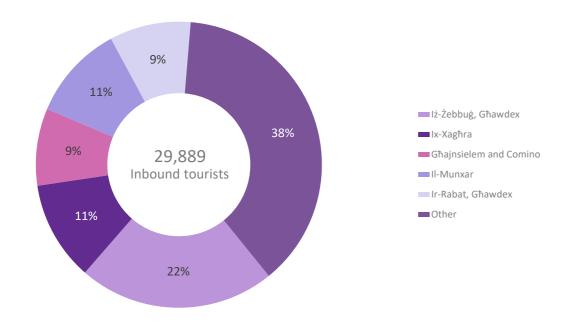

Expenditure by inbound tourists to Gozo and Comino region as single centre destination was estimated at €28.0 million in 2021, an increase of 61.0 per cent when compared to the previous year. Non-package expenditure by single centre inbound tourists to Gozo and Comino region was 342.7 per cent higher than the package component. (Table 6.2.2.9 and Charts 6.2.2.11a, 6.2.2.25)

CHART 6.2.2.25 – Percentage share of total expenditure by inbound tourists to Gozo and Comino region as a single centre destination: 2021

In 2021, total expenditure per capita of inbound tourists that visited Gozo and Comino region as a single centre destination increased from €841 in 2020 to €936. A decrease was recorded in the 'package' expenditure category. (Table 6.2.2.10 and Chart 6.2.2.12)

CHART 6.2.2.26 – Top 5 localities where inbound tourists who visited Gozo and Comino region as a single centre destination stayed longest: 2021

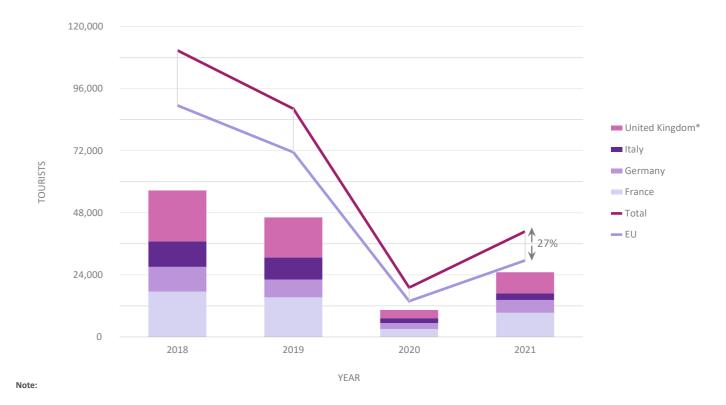

lż-Żebbuġ (Għawdex), Ix-Xagħra, Il-Munxar, Ir-Rabat (Għawdex) and Għajnsielem and Comino featured as the top five places where single centre inbound tourists to Gozo and Comino region stayed longest (Chart 6.2.2.26). It is worth pointing out that here the situation is incomplete contrary to the situation in Malta region, since most inbound tourists visit Gozo and Comino as twin centre destination, and in most cases, exclude locality stayed in Gozo and Comino.

INBOUND TOURISTS TO MALTA AND GOZO AND COMINO REGIONS AS TWIN CENTRE DESTINATION

In 2021, inbound tourists who visited Malta and Gozo and Comino regions as twin centre destination totalled 40,766, an increase of 113.8 per cent when compared to 2020. (Tables 6.2.2.1, 6.2.2.4, 6.2.2.7 and Charts 6.2.2.1, 6.2.2.3a). The majority of inbound tourists on twin centre trips were first-time tourists (76.7 per cent) and came from EU Member States (72.5 per cent) with the strongest market being France. The largest share of twin centre inbound tourists was in the 25 - 44 age bracket (50.4 per cent). Almost ten out of every eleven twin centre trips were carried out for holiday purposes. Non-package twin centre trips accounted for 94.3 per cent, an increase of 112.6 per cent over 2020. Over half of the twin centre inbound tourists travelled by low-cost airlines (51.7 per cent), 44.9 per cent by other airlines and the remaining by sea. All modes of travel recorded increases when compared to 2020, with the largest growth being registered in the other airlines category (143.2 per cent). (Table 6.2.2.7 and Charts 6.2.2.8, 6.2.2.27 - 6.2.2.30).

CHART 6.2.2.27 - Inbound tourists to Malta and Gozo and Comino regions as twin centre destination by main markets and year

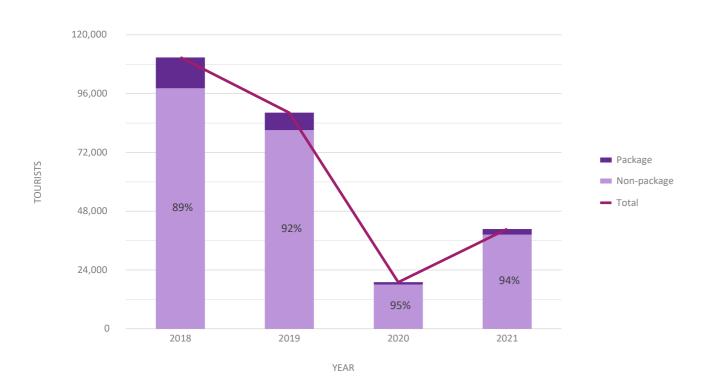

CHART 6.2.2.30 – Inbound tourists to Malta and Gozo and Comino regions as twin centre destination by mode and type of travel to MALTA and year

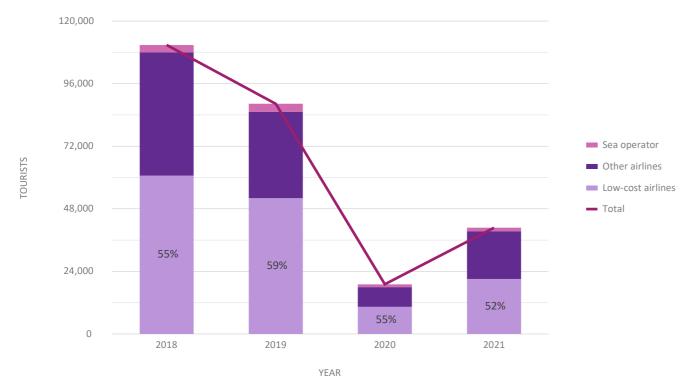

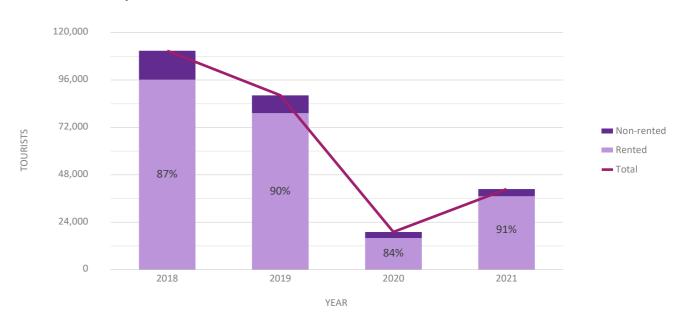

CHART 6.2.2.31 – Inbound tourists to Malta and Gozo and Comino regions as twin centre destination by type of accommodation and year

Most of the twin centre tourists stayed in rented accommodation, while the remaining 8.8 per cent stayed in non-rented accommodation. More than half (57.0 per cent) of those opting for rented accommodation chose collective accommodation. (Table 6.2.2.7 and Chart 6.2.2.31)

Total nights spent by twin centre tourists went up by 95.6 per cent when compared to 2020, amounting to 438,744 nights (Tables 6.2.2.1, 6.2.2.8 and Charts 6.2.2.2, 6.2.2.3b). The majority of inbound twin centre tourist nights, 84.3 per cent, were spent in rented accommodation, 54.0 per cent of which sought collective accommodation. (Table 6.2.2.8 and Chart 6.2.2.2)

Expenditure by twin centre tourists amounted to €44.7 million in 2021. Non-package expenditure by twin centre inbound tourists was almost nine times higher when compared to package expenditure. The package expenditure component increased drastically by 142.6 per cent when compared to 2020. (Table 6.2.2.9 and Chart 6.2.2.11a)

In 2021, total expenditure per capita of inbound tourists who visited Malta and Gozo and Comino regions as twin centre destination increased from \leqslant 894 in 2020 to \leqslant 1,098. The largest growth was recorded in the accommodation expenditure per capita which increased from \leqslant 304 to \leqslant 418. (Table 6.2.2.10 and Chart 6.2.2.12)

Did you know?

In 2021, total nights spent by inbound tourists visiting Malta and Gozo and Comino as a twin-centre destination almost doubled from 2020 to 438,744 nights. The total expenditure spent by the same tourist profile increased by 2.6 times when compared to 2020, reaching €44.7 million during 2021.

METHODOLOGICAL NOTES

National Tourism Survey and Inbound Tourism Survey (Tourstat)

- 1. In 2014, the National Statistics Office introduced a new tool to measure National Tourism to satisfy the concepts and definitions as outlined by Eurostat. The collection consists of tourism demand data on domestic and outbound trips as required by Regulation (EC) No. 692/2011 of the European Parliament and of the Council concerning statistics on tourism statistics. The Regulation aims at giving a complete and comprehensive picture of tourism in Europe and allows the comparability of results with other EU member states. Data is collected via a quarterly Computer-Assisted Telephone Interviewing (CATI) survey.
- 2. Domestic tourism excludes individuals aged 0 to 14 years and overnight stays within the same region of origin, such as, weekend breaks in Malta region by Malta residents.
- 3. Inbound tourism trips are collected from an ongoing frontier national survey known as Tourstat. Tourist air departures are collected through a continuous survey carried out at the departure lounge of the Malta International Airport. A two-stage sampling design is used to collect air passengers. In the first stage, alternate days and nights are selected. In the second stage, within each shift, a sample of passengers is selected systematically. Every crossing passenger is counted and respondents are selected using a pre-defined interval of 1:20 for air. Tourist sea departures data is supplemented by administrative data provided by ferry operators. Tourstat measures the number of tourist trips carried out during a reference period. 'Tourist trips' differs from the 'number of tourists' such that the same person can undertake more than one trip during a reference period. The response rate varies from 75% and 80%.
- 4. Tourstat measures the number of tourist trips carried out during a reference month.
- 5. Tourist sea departures are collected through a regular survey carried out at the Valletta Cruise Port during three separate months every year. A quota sample is used. Survey data is supplemented by administrative data provided by ferry operators.

6. Definitions:

- **Usual Environment:** The geographical area, though not necessarily a contiguous one, within which an individual conducts his regular life routines and shall be determined on the basis of the following criteria: the crossing of administrative borders or the distance from the place of usual residence, the duration of visit, the frequency of visit, the purpose of visit.
- Residents: A person is considered to be a resident of Malta/Gozo and Comino if:
 - (a) S/he has lived for most of the past 12 months in Malta/Gozo and Comino;
 - (b) S/he has lived in Malta/Gozo and Comino for less than 12 months but intends to return within a year to settle here.
- Traveller: A person who moves between different geographic locations, for any purpose and any duration.
- Visitor: The three fundamental criteria used to distinguish visitors from travellers are:
 - (a) The trip should be to a place other than that of the usual environment, which would exclude short-distance local transport and commuting, i.e. more or less regular trips between the place of work/study and the place of residence;
 - (b) The stay in the place visited should not last more than twelve consecutive months, beyond which the visitor would become a resident of that place (from the statistical standpoint);
 - (c) The main purpose of the visit should be other than the exercise of an activity remunerated from within the place visited, which would exclude migratory movements for work purposes.
- Tourist: A visitor who stays at least one night in a rented and non-rented accommodation in the country/place visited.
- **Domestic tourism:** Comprises the activities of a resident visitor within the country, i.e. Maltese residents visiting Gozo and vice versa and staying for not more than 12 consecutive months for personal, business or other purposes.
- Inbound tourism: Comprises the activities of non-resident visitors travelling to Malta (i.e. outside their usual environment), and staying for not more than 12 consecutive months for personal, business or other purpose. The number of inbound tourists cannot be equated to monthly passenger data released by the MIA because the latter includes departing Maltese and transit passengers.
- Outbound tourism: Comprises the activities of residents of Malta travelling to, and staying in places outside Malta and therefore outside
 their usual environment.
- · Same-day visitor: A visitor who does not spend the night in collective/private accommodation in the country/place visited.

- Single centre destination: Refers to inbound tourism trips with overnight stays in one region only.
- Twin centre destination: Refers to inbound tourism trips with combined overnight stays in two regions, i.e., Malta and Gozo and Comino regions.
- Total nights spent: Nights which a guest actually spends or is registered to spend in a rented accommodation establishment or in a non-rented accommodation.
- Average length of stay: The number of nights spent divided by the number of trips during a specified reference period.
- Rented accommodation: Consists of the following two sub-categories:
 - (a) **Collective accommodation:** comprises hotels, guesthouses, hostels, tourist villages, holiday complex, Bed & Breakfast and campsites.
 - (b) Other rented accommodation: comprises holiday furnished premises (farmhouses, flats and villas), host families, marinas, paid-convents, rented yachts and student dormitories.
- Non-rented accommodation: Comprises own private residence (owned dwellings, owned caravans and yachts), staying with friends relatives (even if charged includes also friends' private apartments) and other private accommodation (oil rig, free-convents or timeshare. etc.).
- Total expenditure: Refers to the amount that is going to be paid for the acquisition of consumption goods and services, as well as valuables during tourism trips. It includes expenditures by visitors themselves, as well as expenses that are paid for or reimbursed by others. The total expenditure is broken down by the following expenditure items:
 - (a) **Package expenditure:** refers to the whole amount of money spent on transport, accommodation and other services such as rental of a car, activities or outings during the trip.
 - (b) Non-package expenditure: is the amount of money spent on transport and accommodation reported separately.
 - (c) Other expenditure: is the amount spent on shopping, souvenirs, tickets for concerts or sports events, entrance to museums or zoos and day excursions during a tourism trip. It also includes durables and valuable goods, that is, the amount spent on cars, computers, paintings, jewellery and works of art.
- 7. Arrivals and nights spent in time-share accommodation are being categorised in 'Non-rented Accommodation' instead of 'Collective Accommodation' as per Eurostat recommendation. In this regard, there may be minor differences in these statistics and statistics published in tourism supply due to the fact that hotels report time-share accommodation under 'Collective Accommodation'.
- 8. Prior to comparing and interpreting differences between demand-side (based on Tourstat) and supply-side (based on Accomstat) tourism statistics, users are strongly advised to consult concept 15.4 of the NSO's metadata file (https://metadata.nso.gov.mt/reports.aspx?id=35).
- 9. Absolute changes between one survey estimate and another must be treated with caution since minor changes (i.e. less than 1,500 trips) might be the result of sampling error. Percentage changes for tourists based on counts of less than 1,500 are not presented due to sampling errors.
- 10. The expenditure data in this publication should not be equated to national tourism earnings.
- 11. In view of the COVID-19 situation, the Tourstat survey was suspended between 12 March and 30 June 2020. Statistical methods were applied to cover the period from 13 March to 20 March 2020, when scheduled passenger flights were still in operation.
- 12. In view of the COVID-19 situation, prohibition of non-essential travel between Malta and Gozo came into effect on 03 April 2020 and was lifted on 04 May 2020 (L.N. 118 of 2020: Public Health Act (Cap. 465); Mandatory Non-essential Travel between Malta and Gozo Order, 2020 (https://legislation.mt/eli/ln/2020/118/eng).
- 13. Malta International Airport reopened on 1 July 2020. The first group of destinations that reopened for travel comprised: Germany, Austria, Italy, France, Spain, Poland, Cyprus, Switzerland, Iceland, Slovakia, Norway, Denmark, Hungary, Finland, Ireland, Lithuania, Latvia, Estonia, Luxembourg, Czech Republic, Greece and Croatia. Restrictions on all other flight destinations were lifted on 15 July 2020.

14. During the COVID-19 situation, the following tourism-related sequence of events took place in 2020:

28th February	People flying in from Italy, China (including Hong Kong, Singapore, Japan, Iran, South Korea) from 26th February onwards needed to stay in quarantine for 14 days upon arrival.
8th March	Flights from/to Milan were suspended.
10th March	Flights from/to Italy were suspended.
10th March	The last Cruise call.
11th March	Flights from/to France, Switzerland, Germany, Spain, were suspended.
11th March	People flying in from France, Switzerland, Germany, Spain, needed to stay in quarantine for 14 days upon arrival.
13th March	All people flying in from all destinations needed to stay in quarantine for 14 days upon arrival.
18th March	The last Virtu' Ferries service for passengers between Malta and Sicily.
21st March	All flights from/to all destinations were suspended.
1st July	Re-opening of Malta International Airport. The first group of destinations that reopened for travel comprised: Germany, Austria, Italy, France, Spain, Poland, Cyprus, Switzerland, Iceland, Slovakia, Norway, Denmark, Hungary, Finland, Ireland, Lithuania, Latvia, Estonia, Luxembourg, Czech Republic, Greece and Croatia.
15th July	Restrictions on all other flight destinations were lifted.
21st August	First cruise liner call since March 2020.

15. Owing to the UK's exit from the European Union (with effect from 1st February 2020), UK data is statistically classified as Non-EU. Comparability between comparative periods should be treated with caution.

6.3 CRUISE PASSENGERS

In 2021, there were 106 cruise liner calls in MALTA with a total of 141,917 cruise passengers, an increase of 140.5 per cent over 2020. At 93.0 per cent, transit passengers accounted for the vast majority of total traffic reaching 131,955. The average passengers per vessel in Malta region stood at 1,339. **(Table 6.3.1)** A total of 3,229 passengers visited Gozo and Comino region, while 9,263 spent at least one night on board their berthed cruise liner. **(Tables 6.3.1 and 6.3.2)**

Visitors from the EU Member States comprised 87.1 per cent of total traffic, the major market being Italy. Nevertheless, biggest increases were recorded from the Italy and Spain markets which advanced by 45,955 and 10,414 passengers respectively. **(Table 6.3.1)**

During 2021, the largest share of passengers was in the 40 to 59 age bracket (31.9 per cent), followed by those aged between 60 and 79 years (24.6 per cent). (Tables 6.3.1)

METHODOLOGICAL NOTES

Cruise Passengers

- 1. The majority of passengers embarking on cruise liners from Malta generally end their trip at the same destination. Therefore embarkations are not included in cruise traffic figures to avoid double counting.
- 2. Cruise liners calling at both Malta and Gozo and Comino regions during a single voyage are recorded as one liner call.
- 3. Owing to the UK's exit from the European Union (with effect from 1st February 2020), UK data is statistically classified as Non-EU from January 2020 for all the tables. Requests for further clarification may be directed to the Tourism and Education Statistics Unit.
- 4. Due to the UK's re-classification following exit from the European Union on 1st February 2020, comparability of totals between same periods should be treated with caution.
- 5. Definitions:
 - Embarkations: comprise all cruise passengers who are either Maltese or who are foreigners who arrive in Malta by other means of transport.
 - Transit passengers: comprise all cruise passengers who arrive in and leave Malta on the same cruise ship.
 - Landings: comprise all cruise passengers who arrive in Malta on a cruise ship and leave by another means of transport, or alternatively, stay in Malta.

AGRICULTURE AND FISHERIES

This chapter provides statistics on the agriculture and fisheries activity by region in MALTA for the years 2016 to 2021. The first part provides information on the cultivation of land regarding both arable land and permanent crops; followed by data on the sales by volume and value of produced fruit and vegetables. Following this, a series of livestock statistics describe the number and kind of livestock heads that were reared as well as the number of farms that were operating locally. Then, the last part covers the local fisheries sector and portrays data on the volume and value of fish catches and landings recorded in MALTA by kind of fish species.

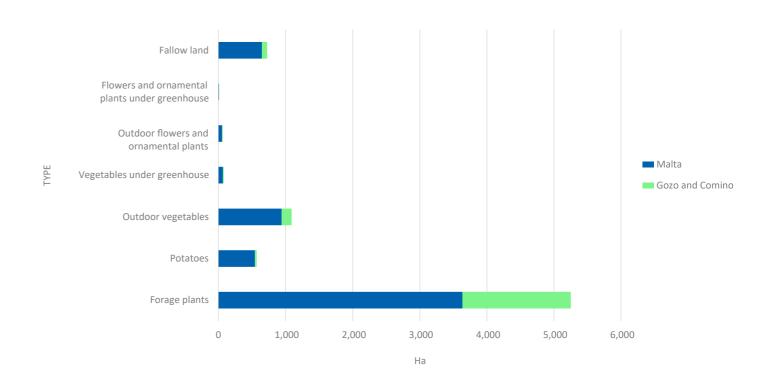

7.1 AGRICULTURE

CULTIVATION AND DISTRIBUTION OF LAND

In 2020, the region of Gozo and Comino had 35.7 per cent of land under cultivation which upon comparison is 2.1 percentage points higher than that of the Malta region. The cultivation of forage plants utilised 67.5 per cent of the total arable land in MALTA whereas outdoor vegetables and fallow land occupied 14.0 and 9.3 per cent of the total respectively. The cultivation of forage plants turned out to be the most common type of cultivated land in both regions, with Gozo and Comino region using up as much as 85.4 per cent, which exceeded the Malta region by 23.7 percentage points. Separately, out of 953 hectares of the land registered for permanent crops recorded in MALTA, 47.9 per cent was utilised for vineyards, 23.9 per cent for fruit and berry plantations and 16.2 per cent for olive plantations. Indeed, while this pattern was closely followed in the Malta region, in the Gozo and Comino region the most common permanent crops were found to be citrus plantations followed by vineyards and olive plantations. (Tables 7.1.1 – 7.1.3 and Chart 7.1.1)

CHART 7.1.1 – Distribution of arable land by type and region (NUTS 3): 2020

Did you know?

Over a four-year period (2016 – 2020), the land under cultivation decreased in both regions. In particular, in the Malta region, land under cultivation went down from 35.2% in 2016 to 33.6%, while in the Gozo and Comino region this decreased by 11.2 percentage points to 35.7% in 2020.

PRODUCTION OF FRUIT AND VEGETABLES

During 2021, the total volume of fruit and vegetables produced and sold in the local organised markets exceeded 32,500 tonnes, with vegetable produce accounting for 93.5 per cent of the total marketed products, and the rest being accounted for by fruit produce. The wholesale value of fruit and vegetables reached €21.5 million in 2021, of which €18.4 million (85.3 per cent) was generated through the sales of vegetables. Overall, both the volume and value of fruit and vegetables sold in MALTA declined when compared to 2016. On a regional level, during 2021, the Malta region produced 94.2 per cent (or €17.0 million) of the total volume of marketable vegetables, while the Gozo and Comino region produced 5.8 per cent (or €1.3 million) of the total value. With regards to the production and sale of fruits, the Malta region produced 85.6 per cent of the total volume recorded in 2021 (or €2.9 million) whereas the Gozo and Comino region produced the remaining 14.4 per cent (or €0.2 million) of the total. (Table 7.1.4)

Did you know?

Between 2016 and 2021, the total volume of fruit and vegetables sold through organised markets in MALTA decreased from 37,050 tonnes to 30,445 tonnes in Malta region whereas in Gozo and Comino region, total volume went down by 880 tonnes to 2,084 tonnes in 2021.

LIVESTOCK

In 2021, the number of livestock heads that were being reared in MALTA amounted to 40,048 pigs, 14,016 cattle, 12,730 sheep and 5,635 goats. On a regional level, the Malta region accounted for 94.4 per cent of the total number of reared pigs, 74.3 per cent of goats, 68.2 per cent of sheep and 64.1 per cent of cattle. The remaining shares were accounted for by the Gozo and Comino region. As regards the distribution of farms, it transpired that 52.8 per cent of the farms in MALTA were registered as rearing sheep. The Malta region accounted for 91.1 per cent of the pig farms, 82.4 per cent of the cattle farms, 72.4 per cent of the goat farms and 68.7 per cent of the sheep farms. While in the reporting year the total number of pig farms were the lowest on record, the number of reared pigs was the highest in terms of counts. Map 7.1.1 displays the number of livestock heads by locality. The Western district has the highest concentration of pigs while dairy cows, cattle, sheep and goat concentrations were predominantly registered in the Gozo and Comino district. (Tables 7.1.5, 7.1.6, Charts 7.1.2 – 7.1.4 and Map 7.1.1)

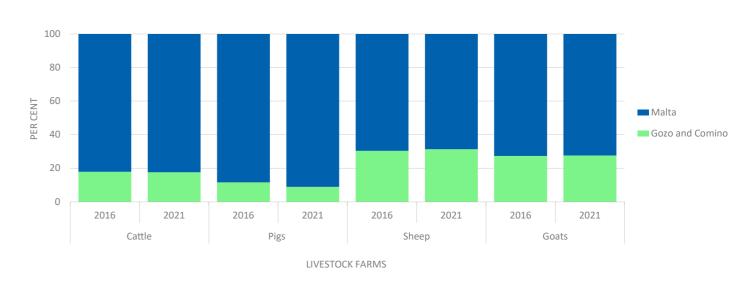

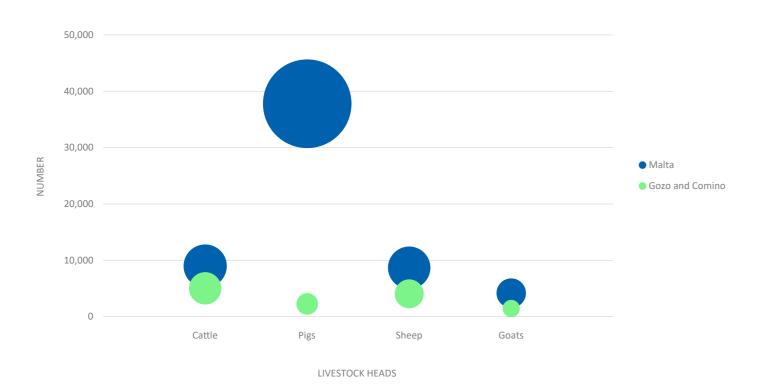

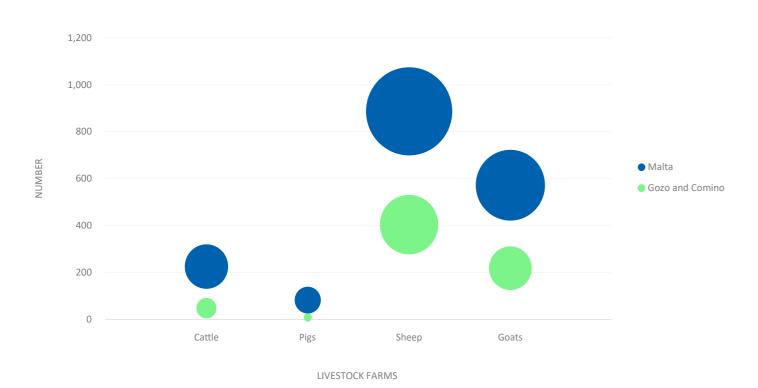

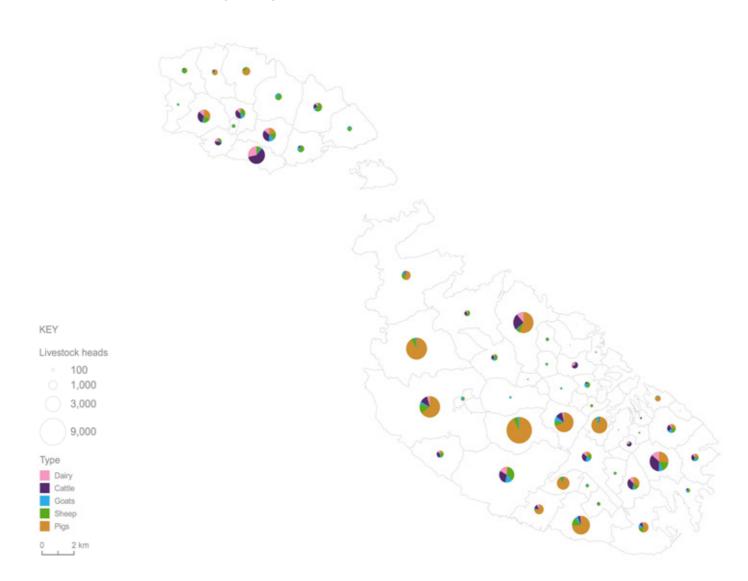

CHART 7.1.4 – Livestock heads and respective farms by region (NUTS 3): 2021

MAP 7.1.1 – Livestock heads by locality (LAU 2): 2021

Did you know?

Between 2016 and 2021, the largest increase in livestock heads in Gozo and Comino region was registered in the number of sheep, which grew by 526 heads, while the number of reared pigs registered the largest decrease of 1,107.

METHODOLOGICAL NOTES

AGRICULTURE

- 1. The Farm Structure Survey conducted in 2016 was carried out according to EU Regulation (EC) No. 1166/2008.
- 2. The Census of Agriculture 2020 was carried out in conformity with the Commission Implementing Regulation (EU) 2018/1874.
- 3. Information on agricultural output that is sold through organised markets is compiled by the NSO via administrative data received on a monthly basis.
- 4. Regional data on the sales of fruit and vegetables that is collected through the administrative sources is dependent on the residency of the respective farmer and independent of the final place of the farmer's consignment at any of the local organised markets.
- 5. Data is recorded by crop, quantity, value and average unit price.
- 6. Data collection on cattle, pigs, sheep and goats is in accordance with EU Regulation (EC) No.1165/2008.

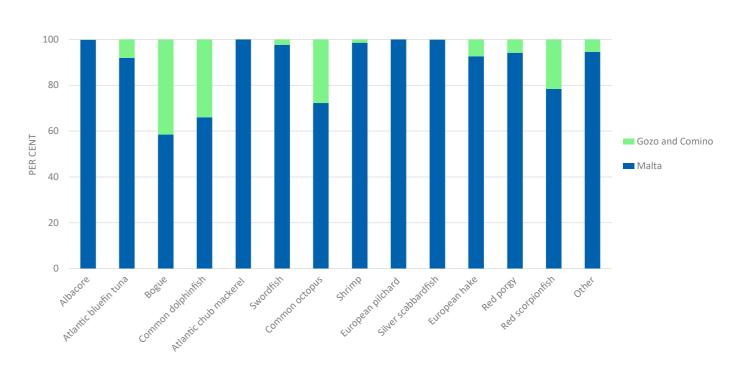

7.2 FISHERIES

FISH LANDINGS AND VESSELS

When analysing the volume of fish landings by species in MALTA during 2021, the 'Atlantic chub mackerel' claimed the largest share at 25.4 per cent of the total. The Malta region was, as expected, the main contributor in terms of total fish landings. Overall, however, the share of fish landings originating from the Gozo and Comino region amounted to 6.9 per cent of total. In MALTA, the landings of the Swordfish species generated the highest total earnings at €3.2 million or 28.6 per cent of the total fish value. By comparison, the Gozo and Comino region accounted for 9.6 per cent of the total value generated by the entire industry in MALTA. (Tables 7.2.1, 7.2.2 and Chart 7.2.1)

CHART 7.2.1 – Volume of fish landings by species and region (NUTS 3): 2021

SPECIES

Note:

1. Allis shad species was removed as no data was recorded.

Did you know?

Between 2017 and 2021, the volume of Atlantic blue fin tuna caught in Gozo and Comino registered the largest increase from 794 kgs in 2017 to 13,385 kgs in 2021. During the same period under review, in Malta region, the Atlantic chub mackerel doubled in volume, reaching 589,630 kgs in 2021.

METHODOLOGICAL NOTES

FISHERIES

1. Monthly data on fish landings is collected on a quarterly basis through an administrative source; which is in turn collected via the daily returns of sales as submitted by the fishermen at the fish market or directly by themselves.

RESOURCES

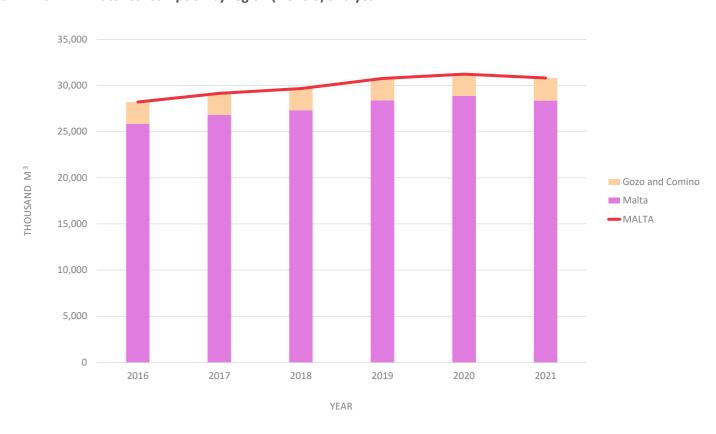

This chapter is split into three sections, covering regional statistics on water, waste and renewable energy harvesting. Statistics for water production and consumption is based on information supplied by the Water Services Corporation. Waste statistics comprise separate waste collection through bring-in sites, civic amenity sites and door-to-door collection, together with municipal waste generation. Statistics on renewable energy harvesting refers strictly to data on photovoltaics (PV) installations, peak power rating in kWp and energy harvesting in GWh.

Water production in MALTA mainly encompasses groundwater and reverse osmosis production, which increased from 32.0 million m³ in 2016 to 34.2 million m³ in 2021. In 2021, the region of Malta accounted for 91.7 per cent of the total water production which mainly reflects the size of the region and the production facilities available. On a regional level, water consumption in Malta registered a drop of 1.8 per cent in 2021 over 2020, while in Gozo and Comino region, an increase of 3.2 per cent was recorded. Malta region consumed 92.0 per cent of the total water, with the rest being consumed in the Gozo and Comino region. The percentage of network losses in MALTA decreased from 11.8 (in 2016) to 9.9 per cent (in 2021). In 2021, the percentage of network losses in the region of Malta was lower than that of Gozo and Comino, with a discrepancy of 4.3 percentage points. (Table 8.1.1 and Chart 8.1.1)

CHART 8.1.1 – Water consumption by region (NUTS 3) and year

Did you know?

Between 2020 and 2021, total water production in Malta region decreased by 1.6%, totalling 31.3 million m³ in 2021. On the other hand, Gozo and Comino region registered an increase of 2.6% over 2020, reaching 2.8 million m³ water production during 2021.

287

When analysing the monthly water consumption pattern longitudinally, a seasonal pattern was observed throughout the years under review. Seasonal peaks and troughs were even more pronounced in the Gozo and Comino region, characterised with sharper increases in demand during summer months. (Chart 8.1.2)

Notes:

- 1. Public water supply comprises the potable water production of the Water Services Corporation.
- Groundwater production includes the summation of pumping stations and boreholes.
- 3. Total production for Gozo and Comino is calculated as the summation of groundwater production, reverse osmosis production and transferred water from Malta less the polishing plant reject, transferred water to Malta and washout losses.
- 4. Total production for Malta is calculated as the summation of groundwater production, reverse osmosis production and transferred water from Gozo and Comino less the transferred water to Gozo and Comino and washout losses.
- 5. Input into the distribution network is not equal to the total production because of water stocks (storage in reservoirs).
- 6. Consumption is the input into the distribution network less network losses.
- Network losses comprise leakages from the underground water distribution through mains and pipes.
- 8. Washout losses are water losses that may occur during various stages of the production process, before the water is inputted into the distribution network.
- 9. Consumption is inclusive of water which is unaccounted for by the billing process of ARMS Ltd.
- 10. The Ħondoq ir-Rummien reverse osmosis plant in Gozo started operations in December 2021.

COLLECTION OF SEPARATED DRY RECYCLABLES

In 2020, the collection of separated dry recyclables through bring-in sites amounted to 3,814 tonnes in MALTA; this was slightly higher than in 2016 (3,486 tonnes). Out of this total, 86.6 per cent was collected in the region of Malta, with the remaining 13.4 per cent collected in Gozo and Comino region. On a regional level, when compared to 2016, the collection of separated dry recyclables through bring-in sites in 2020 was higher in Malta region by 329 tonnes, while Gozo and Comino region recorded a slight drop of one tonne. During 2020, the collection of glass through bring-in sites constituted the highest share of all the material collected in Malta region with 55.1 per cent. In the region of Gozo and Comino, the majority of waste collected through bring-in sites was mixed paper, plastic, cans, glass, which registered a contribution of 48.1 per cent. (Table 8.2.1 and Chart 8.2.1)

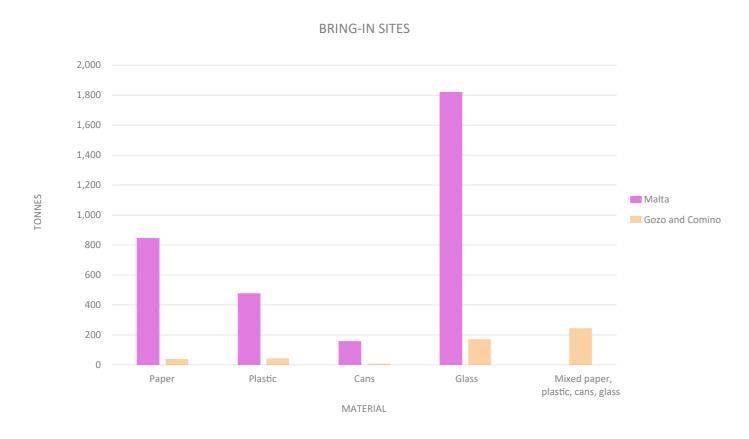

Collection of separated dry recyclables via door-to-door collection was significantly higher when compared to the collection of separated dry recyclables from bring-in sites, reaching 32,612 tonnes in MALTA in 2020. During 2020, the collection of paper, plastic and metal (grey/green bag) from door-to-door-collection accounted for the largest share (89.2 per cent) and registered an increase of 74.9 per cent over 2016. On a regional level, in 2020, paper, plastic and metal collected through the grey/green bag stood at 27,203 tonnes compared to 15,496 tonnes in 2016 in the region of Malta, while collection of glass via door-to-door collection stood at 3,275 tonnes in 2020. In the Gozo and Comino region, the grey/green bag collection in 2020 amounted to 1,871 tonnes, an increase of 66.5 per cent over 2016, while glass collected via door-to-door collection amounted to 263 tonnes in 2020. (Table 8.2.1 and Chart 8.2.1)

Did you know?

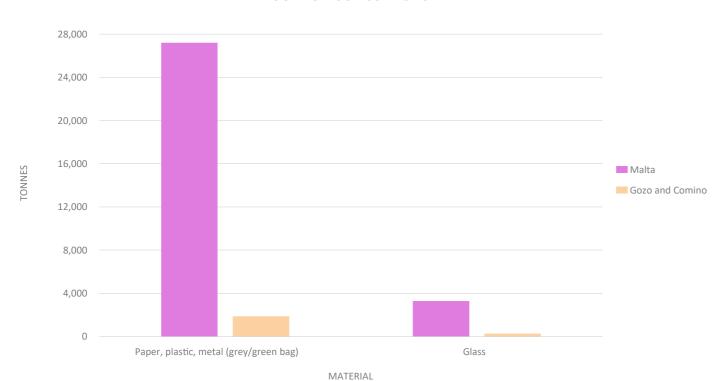

Over the five-year period under review, the collection of separated dry recyclables via door-to-door collection increased significantly in both regions. In fact, in Malta region the collection of this type of waste through door-todoor collection almost doubled from 15,881 tonnes in 2016 to 30,478 tonnes in 2020. Similarly, door-to-door waste collection in Gozo and Comino region went up from 1,232 tonnes in 2016 to 2,134 tonnes in 2020.

CHART 8.2.1 – Collection of separated dry recyclables by material and region (NUTS 3): 2020

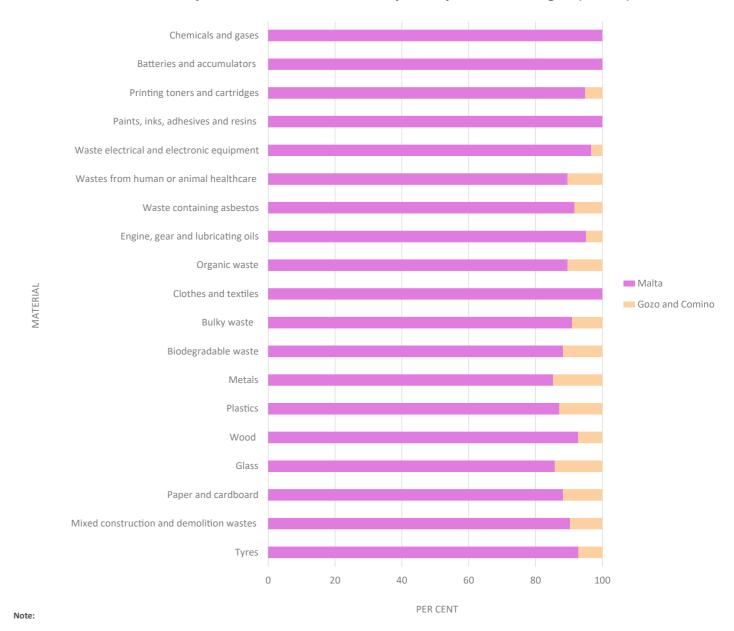

COLLECTION OF SEPARATED WASTE FROM CIVIC AMENITY SITES

During 2020, the collection of separated waste from civic amenity sites stood at 36,766 tonnes in MALTA, an increase of 22.5 per cent over 2016. Non-hazardous waste amounted to 94.1 per cent of waste collected from civic amenity sites. In the region of Malta, waste collected from civic amenity sites in 2020 increased by 6,408 tonnes over 2016 to 33,421 tonnes. Non-hazardous waste constituted 93.7 per cent of all waste collected from civic amenity sites in Malta region, the majority being mixed construction and demolition wastes. In 2020, the collection of waste from civic amenity sites in the Gozo and Comino region increased by 344 tonnes to 3,346 tonnes over 2016, with non-hazardous waste constituting 97.7 per cent of all waste collected, of which, mixed construction and demolition wastes comprised the biggest share. In both regions, the collection of hazardous waste was relatively low during the years 2016 – 2020. (Table 8.2.2 and Chart 8.2.2)

CHART 8.2.2 - Collection of separated waste from Civic Amenity Sites by material and region (NUTS 3): 2020

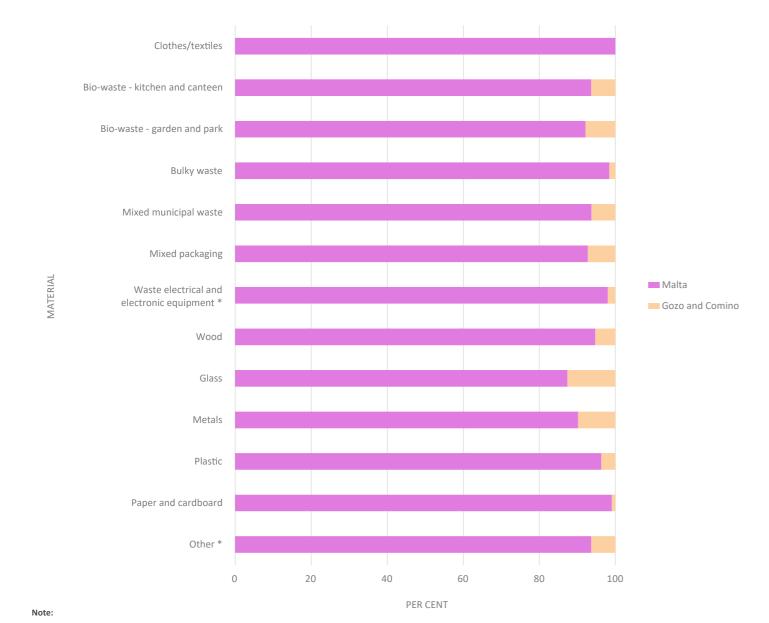

1. Compost category was removed as no data was recorded

MUNICIPAL WASTE GENERATION

Municipal waste generation in MALTA amounted to 331,553 tonnes during 2020, an increase of 39,285 tonnes over 2016. Mixed municipal waste constituted the highest share at 45.0 per cent of all municipal waste generated. In the region of Malta, the generation of municipal waste increased by 14.0 per cent over 2016 to 314,403 tonnes in 2020. During 2020, the majority of municipal waste generated in this region consisted of mixed municipal waste and bulky waste, representing 44.5 and 21.3 per cent of all municipal waste respectively. Similarly, municipal waste generated in the region of Gozo and Comino stood at 17,150 tonnes in 2020, representing an increase of 4.5 per cent over 2016. Mixed municipal waste and mixed packaging were the two municipal waste types that were mostly generated in the Gozo and Comino region, accounting for 54.9 and 12.4 per cent of all municipal waste in 2020 respectively. (Table 8.2.3 and Chart 8.2.3)

Notes:

- 1. Data for 2015 for the Gozo and Comino region refers to waste materials and amounts that were transferred to waste management facilities in Malta. From 2016 onwards data is sourced from the input into the Tal-Kus (Gozo) waste transfer station and the output of the Tal-Kus Civic Amenity Site.
- 2. 2019 was the first full calendar year during which the nationwide collection of organic waste from households took place (classified under Bio waste kitchen and canteen). Full coverage of localities in the Gozo and Comino region was implemented in 2017.
- 4. Data is in line with NSO news release 222/2021.
- 5. Totals may not add up due to rounding.
- 6. *Includes hazardous waste.

STOCK OF PVs: 2021

In 2021, the stock of PV installations amounted to 30,972, of which 85.1 per cent were installed in the region of Malta and the remaining 14.9 per cent were in the Gozo and Comino region. The Northern Harbour and Western districts accounted for 37.6 per cent of the total stock of PV installations, with 6,040 and 5,596 installations respectively. When compared to 2020, new installations increased by 5.9 per cent. The percentage increases were highest in the Northern Harbour district (6.6 per cent) and lowest in the Gozo and Comino district (4.9 per cent) (Table 8.3.1, Chart 8.3.1 and Map 8.3.1).

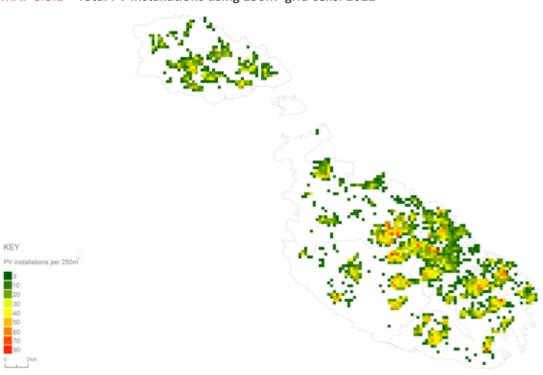

CHART 8.3.1 - Stock of PV installations by district (LAU 1) and year

Maps 8.3.1 to 8.3.3 illustrate the concentration of grid-connected PVs, featuring point data on 250m² grid cells. During 2021, the domestic sector accounted for 93.6 per cent of the total stock of PV installations, followed by the commercial and public sectors, accounting for 5.6 and 0.9 per cent respectively. Most increases in new PV installations resulted from the domestic sector. The Northern Harbour district had the highest stock of PV installations in the domestic sector. (Table 8.3.2, Chart 8.3.2, Maps 8.3.2 and 8.3.3)

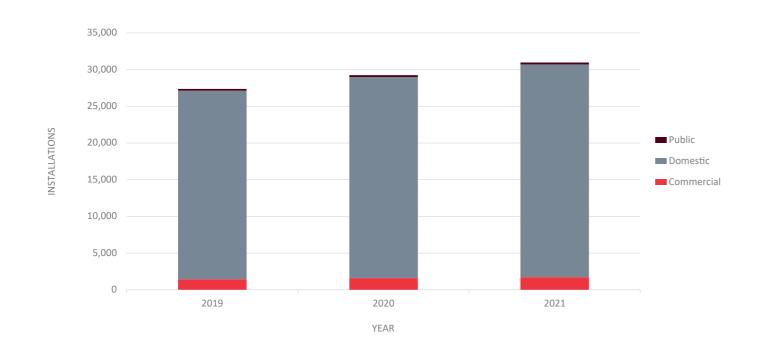

MAP 8.3.1 – Total PV installations using 250m² grid cells: 2021

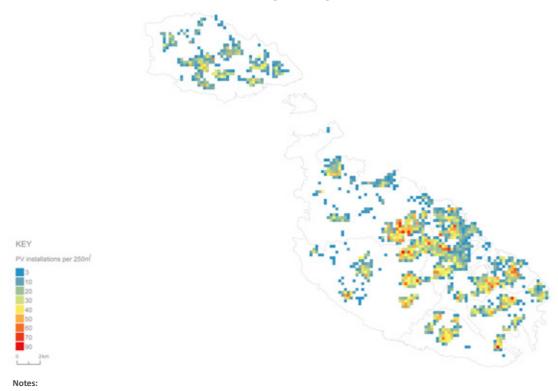

1. Each grid cell represents an area of 250m². 2. Each grid cell shows the total number of PVs installed in that particular area. Grid cells containing less than three PV installations are omitted.

CHART 8.3.2 – Stock of PV installations by sector and year

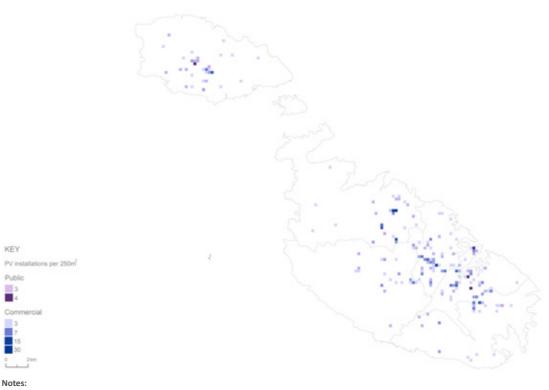

MAP 8.3.2 - Domestic PV installations using 250m² grid cells: 2021

- 1. Each grid cell represents an area of 250m².
- 2. Each grid cell shows the total number of PVs installed in that particular area. Grid cells containing less than three PV installations are omitted.

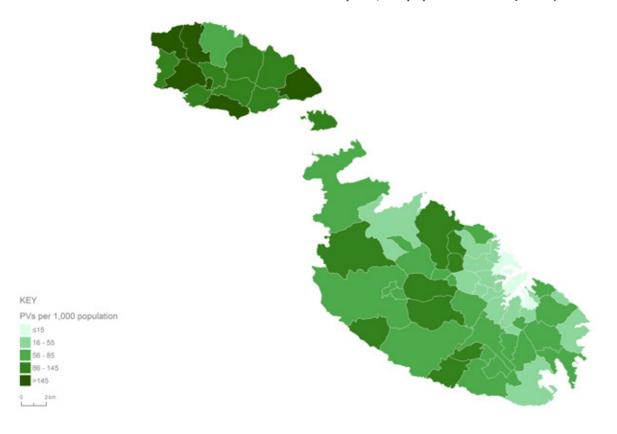

MAP 8.3.3 – Public and commercial PV installations using 250m² grid cells: 2021

- 1. Each grid cell represents an area of 250m².
- 2. Each grid cell shows the total number of PVs installed in that particular area. Grid cells containing less than three PV installations are omitted.

Map 8.3.4 illustrates the spread and intensity of domestic PV installations per 1,000 population by locality, indicating that the top 10 localities were in the region/district of Gozo and Comino. When analysing the results by district, Gozo and Comino district had an average of 124 domestic installations per 1,000 population, followed by the Western and South Eastern districts at 84 and 67 installations respectively. The lowest ratio was registered in the Northern Harbour district, with 33 installations per 1,000 population.

MAP 8.3.4 – Total PVs installed in the domestic sector per 1,000 population: 2021 (LAU 2)

PRODUCTION OF ENERGY FROM PVs: 2021

Total kWp amounted to 203,728.1, an increase of 9.1 per cent over 2020. The commercial sector amounted to 51.5 per cent of total kWp, followed by 46.1 and 2.4 per cent in the domestic and public sectors respectively. The peak power rating of an average PV system in the domestic sector stood at 3.2 kWp, whereas that for the commercial and public sectors amounted to 60.7 and 18.2 kWp respectively. (Table 8.3.3, Charts 8.3.3-4 and Map 8.3.5)

CHART 8.3.3 – Total kWp of grid-connected PVs by sector and year

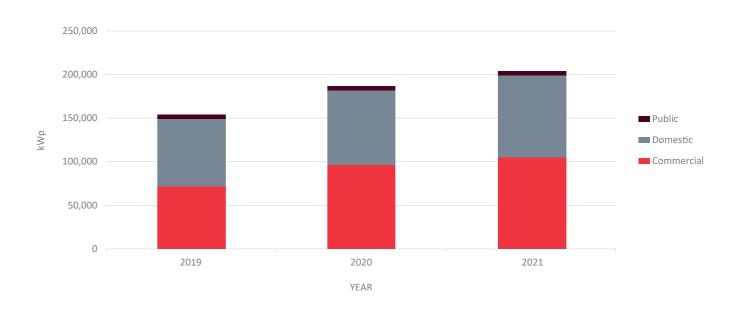

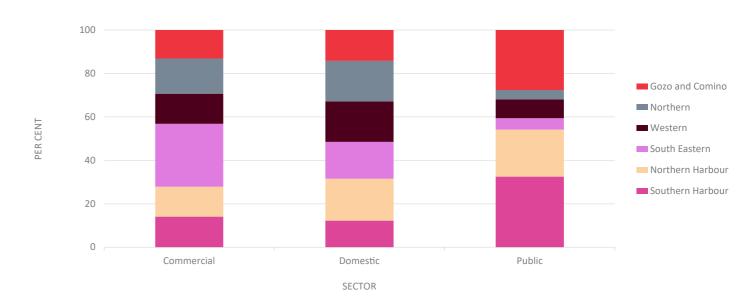

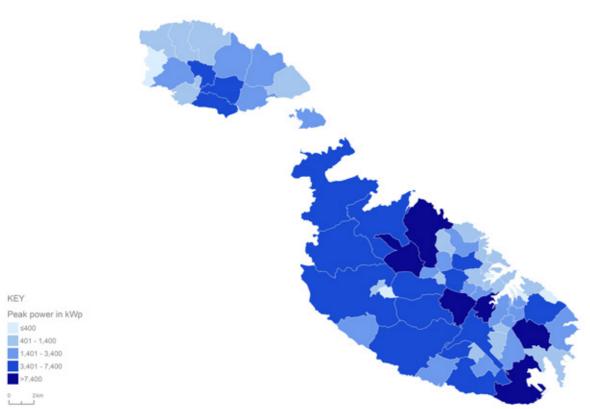

CHART 8.3.4 - Distribution of total kWp of grid-connected PVs by sector and district (LAU 1): 2021

Did you know?

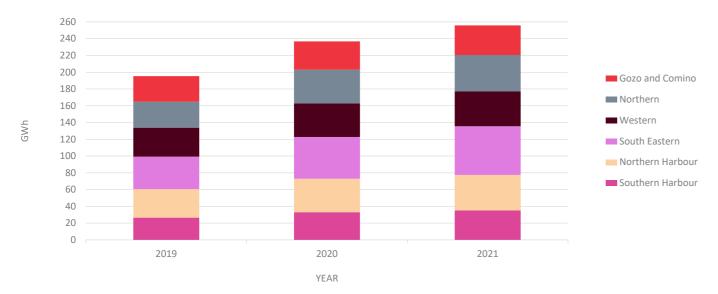

In 2021, the total kWp of grid-connected PVs in both Malta and Gozo and Comino regions was dominated by the commercial sector, with a share of 52.0% and 48.4% of the total kWp of their respective region.

MAP 8.3.5 – Total kWp of PV installations by locality (LAU 2): 2021

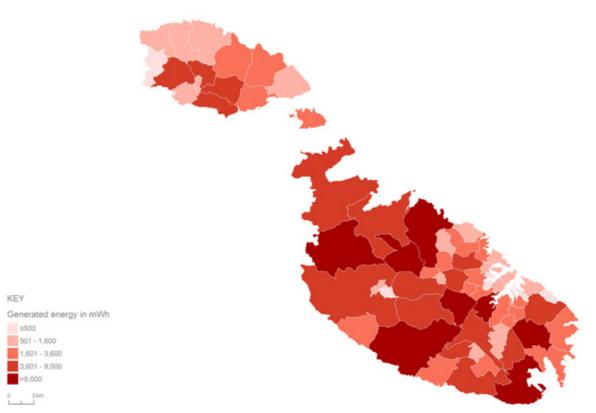

When compared to the situation in 2020, generation of energy from grid-connected PVs increased by 8.1 per cent, totalling an estimated value of 255.9 GWh. Most energy was generated in the South Eastern and Northern districts at 22.7 and 17.0 per cent of the total GWh respectively. Increases were highest in the South Eastern district (16.7 per cent) and lowest in the Western district (3.0 per cent). (Table 8.3.4, Chart 8.3.5 and Map 8.3.6)

CHART 8.3.5 – Estimated total output in GWh from grid-connected PVs by district (LAU 1) and year

MAP 8.3.6 – Total estimated mWh of PV installations by locality (LAU 2): 2021

Did you know?

When compared to 2019, the estimated total output in GWh from grid-connected PVs in 2021 increased by 33.9% in Malta region (from 164.7 GWh to 220.6 GWh) and by 15.0% in Gozo and Comino region (from 30.7 GWh to 35.3 GWh).

Notes:

- 1. Estimated output (GWh) for MALTA was based on data provided by the Energy and Water Agency based on PV meter readings. Estimated output (MALTA) was based on the relation between actual PV meter data (kWh) provided by Enemalta plc. to the Energy and Water Agency and the kWp installations as provided by the Regulator for Energy and Water Services.
- 2. Estimated output for regions (NUTS 3), districts (LAU 1) and localities (LAU 2) was estimated on the basis of the corresponding kWp effectively connected to grid.
- 3. Figures presented in this table are based on data available as at the cut-off date 13th May 2022.

Source: NSO estimates based on actual data provided by the Energy and Water Agency

METHODOLOGICAL NOTES

- 1. The main source of data is the Regulator for Energy and Water Services. Point data showing location of PV installations was obtained from Enemalta plc.
- 2. Statistics for years 2020 2021 are provisional and may be subject to revision.
- 3. Definitions:
 - **Photovoltaic (PV) system:** A complete set of components for converting solar radiation into electricity by the photovoltaic process, including the array/s of photovoltaic modules that collect and absorb sunlight for conversion into electricity, inverter/s and associated balance of system components.
 - kWp: kilowatt peak in the solar industry, kilowatt peak means the peak power rating of a panel.
 - **kWh:** kilowatt hour a unit of energy equal to 1,000 watt-hours. It is normally used as a billing unit for energy delivered to consumers by electricity providers. The units of measurement are as follows:
 - **kWh:** kilowatt hour = 1 thousand watt-hours
 - **mWh:** megawatt hour = 1 million watt-hours
 - **GWh:** gigawatt hour = 1 billion watt-hours
- 4. Commercial sector includes industry.
- 5. Public sector includes institutional households.
- 6. The term installation refers to a collection of PV panels installed as one PV system.
- 7. Installation date refers to the date when the PV system is actually connected to the Feed-in Tariffs grid.
